UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) JRIC-LA Cyber Lab Joint Cyber Roundup, End of December Update,** dated 31 December 2020.

(U//FOUO) The JRIC is providing this Joint Cyber Roundup to remind partners in the JRIC-LA Cyber Lab area of responsibility to remain vigilant and to continue to implement appropriate cyber hygiene protocols. Due to malicious cyber actors continuing to exploit users and organizations through various means, the Joint Cyber Roundup highlights critical vulnerabilities, trends and alerts, and observed updates to ransomware tactics.

(U//FOUO) This Joint Cyber Roundup contains raw information subject to revision, and is provided for situational awareness only.

Subject: (U) LACoDPH News Release: L.A. County Surpasses 10,000 COVID-19 Deaths as New Year's Eve Approaches - 274 New Deaths and 10,392 New Confirmed Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Surpasses 10,000 COVID-19 Deaths as New Year's Eve Approaches - 274 New Deaths and 10,392 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 30 December 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has surpassed the tragic milestone of 10,000 confirmed COVID-19 deaths. This devastating milestone comes as New Year's Eve approaches. To date, Public Health identified 756,116 positive cases of COVID-19 across all areas of L.A. County and a total of 10,056 deaths.

(U) Today, Public Health has confirmed 274 new deaths and 10,392 new cases of COVID-19. The number of new deaths reported today surpasses yesterday's all-time high. Today's number of deaths also reflects a significant number of deaths from the backlog associated with the Spectrum outage and holiday reporting delays. Public Health anticipates confirming additional deaths due to the backlog of death reports over the next two days.

(U) Two months ago, L.A. County experienced around 1,200 cases a day. This past week, we have averaged 13,000 new cases each day; this represents a tenfold increase in daily cases in just two months – a number that is staggering.

(U) Public Health notes that while the number of new cases reported this week are expected to be lower due mostly to testing centers being closed on Christmas and Christmas Eve, cases are expected to increase based on holiday travels.

(U) Public Health again reports the highest number of COVID-19 hospitalizations ever reported since the pandemic began. There are 7,415 people with COVID-19 currently hospitalized and 20% of these people are in the ICU. This is an increase of more than 500 people reported in the last two days.

(U) When L.A. County experienced the summer surge, cases did not reach above 3,000 a day and that kept the increases in hospitalizations and deaths at a relatively smaller curve. However, now with daily cases at or above 13,000, the number of daily hospitalizations and deaths are increasing at much faster rates. Given that cases remain at a very high number, we can, with a high degree of certainty, predict continued increases in the number of people hospitalized and dying, creating more worry and heartache for so many.

(U) Public Health continues efforts to safely and effectively deliver COVID-19 vaccines and build a system that has the capacity to vaccinate prioritized populations. The CDC provides guidance for the allocation of vaccines and the State health department reviews and finalizes these recommendations for us to follow at the county level. The County is implementing a system that builds vaccination capacity throughout the county. This includes relying on private and public healthcare partners and establishing sites where frontline healthcare workers identified in Phase 1a can be vaccinated.

(U) As of Tuesday, a total of 78,022 frontline healthcare workers at acute care hospitals have received their first doses. About 57% of the Pfizer allocation, (not including the doses received this week), has been used. With the

Moderna vaccine, which arrived on December 21, a total of 1,398 EMTs and paramedics were already vaccinated, and by the end of the weekend, 3,189 doses had been administered to staff and residents at skilled nursing facilities. Teams for the county and city, and our Curative partners, are working together to accelerate vaccinations at skilled nursing facilities.

(U) Public Health is beginning to plan for vaccinating healthcare workers in Tier 2. Home healthcare workers and healthcare workers at primary care clinics, urgent care clinics and private practices, can begin to register for appointments. Our COVID-19 Healthcare Provider Information Hub is operational on our website, where you can get more details on how to sign up for a vaccination appointment and what information is required.

(U) Of the 274 new deaths reported today, 95 people that passed away were over the age of 80 years old, 99 people who died were between the ages of 65 and 79 years old, 44 people who died were between the ages of 50 and 64 years old, 11 people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Twenty-two deaths were reported by the City of Long Beach, and two deaths reported by the City of Pasadena.

Subject: (U) LACoDPH News Release: L.A. County Reports Highest Number of New COVID-19 Deaths Partly Due to Backlog - 227 New Deaths and 12,979 New Confirmed Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Reports Highest Number of New COVID-19 Deaths Partly Due to Backlog, Hospitalizations Exceed 7,000 COVID-19 Patients for First Time - 227 New Deaths and 12,979 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 29 December 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 227 new deaths and 12,979 new cases of COVID-19. The high number of new deaths reflects a significant number of deaths from the backlog associated with the Spectrum outage and holiday reporting delays. Public Health anticipates confirming additional deaths due to the backlog of death reports over the next two to three days.

(U) Today, Public Health again confirms the highest number of hospitalizations reported in a day with 7,181 people with COVID-19 currently hospitalized. This is an increase of 267 people reported yesterday. Of the 7,181 people with COVID-19 currently hospitalized, 20% of these patients are in the ICU.

(U) Today's number of daily hospitalizations is nearly a 1,000% increase from two months ago, when on October 29, L.A. County experienced 750 COVID-19 hospitalizations. For comparison, today's number is more than three times the peak of the July surge, when L.A. County experienced 2,232 people hospitalized with COVID-19.

(U) Of the 227 new deaths reported today, 89 people that passed away were over the age of 80 years old, 70 people who died were between the ages of 65 and 79 years old, 40 people who died were between the ages of 50 and 64 years old, and 18 people who died were between the ages of 30 and 49 years old. Eight-five people who died had underlying health conditions including 35 people over the age of 80 years old, 29 people between the ages of 65 and 79 years old, 14 people between the ages of 50 and 64 years old, and seven people between the ages of 30 and 49 years old. Nine deaths were reported by the City of Long Beach.

(U) To date, Public Health identified 746,089 positive cases of COVID-19 across all areas of L.A. County and 9,782 total deaths.

(U) Public Health also extended the Temporary Health Officer Order, which will remain in effect for as long as the State Public Health Officer's Regional Stay At Home remains in effect in the Southern California region.

(U) Guidance for Critical Infrastructure Workers Exposed to Persons with COVID-19

CDC guidance recommends, with possible exception noted below, individuals exposed to a person with suspected or confirmed COVID-19 should be quarantined for 14 days, consistent with public health guidance. Additional exceptions are listed on the CDC website.

- **Critical Infrastructure workers who are symptomatic**

Critical infrastructure workers, who develop a temperature equal to or higher than 100.4 F or symptoms consistent with COVID-19 should immediately separate themselves from others, inform their established point of contact at their workplace (e.g., supervisor or occupational health program), and arrange for medical evaluation and testing.

- **Critical infrastructure workers who are not symptomatic**

Critical infrastructure workers may be permitted to continue work following exposure to a person with suspected or confirmed COVID-19 in limited circumstances and as a last resort to preserve public health or safety, provided they remain asymptomatic and have not tested positive. The CDC provides additional risk mitigation precautions on their website.

Subject: (U) LACoDPH News Release: L.A. County Again Surpasses All-time Highs for New Deaths and Hospitalizations - 145 New Deaths and 16,525 New Confirmed Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Again Surpasses All-time Highs for New Deaths and Hospitalizations - 145 New Deaths and 16,525 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 23 December 2020.

(U) The Los Angeles County Department of Public Health (Public Health) again reports the highest number of new COVID-19 deaths and hospitalizations ever reported since the pandemic began.

(U) Today, Public Health has confirmed 145 new COVID-19 deaths and 6,155 people with COVID-19 currently hospitalized.

(U) Of the 145 new deaths reported today, 55 people that passed away were over the age of 80 years old, 36 people who died were between the ages of 65 and 79 years old, 30 people who died were between the ages of 50 and 64 years old, six people who died were between the ages of 30 and 49 years old, and one person who died was between the ages 18 and 29 years old. One hundred and six people who died had underlying health conditions including 49 people over the age of 80 years old, 28 people between the ages of 65 and 79 years old, 22 people between the ages of 50 and 64 years old, five people between the ages of 30 and 49 years old, and one person between the ages of 18 and 29 years old. Fourteen deaths were reported by the City of Long Beach and one death was reported by the City of Pasadena.

(U) Of the 6,155 people with COVID-19 currently hospitalized, 20% of these patients are in the ICU.

(U) Additionally, Public Health has confirmed 16,525 new cases of COVID-19 today. This is one of the highest number of new COVID-19 cases ever reported.

(U) To date, Public Health identified 663,954 positive cases of COVID-19 across all areas of L.A. County and a total of 9,153 deaths.

(U) As of Tuesday night, more than 38,800 frontline healthcare workers have been vaccinated at acute care hospitals with the Pfizer vaccine. Our first two shipments of the Pfizer vaccine include 131,600 doses. We also received our first shipments of the Moderna vaccine and are distributing the 116,600 doses this week at skilled nursing facilities and to EMTs and firefighters. Public Health created a COVID-19 vaccine management dashboard that will be updated weekly to list how many vaccine allocations have been received and where they have been distributed. This dashboard will also provide a running tally of how many doses have been administered. Currently, this dashboard shows the vaccines being administered within Phase 1a where frontline healthcare and public health workers in hospitals, healthcare facilities, clinics, labs, and field settings are vaccinated along with staff and residents at long term care facilities and frontline EMTs and paramedics. (U) The above link will download the **(U) Cybersecurity and Infrastructure Security Agency (CISA) Insights: What Every Leader Needs to know about the Ongoing APT Cyber Activity**, dated 23 December 2020.

(U) CISA is tracking a significant cyber incident impacting enterprise networks across federal, state, and local governments, as well as critical infrastructure entities and private sector organizations. An advanced persistent threat (APT) actor compromised the SolarWinds Orion software supply chain and is abusing commonly used authentication mechanisms. If left unchecked, this threat actor has the resources, patience, and expertise to resist eviction from compromised networks and continue to hold affected organizations at risk. CISA urges organizations to prioritize measures to identify and address this threat.

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

Right-Wing Extremists Plotted Attack on US Power Grid

- In an unsealed affidavit, the FBI alleged that a 17-year old Ohio male shared plans in a group chat of approximately a dozen people to attack southeastern United States power stations if President Donald Trump were to lose re-election in 2020.
- The attacks were originally planned to be "operational" by the 2024 elections, but accelerated for the 2020 elections if President Trump lost.
- According to the affidavit, the group members shared far-right extremist ideology and identified how the group communicated their rhetoric over encrypted messaging applications.

Subject: (U) LACoDPH News Release: L.A. County Surpasses 9,000 COVID-19 Deaths as Hospitalization Surge Continues - 88 New Deaths and 12,954 New Confirmed Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Surpasses 9,000 COVID-19 Deaths as Hospitalization Surge Continues - 88 New Deaths and 12,954 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 22 December 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has tragically surpassed 9,000 confirmed COVID-19 deaths. L.A. County has experience more than 1,000 COVID-19 deaths in just two weeks; on December 8 the County reported 8,000 deaths. This is an average of nearly 73 COVID-19 deaths per day over the past two weeks.

(U) To date, Public Health identified 647,542 positive cases of COVID-19 across all areas of L.A. County and a total of 9,016 deaths. Today, Public Health has confirmed 88 new deaths and 12,954 new cases of COVID-19.

(U) There are 5,866 people with COVID-19 currently hospitalized and 20% of these people are in the ICU. The number of people hospitalized with COVID-19 today is again a new high. Today's daily hospitalization count has increased more than 2,700 daily patients from two weeks ago, when the number of people hospitalized with COVID-19 was 3,113.

(U) Testing results are available for more than 4,425,000 individuals with 14% of people testing positive.

(U) The University of Southern California's Center for Social and Economic Research continues to conduct a weekly representative survey with L.A. County residents about their actions through the pandemic. As cases continue to surge, nearly 80% of survey respondents indicated they visited a grocery store or pharmacy in the past week. Thirty percent of survey respondents indicated they visited a friend, neighbor or relative, and 30% of the respondents indicated they had visitors at their residence

(U) If the survey is representative of L.A. County residents, more than 3,000,000 residents are not following the safety guidance that directs us to not gather with people outside our immediate household. Being in close physical distance with non-household members, especially when unmasked and not distanced, increases risk and contributes to easy spread of the virus. Many people infected with COVID-19, are asymptomatic and unknowingly spread the disease to others, including to those who have underlying health conditions with increased risk for serious illness and death.

(U) Of the 88 new deaths reported today, 31 people that passed away were over the age of 80 years old, 31 people who died were between the ages of 65 and 79 years old, 17 people who died were between the ages of 50 and 64 years old and five people who died were between the ages of 30 and 49 years old. Sixty-one people who died had underlying health conditions including 20 people over the age of 80 years old, 24 people between the ages of 65 and 79 years old, 14 people between the ages of 50 and 64 years old and three people between the ages of 30 and 49 years old. Four deaths were reported by the City of Long Beach.

Fifty Organizations Impacted by Widespread Cyber Attack

- On 20 December, US cybersecurity company, FireEye, reported approximately 50 companies and organizations were "genuinely impacted" by the widespread cyber attack of US government networks.

Second Cyber Attack Team Involved in Large-scale Data Breach

- Security officials identified a second threat actor, unrelated to the Russian threat actors, which also targeted and compromised the SolarWinds software earlier this year.
- Security experts labeled the second threat as "SUPERNOVA" and stated it imitates SolarWinds' Orion product, without a digital signature.
- On 19 December, the Cybersecurity and Infrastructure Security Agency (CISA) provided an updated alert and supplemental guidance on the SolarWinds Orion compromise.

FBI and Interpol Disrupt Large Scale Online Stolen Credit Card Marketplace

- FBI and Interpol officials seized servers used by Joker's Stash, the largest online marketplace for buying and selling stolen cards, temporarily disrupting the site's activity.
- The site was managed by a blockchain company that posted packs of stolen payment card details used for fraudulent transactions.

(U) Guidance for Critical Infrastructure Workers Exposed to Persons with COVID-19

CDC guidance recommends, with possible exception noted below, individuals exposed to a person with suspected or confirmed COVID-19 should be quarantined for 14 days, consistent with public health guidance. Additional exceptions are listed on the CDC website.

- **Critical Infrastructure workers who are symptomatic**

Critical infrastructure workers, who develop a temperature equal to or higher than 100.4 F or symptoms consistent with COVID-19 should immediately separate themselves from others, inform their established point of contact at their workplace (e.g., supervisor or occupational health program), and arrange for medical evaluation and testing.

- **Critical infrastructure workers who are not symptomatic**

Critical infrastructure workers may be permitted to continue work following exposure to a person with suspected or confirmed COVID-19 in limited circumstances and as a last resort to preserve public health or safety, provided they remain asymptomatic and have not tested positive. The CDC provides additional risk mitigation precautions on their website.

(U) NOTABLE ANNIVERSARY DATES

- 2007, Pakistan: Suicide bomber kills at least 50 in mosque near Peshawar. Outgoing interior minister believed targeted; no immediate claim of responsibility.

- 1988, United Kingdom: Pan Am Flight 103 destroyed by a bomb over Lockerbie, Scotland; all 259 passengers and 11 on the ground killed; Libya responsible.

Subject: (U) LACoDPH News Release: LA County Exceeds 5,000 COVID-19 Hospitalizations as Cases Continue to Surge; Four New Cases of MIS-C in Children Reported 96 New Deaths and 16,504 New COVID-19 Cases

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Exceeds 5,000 COVID-19 Hospitalizations as Cases Continue to Surge; Four New Cases of MIS-C in Children Reported 96 New Deaths and 16,504 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 18 December 2020.

(U) As 96 new deaths and 16,504 new cases of COVID-19 are confirmed, the Los Angeles County Department of Public Health (Public Health) again confirms the highest number of COVID-19 hospitalizations reported in a day with 5,100 people with COVID-19 currently hospitalized and four additional MIS-C cases in children.

(U) Since Monday, L.A. County has reported more than 71,000 new COVID-19 cases; an acceleration of cases never seen before in our community. As case numbers continue to surge, the total number of individuals who will become seriously ill or pass away will also increase.

(U) COVID-19 hospitalizations continue to accelerate at alarming speed. Of the 5,100 people with COVID-19 currently hospitalized, 20% of these people are in the ICU. Today's number reflects an increase of nearly 1,500 patients in just one week; on December 11, the daily number of people hospitalized with COVID-19 was 3,624.

(U) Of the 96 new deaths reported today, 36 people that passed away were over the age of 80 years old, 28 people who died were between the ages of 65 and 79 years old, 18 people who died were between the ages of 50 and 64 years old, and seven people who died were between the ages of 30 and 49 years old. Sixty-six people who died had underlying health conditions including 26 people over the age of 80 years old, 22 people between the ages of 65 and 79 years old, 13 people between the ages of 50 and 64 years old, and five people between the ages of 30 and 49 years old. Four deaths were reported by the City of Long Beach and three deaths were reported by the City of Pasadena.

(U) To date, Public Health identified 596,721 positive cases of COVID-19 across all areas of L.A. County and 8,757 total deaths.

Subject: (U) LACoDPH News Release: Public Health Calls on Everyone to Stay Home During this Dangerous Time - 138 New Deaths and 22,422 New Confirmed Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: As L.A. County Surges Past Previous Highs of COVID-19 Deaths, Cases and Hospitalizations, Public Health Calls on Everyone to Stay Home During this Dangerous Time - 138 New Deaths and 22,422 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 16 December 2020.

(U) The Los Angeles County Department of Public Health (Public Health) confirms the highest number of new COVID-19 deaths, cases and hospitalizations ever reported throughout the pandemic.

(U) Today, Public Health has confirmed 138 new deaths and 22,422 new cases of COVID-19. The number of new cases reported today are, in part, due to a backlog of over 7,000 test results received from one large lab.

(U) During the last week of November, the County experienced an average of about 5,900 new cases a day. Today's number is nearly four times that.

(U) Since November 9, average daily deaths have increased nearly 600%, from 12 average deaths per day to more than 70 this week.

(U) Initial allocations of COVID-19 vaccines have arrived in Los Angeles County. As of today, all nine designated sites received their allotment of the almost 83,000 doses of the COVID-19 vaccine. Each of these nine prepositioned sites worked with Public Health and EMS to arrange for the redistribution of vaccines so that every acute care hospital across Los Angeles County that treats COVID-19 patients receive a pro-rata share of this initial allocation. As of today, acute care hospitals are beginning or will soon begin the process of administering the vaccinations to their staff at highest risk of exposure. The first round of COVID-19 vaccines in LA County are appropriately going to the heroes in this pandemic – the frontline healthcare workers who have been putting themselves at risk each day to care for others.

(U) Of the 138 new deaths reported today, 45 people that passed away were over the age of 80 years old, 49 people who died were between the ages of 65 and 79 years old, 27 people who died were between the ages of 50 and 64 years old, nine people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. One hundred people who died had underlying health conditions including 37 people over the age of 80 years old, 39 people between the ages of 65 and 79 years old, 20 people between the ages of 50 and 64 years old, and four people between the ages of 30 and 49 years old. Seven deaths were reported by the City of Long Beach.

(U) To date, Public Health identified 566,005 positive cases of COVID-19 across all areas of L.A. County and a total of 8,568 deaths.

Kenya Man Arrested for Plotting Terror Attack

- On 16 December, federal authorities indicted Cholo Abdi Abdullah, 30, with six counts of terrorism-related offenses based on his activities as an operative of al-Shabaab, including conspiring to conduct an attack in the United States.
- From 2017-2019, Abdullah attended flight school in the Philippines to train to conduct a 9/11-style hijacking attack while researching methods to hijack a commercial airliner, breaching a cockpit door, information on US-based skyscraper targets, and how to obtain a US Visa.

US State Department Designates New Terrorist Organization

- On 15 December, the State Department designated the Iranian-backed, Bahrain-Based, Saraya al-Mukhtar group as a Specially Designated Global Terrorist.
- Saraya al-Mukhtar receives funding and logistics support from the Islamic Revolutionary Guard Corps and has plotted attacks against US personnel in Bahrain.

US Removes Sudan from Terrorism List

- On 14 December, the US Embassy in Khartoum announced the rescission of Sudan's state sponsor of terrorism designation after a settlement was reached for the 1998 bombings of two US embassies in Tanzania and Kenya.
- Sudan had been listed as a state sponsor of terrorism since 1993.

(U) NATIONAL

Canadian Citizen Indicted for Mailing Biological Weapons

- On 15 December, a Texas grand jury indicted Pascale Cecile Veronique Ferrier, 53, for prohibitions with respect to biological weapons and making threats via interstate commerce.
- From 14-21 September, Ferrier sent envelopes to multiple law enforcement agencies and detention centers in Texas that contained a powdery substance alleged to be Ricin.
- Ferrier faces life in prison.

Subject: (U) LACoDPH News Release: COVID-19 Hospitalizations Continue to Break Records, Business Compliance is Essential to Save Lives - 86 New Deaths and 11,194 New Confirmed Cases of COVID-19 in Los Angeles

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: COVID-19 Hospitalizations Continue to Break Records, Business Compliance is Essential to Save Lives - 86 New Deaths and 11,194 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 15 December 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 86 new deaths and 11,194 new cases of COVID-19. This is the highest number of daily deaths reported since the summer surge.

(U) There are 4,403 people with COVID-19 currently hospitalized and 21% of these people are in the ICU. Hospitalizations have increased 4-fold since November 16. The number of people hospitalized was 1,049 on November 16 and over 4,400 today.

(U) According to the State, the Southern California Region has 1.7% ICU capacity remaining.

(U) During this time of extraordinarily high number of cases and hospitalizations and increasing numbers of deaths, it is more important than ever that County businesses carefully follow the Public Health requirements and be fully compliant with the safeguards and modifications in the Health Officer Order and protocols.

(U) Of the 86 new deaths reported today, 34 people that passed away were over the age of 80 years old, 33 people who died were between the ages of 65 and 79 years old, 16 people who died were between the ages of 50 and 64 years old, and three people who died were between the ages of 30 and 49 years old. Seventy people who died had underlying health conditions including 29 people over the age of 80 years old, 28 people between the ages of 65 and 79 years old, 11 people between the ages of 50 and 64 years old, two people between the ages of 30 and 49 years old.

(U) To date, Public Health identified 543,769 positive cases of COVID-19 across all areas of L.A. County and 8,431 total deaths.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U//FOUO) JRIC Bulletin: Significant Disruption of Vaccine Logistics in the AOR Unlikely; Fraud and Misinformation Activity Expected

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

Attachment Link(s):

- 201215 FOUO JRIC Bulletin - Significant Disruption of Vaccine Logistics in the AOR Unlikely but Fraud and Misinformation Activity Expected.pdf (8 pages)

Link(s) will expire on 12/29/2020

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC) Bulletin: Significant Disruption of Vaccine Logistics in the AOR Unlikely; Fraud and Misinformation Activity Expected**, dated 15 December 2020.

(U//FOUO) The JRIC is not aware of any credible threats to vaccine supply or distribution chains in its six-county area of responsibility.

(U//FOUO) As vaccine shipments, distribution, and inoculations ramp up, protest activity is likely to increase in response to concerns regarding the safety, necessity, and efficacy of the vaccine, the priority of those chosen to receive it first, and continued lock-down restrictions. False claims, rumors, viral hoaxes, and conflicting narratives exploiting ambiguity, uncertainty, and fear are likely to contribute to the number and size of protests, which may be exploited by violent opportunists for their own criminal aims.

(U) Questions regarding vaccination logistics should be directed to the appropriate Public Health agency in your respective county or city.

(U) Please provide feedback at jric@jric.org.

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) JRIC-LA Cyber Lab-County of Los Angeles Joint Cyber Notification: SolarWinds Orion Products Actively Exploited,** dated 14 December 2020.

(U//FOUO) The Cybersecutiy and Infrastructure Security Agency (CISA) is warning that ***SolarWinds^{USBUS} Orion products*** (affected versions are 2019.4 through 2020.2.1 HF1) are currently being exploited by malicious actors. Any SolarWinds Orion Software downloaded or updated from approximately March 2020 to present may have contained a hidden malicious backdoor. CISA has issued an Emergency Directive for federal agencies on how to Mitigate the SolarWinds Orion Code Compromise.

(U//FOUO) JRIC, City of Los Angeles, County of Los Angeles, and the LA Cyber Lab recommend technical staff review the **CISA Emergency Directive**, and other resources provided in this Alert. If SolarWinds Orion Products are used in your environment, you should immediately take actions to mitigate or identify the potential threat.

Austrian Police Seize Weapons Intended for German Extremists

- On 12 December, Austrian authorities announced the arrests of five people following a series of raids, and the seizure of automatic weapons, explosives, and hand grenades intended to supply right-wing extremist groups.
- Austria's Interior Minister said the suspects sought to attack society, democracy, and basic freedoms.

Oil Tanker Hit by Explosives in Saudi Arabia

- On 14 December, Hafnia officials confirmed an attack on one of its oil tankers, the BW Rhine, by an explosive-laden boat while the tanker prepared to discharge from its terminal at a port in Jeddah.
- The crew extinguished the fire onboard and reported damage to the ship's hull with no effect on supplies; there were no injuries.
- No group has claimed responsibility.

Indonesian Police Arrest Terror Suspect Linked to Bali Bombing

- On 14 December, Indonesian authorities announced the arrest of Jemaah Islamiyah commander Aris Sumarsono following a raid at an East Lampung district residence on Sumatra Island.
- Sumarsono masterminded the 2000 Christmas and New Year's Eve Indonesia bombings and the 2000 attack on the Philippine ambassador in Jakarta.

Russian Cybercriminals Target US Federal Agencies

- On 13 December, the United States issued a warning ordering government users to disconnect SolarWinds software, stating it was compromised by "malicious actors."
- The FBI is investigating Russian cybercriminals suspected of monitoring internal email traffic at the US Treasury and Commerce Departments, and at non-critical DHS networks.
- Authorities believe the breaches are linked to a broad campaign involving the recent attack on FireEye, a major US cybersecurity company with government and commercial contracts.

(U) Critical Infrastructure Workers Exposed to Persons with COVID-19

CDC guidance recommends, with possible exception noted below, individuals exposed to a person with suspected or confirmed COVID-19 should be quarantined for 14 days, consistent with public health guidance. Additional exceptions are listed on the CDC website.

- **Critical Infrastructure workers who are symptomatic**

Critical infrastructure workers, who develop a temperature equal to or higher than 100.4 F or symptoms consistent with COVID-19 should immediately separate themselves from others, inform their established point of contact at their workplace (e.g., supervisor or occupational health program), and arrange for medical evaluation and testing.

- **Critical infrastructure workers who are not symptomatic**

Critical infrastructure workers may be permitted to continue work following exposure to a person with suspected or confirmed COVID-19 in limited circumstances and as a last resort to preserve public health or safety, provided they remain asymptomatic and have not tested positive. The CDC provides additional risk mitigation precautions on their website.

(U) NOTABLE ANNIVERSARY DATES

- 2012, United States: Adam Lanza fatally shot 20 children and six staff members at Sandy Hook Elementary School before committing suicide.
- 1987, West Bank: Founding of the Islamic Resistance Movement (HAMAS) by Shaykh Ahmad Yasin.

Subject: (U) LACoDPH News Release: L.A. County Exceeds 500,000 COVID-19 Cases and Continues to Break All-Time Records; 50 New Deaths and 13,815 New Positive Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Exceeds 500,000 COVID-19 Cases and Continues to Break All-Time Records; 50 New Deaths and 13,815 New Positive Cases of Confirmed COVID-19 in Los Angeles County - Please Stay Home and Follow the Safety Guidance**, dated 11 December 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has reported more than 500,000 confirmed COVID-19 cases in Los Angeles County. We have reported 100,000 new cases since November 30, when L.A County reached 400,000 COVID-19 cases.

(U) To date, Public Health identified 501,635 positive cases of COVID-19 across all areas of L.A. County and 8,199 total deaths. Upon further investigation, 97 cases reported earlier were not L.A. County residents.

(U) Today, Public Health has confirmed 50 new deaths and 13,815 new cases of COVID-19. Today's number of new cases surpassed yesterday's high of 12,819 new COVID-19 cases. This is the third time within the last six days daily new cases were over 10,000.

(U) There are 3,624 people with COVID-19 currently hospitalized and 23% of these people are in the ICU. The number of people hospitalized with COVID-19 continues to exceed all-time highs every day since December 1 and has increased nearly every day since November 1. The number of people hospitalized has increased twofold in just 15 days.

(U) The impact of the Thanksgiving surge of cases on top of already rising cases is creating extraordinary stress on our healthcare system. When we see increases in cases, we see increases in hospitalizations about two weeks later.

(U) In two weeks, there could be over 7,300 daily hospitalizations for COVID-19, and over 1,600 patients in the ICU. This is alarming given that there are only 2,100 adult ICU beds across County hospitals and many of these beds are essential for patients that need intensive care for other illness including trauma, cardiac surgeries, serious infections, and cancer treatments.

(U) Of the 50 new deaths reported today, 18 people that passed away were over the age of 80 years old, 18 people who died were between the ages of 65 and 79 years old, 10 people who died were between the ages of 50 and 64 years old, and two people who died were between the ages of 30 and 49 years old. Forty-one people who died had underlying health conditions including 25 people over the age of 80 years old, 24 people between the ages of 65 and 79 years old, 10 people between the ages of 50 and 64 years old, one person between the ages of 30 and 49 years old, and one child under the age of 18 years old. Two deaths were reported by the City of Long Beach.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 7,746 people (99 percent of the cases reported by Public Health); 52% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian

residents, 9% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Warns the Surge in Cases Must Stop to Save Lives, Help Distressed Hospitals and Overwhelmed Healthcare Workers - 75 New Deaths and 9,243 New Positive Cases of Confirmed COVID-19 in Los Angeles County**, dated 9 December 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 75 new deaths and 9,243 new cases of COVID-19. This is the highest number of daily deaths since July 29.

(U) Public Health urges everyone to help and collectively take the best actions available to get this situation under control: No gatherings/events with others outside of your immediate household, always and correctly wear face coverings/masks when around others, and maintain your physical distance from others who are not from your household. During this surge, everyone should also stay at home except for essential activities, avoid all travel that is not essential, get tested if you have symptoms or concerns, and isolate immediately from your family and others if you have symptoms or test positive for COVID-19.

(U) L.A. County continues to experience more new cases reported each day for COVID-19 than at any point during the pandemic. This past week and a half, cases increased from an average of about 4,900 new cases each day the last week in November, to an average of more than 9,000 daily cases.

(U) Testing results are available for nearly 3,985,000 individuals with 11% of all people testing positive. The County's daily test positivity rate has increased significantly. From early November through November 29, the test positivity rate has increased 3-fold from around 3.5% to just over 9%. Today’s test positivity rate is 12.5%.

(U) There are 3,299 people with COVID-19 currently hospitalized and 23% of these people are in the ICU. The number of daily hospitalizations has increased over 400% from November 1 when the daily number of people hospitalized was 791.

(U) To date, Public Health identified 475,271 positive cases of COVID-19 across all areas of L.A. County and a total of 8,075 deaths Upon further investigation, 293 cases reported earlier were not L.A. County residents.

(U) Of the 75 new deaths reported today, 17 people that passed away were over the age of 80 years old, 28 people who died were between the ages of 65 and 79 years old, 17 people who died were between the ages of 50 and 64 years old, and seven people who died were between the ages of 30 and 49 years old. Fifty-three people who died had underlying health conditions including 14 people over the age of 80 years old, 17 people between the ages of 65 and 79 years old, 16 people between the ages of 50 and 64 years old, and six people between the ages of 30 and 49 years. Five deaths were reported by the City of Long Beach and one death by the City of Pasadena.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 7,627 people (99 percent of the cases reported by Public Health); 52% of deaths occurred among Latino/Latinx residents, 24% among White residents, 14% among Asian

residents, 9% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above links will download the **(U//FOUO) JRIC-LA Cyber Lab Joint Cyber Spotlight: Legitimate Online Services Exploited for Credential Harvesting,** dated 9 December 2020.

(U//FOUO) Malicious actors increasingly carry out phishing campaigns by using legitimate online services such as Google[USBUS] Docs, Google Sheets, and Dropbox[USBUS] to host malicious landing pages. While large, well-established companies such as Google and Dropbox have effective systems to detect and remove such malicious threats, other services are much less adept at detecting and removing malicious landing pages. Since late November 2020, the LA Cyber Lab has observed an active, credential harvesting phishing campaign exploiting content creating online services Canva and Evernote[USBUS] within the JRIC six-county area of responsibility.

(U//FOUO) Phishing, spearphising, and phishing or spearphishing via service—such as third party services Canva and Evernote—represent low-effort capabilities malicious actors can use to steal credential information. Because credential harvesting remains one of the easiest ways to gain access to sensitive data, which can then be leveraged for data breaches, data exfiltration, and other cyber attacks, users are encouraged to remain vigilant as tactics, techniques, and procedures used by malicious actors continue to evolve.

Europol Issues Warning of Fraudulent #COVID19 Vaccines on Dark Web

- On 4 December, Europol issued a warning of the circulation of counterfeit COVID-19 vaccines on the dark web, as the United Kingdom prepares to deploy a vaccine.
- Europol warns the fraudulent vaccines will be ineffective or toxic, and may lead to virus outbreaks among communities assumed to have been properly vaccinated.

(U) Critical Infrastructure Workers Exposed to Persons with COVID-19

CDC guidance recommends, with possible exception noted below, individuals exposed to a person with suspected or confirmed COVID-19 should be quarantined for 14 days, consistent with public health guidance. Additional exceptions are listed on the CDC website.

- **Critical Infrastructure workers who are symptomatic**

Critical infrastructure workers, who develop a temperature equal to or higher than 100.4 F or symptoms consistent with COVID-19 should immediately separate themselves from others, inform their established point of contact at their workplace (e.g., supervisor or occupational health program), and arrange for medical evaluation and testing.

- **Critical infrastructure workers who are not symptomatic**

Critical infrastructure workers may be permitted to continue work following exposure to a person with suspected or confirmed COVID-19 in limited circumstances and as a last resort to preserve public health or safety, provided they remain asymptomatic and have not tested positive. The CDC provides additional risk mitigation precautions on their website.

Subject: (U) LACoDPH News Release: COVID-19 New Cases and Hospitalizations Continue to Break Records - L.A. County Public Health advises everyone to stay home as much as possible

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **COVID-19 New Cases and Hospitalizations Continue to Break Records - L.A. County Public Health advises everyone to stay home as much as possible**, dated 3 December 2020.

(U) The Los Angeles County Department of Public Health (Public Health) again confirms the highest daily number of new cases and people hospitalized with COVID-19. Today, Public Health has confirmed 44 new deaths and 7,854 new cases of COVID-19. The number of new cases surpasses the previous all-time high of 7,593 reported on December 1.

(U) This is the second time this week Los Angeles County has surpassed the previous record for new cases and third consecutive day for hospitalizations.

(U) There are 2,572 people with COVID-19 currently hospitalized and 23% of these people are in the ICU. This number surpassed yesterday's all-time high of 2,439 people hospitalized with COVID-19.

(U) Please stay home as much as possible. Even if you don't feel sick, the simple act of being around people outside your household is extremely risky right now. Avoid doing any activities that are not essential. Always wear a face covering whenever outside your home, keep your distance from others not in your household, wash your hands frequently, and avoid crowds. Individuals with underlying health conditions and those that are older should remain in their home and not be around others as much as possible.

(U) To date, Public Health identified 421,881 positive cases of COVID-19 across all areas of L.A. County and a total of 7,782 deaths.

(U) Of the 44 new deaths reported today, 17 people that passed away were over the age of 80 years old, 14 people who died were between the ages of 65 and 79 years old, five people who died were between the ages of 50 and 64 years old, four people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Twenty-eight people who died had underlying health conditions including 12 people over the age of 80 years old, 10 people between the ages of 65 and 79 years old, three people between the ages of 50 and 64 years old, two people between the ages of 30 and 49 years old and one person between the ages of 18 and 29 years old. Two deaths were reported by the City of Long Beach and one death was reported by the City of Pasadena.

Subject: (U) LACoDPH News Release: COVID-19 Deaths Increase as L.A. County Continues to Break COVID-19 Hospitalizations Record - 40 New Deaths and 5,987 New Confirmed Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: COVID-19 Deaths Increase as L.A. County Continues to Break COVID-19 Hospitalizations Record - 40 New Deaths and 5,987 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 2 December 2020.

(U) The Los Angeles County Department of Public Health (Public Health) confirms the highest daily number of people hospitalized with COVID-19. Currently, there are 2,439 people hospitalized with COVID-19, surpassing yesterday's high of 2,316 people.

(U) Today, Public Health has confirmed 40 new deaths and 5,987 new cases of COVID-19. Since early November, average daily cases have increased by 225%, and in the past week and a half we have seen this average jump to over 5,300 cases each day.

(U) The County's daily test positivity rate has also increased significantly and now is 13.0%. The test positivity rate was 3.9% on November 1. Increased COVID-19 transmission has a cascading impact in populations that are of particular concern. Weekly cases among healthcare workers increased 71% since the first week of November. Weekly new outbreaks at worksites increased 172% since early November. Weekly new cases among people who are residing in skilled nursing facilities increased 89% since early November. Cases at schools, both among staff and students, increased 224% since early November.

(U) Along with the steep acceleration of COVID-19 transmission and hospitalizations, the County is experiencing increases in people passing away from COVID-19. Since November 9, average daily deaths have increased 92%. This past week, average daily COVID-19 deaths climbed to 38.

(U) Of the 2,439 people with COVID-19 currently hospitalized, 24% of these people are in the ICU. The average daily number of people hospitalized has increased 94% in just two weeks.

(U) Testing results are available for more than 3,760,000 individuals with 10% of all people testing positive.

(U) To date, Public Health identified 414,185 positive cases of COVID-19 across all areas of L.A. County and a total of 7,740 deaths. Upon further investigation, 198 cases reported earlier were not L.A. County residents.

(U) Of the 40 new deaths reported today, 22 people that passed away were over the age of 80 years old, eight people who died were between the ages of 65 and 79 years old, six people who died were between the ages of 50 and 64 years old, and two people who died were between the ages of 30 and 49 years old. Twenty-eight people who died had underlying health conditions including 17 people over the age of 80 years old, six people between the ages of 65 and 79 years old, and five people between the ages of 50 and 64 years old. Two deaths were reported by the City of Long Beach.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 7,305 people (99 percent of the cases reported by Public

Health); 52% of deaths occurred among Latino/Latinx residents, 24% among White residents, 14% among Asian residents, 9% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

Oregon Man Sentenced for Bomb Hoax

- On 1 December, a federal judge sentenced Kellie Kent Cameron, 32, to 21 months in prison for a fake bomb threat at the Deschutes County Courthouse.
- In July 2019, Cameron and an accomplice placed a hoax device near the courthouse ramp before calling in the threat, causing buildings and businesses to evacuate.

Washington Women Charged with Terrorist Attacks to Railroad Carrier

- On 30 November, a federal judge charged Samantha Frances Brooks, 27, and Ellen Brennan Reiche, 23, with terrorist attack and violence against a railroad carrier after surveillance identified them placing a shunt device on a Washington railroad track on 28 November.
- Since January 2020, authorities have investigated 41 local incidents of shunts placed on tracks.
- Brooks and Reiche face up to 20 years in prison.

(U) CALIFORNIA

Santa Barbara Dive Boat Captain Charged with Manslaughter

- On 1 December, federal authorities indicted Jerry Nehl Boylan, 67, with 34 counts of seaman's manslaughter for the deaths of passengers and a crewmember on the Conception dive boat on 2 September 2019.
- Investigations revealed several federal regulation violations and negligence when a fire broke out on board the ship.
- Each charge of seaman's manslaughter carries a penalty of 10 years in prison.

Subject: (U) LACoDPH News Release: L.A. County COVID-19 Cases and Hospitalizations Soar Past Previous All-time Highs- 46 New Deaths and 7,593 New Confirmed Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County COVID-19 Cases and Hospitalizations Soar Past Previous All-time Highs- 46 New Deaths and 7,593 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 1 December 2020.

(U) The Los Angeles County Department of Public Health (Public Health) confirms the highest number of new COVID-19 cases and people hospitalized with COVID-19 that L.A. County has ever experienced throughout the pandemic.

(U) Today, Public Health has confirmed 46 new deaths and 7,593 new cases of COVID-19. The number of new COVID-19 cases significantly surpassed the previous high of 6,124 new cases seen last week, and signals that the virus is infecting more people at a faster rate than ever seen in L.A. County before. The daily test positivity rate today is almost 12%, up from 7% one week ago.

(U) There are 2,316 people with COVID-19 currently hospitalized and 24% of these people are in the ICU. This exceeds the peak of 2,232 people hospitalized with COVID-19 during the July surge. The daily number of people hospitalized with COVID-19 has increased nearly every day since November 1 when the daily number of people hospitalized with COVID-19 was 799.

(U) Testing results are available for more than 3,760,000 individuals with 10% of all people testing positive.

(U) To date, Public Health identified 408,396, positive cases of COVID-19 across all areas of L.A. County and 7,700 total deaths.

(U) To stop the surge, everyone needs to immediately stay home as much as possible and always wear a face covering whenever engaging in activities outside their homes. Do not mingle with others not in your household. Because COVID-19 spreads from person to person through respiratory droplets, face coverings combined with frequent hand-washing and physical distancing provide the best protection if you need to leave your home.

(U) Public Health's compliance teams continue to visit businesses across the County every day. Inspectors review Public Health protocols with business owners, identify deficiencies, and issue citations for those out of compliance. From November 8 through November 22, 57 total citations were issued to businesses including restaurants, gyms, places of worship and private schools for noncompliance with Health Officer Orders. Since the end of August, 352 total citations have been issued. A list of non-compliant businesses that received citations can be found online.

(U) Of the 46 new deaths reported today, 22 people that passed away were over the age of 80 years old, 10 people who died were between the ages of 65 and 79 years old, eight people who died were between the ages of 50 and 64 years old, four people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Twenty-nine people who died had underlying health conditions including 12 people over the age of 80 years old, eight people between the ages of 65 and 79 years old, five people between the ages of 50 and 64 years old, three people between the ages of 30 and 49 years old, and one person between the ages of 18 and 29. One death was reported by the City of Long Beach.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 7,270 people (99 percent of the cases reported by Public Health); 52% of deaths occurred among Latino/Latinx residents, 24% among White residents, 14% among Asian residents, 9% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 116 cases and one death reported earlier were not L.A. County residents.

Subject: (U) LACoDPH News Release: L.A. County Exceeds 400,000 COVID-19 Cases as Surge in COVID-19 Hospitalizations Continue - 17 New Deaths and 5,150 New Confirmed Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Exceeds 400,000 COVID-19 Cases as Surge in COVID-19 Hospitalizations Continue - 17 New Deaths and 5,150 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 30 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has reported more than 400,000 confirmed COVID-19 cases in Los Angeles County. To date, Public Health identified 400,919, positive cases of COVID-19 across all areas of L.A. County and a total of 7,655 deaths. Today, Public Health has confirmed 17 new deaths and 5,150 new cases of COVID-19. This is far higher than the County's peak number of daily cases during the summer surge, which averaged 2,950 cases on July 14.

(U) There are 2,185 people with COVID-19 currently hospitalized and 24% of these people are in the ICU. This is more than two times the average seen on November 13 when the daily number of people hospitalized with COVID-19 was 974.

(U) Public Health remains concerned not only about the people who are suffering from COVID-19, but also about how increasing numbers in hospitalization could overwhelm the healthcare system.

(U) Hospitals across the country and world have been overwhelmed and have not had enough capacity to treat patients who have COVID-19, but also serve patients who are in need of medical care for other reasons. This remains a concern here in L.A. County, and although currently we have adequate capacity at hospitals and there are extensive plans in place to take appropriate actions to manage the increases, a continued surge in cases and hospitalizations is not sustainable. Public Health is closely tracking the number of positive cases among healthcare workers related to the COVID-19 pandemic response to be sure we have sufficient healthcare workers to staff our facilities and care for patients. This week, we are reporting an additional 747 new cases among healthcare workers.

(U) Throughout the pandemic, the largest proportion of positive cases in healthcare workers were among people working in skilled nursing facilities. To date, almost one-third of healthcare worker cases are in people working in skilled nursing facilities.

(U) Once there are increases in the number of infected healthcare workers at skilled nursing facilities, more residents are also likely to become infected. L.A. County is experiencing increases in cases among skilled nursing facilities residents. From November 1 through November 21, cases among residents have increased 89%, from 146 to 276 cases.

(U) L.A. County is also seeing increases in people residing in skilled nursing facilities passing away from COVID-19. During the week of November 1, 17 residents passed away, and during the week of November 15, 30 residents passed away.

(U) It is very possible that within a week, the County will experience the daily number of people hospitalized for COVID-19 around 2,500. A week after that, the average daily number of deaths could be around 50 people. We know

that the effects of actions we took this past weekend will be seen in about two weeks from now in the number of daily cases. If you did travel or gather over the holiday, it is important for you to quarantine for 14 days. It is very possible that you were exposed to someone who is infected with COVID-19. The Centers for Disease Control and Prevention is advising those who travel should test twice during the quarantine period, once a couple of days after you return, and another test taken five to seven days later. Please note, that a negative test does not mean you don't need to remain home in quarantine since this virus can incubate over 14 days.

(U) Effective today, Monday, November 30, additional safety measures go into effect that aim to reduce the risk of transmission in the following several ways:

- Requesting that individuals remain in their homes and with their immediate households as much as possible and reduce mingling with others not in your household.
- Requiring that everyone wear a face covering whenever they are engaging in activities outside their homes where they are or can be in contact with others not in their household; this includes at gyms, at parks, at beaches. Unless swimming, please keep your face covering on over your nose and mouth.
- And reducing capacity at sites where non-household members mingle to avoid crowding.

(U) The additional safety modifications in the Order will remain in effect for three weeks until December 20 and include the following changes:

- Gatherings: All public and private gatherings with individuals not in your household are prohibited, except for faith based services and protests, which are constitutionally protected rights.

- Occupancy limits at various businesses; all individuals at these sites are required to wear face coverings and keep at least 6 feet of distance:
    - Essential retail – 35% maximum occupancy
    - Non-essential retail (includes indoor malls) – 20% maximum occupancy
    - Personal care services – 20% maximum occupancy
    - Libraries – 20% maximum occupancy
    - Fitness centers operating outdoors – 50% maximum occupancy
    - Museums galleries, zoos, aquariums, botanical gardens operating outdoors – 50% maximum occupancy
    - Mini-golf, batting cages, go-kart racing operating outdoors – 50% maximum occupancy

- Outdoor recreation activities all which require face coverings (except for swimming) and distancing:
    - Beaches, trails, and parks remain open; gatherings at these sites with members outside your household are prohibited.
    - Golf courses, tennis courts, pickleball, archery ranges, skate parks, bike parks, and community gardens remain open for individuals or members of a single household. Pools that serve more than one household may open only for regulated lap swimming with one person per lane.
    - Drive-in movies/events/car parades are permitted provided occupants in each car are members of one household.

- Schools:
    - All schools and day camps remain open adhering to re-opening protocols. K-12 Schools and Day Camps with an outbreak (3 cases or more over 14 days) should close for 14 days.

- Closed non-essential businesses/activities:
    - Playgrounds (with the exception of playgrounds at childcare and schools)
    - Cardrooms

(U) Of the 17 new deaths reported today, nine people that passed away were over the age of 80 years old, six people who died were between the ages of 65 and 79 years old, and two people who died were between the ages of 50 and 64 years old. Fourteen people who died had underlying health conditions including eight people over the age of 80 years old, six people between the ages of 65 and 79 years old, and one person between the ages of 50 and 64 years old.

Subject: (U) LACoDPH News Release: Public Health to Add Additional Safety Modifications to Health Officer Order - Targeted Safer at Home Order Comes After 5-Day Average of New Cases is 4,751

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Public Health to Add Additional Safety Modifications to Health Officer Order - Targeted Safer at Home Order Comes After 5-Day Average of New Cases is 4,751**, dated 27 November 2020.

(U) As new COVID-19 cases remain at alarming levels and the number of people hospitalized continue to increase, a temporary Los Angeles County Health Officer Order will be issued to require additional safety measures across sectors. The temporary order will take effect Monday, November 30, 2020 and remain in effect through December 20, 2020.

(U) Today, Public Health has confirmed 24 new deaths and 4,544 new cases of COVID-19. Currently, the five-day average of new cases is 4,751.

(U) On November 17, Los Angeles County established thresholds for additional actions if the five-day average of cases is 4,500 or more or hospitalizations are more than 2,000 per day. A new Health Officer Order would be issued for three weeks that offered additional safety modifications while allowing essential and emergency workers and those securing or providing essential and permitted services to leave their homes.

(U) In the new Order that goes into effect on Monday, residents are advised to stay home as much as possible and always wear a face covering over their nose and mouth when they are outside their household and around others.

(U) The additional safety modifications in the order include the following changes to the existing Health Officer Order:

- Gatherings: All public and private gatherings with individuals not in your household are prohibited, except for faith based services and protests, which are constitutionally protected rights.
- Occupancy limits at various businesses; all individuals at these sites are required to wear face coverings and keep at least 6 feet of distance:
  - Essential retail – 35% maximum occupancy
  - Non-essential retail (includes indoor malls) – 20% maximum occupancy
  - Personal care services – 20% maximum occupancy
  - Libraries – 20% maximum occupancy
  - Fitness centers operating outdoors – 50% maximum occupancy
  - Museums galleries, zoos, aquariums, botanical gardens operating outdoors – 50% maximum occupancy
- Outdoor recreation activities all which require face coverings (except for swimming) and distancing:
  - Beaches, trails, and parks remain open; gatherings at these sites with members outside your household are prohibited.
  - Golf courses, tennis courts, pickleball, archery ranges, skate parks, bike parks, and community gardens remain open for individuals or members of a single household. Pools that serve more than one household may open only for regulated lap swimming with one person per lane.

- o Drive-in movies/events/car parades are permitted provided occupants in each car are members of one household.
- Schools:
- o All schools and day camps remain open adhering to re-opening protocols. K-12 Schools and Day Camps with an outbreak (3 cases or more over 14 days) should close for 14 days.
- Closed non-essential businesses/activities:
- o Playgrounds (with the exception of playgrounds at childcare and schools)
- o Cardrooms

(U) Because of the high rates of transmission in the community, restaurants, bars, breweries and wineries remain closed for in-person dining and drinking, as customers are not wearing face coverings during their visit which results in an increased chance of transmission of the virus. Restaurants, wineries and breweries remain open for pick-up, delivery, and take-out. Breweries and wineries remain open for retail sales at 20% occupancy.

(U) There are 1,893 people with COVID-19 currently hospitalized and 24% of these people are in the ICU. On October 27, one month ago, there were 747 people hospitalized with COVID-19.

(U) To date, Public Health identified 387,793 positive cases of COVID-19 across all areas of L.A. County and a total of 7,604 deaths. Testing results are available for more than 3,681,714 individuals with 10% of all people testing positive.

Subject: (U) LACoDPH News Release: LA County Experiences Highest New COVID-19 Deaths Reported in Months Following Surging COVID-19 Cases and Hospitalizations

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: LA County Experiences Highest New COVID-19 Deaths Reported in Months Following Surging COVID-19 Cases and Hospitalizations - Alarming Increases in Cases and Hospitalizations Must Slow to Avoid Overwhelming Healthcare System**, dated 24 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 51 new deaths and 3,692 new cases of COVID-19. This is the highest number of deaths reported since September 9.

(U) Testing results are available for more than 3,600,000 individuals with 10% of all people testing positive. The cumulative positivity rate has increased. The cumulative positivity rate remained 9% over many weeks.

(U) There are 1,575 people with COVID-19 currently hospitalized and 26% of these people are in the ICU. Just two weeks ago, there were 888 people with COVID-19 hospitalized.

(U) Of the 51 new deaths reported today, 18 people that passed away were over the age of 80 years old, 19 people who died were between the ages of 65 and 79 years old, 12 people who died were between the ages of 50 and 64 years old, and one person who died was between the ages of 30 and 49 years old. Forty-one people who died had underlying health conditions including 15 people over the age of 80 years old, 17 people between the ages of 65 and 79 years old, eight people between the ages of 50 and 64 years old, and one person between the ages of 30 and 49 years old. One death was reported by the City of Pasadena.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 7,077 people (99 percent of the cases reported by Public Health); 52% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 9% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

Subject: (U) LACoDPH News Release: Public Health Reports 35 New Deaths and 4,272 New Confirmed Cases of COVID-19 in Los Angeles County - COVID-19 Transmission is Alarmingly High in L.A. County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 35 New Deaths and 4,272 New Confirmed Cases of COVID-19 in Los Angeles County - COVID-19 Transmission is Alarmingly High in L.A. County**, dated 20 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 35 new deaths and 4,272 new cases of COVID-19. COVID-19 transmission is alarmingly high in L.A. County. Over the last three days, there have been a total of 13,247 new cases reported; a 3-day average of 4,415 daily new cases.

(U) The County's daily test positivity rate has also increased significantly and now is 7.3%. The test positivity rate was 3.9% on November 1.

(U) There are 1,298 people with COVID-19 currently hospitalized and 27% of these people are in the ICU. This is a 78% increase from a month ago when daily hospitalizations were 730. The last time the County saw numbers this high at our hospitals was in August.

(U)Starting tonight, the following safeguards and restrictions will go into effect across L.A. County:

- For non-essential businesses permitted to operate indoors—including retail stores, offices, personal care services—occupancy will be limited to 25% of the maximum occupancy allowed.
- The number of patrons at outdoor restaurants, breweries and wineries will be limited to 50% of maximum outdoor capacity.
- The number customers at cardrooms, outdoor mini-golf, go-karts and batting cages will be limited to 50% of maximum outdoor capacity.
- Services at personal care establishments may only be provided by appointment to customers wearing face coverings by staff wearing face coverings.
- Starting tonight, restaurants, breweries, wineries, bars, and all other non-essential retail establishments must close for in customer service between 10 p.m. to 6 a.m. – all these sites can be open for take-out, delivery, and pick up.
- Gatherings may only happen outdoors and include 15 people who are members of no more than 3 households.

(U) Yesterday, the State issued a Health Officer Order with additional restrictions effective tomorrow, November 21 until December 21 that also apply to all county residents. This includes closing not just restaurants, breweries, wineries, and non-essential retail at 10:00 pm, but closing all non-essential businesses between 10:00 p.m. through 5:00 a.m. for in-person customer service. This includes card rooms, entertainment venues and activities, and sporting events. Delivery, take-out, and pick-up is still allowed.

(U) Of the 35 new deaths reported today, 15 people that passed away were over the age of 80 years old, 11 people who died were between the ages of 65 and 79 years old, five people who died were between the ages of 50 and 64 years old and two people who died were between the ages of 30 and 49 years old. Twenty-four people who died had underlying health conditions including 10 people over the age of 80 years old, 10 people between the ages of 65 and

79 years old, three people between the ages of 50 and 64 years old, and one person between the ages of 30 and 49 years old. One death was reported by the City of Long Beach and one death was reported by the City of Pasadena.

Subject: (U) LACoDPH News Release: COVID-19 Transmission Surges at Dangerous Pace, LA County Sees Highest Number of New COVID-19 Cases as Hospitalizations Climb

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: COVID-19 Transmission Surges at Dangerous Pace, LA County Sees Highest Number of New COVID-19 Cases as Hospitalizations Climb – Public Health Reports 29 New Deaths and 5,031 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 19 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 29 new deaths and 5,031 new cases of COVID-19. This is the highest number of daily new cases L.A. County has experienced throughout the pandemic. Over the last two days, there have been a total of 8,975 new cases reported; a 2-day average of nearly 4,500 daily new cases.

(U) The County is experiencing a dangerous acceleration of cases that is increasing at a higher rate than the July surge. From June 20 through July 3, the 7-day average increase in new cases was 47%. From October 28 through November 10, the 7-day average increase in new cases is surging at 68%.

(U) There are 1,238 people with COVID-19 currently hospitalized and 28% of these people are in the ICU. The daily number of people hospitalized with COVID-19 has increased nearly every day since November 2 when daily hospitalizations were 777. To date, Public Health identified 353,232 positive cases of COVID-19 across all areas of L.A. County, and it is certain that many more have been infected; we have experienced a total of 7,363 deaths.

(U) Of the 29 new deaths reported today, 12 people that passed away were over the age of 80 years old, eight people who died were between the ages of 65 and 79 years old, and seven people who died were between the ages of 50 and 64 years old. Eighteen people who died had underlying health conditions including eight people over the age of 80 years old, five people between the ages of 65 and 79 years old, and five people between the ages of 50 and 64 years old. Two deaths were reported by the City of Long Beach.

Subject: (U) LACoDPH News Release: Public Health to Update Health Officer Order as COVID-19 Transmission Surges and Hospitalizations Accelerate - Public Health Reports 36 New Deaths and 3,944 New Cases

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Public Health to Update Health Officer Order as COVID-19 Transmission Surges and Hospitalizations Accelerate - Public Health Reports 36 New Deaths and 3,944 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 18 November 2020.

(U) As COVID-19 cases surge and hospitalizations continue to increase, the Los Angeles County Health Officer Order will be modified with an effective date of Friday, November 20 to reduce the possibility for crowding and reduce the potential for exposures in settings where people are not always wearing their face coverings in an effort to prevent more cases, increased hospitalizations and more deaths.

(U) On Friday, the following will go into effect:

- Private outdoor gatherings may only include 15 people who are from no more than 3 households, including the host household.
- The number of patrons at outdoor restaurants, breweries and wineries will be limited to 50% maximum outdoor capacity. Restaurants, breweries, wineries, bars, and all other non-essential retail establishments must close from 10 p.m. to 6 a.m. This is not a curfew, but rather restrictions on operating hours. As permitted to operate, businesses can still offer pick-up and delivery services outside of these hours.
- The number of customers at cardrooms, outdoor mini-golf, go-karts and batting cages will be limited to 50% maximum outdoor capacity.
- Non-essential businesses permitted to operate indoors - including retail stores, offices, personal care services - will be limited to 25% of the maximum occupancy allowed.
- Services at personal care establishments may only be provided by appointment to customers wearing face coverings by staff wearing face coverings.
- Services that require either the customer or the staff to remove their face covering, such as facials and shaves, are not permitted.
- Food and drinks cannot be served at these establishments to customers.
- In addition, the County has established thresholds for additional actions if cases and/or hospitalizations continue to increase.

(U) If the five-day average of cases is 4,000 or more or hospitalizations are more than 1,750 per day, outdoor and indoor dining at restaurants, breweries, wineries and bars will be prohibited and these businesses will only be able to offer pick-up and delivery services.

(U) If the five-day average of cases is 4,500 or more or hospitalizations are more than 2,000 per day, a Safer at Home Order will be mandated for three weeks. The Order would only allow essential and emergency workers and those securing essential services to leave their homes. In addition, a 10:00 p.m. to 6:00 a.m. curfew would be mandated, with essential workers exempt.

(U) Today, the Los Angeles County Department of Public Health (Public Health) has confirmed 36 new deaths and 3,944 new cases of COVID-19. To date, Public Health identified 348,336 positive cases of COVID-19 across all areas of

L.A. County and a total of 7,335 deaths. Upon further investigation, 131 cases reported earlier were not L.A. County residents.

(U) Public Health cautions, that if this County surge continues at the current rate of increase, by December 6, less than three weeks from today, daily new cases could reach 4,000.

(U) There are 1,188 people with COVID-19 currently hospitalized and 27% of these people are in the ICU. On November 1, the average daily number of people hospitalized for COVID-19 was 791. Testing results are available for more than 3,440,000 individuals with 9% of all people testing positive. The County's test positivity rate, or the percentage of tests that come back positive, has increased from an average of about 5.1% on November 8 to about 7.1% today. For comparison, the test positivity rate was 3.9% on November 1.

(U) The best way to celebrate Thanksgiving this year is to stay home and celebrate with people who live in your household. Connect with friends and family you don't live with using all of the technology that allows us to see and hear each other from afar. If you do choose to gather, closely follow the guidance for private gatherings. Gather outdoors with no more than two other households, and no more than 15 people; wear face coverings unless eating or drinking and stay at least 6 feet apart. Limit the gathering to no more than two hours and do not share food or utensils.

(U) Of the 36 new deaths reported today, 16 people that passed away were over the age of 80 years old, nine people who died were between the ages of 65 and 79 years old, eight people who died were between the ages of 50 and 64 years old, and two people who died were between the ages of 30 and 49 years old. Twenty-eight people who died had underlying health conditions including 12 people over the age of 80, 9 people between the ages of 65 and 79 years old, seven people between the ages of 50 and 64 years old, and one person between the ages of 30 and 49 years old. One death was reported by the City of Pasadena.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 25 New Deaths and 2,301 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 17 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 25 new deaths and 2,301 new cases of COVID-19. To date, Public Health identified 344,523 positive cases of COVID-19 across all areas of L.A. County and a total of 7,299 deaths.

(U) There are 1,126 people with COVID-19 currently hospitalized and 27% of these people are in the ICU. The County has not experienced the number of daily COVID-19 hospitalizations over 1,100 since late-August. This is more than a 40% increase from two week ago when daily hospitalizations were 798.

(U) Testing results are available for more than 3,420,000 individuals with 9% of all people testing positive.

(U) Of the 25 new deaths reported today, seven people that passed away were over the age of 80 years old, eight people who died were between the ages of 65 and 79 years old, seven people who died were between the ages of 50 and 64 years old, two people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Nineteen people who died had underlying health conditions including five people over the age of 80, six people between the ages of 65 and 79 years old, five people between the ages of 50 and 64 years old, two people between the ages of 30 and 49 years old, and one person between the ages of 18 and 29 years old.

Subject: (U) LACoDPH News Release: Public Health Officials Urge Immediate Action as COVID-19 Cases Surge in LA County and Hospitalizations Continue to Increase

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Officials Urge Immediate Action as COVID-19 Cases Surge in LA County and Hospitalizations Continue to Increase - Public Health Reports 6 New Deaths and 2,795 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 16 November 2020.

(U) As COVID-19 cases surge and hospitalizations continue to rise here and across California, the Los Angeles County Department of Public Health (Public Health) urges everyone to take immediate action to slow the spread of COVID-19 and to stay home as much as possible for the next two to three weeks except for accessing essential services.

(U) Today, Public Health has confirmed 6 new deaths and 2,795 new cases of COVID-19. Over the weekend, Public Health reported a total of 6,841 new cases; 3,780 new cases for Saturday and 3,061 new cases for Sunday. The County has not experienced daily numbers like this since late July, during the last surge that resulted in many people becoming very seriously ill and losing their lives to COVID-19.

(U) Younger residents are among those driving the surge in increasing cases. In the last month, the case rate for residents age 18 to 29 years old has more than doubled, from 11.5 cases per 100,000 people to 25 cases per 100,000 people. The second highest group, residents ages 30 through 49 years old, has nearly doubled from 9.4 cases to 18 cases per 100,000 people.

(U) There are 1,049 people with COVID-19 currently hospitalized and 28% of these people are in the ICU. This is the highest number of people hospitalized with COVID-19 each day since the beginning of September and is the second day in a row the daily number of hospitalized patients with COVID-19 exceeded 1,000.

To: Stacy Spell
Subject: (U) LACoDPH News Release: State Issues Travel Advisory as Cases Surge and Hospitalizations Remain High in L.A. County - Public Health Reports 28 New Deaths and 2,481 New Positive Cases of COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: State Issues Travel Advisory as Cases Surge and Hospitalizations Remain High in L.A. County - Public Health Reports 28 New Deaths and 2,481 New Positive Cases of COVID-19**, dated 13 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 28 new deaths and 2,481 new cases of confirmed COVID-19. To date, Public Health has identified 332,865 positive cases of COVID-19 across all areas of L.A. County and 7,246 total deaths. There are 942 people currently hospitalized with COVID-19, up 15 percent from last week Friday (11/6), and 28% of these people are in the ICU.

(U) Today the state issued a travel advisory in advance of the holiday season. As COVID-19 transmission is increasing in many states and countries, those arriving, or returning to California, from other states or countries should self-quarantine for 14 days after arrival. During this time, people should limit their interactions to their immediate household. This recommendation does not apply to individuals who cross state or country borders for essential travel. All Californians are encouraged to stay home or in their region and avoid non-essential travel to other states or countries.

(U) As the holiday season approaches and COVID-19 spread is increasing, it is critically important that everyone follow the simple public health safety measures that provide protection from COVID-19 and minimizes spreading it to friends and family. There is a high level of risk associated with gatherings of any kind, especially when people are inside, not keeping physical distance of at least 6 feet and not wearing face coverings. Residents that gather with up to two other households should do so only outdoors, wearing face coverings and keeping six feet of distance the entire time.

(U) Because COVID-19 spreads from person to person through respiratory droplets, face coverings combined with other preventive measures, such as frequent handwashing and physical distancing, provides the best protection. If you are planning to get together with others, it is important that your plan follows the Public Health protocols on small private gatherings. It is critically important that residents not attend any private gatherings or leave their home if they are experiencing symptoms of illness, have tested positive for COVID-19 or if they have been exposed or likely have been exposed to someone who is positive.

(U) Of the 28 new deaths reported today, 10 people that passed away were over the age of 80 years old, eight people who died were between the ages of 65 and 79 years old, six people who died was between the ages of 50 and 64 years old, and four people who died was between the ages of 30 and 49 years old. Twenty-four of the 28 deaths reported today were people with underlying health conditions, including nine people who were over the age of 80 years old, six people who were between the ages of 65 and 79 years old, six people between the ages of 50 and 64 years old, and three people between the ages of 30 and 49 years old.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,835 people (99 percent of the cases reported by Public Health); 52% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian

residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 66 cases and 3 deaths reported earlier were not L.A. County residents.

Subject: (U) LACoDPH News Release: Public Health Warns COVID-19 Community Transmission Continues to Increase at Concerning Levels - Public Health Reports 7 New Deaths and 2,533 New Confirmed Cases of COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Warns COVID-19 Community Transmission Continues to Increase at Concerning Levels - Public Health Reports 7 New Deaths and 2,533 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 12 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) continues to see significant increases in key indicators, including daily new cases and test positivity rates.

(U) Today, Public Health has confirmed 7 new deaths and 2,533 new cases of COVID-19. To date, Public Health identified 330,450 positive cases of COVID-19 across all areas of L.A. County and a total of 7,221 deaths.

(U) Since last week, L.A. County has experienced over 2,000 new cases nearly every day. On November 3, the average number of daily cases was 1,464, and one month before, on October 3, that number of daily cases reported was 988.

(U) Testing results are available for nearly 3,320,000 individuals with 9% of all people testing positive. The County's test positivity rate, or the percentage of tests that come back positive, has increased from an average of about 3.6% on October 3 to about 5.9% today. Increasing daily case numbers and increasing test positivity percents are deeply troubling and more evidence of accelerating community transmission.

(U) Public Health reminds everyone that testing does not prevent people from transmitting and acquiring the virus and is not a substitute for distancing from other people outside your household, wearing face coverings over your nose and mouth, hand washing and avoiding crowds.

(U) There are 953 people with COVID-19 currently hospitalized and 28% of these people are in the ICU. On October 3, the average daily number of people hospitalized with COVID-19 was 682 patients, the lowest since the beginning of the pandemic.

(U) When we look back at the summer surge in new cases, we are reminded to prepare for an expected increase in hospitalizations and deaths. On May 28, the County began to experience an increase in cases, which started the steep increase in cases. Twenty-one days later, on June 18, hospitalizations began to increase. Twelve days after that, deaths began to increase. Cases, hospitalizations and deaths all reached their peak within two weeks of each other, from mid to late July. After businesses reclosed in late June through mid-July, cases steadily declined and hit their lowest level on September 10. It took an additional three weeks to see hospitalizations and deaths hit their lowest post-surge levels.

(U) With widespread community transmission, the County’s daily case numbers continue to keep us in the State’s most restrictive purple tier (Tier 1) in the Blueprint for a Safer Economy. Currently, L.A. County's adjusted case rate is 7.6 new cases per 100,000 people. This is a slight increase from the 7.5 adjusted case rate reported last week. The County must reduce its daily number of new cases to 7 or fewer new cases per 100,000 people for two consecutive

weeks in order to move to the next less restrictive Tier 2. The County's overall test positivity rate is 3.8% which meets the threshold for Tier 3 and the test positivity rate in our lowest-resourced areas slightly decreased from 6.8% to 6.5% which still meets the threshold for Tier 2.

(U) Schools throughout the County have reopened for specialized services for students with high-needs, waiver programs for students in grades TK-2, childcare, and modified youth sports programs. As of November 9, 1,571 schools have reopened for onsite learning for high-needs students; 73% are public schools, 15% are charter schools, and 12% are private schools. More than 75,000 students and more than 30,000 staff have returned for on-site learning. A list of schools open for K-12 specialized services is available online.

(U) Given the widespread transmission of COVID-19, and as in any other sector that is open, there will be cases at school sites. And while there have been around 150 cases reported among 105,868 students and staff attending schools, there have only been 12 outbreaks associated with school sites; 11 of these outbreaks involved less than five people (primarily staff). The one site with a larger outbreak was related to a sports team that traveled to Arizona to play in a competition. All schools with cases and outbreaks are working closely with Public Health to ensure appropriate disease management and contact tracing. In accordance with Health Officer orders, people who are positive are isolated from all others for at least 10 days, and close contacts are required to quarantine for 14 days.

(U) Of the seven new deaths reported today, two people that passed away were over the age of 80 years old, two people who died were between the ages of 65 and 79 years old, and one person who died was between the ages of 50 and 64 years old. Three people who died had underlying health conditions including one person over the age of 80 and two people between the ages of 65 and 79 years old. Two deaths were reported by the City of Long Beach. Upon further investigation, 47 cases and two deaths reported earlier were not L.A. County residents.

Subject: (U) LACoDPH News Release: Public Health Reports 25 New Deaths and 2,318 New Confirmed Cases of COVID-19 in Los Angeles County; COVID-19 Hospitalizations Continue to Increase

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 25 New Deaths and 2,318 New Confirmed Cases of COVID-19 in Los Angeles County; COVID-19 Hospitalizations Continue to Increase**, dated 10 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 25 new deaths and 2,318 new cases of COVID-19. To date, Public Health identified 325,876 positive cases of COVID-19 across all areas of L.A. County and a total of 7,200 deaths.

(U) There are 888 people with COVID-19 currently hospitalized and 28% of these people are in the ICU. The number of people hospitalized with COVID-19 each day increased to over 800 this past week and now nears 900. A month ago in early-October, the daily number of people hospitalized with COVID-19 was between 650 and 725 patients.

(U) Throughout this pandemic when we have seen a surge in cases, it is followed by increases in hospitalizations and deaths.

(U) It is very important businesses understand, implement and continue to comply with protocols and directives, as they can contribute to increased community transmission when COVID-19 spreads among their employees and customers.

(U) During Public Health's recent business compliance checks, inspectors noted the majority of businesses were in compliance with most of the Public Health protocols. However, some businesses failed to ensure employees and patrons were appropriately distanced, patrons were wearing face coverings, and did not post their completed protocols for reopening. From October 25 through November 1, a total of 44 citations were issued to businesses including restaurants, gyms, hotels and places of worship for noncompliance with Health Officer Orders. Since the end of August, a total of 260 citations have been issued.

(U) As flu season approaches, COVID-19 continues to circulate at high rates throughout L.A. County. It is critically important to be protected from influenza by getting immunized for flu. Flu immunizations are safe and provide protection against the harmful effects of influenza and can also help keep people out of the hospital freeing up critical hospital resources. As we begin to see increases in COVID-19 hospitalizations and considering the toll COVID-19 has had on our communities and our healthcare system, now more than ever it is important to be protected from influenza.

(U) Everyone 6 months and older should be immunized against flu. Anyone can get flu (even healthy people), but people at high risk of developing serious flu-related complications include: people 65 years and older, pregnant women, children younger than 5 years and people with chronic medical conditions (such as asthma, diabetes, heart disease, or HIV).

(U) Of the 25 new deaths reported today, eight people that passed away were over the age of 80 years old, nine people who died were between the ages of 65 and 79 years old, seven people who died were between the ages of

50 and 64 years old and one person who died was between that ages of 30 and 49 years old. Twenty-one people who died had underlying health conditions including seven people over the age of 80, eight people between the ages of 65 and 79 years old, and six people between the ages of 50 and 64 years old. Upon further investigation, 67 cases and two deaths reported earlier were not L.A. County residents.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,789 people (99 percent of the cases reported by Public Health); 52% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

UK Teen Sentenced for Terrorism Charges

- On 6 November, a UK court sentenced Paul Dunleavy, 17, to 5.5 years in prison for the collection, preparation, and instigation of terrorism.
- In July 2019, Dunleavy joined the Feuerkrieg Division, a right wing extremist group, expressed his extremist views online, and offered to build firearms for others.
- During a search of Dunleavy's bedroom, authorities found knives, air rifles, face coverings, camouflage face paint, shotgun cartridges, and bullet casings.

Islamist Militants Behead More Than 50 in Mozambique

- On 6 November, ISIS-linked militants attacked and beheaded more than 50 in Cabo Delgado province, Mozambique.
- The beheadings follow a series of attacks carried out by militants since 2017.

(U) NATIONAL

Texas Police Officer Killed

- On 9 November, Houston Police Sergeant Sean Rios, 47, was fatally shot during an exchange of gunfire in north Houston.
- Houston police have not made any arrests but have leads on the suspects involved in the shooting.
- Sergeant Rios was a 25-year veteran of the Houston Police Department.

Two Washington Deputies Wounded, Suspect Killed in Shooting

- On 9 November, two King County Sheriff's deputies sustained gunshot wounds after responding to calls of a car robber at an apartment complex in Woodinville, Washington.
- The deputies were hospitalized and later released, and the suspect was fatally shot.

Indiana Woman Sentenced for Financing Terrorism

- On 9 November, a US federal judge sentenced Samantha Marie Elhassani, 35, to 78 months in prison and three years of supervised release for providing financial support to individuals who sought to support ISIS.
- Between November 2014 and April 2015, Elhassani helped her husband and brother-in-law join ISIS by traveling with them to Syria and transporting more than $30,000 in cash and gold from the United States and into a safe deposit box in Hong Kong to aid their efforts.
- In July 2018, Syrian Democratic Forces transferred Elhassani and her children to US law enforcement custody.

Subject: (U) LACoDPH News Release: L.A. County Community Health Worker Initiative Targets Communities Hardest Hit by COVID-19; Public Health Reports 5 New Deaths and 1,431 New Confirmed Cases of COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Community Health Worker Initiative Targets Communities Hardest Hit by COVID-19; Public Health Reports 5 New Deaths and 1,431 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 9 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 5 new deaths and 1,431 new cases of COVID-19. The number of new cases and deaths reflects a reporting lag over the weekend.

(U) L.A. County is experiencing a surge in COVID-19 transmission. From mid-September to late-October, new reported cases went from a little over 750 cases per day to almost 1,400 cases per day. Over the weekend, Public Health reported for Saturday and Sunday, a total of 4,656 cases; 2,418 new cases for Saturday and 2,238 new cases for Sunday. These numbers are demonstrating real and alarming increases.

(U) Public Health reminds everyone who participated in a gathering, especially one where there were crowds and where people were not distancing and wearing a face covering, that it is important to take very seriously that you may have been exposed to COVID-19. Please quarantine for 14 days and, in particular, stay away from anyone who is at increased risk for serious illness from the virus. This includes elderly family members and friends with underlying health conditions such as diabetes, cardiovascular disease, and cancer. Public Health also encourages people who participated in such gatherings to get tested for COVID-19. There continues to be plenty of testing capacity across our county, and anyone can make an appointment to be tested at www.covid19.lacounty.gov/testing.

(U) To date, Public Health identified 323,625 positive cases of COVID-19 across all areas of L.A. County and a total of 7,177 deaths. Upon further investigation, 13 cases reported earlier were not L.A. County residents.

(U) As we have seen increases in cases over the last few weeks, certain communities are experiencing the burden of transmission of the virus more than others. Overall, in Los Angeles County, the current adjusted case rate over the last two weeks is 188 cases per 100,000 people. During the same time period, in Pacoima, the adjusted case rate is 506 cases per 100,000 people, in Sun Valley, the adjusted case rate is 456 cases per 100,000 people and in Palmdale, the adjusted case rate is 406 cases per 100,000 people.

(U) The County is re-aligning resources to communities experiencing significant surges including targeted compliance and support for cases and close contacts. Our Community Health Worker Outreach Initiative will coordinate and mobilize community health workers, also called Promotoras, in highly impacted communities to conduct healing-informed grassroots community outreach. Community health workers will provide accurate and up-to-date information regarding COVID-19 and connect residents with needed critical services, including health insurance, testing, mental health services and other safety net services such as food pantries and housing assistance. They will share current public health directives and inform residents about safety requirements at sectors that are open and requirements for worker safety.

(U) There continues to be a steady decline in COVID-19 deaths associated with skilled nursing facilities. Skilled nursing facility COVID-19 associated deaths peaked in the beginning of May with 190 deaths a week. Last week, deaths in skilled nursing facilities dropped to 16 deaths a week. These facilities did not experience a surge in COVID-19 deaths in July and August as Los Angeles County did overall. A significant reason for the improvement in our skilled nursing facility outcomes is the continued efforts at nursing homes to protect workers and residents through enhanced infection control, using appropriate PPE, and diligence in appropriate testing.

(U) All 340 skilled nursing facilities in the County conduct weekly testing of residents and staff. For the week of October 24, nearly 46,000 COVID-19 tests were completed among staff and residents. One hundred and sixty-three people tested positive for COVID-19; there were 77 new cases among residents and 86 new cases among staff. As of October 24, 233 facilities reported no positive cases. For comparison, in early September, nearly half of all skilled nursing facilities had an outbreak. Nearly all skilled nursing facilities report having adequate staffing (99%) and having adequate PPE (95%).

(U) Public Health also continues tracking the number of positive cases and deaths among healthcare workers related to the COVID-19 pandemic response. There have been a total of 17,647 positive cases among healthcare workers and first responders in Los Angeles County. Seventy percent of healthcare workers who tested positive are younger than 50 years old. Slightly over half of the cases are among Latino/Latinx healthcare workers, and 68% of cases are among women. There have been a total 107 deaths among healthcare workers. Over half of these deaths occurred among men which is an overrepresentation of deaths, since the majority of cases are among women. Three-quarters of deaths are among healthcare workers who are age 50 and older, and 45% are among Latino/Latinx healthcare workers. The vast majority, 83%, of healthcare workers who passed away had underlying health conditions. Nurses continue to account for the majority of deaths among healthcare workers at 36%.

(U) Of the five new deaths reported today, one person that passed away was over the age of 80 years old, two people who died were between the ages of 65 and 79 years old, and two people who died were between the ages of 50 and 64 years old. Four people who died had underlying health conditions including two people between the ages of 65 and 79 years old, and two people between the ages of 50 and 64 years old.

Subject: (U) LACoDPH News Release: Public Health Reports 23 New Deaths and 2,108 New Confirmed Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 23 New Deaths and 2,108 New Confirmed Cases of COVID-19 in Los Angeles County; Case Investigation and Contact Tracing Efforts Continue as New Cases Increase**, dated 6 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 23 new deaths and 2,108 new cases of COVID-19. This is the third consecutive day of new cases over 1,800 and the first time the number of new cases reached over 2,100 since mid-August. Over the last three days, there have been 6,016 new cases reported.

(U) As COVID-19 spread increases in L.A. County, Public Health urges participation with case investigation and contact tracing efforts. Obtaining as much information as possible from people who are positive during the case investigation interview helps contain the virus and minimize outbreaks. While contact tracing cannot slow this virus on its own, is a crucial part of protecting the health of communities. To date, more than 157,000 people who are or were positive for COVID-19 completed the case investigation interview process and more than 71,000 of their close contacts completed interviews.

(U) Anyone who receives a positive lab result or has been exposed to someone with COVID-19, should expect a call from a Public Health specialist to discuss how to protect themselves and others, how to isolate or quarantine, how to access services and providers, and to talk through other concerns or questions a case or contact may have. We encourage anyone who receives a call from Public Health to speak to our Public Health specialist. If a Public Health specialist calls, it will display on your phone as “LA Public Health” or as 833-641-0305.

(U) It’s important if someone thinks they could be positive for COVID-19 and are awaiting testing results, to stay at home and isolate until they receive results. If the results are positive, then they will need to self-isolate for 10 days and 24 hours after symptoms and fever subside. Public Health reminds anyone with a positive lab result who has not yet connected with a Public Health specialist to call 1-833-540-0473 for support and information about services. Residents who do not have COVID-19 should continue calling 211 for resources or more information.

(U) To date, Public Health identified 317,656 positive cases of COVID-19 across all areas of L.A. County and a total of 7,157 deaths.

(U) Of the 23 new deaths reported today, 11 people that passed away were over the age of 80 years old, six people who died were between the ages of 65 and 79 years old, and six people who died were between the ages of 50 and 64 years old. Twenty-one people who died had underlying health conditions including 10 people over the age of 80, six people between the ages of 65 and 79 years old, and five people between the ages of 50 and 64 years old.

Two Men in Police Custody for Plot to Attack Philadelphia Vote Counting Center

- On 5 November, authorities arrested two men after police were alerted to a possible attack plot against a Philadelphia building where US election ballots are being counted.
- In a 6 November statement, Philadelphia police said it received information that people armed with guns were traveling to the convention center in a silver Hummer truck.
- Philadelphia police located the Hummer outside the convention center and arrested two men on firearms charges for carrying guns without a valid Pennsylvania permit.

Florida Authorities Search for Suspects Involved in Theft of Gun Store

- The ATF and local authorities initiated a manhunt for five men in connection with a 3 November theft of 40 firearms from an Apopka gun store in central Florida.
- ATF found the stolen sedan used to ram the business, and two firearms in the Pine Hills area of Orange County.
- ATF and the National Shooting Sports Foundation are offering a $5,000 reward for information leading to the arrest of the suspects.

Portland Resident Indicted in Terrorism Case

- On 5 November, a federal grand jury returned an indictment against Hawazen Sameer Mothafar, 31, for providing material support to ISIS.
- Mothafar produced and distributed ISIS propaganda and recruiting materials that he coordinated with overseas ISIS media operatives.
- Mothafar also made false statements on immigration documents and to government officials denying any ties to terrorist groups.

New York Man Pleads Guilty to Threatening Police Officers

- On 5 November, Jhajuan Sabb, 21, pleaded guilty to threatening attacks against the Troy, New York, Police Department during a June 2020 demonstration.
- Sabb admitted to making Facebook Live recordings on 5 June, threatened to throw bricks at the Troy Police building, and threatened to run over police officers with a vehicle.
- Sabb faces up to five years in prison and three years of supervised release.

Texas Man Sentenced for False Statements

- On 5 November, William Patrick Williams, 20, was sentenced to two years in federal prison for making false statements to a federally licensed firearms dealer.
- According to the criminal complaint, Williams told his grandmother he purchased an AK-47 rifle and planned to "shoot up" a local hotel and commit suicide by cop.
- Authorities were notified and searched a hotel room Williams rented; police found an AK-47 rifle, 17 loaded ammunition magazines, knives, tactical clothing and gloves.

Mexican Immigrant Pleads Guilty to Killing Police Officer

- On 5 November, Paulo Virgen Mendoza pleaded guilty to the 26 December 2018 fatal shooting of Newman Police Corporal Ronil Singh.
- Authorities said Corporal Singh stopped Mendoza on suspicion of driving under the influence prior to the fatal shooting.

Subject: (U) LACoDPH News Release: As COVID-19 Spread Increases in L.A. County, Workplace Outbreaks Also Increase; Public Health Reports 25 New Deaths and 2,065 New Confirmed Cases of COVID-19 in Los Angeles

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: As COVID-19 Spread Increases in L.A. County, Workplace Outbreaks Also Increase; Public Health Reports 25 New Deaths and 2,065 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 5 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 25 new deaths and 2,065 new cases of COVID-19. Today's number of new cases surpasses yesterday's and is the highest number of new cases not associated with backlog cases reported since late-August.

(U) As COVID-19 spread continues increasing in Los Angeles County, the number of COVID-19 workplace outbreaks has also increased. During the two-week period of September 6 through September 19, there were 23 outbreaks in non-healthcare and non-residential workplaces, the lowest number of worksite outbreaks since June. During the two-week period from October 4 through October 17, the number of worksite outbreaks increased to 40.

(U) Public Health is carefully tracking outbreaks at worksites and continues to assist sectors with the required business protocol compliance and safety measures. During an outbreak, health inspectors assess the worksite and provide guidance to control the outbreak. At times, this may include requiring a business to close until required measures are in place to prevent the virus from spreading. Worker protections and safe workplaces are a crucial part of slowing the spread of COVID-19 and protecting the health of our communities.

(U) Workers and employers can anonymously report to Public Health clusters of COVID-19 cases at worksites as well as violations of Health Officer Orders and Protocols in the workplace. They can call the Environmental Health Customer Call Center at 888-700-9995, Monday - Friday from 8:00 a.m. - 5:00 p.m., excluding holidays. A complaint system to report violations is also available online at www.publichealth.lacounty.gov.

(U) To date, Public Health identified 315,564 positive cases of COVID-19 across all areas of L.A. County and a total of 7,140 deaths.

(U) There are 825 people with COVID-19 currently hospitalized and 29% of these people are in the ICU. The number of people hospitalized with COVID-19 has slightly increased to over 800 in the last two days. Since mid-September, the daily number of hospitalized patients with COVID-19 held steady under 800 people hospitalized.

(U) L.A. County continues to see decreases and stabilizing in the numbers of deaths across all race and ethnicity groups. We continue to see a high mortality rate among people living in areas with the highest levels of poverty, with over three times the death rate when compared to people living in the lowest levels of poverty.

(U) Of the 25 new deaths reported today, nine people that passed away were over the age of 80 years old, seven people who died were between the ages of 65 and 79 years old, six people who died were between the ages of 50 and 64 years old, one person who died was between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Nineteen people who died had underlying health conditions including nine

people over the age of 80, seven people between the ages of 65 and 79 years old, and three people between the ages of 50 and 64 years old. One death was reported by the City of Long Beach.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,731 people (99 percent of the cases reported by Public Health); 52% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 27 cases and two deaths reported earlier were not L.A. County residents.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Delaware Man Sentenced for Swatting Incidents

- On 4 November, a district judge sentenced Rodney Phipps, 30, to 37 months in prison for five counts of interstate swatting phone calls and one count of making a false threat involving explosives.
- From August 2015 to August 2017, Phipps made false reports about murder, shooting incidents, arson, and a hostage situation; many instances, contained explicit threats that the caller would shoot any law enforcement personnel who responded to the call.

Maryland Man Charged for Making Explosive Devices

- On 2 November, authorities charged Stephen Russell Smith, 40, with four counts of making and possessing a destructive device, and four counts of possessing explosive material after Fire Marshals responded to a call from a female occupant who found several hand grenades and other suspicious items.
- Investigators found three improvised explosive detonators and materials to build explosive and destructive devices before bomb squad officials rendered the devices safe.

Two Men Charged in Baltimore Ballot Box Guard Shooting

- On 4 November, authorities charged Christopher Winchester, 24, and Jamal Simmons, 27, for the 15 October shooting of ballot box guard, Tray Jackson, who remains in stable condition after being shot multiple times.
- Detectives arrested Winchester and Simmons in separate locations in Baltimore on 26 October; no motive or indication that the crime was connected to Jackson's guard election duties has been given.

(U) CYBER

US Seizes Additional Domain Names Used by Iran to Further Covert Influence Campaign

- On 3 November, the United States seized 27 additional domain names used unlawfully by Iran's Islamic Revolutionary Guard Corps (IRGC) to further a covert influence campaign.
- Four of the domains appeared to be genuine news outlets, but were actually under the control of the IRGC and targeted US audiences with the aim of influencing US policy and public opinion.
- This warrant follows an earlier seizure of 92 domains used by the IRGC for the same purposes.

(U) COVID-19 INTERIM GUIDANCE

Disinfect and Clean Work Spaces

- Employers should routinely clean and disinfect all areas such as offices, bathrooms, common areas, and shared electronic equipment.

(U) NOTABLE ANNIVERSARY DATES

- 2006, Iraq: Former president and dictator of Iraq, Saddam Hussein, is sentenced to death for his role in the massacre of the 148 Shi'as in 1982.
- 2009, United States: US Army Major Nidal Malik Hasan killed 13 and wounded 43 at Fort Hood in Texas in the largest mass shooting at a US military installation.
- 2017, United States: Devin Kelley fatally shot 26 and wounded 20 at the First Baptist Church in Sutherland Springs, Texas.

Subject: (U) LACoDPH News Release: L.A. County Sees High Number of New COVID-19 Cases; Hospitalizations Slightly Increase - Public Health Reports 22 New Deaths and 1,843 New Confirmed Cases of COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Sees High Number of New COVID-19 Cases; Hospitalizations Slightly Increase - Public Health Reports 22 New Deaths and 1,843 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 4 November 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 22 new deaths and 1,843 new cases of COVID-19. Today's number of new cases surpasses the high daily numbers seen in the last two weeks and is the highest number of new cases not associated with backlog cases reported since late-August. To date, Public Health identified 313,562 positive cases of COVID-19 across all areas of L.A. County and a total of 7,117 deaths.

(U) There are 817 people with COVID-19 currently hospitalized and 29% of these people are in the ICU. Today's number of people hospitalized is a slight increase from daily counts in late September and early October and is the first time the daily number of hospitalized patients with COVID-19 has exceeded 800 since mid-September. And while this is still significantly lower than the peak of over 2,200 daily hospitalizations in mid-July, the increase in hospitalizations is most likely associated with the continued increase in cases over the past two weeks.

(U) Testing results are available for nearly 3,182,000 individuals with 9% of all people testing positive.

(U) Our daily case numbers continue to keep the County in the State's most restrictive purple tier (Tier 1) in the Blueprint for a Safer Economy. Currently, L.A. County's adjusted case rate is 7.5 new cases per 100,000 people. This is a decrease from the 8.0 adjusted case rate reported last week. The County must reduce its daily number of new cases to 7 or fewer new cases per 100,000 people for two consecutive weeks in order to move to the next less restrictive Tier 2.

(U) Of the 22 new deaths reported today, eight people that passed away were over the age of 80 years old, seven people who died were between the ages of 65 and 79 years old, five people who died were between the ages of 50 and 64 years old, one person who died was between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Fifteen people who died had underlying health conditions including seven people over the age of 80, five people between the ages of 65 and 79 years old, two people between the ages of 50 and 64 years old, and one person between the ages of 18 and 29 years old.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,707 people (99 percent of the cases reported by Public Health); 52% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 62 cases and two deaths reported earlier were not L.A. County residents.

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC) Notification: Shootings at Multiple Locations in Vienna, Austria - Update**, dated 2 November 2020.

(U) On 2 November shortly after 2000 local time, a series of attacks occurred in the inner district of Vienna, Austria, leaving at least one dead and 15 wounded, including a police officer.

(U) Authorities said multiple gunmen armed with automatic weapons targeted six locations in the city. The gunmen randomly fired gunshots at people in a busy district with cafes and restaurants near Vienna's main synagogue, that was closed at the time of the attacks. Police fatally shot one suspect; an unknown number of suspects remain at large.

(U) Austrian authorities are investigating the attack as terrorism and stated "an anti-Semitic motive cannot be excluded" due to the proximity to the synagogue. The Austrian army is deployed to assist with protecting buildings and properties. No group has claimed responsibility.

(U//FOUO) This information is based on preliminary reporting and is subject to change.

Gunmen Target University Campus in Afghanistan

- On 2 November, three gunmen entered Kabul University during an Iranian book fair and fatally shot 22 and wounded 22 before Afghan security forces killed them.
- A regional ISIS group claimed responsibility.

Sword-Wielding Man Attacks Residents in Quebec, Canada

- On 31 October, authorities arrested an unnamed 24-year-old man wearing medieval clothing after he fatally stabbed two and wounded five with a sword in Quebec.
- Although authorities have not released a motive, police believe the attack was not linked to terrorism and mental illness may have played a role.

US Special Forces Rescue American Hostage in Nigeria

- On 31 October, US Special Forces rescued Philip Walton, 27, from an armed group in Northern Nigeria.
- Walton was taken hostage in Niger on 26 October.

Subject: (U) LACoDPH News Release: Public Health Reports 26 New Deaths and 1,296 New Confirmed Cases of COVID-19 in Los Angeles County and Provides Guidance for Celebrating Halloween and Dia de los Muertos

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 26 New Deaths and 1,296 New Confirmed Cases of COVID-19 in Los Angeles County, Public Health Provides Guidance for Celebrating Halloween and Dia de los Muertos**, dated 30 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 26 new deaths and 1,296 new cases of COVID-19. To date, Public Health identified 306,327 positive cases of COVID-19 across all areas of L.A. County and 7,056 total deaths.

(U) Testing results are available for over 3,101,000 individuals with 9% of all people testing positive. There are 743 people with COVID-19 currently hospitalized and 30% of these people are in the ICU.

(U) Public Health asks everyone to celebrate Halloween and Dia de los Muertos this weekend as carefully and as safely as possible as COVID-19 continues to spread in L.A. County. Public Health does not recommend trick-or-treating and trunk or treating this year, as participating in these activities increases the risk of exposure to the virus through communal food handling, crowding and mixing with non-household individuals. Safer options include participating in a virtual party, attending a drive-in event, driving around your neighborhood to see decorated houses, holding a scavenger hunt for treats at home, or attending a special Halloween drive-in movie. Carnivals, parties, festivals, live entertainment, and haunted house attractions are not safe this Halloween and are not permitted under the Health Officer Order. For more info on celebrating Halloween and Dia de los Muertos safely, visit, www.publichealth.lacounty.gov.

(U) Of the 26 new deaths reported today, seven people that passed away were over the age of 80 years old, five people who died were between the ages of 65 and 79 years old, nine people who died were between the ages of 50 and 64 years old, and five people who died were between the ages of 30 and 49 years old. Twenty-four people who died had underlying health conditions including seven people over the age of 80, five people between the ages of 65 and 79 years old, seven people between the ages of 50 and 64 years old, and five people between the ages of 30 and 49 years old.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,649 people (99 percent of the cases reported by Public Health); 52% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 39 cases and 14 deaths reported earlier were not L.A. County residents.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: L.A. County Sees Highest Number of New Cases Since Late- August; Public Health Reports 19 New Deaths and 1,745 New Confirmed Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Sees Highest Number of New Cases Since Late- August; Public Health Reports 19 New Deaths and 1,745 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 29 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 19 new deaths and 1,745 new cases of COVID-19. This is the highest number of new cases reported since late-August not associated with backlog cases.

(U) To date, Public Health identified 305,070 positive cases of COVID-19 across all areas of L.A. County and a total of 7,044 deaths. Upon further investigation, 44 cases and 15 deaths reported earlier were not L.A. County residents.

(U) There are 750 people with COVID-19 currently hospitalized and 31% of these people are in the ICU. The number of COVID-19 hospitalizations has remained stable for most of September and October.

(U) Schools have reopened for specialized services for students with high-needs, waiver programs for students in grades TK-2, childcare, and modified youth sports programs. They are required to follow school re-opening protocols for infection control, distancing, and cohorting to minimize COVID-19 spread. Additionally, Public Health has a dedicated team of specialists providing technical assistance and disease management to all schools that are re-opened or re-opening, and every school that re-opens receives a site visit from Public Health.

(U) Parents play a vital part in the shared responsibility to prevent COVID-19 spread in schools and communities. To date, nearly 30,000 COVID-19 cases have occurred in children under 18 years old in L.A. County. If a child's school has reopened for one of the approved purposes, the decision to send a child back to school rests with each family. It is essential for families to follow the Department of Public Health's safety guidance to reduce the risk of getting and spreading COVID-19. The necessary steps include:

- Keeping your child at home if she or he is sick and or has any symptoms of COVID-19, or if your child has been in contact with someone with COVID-19; symptoms to look out for in your child are fever, new onset of cough, diarrhea/vomiting/abdominal pain, and new onset of severe headache;
- Instructing your child to always wear a mask while at school and when in public outside of your home;
- Developing good hand hygiene habits so that your child frequently washes their hands, particularly before eating and after toileting;
- Teaching your child to stay 6 feet apart from others who aren't in your household.

(U) There are also actions that parents can take to increase their child's safety at school:

- Find out if your child's school does a symptom screening daily before children and staff enter school; they should be requiring this step for the entire school community.
- Ask your child about their experience at school regarding distance between students, mask-wearing, and hand washing.

- Model the behaviors you wish to see your child demonstrate when they go to school; these behaviors include wearing a face covering when outside the home, physical distancing, and hand washing.
- Ask the school to share its safety protocols and other plans for how it will handle cases and exposure that might occur at the school and ask how the school will communicate with parents if that happens.
- Be part of school efforts that promote compliance with safety directives.

(U) Of the 19 new deaths reported today, five people that passed away were over the age of 80 years old, eight people who died were between the ages of 65 and 79 years old, two people who died were between the ages of 50 and 64 years old, and one person who died was between the ages of 30 and 49 years old. Thirteen people who died had underlying health conditions including five people over the age of 80, six people between the ages of 65 and 79 years old, one person between the ages of 50 and 64 years old, and one person between the ages of 30 and 49 years old. Three deaths were reported by the City of Long Beach.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,635 people (99 percent of the cases reported by Public Health); 52% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

Subject: (U) LACoDPH News Release: Public Health Reports 29 New Deaths and 1,586 New Confirmed Cases of COVID-19 in Los Angeles County; Health Officials Urge Diligence in Following Business Protocols

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 29 New Deaths and 1,586 New Confirmed Cases of COVID-19 in Los Angeles County; Health Officials Urge Diligence in Following Business Protocols**, dated 27 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 29 new deaths and 1,586 new cases of COVID-19. COVID-19 spread has increased in L.A. County, and this is a cause for concern. At the beginning of October, the average reported cases was 940 per day.

(U) To date, Public Health identified 302,077 positive cases of COVID-19 across all areas of L.A. County and a total of 7,027 deaths.

(U) This last week, Public Health observed many instances of customers at restaurants not following the required infection control protocols while watching sporting events such as the World Series on television. Public Health urges restaurants, breweries, and wineries that show sporting events on televisions to strictly adhere to public health protocols and directives to prevent increases of COVID-19. This includes not allowing customers to congregate in any areas or around televisions, ensuring guests are seated at a table, and keeping at least six feet of physical distance between tables. Employees should always be wearing appropriate face coverings, and customers should use a face covering when they are not eating or drinking.

(U) Public Health's compliance teams visit businesses across the County every day. Inspectors review public health protocols with business owners, identify deficiencies, and issue citations and fines for those out of compliance. From October 12 through October 18, a total of 48 citations were issued to businesses including restaurants, hotels, gyms, and places of worship for noncompliance with Health Officer Orders. Since the end of August, a total of 194 citations have been issued.

(U) Of the 29 new deaths reported today, 14 people that passed away were over the age of 80 years old, eight people who died were between the ages of 65 and 79 years old, four people who died were between the ages of 50 and 64 years old, two people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Twenty-two people who died had underlying health conditions including 12 people over the age of 80, five people between the ages of 65 and 79 years old, three people between the ages of 50 and 64 years old, one person between the ages of 30 and 49 years old, and one person between the age of 18 and 29 years old.

Subject: (U) LACoDPH News Release: L.A. County Sees Increase in Daily COVID-19 Cases as COVID-19 Deaths Reach 7,000 People - 8 New Deaths and 861 New Confirmed Cases in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Sees Increase in Daily COVID-19 Cases as COVID-19 Deaths Reach 7,000 People and Cumulative Cases Surpass 300,000 - 8 New Deaths and 861 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 26 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has reached the grim milestone of 7,000 confirmed COVID-19 deaths and 300,614 positive cases of COVID-19 across all areas of L.A. County.

(U) Today, Public Health has confirmed 8 new deaths and 861 new cases of COVID-19. The number of new cases and deaths reflects a reporting lag over the weekend.

(U) Last week, the department experienced reporting system issues, first seeing low case numbers followed by high case numbers. Because of differences in test processing times and reporting lags, the new cases we announce daily are likely collected over several days and sometimes include backlogs of test results. To understand community spread, the department also tracks cases using the episode date associated with each case record. The episode date is usually the date the test was taken.

(U) The numbers by episode date confirm an increase in cases across L.A. County.

(U) Since the beginning of October, cases have increased from around 940 new cases per day to, as of last week, almost 1,200 new cases per day. This increase, while not as steep as seen in July, is cause for concern.

(U) There are 767 people with COVID-19 currently hospitalized and 29% of these people are in the ICU. Public Health notes children of all ages have been hospitalized for COVID-19 and even though the likelihood of hospitalization among children remains very low across all age groups, there was a gradual upward trend in hospitalizations among all age groups from April through mid-September. The largest increases were among children ages 12 through 17 years old that occurred in late August and mid-September, likely a result of the summer's spike in cases.

(U) Public Health advises residents to celebrate Halloween as safely as possible. Trick-or-treating and trunk or treating are not safe during a pandemic, and we strongly recommend that you not participate in these activities since they carry the risk of increased exposure to the virus through crowding, mixing with non-household individuals, and communal food handling. Instead, participate in a virtual party, take a walk (socially distanced and masked) or a drive around your neighborhood to see decorated houses, hold a scavenger hunt for your children at your home where they can find their treats, or attend a special Halloween drive-in movie. Parties, haunted houses, carnivals, and other larger gatherings are not safe this Halloween and are not permitted under the Health Officer Order.

(U) Public Health has identified 1,979 cases among people experiencing homelessness. Since the July spike in cases, we have seen case numbers stabilize among people experiencing homelessness. On average, we have reported about 40 to 50 cases per week among people experiencing homelessness since the end of August. To date, 47 people experiencing homelessness have passed away from COVID-19. Of the people experiencing homelessness who passed

away, 23 were sheltered, 14 were unsheltered, and for 10 people who passed away, their sheltered status was unknown. To date, 216 total cases of COVID-19 occurred among shelter staff and two total shelter staff have passed away due to COVID-19. Because people experiencing homelessness are likely to have underlying conditions that make them more susceptible to negative COVID-19 outcomes, we continue working with partner organizations to address their unique needs and participate in efforts to reduce virus transmission.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: Two New MIS-C Cases in Children Confirmed; Public Health Reports 23 New Deaths and 2,773 New Positive Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Two New MIS-C Cases in Children Confirmed; Public Health Reports 23 New Deaths and 2,773 New Positive Cases of COVID-19 in Los Angeles County - High COVID-19 Case Numbers Reflect Backlog Test Results**, dated 23 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 23 new deaths and 2,773 new cases of COVID-19. The high number of new cases include backlog cases due to technical issues with data reporting systems this week. Public Health anticipates receiving additional backlog test results over the next few days.

(U) To date, Public Health has identified 296,821 positive cases of COVID-19 across all areas of L.A. County, and a total of 6,974 deaths.

(U) Public Health in consultation with the Board of Supervisors, is revising the Health Officer Order to allow for the re-openings of additional personal care services indoors with modifications (in addition to hair salons and nail salons), as well as outdoor operations at go-carts, mini-golf and batting cages. In addition, the percentage of high-needs students permitted at a school campus for on-site learning has been increased from 10% to 25%, allowing more students to return for in-person instruction and services. Public Health will also modify the Health Officer Order for breweries and wineries; reservations will no longer be required at these establishments, though they are strongly recommended. In addition, wine tastings for retail sales will no longer require a meal to be served. Comprehensive protocols for all sectors that reopen will be posted online to ensure infection control and distancing and the continued health and safety of workers and the community. Businesses are required to implement the protocols prior to reopening to ensure they are in compliance with the Health Officer Order, and to avoid citations, fines, and possible closure.

Subject: (U) LACoDPH News Release: Public Health Reports 18 New Deaths and 3,600 New Positive Cases of COVID-19 in Los Angeles County; High Number of New Cases Due to Backlog of Test Results

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 18 New Deaths and 3,600 New Positive Cases of COVID-19 in Los Angeles County; High Number of New Cases Due to Backlog of Test Results - Public Health Officials Outline Different Types of COVID-19 Tests and How They are Used**, dated 22 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 18 new deaths and 3,600 new cases of COVID-19. The number of new cases reported today includes an estimated 2,000 backlog cases due to technical issues with data reporting systems over the last few days. These issues have been addressed and we continue to improve our reporting systems. Public Health anticipates receiving additional backlog test results over the next few days.

(U) To date, Public Health has identified 294,065 positive cases of COVID-19 across all areas of L.A. County, and 6,956 total deaths.

(U) Public Health has reviewed the new state recommendations and consulted with the Board of Supervisors about the timing for additional openings, including the re-opening of additional personal care services indoors with modifications (in addition to hair salons and nail salons), the percentage of high need students allowed for in-person learning, outdoor operations at go-carts, mini-golf and batting cages, and modifying requirements for breweries/wineries. Public Health will post a revised Health Officer Order tomorrow. As a reminder, county health departments are not allowed to be less restrictive than State Health Officer Orders. They can align or be more restrictive.

(U) Of the 18 new deaths reported today, six people that passed away were over the age of 80 years old, 10 people who died were between the ages of 65 and 79 years old, one person who died was between the ages of 50 and 64 years old, and one person who died was between the ages of 30 and 49 years old. Sixteen people who died had underlying health conditions including five people over the age of 80, 10 people between the ages of 65 and 79 years old, and one person between the ages of 50 and 64 years old.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,552 people (99 percent of the cases reported by Public Health); 52% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 21 cases and 6 deaths reported earlier were not L.A. County residents.

(U) GLOBAL

US National Security Officials Confirm Russia, Iran Election Interference

- On 21 October, US federal national security officials announced Iran and Russia obtained American voter registration information to influence the public about the upcoming US elections.
- The Director of National Intelligence (DNI) stated Iran is sending spoofed emails to intimidate voters, incite social unrest, and damage President Trump.
- The DNI also said Russia obtained American voter information as they did in 2016.

(U) NATIONAL

Maryland Man Arrested for Letter Threatening Joe Biden and Kamala Harris

- On 21 October, authorities arrested and charged James Dale Reed, 42, with threats against a candidate for president and vice president for allegedly leaving a letter at a Maryland residence on 4 October threatening to kidnap and kill Biden and Harris.
- Reed faces up to five years in federal prison.

Nothing Significant to Report (NSTR)

(U) CYBER

US Seizes Multiple Terror Group Domain Names

- On 21 October, the US Justice Department announced the seizure of "Aletejahtv.com" and "kataibhezbollah.com," two websites that were unlawfully utilized by a specially designated national and foreign terrorist organization.
- Kata'ib Hizballah used these domains to destabilize Iraq and recruiting others to join their cause.

Ransomware Targets City of Shafter, California

- On 21 October, the city of Shafter suffered a ransomware attack that compromised city computer systems and locked city staff out.
- Shafter city officials do not believe the attack affected personal information and are working to restore services.
- The city requested assistance from federal law enforcement partners to determine the source of the attack.

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) SEFFC - Officer Safety Awareness - Walking/Hiking Stick**, dated 19 October 2020.

(U//FOUO) The Southeast Florida Fusion Center (SEFFC) has received information regarding a segmented walking/hiking stick that may pose a threat to law enforcement personnel. Each segment contains a tool that is used in outdoor activities such as hiking. It is advertised as a walking stick and there is no indication that it is intended to cause harm against others or police officers.

(U//FOUO) Officers are reminded to be vigilant at all times and be cognizant of potentially hidden methods of escaping custody.

(U//FOUO) Handling Notice: Recipients are reminded that this Southeast Florida Fusion Center bulletin contains sensitive information meant for use primarily within the law enforcement and homeland security communities. Release of this material could adversely affect or jeopardize investigative activities. As such, bulletins of this nature are not to be released either in written or oral form to the media, the general public, or other personnel who do not have a valid "need-to-know" without prior approval from the Southeast Florida Fusion Center.

(U) Warning: This document is **Unclassified//For Official Use Only (U//FOUO)**. Subject: (U) LACoDPH News Release: L.A. County COVID-19 Case Increases Driven by Younger Residents - One New Death and 923 New Confirmed Cases of COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County COVID-19 Case Increases Driven by Younger Residents - One New Death and 923 New Confirmed Cases of COVID-19 in Los Angeles County**, dated 19 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed one new death and 923 new cases of COVID-19. The low number of new deaths and new cases reported today reflect a reporting lag from over the weekend.

(U) To date, Public Health identified 289,366 positive cases of COVID-19 across all areas of L.A. County and a total of 6,877 deaths. Upon further investigation, eight cases reported earlier were not L.A. County residents. Testing results are available for nearly 2,894,000 individuals with 9% of all people testing positive.

(U) People of all ages are at risk of being infected with COVID-19 and younger groups are driving L.A. County's case counts. Throughout the pandemic, people between the ages of 18 and 49 years old have had the highest number of cases, now accounting for 58% of all cases. When you add teenagers, a group who may be out socializing, individuals between 12 through 50 years old account for 68% of new cases.

(U) There are 722 people with confirmed cases of COVID-19 currently hospitalized and 27% of these people in the ICU. People over the age of 50 years old continue to make up the majority (60%) of people hospitalized with COVID-19. People between the ages of 18 and 29 years old have had a significant increase in hospitalizations and now comprise of over 10% hospitalization. This has doubled from the 5% of all hospitalizations seen in mid-May among this age group.

(U) As of October 13, there have been a total of three deaths among the 2,072 pregnant women that tested positive for COVID-19. All the women who died had underlying health conditions. Eighty percent of pregnant women testing positive for COVID-19 are Latina/Latinx, 8% are White, 4% are African American/Black, 3% are Asian, 3% identify with another race, and race/ethnicity was unknown or unspecified for 2%. The potential explanations for the disproportionality among Latinas are numerous and rooted in the inequities seen throughout this pandemic where Latinx communities have consistently experienced higher case, hospitalization, and death rates. Among the 1,176 births where there was testing information, 17 babies tested positive for the virus.

(U) Because Latinx residents are more likely to live in high-poverty areas where they have less access to the health affirming resources needed for optimal health and well-being and are more likely to work in lower-wage jobs with less control over their working conditions and a higher risk of workplace exposures, limiting workplace exposures is key to reducing the risk of exposure to pregnant Latinas and their partners. We continue to work with employers to implement workplace protocols and to identify clusters of positive cases before they turn into a workplace outbreak.

(U) Public health tracks the number of positive cases and deaths among healthcare workers related to the COVID-19 pandemic response. There have been a total 101 COVID-19 deaths and a total of 16,435 positive cases among healthcare workers and first responders in Los Angeles County. Nurses continue to account for the majority of cases

(36%) and deaths (44%) among healthcare workers. One-third (33%) of healthcare workers who tested positive for the virus worked at skilled nursing and assisted living facilities and 26% of healthcare workers testing positive worked at hospitals. Latino/Latinx people account for nearly 50% of all cases among healthcare workers, Asian healthcare workers account for nearly 15%, White healthcare workers account for 11%, and African American/Black healthcare workers account for nearly 7%. Public Health works with organizations across the county to ensure that health care workers are protected at worksites and have the personal protective equipment needed to stay safe.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,474 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Today's reported COVID-19 death occurred in a person over the age of 80 years old who had underlying health conditions.

Subject: (U) LACoDPH News Release: Public Health Advises it has Never Been More Important for Residents to Get Immunized against the Flu; Public Health Reports 27 New Deaths and 1,072 New Positive Cases

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Advises it has Never Been More Important for Residents to Get Immunized against the Flu; Public Health Reports 27 New Deaths and 1,072 New Positive Cases of COVID-19**, dated 16 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) encourages residents to protect themselves from influenza this year by getting the flu immunization.

(U) Because it is highly likely that both flu and COVID-19 will be present in L.A. County this year, it's vital that we do all that we can to protect ourselves to prevent a serious flu season coinciding with the COVID-19 pandemic.

(U) Everyone 6 months and older should be immunized against flu. Anyone can get flu (even healthy people), but people at high risk of developing serious flu-related complications include: people 65 years and older, pregnant women, children younger than 5 years and people with chronic medical conditions (such as asthma, diabetes, heart disease, or HIV).

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 27 new deaths and 1,072 new cases of confirmed COVID-19. Today's reported cases are an undercount due to a technical issue with the State's data reporting system. To date, Public Health has identified 287,222 positive cases of COVID-19 across all areas of L.A. County and a total of 6,855 deaths.

(U) Of the 27 new deaths reported today, 15 people that passed away were over the age of 80 years old, six people who died were between the ages of 65 and 79 years old, four people who died were between the ages of 50 and 64 years old, and two people who died were between the ages of 30 and 49 years old. Twenty-four people who died had underlying health conditions including 14 people over the age of 80, six people between the ages of 65 and 79 years old and four people between the ages of 50 and 64 years old.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,451 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 33 cases and 6 deaths reported earlier were not L.A. County residents.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 24 New Deaths and 1,233 New Confirmed Cases of COVID-19 in Los Angeles County; Public Health Reinforces Flu Immunizations for People at Increased Risk for Serious Illness as COVID-19 Pandemic Continues**, dated 15 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 24 new deaths and 1,233 new cases of COVID-19. To date, Public Health identified 286,183 positive cases of COVID-19 across all areas of L.A. County and 6,834 total deaths.

(U) There are 723 people with confirmed cases of COVID-19 currently hospitalized and 27% of these people in the ICU. Testing results are available for more than 2,866,000 individuals with 9% of all people testing positive.

(U) This week, there are 57 new cases among people experiencing homelessness. This includes 31 cases from previous weeks that were newly identified and were included in the new case totals. To date, Public Health has identified 1,889 cases among people experiencing homelessness. There was one new death reported among people experiencing homelessness. To date, 45 people who were experiencing homelessness have passed away from COVID-19.

(U) Of the 24 new deaths reported today, two people that passed away were over the age of 80 years old, 13 people who died were between the ages of 65 and 79 years old, seven people who died were between the ages of 50 and 64 years old, and one person who died was between the ages of 30 and 49. Eighteen people who died had underlying health conditions including two people over the age of 80 years old, 13 people between the ages of 65 and 79 years old, and three people between the ages of 50 and 64 years old. One death was reported by the City of Long Beach.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,430 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 66 cases and two deaths reported earlier were not L.A. County residents.

Subject: (U) LACoDPH News Release: Public Health to Update Health Officer Order Regarding Private Gatherings - 22 New Deaths and 1,349 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health to Update Health Officer Order Regarding Private Gatherings - 22 New Deaths and 1,349 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 14 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) will update the Health Officer Order to align with State guidance on private gatherings.

(U) On Friday, October 9, the State updated guidance to allow private gatherings of three or fewer households, as long as the private gathering is outdoors, everyone wears a cloth face covering and keeps at least six feet of physical distance, food is in single-serve disposable containers, and the duration of the gathering is two hours or less.

(U) On 15 October, Public Health will update the Health Officer Order to align with this change in the State guidance.

(U) Today, Public Health has confirmed 22 new deaths and 1,349 new cases of COVID-19. To date, Public Health identified 285,016 positive cases of COVID-19 across all areas of L.A. County and 6,812 total deaths. Upon further investigation, 83 cases reported earlier were not L.A. County residents.

(U) Schools are currently permitted to open for in-person learning and necessary assessments for high-need students while adhering to the school re-opening protocols. To date, 837 schools have opted to offer in-person learning for high-need students; 72% are public schools, 15% are charter schools, and 13% are private schools. Over 17,000 students and 10,000 staff have returned for on-site learning. The San Fernando region of L.A. County and the South Bay/Harbor region have the most schools opened at this time. A list of schools open for K-12 specialized services can be found online.

(U) Of the 22 new deaths reported today, five people that passed away were over the age of 80 years old, seven people who died were between the ages of 65 and 79 years old, five people who died were between the ages of 50 and 64 years old, one person who died was between the ages of 30 and 49, and one person who died was between the ages of 18 and 29. Fourteen people who died had underlying health conditions including four people over the age of 80 years old, six people between the ages of 65 and 79 years old, and four people between the ages of 50 and 64 years old. Three deaths were reported by the City of Long Beach.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,413 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 18 New Deaths and 790 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 13 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 18 new deaths and 790 new cases of COVID-19. To date, Public Health identified 283,750 positive cases of COVID-19 across all areas of L.A. County and a total of 6,790 deaths. Today's number of new cases and deaths reflect a reporting lag over the holiday.

(U) There are 692 confirmed cases of COVID-19 currently hospitalized and 27% of these people are confirmed cases in the ICU.

(U) Through the pandemic, Public Health has tracked the number of positive cases and deaths among healthcare workers related to the COVID-19 pandemic response. There have been a total 99 deaths and 16,080 positive cases among healthcare workers and first responders in Los Angeles County. The number of new weekly cases among healthcare workers has declined from 704 new cases reported for the week of July 4 to 368 new cases reported last week.

(U) Two-thirds of cases among healthcare workers occurred among women (68%) and the majority of COVID-19 related deaths in healthcare workers/first responders have occurred among men (55%). Nurses continue to account for the majority of positive cases (36%) and deaths (43%) among healthcare workers. Half of the healthcare workers identified with COVID-19 are Latino/Latinx, origin (50%), and nearly half are between 30 and 40 years old (46%). Cases have been identified among 29 different occupational settings and skilled nursing/long-term care facilities continue to have the highest proportion of cases (33%).

Subject: (U) LACoDPH News Release: Public Health Officials Provide Guidance for Individuals that were in Gatherings; Reports 2 New Deaths and 881 New Positive Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Officials Provide Guidance for Individuals that were in Gatherings Public Health Reports 2 New Deaths and 881 New Positive Cases of Confirmed COVID-19 in Los Angeles County**, dated 12 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 2 new deaths and 881 new cases of confirmed COVID-19. The low number of new deaths and new cases reported today reflect a reporting lag from over the weekend.

(U) According to the Center for Disease Control and Prevention, masks are strongly encouraged in settings where people might raise their voices, such as shouting, chanting, or singing. When someone raises their voice, their respiratory droplets, which carry the virus, spread farther.

(U) Public Health encourages you to get tested if you have been in a crowd or gathering where people were close together and not wearing face coverings and/or not keeping their distance. By finding out if you are positive, even if you have no symptoms yet, you can quickly take steps to prevent your family, friends or coworkers from becoming infected by you and get the medical care you need.

(U) To date, Public Health has identified 282,982 positive cases of COVID-19 across all areas of L.A. County and 6,773 total deaths. Upon further investigation, 34 cases reported earlier were not L.A. County residents.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,378 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 23% among White residents, 14% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

(U) Of the two new deaths reported today, one person that passed away was between the ages of 65 and 79 years old and one person who died was between the ages of 50 and 64 years old. Both people who died had underlying health conditions.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: One Additional Case of MIS-C in a Child Confirmed; Public Health Reports 13 New Deaths and 1,256 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: One Additional Case of MIS-C in a Child Confirmed; Public Health Reports 13 New Deaths and 1,256 New Cases of Confirmed COVID-19 in Los Angeles County - Public Health Reminds Residents to Avoid Crowded Places**, dated 9 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 13 new deaths and 1,256 new cases of COVID-19. To date, Public Health identified 279,909 positive cases of COVID-19 across all areas of L.A. County and a total of 6,741 deaths.

(U) Public Health has confirmed one additional case of multisystem inflammatory syndrome in children (MIS-C). This brings the total cases of MIS-C in L.A. County to 41 children. All 41 children with MIS-C in L.A. County were hospitalized and 46% of the children were treated in the ICU. Of the children with MIS-C, 27% were under the age of 5 years old, 39% were between the ages of 5 and 11 years old, and 34% were between the ages of 12 and 20 years old. Latino/Latinx children account for 70% of the reported cases. There are no reported MIS-C deaths in L.A. County children.

(U) There are 724 confirmed cases of COVID-19 currently hospitalized and 26% of these people are confirmed cases in the ICU. While slightly increasing from the low of 673 this week, the number of daily hospitalizations has remained under 800 daily hospitalizations since mid-September.

(U) Public Health urges residents to adhere to public health protocols and directives to prevent increases of COVID-19 infections. As a reminder, gathering with people outside your household puts you and those around you at greater risk. If you are celebrating this weekend, please remember to avoid crowded places and close contact with others not in your household. Everyone should always wear a face covering securely over their nose and mouth and maintain six feet distance between yourself and people not in your household. Gatherings, events or parties with non-household members are not permitted even if they are conducted outdoors except those expressly allowed in the L.A. County Order. This includes in-person sport viewing and dinner parties as these events can become places where COVID-19 can spread easily. It is important for everyone to follow the directives and to do their part every day to keep everyone as safe as possible.

Subject: (U) LACoDPH News Release: Public Health Reports 21 New Deaths and 1,280 New Cases of Confirmed COVID-19 in Los Angeles Public Health Officials Urge Residents to Avoid Gatherings

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 21 New Deaths and 1,280 New Cases of Confirmed COVID-19 in Los Angeles Public Health Officials Urge Residents to Avoid Gatherings**, dated 8 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 21 new deaths and 1,280 new cases of confirmed COVID-19. To date, Public Health has identified 278,665 positive cases of COVID-19 across all areas of L.A. County, and 6,726 total deaths.

(U) As COVID-19 continues to spread throughout L.A. County communities, Public Health urges participation with case investigation and contact tracing efforts. To date, nearly 139,000 people who are or were positive for COVID-19 completed the case investigation interview process. More than 84,000 contacts, or people that were exposed to the virus, were identified, and nearly 61,000 close contacts completed interviews. Since early August, an average of 63% of cases have provided at least one contact for follow-up. Our ability to talk to people who are infected and those potentially infected with COVID-19 is an important tool in slowing the spread of the virus.

(U) Testing results are available for more than 2,770,000 individuals with 9% of all people testing positive.

(U) Of the 21 new deaths reported today, eight people that passed away were over the age of 80 years old, seven people who died were between the ages of 65 and 79 years old, four people who died were between the ages of 50 and 64 years old, and two people who died were between the ages of 30 and 49 years old. Eighteen people who died had underlying health conditions including six people over the age of 80, seven people between the ages of 65 and 79 years old, three people between the ages of 50 and 64 years old, and two people between the ages of 30 and 49 years old.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,333 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 23% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 60 cases and four deaths reported earlier were not L.A. County residents.

(U) There are 709 confirmed cases of COVID-19 currently hospitalized and 28% of these people are confirmed cases in the ICU.

(U//FOUO) The above links will download the **(U//FOUO) JRIC-LA Cyber Lab Joint Cyber Spotlight: Latest Emotet Campaign Exploits US Election Themes**, dated 8 October 2020.

(U//FOUO) As the 2020 US presidential election approaches, the JRIC and LA Cyber Lab assess Emotet campaigns related to the election will continue, and may intensify. Since early September 2020, LA Cyber Lab has observed ongoing Emotet phishing email campaigns targeting government agencies in the JRIC six-county area of responsibility (AOR).

(U//FOUO) The 29 September 2020 US presidential debate was followed by an Emotet campaign using emails with malicious attachments disguised by the nefarious cyber actors as volunteer recruitment efforts by the Democratic National Committee (DNC). Similar campaigns tailored to high-profile political events in the run-up to the 2020 elections will likely occur.

Two UK Inmates Convicted for Attempting to Murder Prison Officer

- On 7 October, a UK court convicted Brusthom Ziamani, 25, and Baz Macaulay Hockton, 26, of attempted murder of a prison officer following an investigation conducted by anti-terrorism authorities.
- Ziamani and Hockton wore imitation suicide belts made from wires and plastic cartons and lured the prison officer to a cupboard before assaulting him on the floor; prison officers responded, disrupted the attack, and secured Ziamani and Hockton in their cells.
- Authorities recovered material supporting extremist ideology connected to Ziamani and Hockton; both will be sentenced today.

Somali Men Found Guilty for Roles in 2013 Westgate Mall Attack

- On 7 October, a Kenyan court found Mohamed Ahmed Abdi and Hussein Hassan Mustafa guilty of supporting Al-Shabaab in the 2013 Westgate Mall attack that left 67 dead.
- Abdi and Mustafa are scheduled for sentencing on 22 October.

FBI Disrupts Plot to Kidnap Michigan Governor

- On 8 October, the US Justice Department announced charges against six people involved in a plot to kidnap and take hostage Michigan Governor Gretchen Whitmer at the Michigan State Capitol in Lansing with the intent to overthrow the state's government.
- According to prosecutors, the group discussed tactics to target the Michigan State Capitol building, including the use of Molotov cocktails to destroy police vehicles, and the construction of IEDs to use in their attack.
- The FBI first learned of the plot earlier this year, and embedded confidential sources and undercover agents to monitor the group's activities; authorities arrested the suspects on 6 October.

Subject: (U) LACoDPH News Release: Public Health Reports 30 New Deaths and 990 New Positive Cases of Confirmed COVID-19 in Los Angeles County - Cases Among People Experiencing Homelessness Decline

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 30 New Deaths and 990 New Positive Cases of Confirmed COVID-19 in Los Angeles County - Cases Among People Experiencing Homelessness Decline**, dated 6 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 30 new deaths and 990 new cases of confirmed COVID-19. To date, Public Health has identified 275,856 positive cases of COVID-19 across all areas of L.A. County, and a total of 6,681 deaths. Testing results are available for more than 2,737,000 individuals with 9% of all people testing positive.

(U) To date, Public Health has identified 1,846 cases among people experiencing homelessness. The weekly number of new cases among this group has declined significantly. Cases among people experiencing homelessness peaked the week of July 7 at 138 new cases. This week, there are 53 new cases among people experiencing homelessness. This includes 36 cases from previous weeks that were newly identified and were included in the new case totals.

(U) To date, 44 people who were experiencing homelessness and two people who were working in shelters have passed away from COVID-19. Of the people who were experiencing homelessness who passed away, 21 were sheltered, 13 were unsheltered, and for 10 people who passed away, their sheltered status was unknown. There were no new deaths reported among people experiencing homelessness or shelter staff this week.

(U) Tomorrow, Wednesday, October 7, indoor shopping malls will be allowed to reopen with occupancy limited to 25% capacity, and with all food courts and all common areas closed. Last week, Public Health released a timeline for reopening nail salons, indoor malls and outdoor cardrooms, outside playgrounds, and the school waiver application program for in-person learning for students in grades TK-2. Nail salons, outdoor cardrooms and outside playgrounds have been allowed to resume operations with the required modifications in place. The school waiver program also began accepting applications yesterday.

(U) Of the 30 new deaths reported today, 13 people that passed away were over the age of 80 years old, nine people who died were between the ages of 65 and 79 years old, five people who died were between the ages of 50 and 64 years old, and one person who died was between the ages of 30 and 49 years old. Twenty-one people who died had underlying health conditions including 11 people over the age of 80, six people between the ages of 65 and 79 years old, and four people between the ages of 50 and 64 years old. Two deaths were reported by the City of Pasadena.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,290 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 23% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 76 cases and two deaths reported earlier were not L.A. County residents.

(U) There are 685 confirmed cases currently hospitalized and 29% of these people are confirmed cases in the ICU.

Subject: (U) LACoDPH News Release: Public Health Highlights Infection Control and Distancing to Prevent COVID-19 Spread as Sectors Reopen - Seven New Deaths and 472 New Positive Cases of Confirmed COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Highlights Infection Control and Distancing to Prevent COVID-19 Spread as Sectors Reopen - Seven New Deaths and 472 New Positive Cases of Confirmed COVID-19 in Los Angeles County**, dated 5 October 2020.

(U) As sectors reopen in L.A. County, the Los Angeles County Department of Public Health (Public Health) highlights infection control and distancing as the best ways to avoid becoming infected with COVID-19, and cautions daily testing is not a substitute for these safety measures.

(U) The goal for everyone, including Public Health, businesses, and residents, is to reopen sectors in a way that does not result in more cases, illness, and deaths from COVID-19. We are seeing in cities across the country and the world that with reopening often comes increases in transmission of the virus that ultimately requires sectors to close again for the safety of residents.

(U) Today, Public Health has confirmed seven new deaths and 472 new cases of COVID-19. To date, Public Health identified 274,942 positive cases of COVID-19 across all areas of L.A. County and a total of 6,654 deaths. The low number of new deaths and new cases reported today reflect a reporting lag from over the weekend. Upon further investigation, 95 cases reported earlier were not L.A. County residents.

(U) Beginning today, Monday, **October 5**, schools can apply for a waiver to reopen their classrooms for in-person instruction for students in grades TK through 2. To apply, schools must complete an online application available at www.publichealth.lacounty.gov. The application must be accompanied by letters of support from employees and parents. In addition to the application and letters of support, schools must also submit a completed Public Health K-12 Protocol Checklist to demonstrate that they are in compliance with all required infection control protocols. The program prioritizes the issuance of waivers to schools with higher percentages of students qualified for free/reduced meals and is capped at 30 schools per week. The review process will take 2-3 weeks and includes consultation with the California Department of Public Health.

(U) The timeline for the re-opening of additional sectors are the following:

(U) As of **October 1**, nail salons resumed indoor services at 25% capacity. Outdoor services should continue as much as possible. As of today, **October 5**, cardrooms can reopen for outdoor operations only. Food and beverages may not be served at the tables. Face coverings are required. On **October 7**, indoor shopping malls will be allowed to reopen with occupancy limited to 25% capacity; all food courts and all common areas remain closed. Outside playgrounds can reopen at the discretion of cities and L.A. County Parks and Recreation. Face coverings and physical distancing are required. Public Health continues consulting with County Counsel on the process for re-opening outdoor operations at breweries and wineries serving a meal.

(U) Of the seven new deaths reported today, three people that passed away were over the age of 80 years old, one person who died was between the ages of 65 and 79 years old, two people who died were between the ages of 50 and 64 years old, and one person who died was between the ages of 30 and 49 years old. Five people who died had

underlying health conditions including three people over the age of 80 and two people between the ages of 50 and 64 years old.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 6,265 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 23% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

Subject: (U) LACoDPH News Release: Public Health Underscores Safety Guidance & Importance of Contact Tracing - 21 New Deaths and 1,324 New Positive Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Underscores Safety Guidance & Importance of Contact Tracing as Community Spread of COVID-19 Continues - 21 New Deaths and 1,324 New Positive Cases of Confirmed COVID-19 in Los Angeles County; Two New Cases of MIS-C in Children Reported**, dated 2 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 21 new deaths and 1,324 new cases of COVID-19. To date, Public Health identified 272,653 positive cases of COVID-19 across all areas of L.A. County and 6,626 total deaths. Public Health is reporting two additional cases of multisystem inflammatory syndrome in children (MIS-C). This brings the total cases of MIS-C in L.A. County to 40 children. All 40 children with MIS-C in L.A. County were hospitalized and nearly 50% of the children were treated in the ICU. Of the children with MIS-C, 27% were under the age of 5 years old, 38% were between the ages of 5 and 11 years old, and 35% were between the ages of 12 and 20 years old. Latino/Latinx children account for 70% of the reported cases. There have been no reported MIS-C deaths in LA County children.

(U) There continues to be widespread COVID-19 transmission in L.A. County. It is important that everyone follow the safety measures that minimize COVID-19 transmission and saves lives, including avoiding gatherings with people not from your household.

(U) If you think you have been exposed to COVID-19, this includes a person diagnosed with or likely to have COVID-19, it is very important that you quarantine for 14 days and stay away from all other people, especially those at greater risk of becoming seriously ill from COVID-19, and monitor your health during the 14 days. This is required to prevent you from unintentionally spreading COVID-19 to other people.

(U) You should get tested if you were exposed to COVID-19. If you think you could be positive for COVID-19 and are awaiting testing results, it is important to stay at home and act as if you are positive for the virus. This means staying home except to get medical care and separate yourself from others until at least 10 days have passed since the onset of symptoms, and you have had no fever for at least 24 hours and your symptoms have improved.

(U) As the COVID-19 pandemic continues, Public Health continues to encourage participation with case investigation and contact tracing efforts. To date, over 134,000 people who are or were positive for COVID-19 completed the case investigation interview process. More than 81,000 contacts, or people that were exposed to the virus, were identified, and nearly 59,000 close contacts completed interviews. Obtaining as much information as possible from people during the case investigation interview helps contain this virus and minimize outbreaks, and it is a crucial part of protecting the health of communities.

(U) If a person tests positive for COVID-19, they should plan to receive a call from a contact tracer to discuss how to protect themselves and others, to find out where they may have been, and who they were in close contact with while infectious.

(U) We encourage anyone who receives a call from Public Health to speak to our contact tracers. If a contact tracer calls, it will display on your phone as “LA Public Health” or as 833-641-0305.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Attachment Link(s):

- 201001 FOUO JRIC Bulletin - Vehicle-vs-Pedestrian Encounters Likely to Increase in Late 2020.pdf (6 pages)

Link(s) will expire on 10/15/2020

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC) Bulletin: Vehicle-vs.-Pedestrian Encounters Likely to Increase in Late 2020**, dated 1 October 2020.

(U//FOUO) Vehicle-vs.-pedestrian incidents—most spontaneous, some premeditated—associated with mass gatherings such as marches and protests will likely continue to increase in the United States and JRIC area of responsibility (AOR) in late 2020, presenting growing public safety challenges associated with creating and securing highly mobile, dynamic, complex event perimeters to separate pedestrians and vehicles.

(U//FOUO) The JRIC assesses a heightened threat environment, due to the polarized US political climate, anticipated increase in the number of protests leading up to and following the 3 November 2020 US presidential elections, and ongoing attempts by nefarious actors to exploit negative socioeconomic impacts of the COVID-19 pandemic to incite violence. While not directly related to protests, nationally, at least four law enforcement officers (LEOs) have been feloniously killed by vehicles so far in 2020. While the JRIC has no credible information at this time of vehicle attack threats against LEOs, essential personnel, or crowds in the six-county AOR, lone actor attacks are difficult to detect and interdict

Subject: (U) LACoDPH News Release: Public Health Announces Timeline for Sector Re-openings 35 New Deaths and 1,148 New Positive Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Announces Timeline for Sector Re-openings 35 New Deaths and 1,148 New Positive Cases of Confirmed COVID-19 in Los Angeles County**, dated 1 October 2020.

(U) The Los Angeles County Department of Public Health (Public Health), in consultation with the Board of Supervisors, will revise the Health Officer Order to allow for limited in-door operations at nail salons and shopping malls, outdoor operations for cardrooms, re-opening of outside playgrounds and the school waiver program for grades TK-2.

(U) The following sectors and program will be allowed to reopen on the following dates under the following restrictions:

- Nail Salons - October 1 - Indoor services may resume at 25% capacity. Outdoor services should continue as much as possible.
- Schools (TK-2) Waiver Program - Applications can be submitted on October 5 - Limited to 30 schools per week.
- Cardrooms - October 5 - Outdoor operations only. Food and beverages may not be served at the tables.
- Indoor Shopping Malls - October 7 - Occupancy limited to 25% capacity; all food courts and all common areas remain closed.
- Outside Playgrounds - At the discretion of cities and L.A. County Parks and Recreation - Face coverings and physical distancing are required.

(U) Public Health is consulting with County Counsel to determine the process and date for re-opening outdoor operations at breweries and wineries serving a meal. We anticipate this process will be completed in a week.

(U) Beginning Monday, October 5, school waiver applications for in-person instruction for students in grades TK-2 will be available online at www.publichealth.lacounty.gov. Applications will be received and reviewed by Public Health in consultation with the State. Schools must follow all required school re-opening protocols for infection control, distancing, and cohorting. Students will be in cohorts of no more than 12 children and two supervising adults in each classroom. This group of students and adults will need to stay together throughout the entire day for all activities. Every school that re-opens will receive a site visit from Public Health. Public Health has a dedicated team of specialists providing technical assistance and disease management control to all schools that are re-opened or re-opening.

(U) Comprehensive protocols for all sectors that reopen will be posted online to ensure the continued health and safety of workers and the community. Businesses are required to implement the protocols for infection control and distancing prior to reopening to ensure they are in compliance, and to avoid citations, fines and possible closure. Businesses have a duty to protect employees, customers and residents from COVID-19 as much as possible and to follow Public Health protocols and directives. It is important for everyone to follow the directives and to do their part every day to keep everyone as safe as possible.

(U) Today, Public Health has confirmed 35 new deaths and 1,148 new cases of confirmed COVID-19. To date, Public Health has identified 271,371 positive cases of COVID-19 across all areas of L.A. County, and a total of 6,610 deaths.

Two ISIS Members Charged with Material Support Violations

- On 30 September, a federal court charged Emraan Ali, 53, and Jihad Ali, 19, with providing and attempting to provide material support to ISIS.
- In March 2015, the men traveled to Syria to join ISIS, and received military and religious training to serve as ISIS fighters.
- In March 2019, the men surrendered to Syrian authorities during the last sustained ISIS battles to maintain territory in Syria.

Florida Man Sentenced for Making Threats against Police Officers

- On 30 September, a US District judge sentenced James Alexander, 26, to 37 months in federal prison for making online threats to harm two Plant City Police officers.
- Beginning in October 2017, Alexander posted threats on multiple Facebook pages directed against law enforcement; between May and June 2018, he sent direct threats to two Plant City Police officers, threatening to harm them and their families.

Massachusetts Man Sentenced for Beheading Plot

- On 28 September, a Boston federal court sentenced David Daoud Wright for an extended period of 30 years in prison, from an original 28-year sentence, for plotting to behead blogger Pamela Geller on behalf of ISIS.
- The 1st US Circuit Court of Appeals rejected the charge of conspiracy to provide material support to a designated foreign terrorist organization, however Wright remains convicted of conspiracy to commit acts of terrorism transcending national boundaries.

Subject: (U) LACoDPH News Release: Data Shows Progress against COVID-19 Continues; 30 New Deaths and 1,063 New Positive Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Data Shows Progress against COVID-19 Continues; 30 New Deaths and 1,063 New Positive Cases of Confirmed COVID-19 in Los Angeles County - Nail Salons, Indoor Malls, Outdoor Operations for Cardrooms, Breweries and Wineries Serving Meals, and Outside Playgrounds May Reopen in Near Future**, dated 30 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) continues seeing progress in key indicators, including positivity rates, hospitalizations and deaths. Today, Public Health has confirmed 30 new deaths and 1,063 new cases of confirmed COVID-19. To date, Public Health has identified 270,299 positive cases of COVID-19 across all areas of L.A. County, and a total of 6,576 deaths.

(U) There are 734 people currently hospitalized with COVID-19 and 28% of these people are in the ICU. Hospitalizations have remained fairly steady the past couple of weeks after declining significantly since the middle of July when the County experienced an average of about 2,200 hospitalizations per day. As of September 24, the County is averaging 743 hospitalizations per day. This is the lowest number we have seen in 6 months.

(U) Over the next 10 days, the following sectors will be allowed to reopen once they implement the required protocols for infection control and distancing:

- (U) Nail salons may reopen for limited indoor services at 25 percent occupancy.
- (U) Cardrooms may reopen for outdoor gaming only. Food and beverages may not be served in cardrooms at this time.
- (U) Indoor shopping malls will be allowed to reopen at 25 percent maximum occupancy; all food courts and all common areas remain closed per the State order.
- (U) Outdoor playgrounds may reopen at the approval and discretion of cities and the County Parks and Recreation Department. Parents and children age two years old and older must always wear a cloth face covering, avoid people not in their household, and sanitize hands before and after using playground equipment. There is no eating or drinking allowed at the playground. Indoor playgrounds remain closed.

Subject: (U) LACoDPH News Release: L.A. County Will Open School Waiver Program for Grades TK-2 39 New Death and 905 New Positive Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Will Open School Waiver Program for Grades TK-2 39 New Death and 905 New Positive Cases of Confirmed COVID-19 in Los Angeles County**, dated 29 September 2020.

(U) After a motion was approved by the Los Angeles County Board of Supervisors, the Los Angeles County Department of Public Health (Public Health) will plan to open the school waiver program for in person instruction for grades TK-2.

(U) The program will begin accepting applications in early October for 30 schools per week and prioritize the issuance of waivers to schools with higher percentages of students qualified for free/reduced meals.

(U) Superintendents must submit school district waiver requests to re-open for approval by the local Health Officer. The decision to grant a waiver will be based on ensuring that schools are able to open in full adherence with the L.A. County school re-opening protocols. The process requires consultation with the California Department of Public Health prior to accepting or rejecting waiver applications. The application process will be available online at www.publichealth.lacounty.gov and will be launched in early October.

(U) Today, Public Health has confirmed 39 new deaths and 905 new cases of confirmed COVID-19. To date, Public Health has identified 269,284 positive cases of COVID-19 across all areas of L.A. County, and a total of 6,551 deaths.

(U) Although Los Angeles County met the State's metric thresholds for Tier 2 last week, L.A. County remains in Tier 1 due to the current adjusted daily case rate of 7.3 cases per 100,000 residents. Per the State guidelines, to move to Tier 2, the County's case rate needs to be 7 or fewer new cases a day per 100,000 residents for two consecutive weeks. The County's test positivity rate is 2.9% which places the County in Tier 3 for this metric. The State places Counties in the most restrictive Tier when the metrics fall in two different tiers, so the County remains in Tier 1 because the daily case rate indicates there is still widespread transmission in our communities.

Subject: (U) LACoDPH News Release: L.A. County Sees Lowest Number of New COVID-19 Deaths Since March Likely Due to Weekend Reporting Lag - One New Death and 663 New Positive Cases of Confirmed COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Sees Lowest Number of New COVID-19 Deaths Since March Likely Due to Weekend Reporting Lag - One New Death and 663 New Positive Cases of Confirmed COVID-19 in Los Angeles County**, dated 28 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed one new death and 663 new cases of confirmed COVID-19. This is the lowest number of new deaths reported since March. However, Public Health cautions the decrease of new deaths and new cases reported today reflects, in part, a reporting lag from over the weekend.

(U) To date, Public Health has identified 268,455 positive cases of COVID-19 across all areas of L.A. County, and a total of 6,515 deaths. Upon further investigation, nine cases reported earlier were not L.A. County residents.

(U) There are 689 people currently hospitalized with COVID-19 and 34% of these people are in the ICU. People under the age of 65 continue to make up an increasing proportion of people hospitalized with COVID-19 with nearly 70% of patients recently hospitalized. People between the ages of 18 and 29 years old represent the most significant increase in hospitalizations and now comprise over 10% of people who are hospitalized.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Hypertension and diabetes are the most common underlying health conditions among people who died from COVID-19. Neurologic conditions, cardiovascular disease and chronic renal disease are also common. Of the deaths reported by Public Health, 3,705 people had hypertension, 2,727 people had diabetes, 1,498 people had cardiovascular disease, 1,097 had chronic renal disease, and 1,025 people had neurologic conditions. Please note, each person may have multiple conditions. Public Health estimates as many as 20% to 30% of L.A. County residents, across all age groups, have an underlying health condition that puts them at higher risk for serious disease from COVID-19.

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 34 New Deaths and 1,401 New Positive Cases of Confirmed COVID-19 in Los Angeles County - 4 Additional Cases of MIS-C in Children Identified**, dated 25 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 34 new deaths and 1,401 new cases of confirmed COVID-19. Today is the highest number of new cases reported within the last two weeks.

(U) To date, Public Health has identified 265,775 positive cases of COVID-19 across all areas of L.A. County, and 6,488 total deaths.

(U) Public Health is also reporting four new cases of multisystem inflammatory syndrome in children (MIS-C). This brings the total number of MIS-C cases in L.A. County to 38 children.

(U) All 38 children with MIS-C in L.A. County were hospitalized and 47% of the children were treated in the ICU. Twenty-six percent of these cases were between the ages of 0 and 4 years old, 37% were between the ages of 5 and 11 years old, and 37% were between the ages of 12 and 20 years old. Latino/Latinx children account for 71% of the reported cases. None of the children with MIS-C in L.A. County have died due to the illness.

(U) As of September 22, there have been a total of three deaths among the 1,853 pregnant women that tested positive for COVID-19. Eighty percent of pregnant women testing positive for COVID-19 are Latina/Latinx, 7% are White, 4% are African American/Black, 3% are Asian, 4% identify with another race, and race/ethnicity was unknown or unspecified for 1%. Among the 956 births where there was testing information, 16 babies tested positive for the virus.

(U) Of the 34 new deaths reported today (excluding Long Beach and Pasadena), 14 people that passed away were over the age of 80, nine people who died were between the ages of 65 and 79 years old, six people who died were between the ages of 50 and 64 years old and two people who died were between the ages of 30 and 49 years old. Twenty-eight people had underlying health conditions including 13 people over the age of 80 years old, eight people between the ages of 65 and 79 years old, five people between the ages of 50 and 64 years old, and two people between the ages of 30 and 49. Three deaths were reported by the City of Long Beach.

Subject: (U) LACoDPH News Release: Public Health Sees Steady Decline in COVID-19 Deaths Associated with Skilled Nursing Facilities - Public Health Reports 39 New Deaths and 1,165 New Positive Cases of COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Sees Steady Decline in COVID-19 Deaths Associated with Skilled Nursing Facilities - Public Health Reports 39 New Deaths and 1,165 New Positive Cases of Confirmed COVID-19 in Los Angeles County**, dated 24 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 39 new deaths and 1,165 new cases of COVID-19. To date, Public Health identified 264,414 positive cases of COVID-19 across all areas of L.A. County and a total of 6,455 deaths.

(U) Public Health is seeing a steady decline in COVID-19 deaths in skilled nursing facilities in Los Angeles County. Skilled nursing facility COVID-19-associated deaths peaked in the beginning of May with 190 deaths a week. By mid-September, deaths in skilled nursing facilities dropped to 22 a week. Skilled nursing facilities did not experience an increase in COVID-19 deaths in July and August as Los Angeles County did overall.

(U) Public Health remains in regular contact with skilled nursing facilities and provides facilities with education, technical assistance, guidance, emergency supplies of personal protective equipment, and COVID-19 testing support. Public Health also continues to survey skilled nursing facilities in the County for compliance with mandated COVID-19 testing and reports of COVID-19 cases and outbreaks. All 341 skilled nursing facilities are conducting testing of residents and staff; between September 6 and September 12, 30,000 COVID-19 tests were completed among staff and residents. The percentage of residents that tested positive during this time period was 1.3% and for staff was .4%. Ninety-nine percent of skilled nursing facilities reported having adequate staffing and 94% reported having adequate PPE. Out of the 341 facilities, 164 were reported as having one or more cases and 177 facilities reported no positive cases. Public Health continues to conduct on-site inspections at skilled nursing facilities that are reported to be in noncompliance with infection control practices, or those that have reports of noncompliance that caused serious harm or death to a resident. These inspections occur within 24 hours of reported complaints.

(U) Of the 39 new deaths reported today, 13 people that passed away were over the age of 80 years old, 11 people who died were between the ages of 65 and 79 years old, 12 people who died were between the ages of 50 and 64 years old, and one person who died was between the ages of 30 and 49 years old. Thirty-five people who died had underlying health conditions including 13 people over the age of 80, nine people between the ages of 65 and 79 years old, 12 people between the ages of 50 and 64 years old and one person between the ages of 30 and 49 years old. Two deaths were reported by the City of Long Beach.

Subject: (U) LACoDPH News Release: Key Indicators Show Progress in Response to COVID-19 - 31 New Deaths and 1,265 New Positive Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Key Indicators Show Progress in Response to COVID-19 - 31 New Deaths and 1,265 New Positive Cases of Confirmed COVID-19 in Los Angeles County**, dated 23 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) continues seeing progress in key indicators, including daily hospitalizations and deaths. Public Health remains vigilant in monitoring the metrics that show LA County's progress in slowing the spread of COVID-19 and reducing the disproportionality in highly impacted groups.

(U) There are 779 confirmed cases currently hospitalized and 28% of these people are confirmed cases in the ICU. Daily hospitalizations have declined and have dropped down slightly lower than the numbers seen in early April. The number of hospitalized COVID-19 patients has been below 1,000 for most of September and reflects, in part, an overall decrease in transmission of the virus and better treatments that result in shorter lengths of hospital stays.

(U) Today, Public Health reports 31 new deaths and 1,265 new cases of COVID-19. To date, Public Health identified 263,333 positive cases of COVID-19 across all areas of L.A. County, and 6,423 total deaths.

(U) Deaths have continued to decline since the peak seen two months ago. In late July, the average daily reported deaths was 43, and on September 9, the average daily reported deaths was 20. While deaths continue to decrease, if there is an increase in cases as a result of Labor Day activities, this will likely translate into more hospitalizations and deaths in the coming weeks. We have seen a slight increase in cases recently, which we are watching closely, especially since these increases happened after the Labor Day weekend.

(U) Of the 31 new deaths reported today, 10 people that passed away were over the age of 80 years old, 14 people who died were between the ages of 65 and 79 years old, six people who died were between the ages of 50 and 64 years old, and one person who died was between the ages of 30 and 49 years old. Twenty-four people who died had underlying health conditions including nine people over the age of 80, 10 people between the ages of 65 and 79 years old, and five people between the ages of 50 and 64 years old.

Subject: (U) LACoDPH News Release: Public Health Reports 40 New Deaths and 810 New Positive Cases of Confirmed COVID-19; Must Meet Thresholds for Two Consecutive Weeks Before Moving Tiers

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 40 New Deaths and 810 New Positive Cases of Confirmed COVID-19 in Los Angeles County; Los Angeles County Meets Metric Thresholds for Tier 2 - Must Meet Thresholds for 2 Consecutive Weeks Before Moving Tiers**, dated 22 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 40 new deaths and 810 new cases of confirmed COVID-19. To date, Public Health has identified 262,133 positive cases of COVID-19 across all areas of L.A. County and a total of 6,401 deaths.

(U) Public Health is closely monitoring the number of daily hospitalizations related to COVID-19. Unlike the daily number of cases, which reflects the number of people tested in L.A. County, the number of hospitalizations is a stable indicator representing the number of people who are seriously ill from COVID-19. During the pandemic we have seen increases in the numbers of hospitalizations three to four weeks after an event where there was widespread transmission of COVID-19, including after holiday weekends or sector re-openings.

(U) The County continues to see the number of daily COVID-19 hospitalizations decline from the July 20 peak of a 3-day average of over 2,200 hospitalizations. There are 745 people currently hospitalized with COVID-19 and 28% of these people are in the ICU. Even in the last month, since the end of August, there has been a significant decrease from an average of 1,200 daily hospitalizations to the average this past week of under 800 hospitalizations per day. We are hoping that we do not see an increase in the number of daily hospitalizations in the upcoming weeks associated with activities that occurred over the Labor Day holiday.

(U) According to the State's Blueprint for a Safer Economy, Los Angeles County has met the metric thresholds for Tier 2 (Substantial risk level). Per the State guidelines, Los Angeles County must continue to meet these metric thresholds for two consecutive weeks before moving into Tier 2. The State also announced that counties may now make their own determination to allow nail salons to resume indoor operations. Public Health will be consulting with the Board of Supervisors to determine the timing of adopting changes to the County Health Officer Order that would allow nail salons to resume modified indoor operations.

(U) Of the 40 new deaths reported today, 15 people that passed away were over the age of 80 years old, 12 people who died were between the ages of 65 and 79 years old, seven people who died were between the ages of 50 and 64 years old, four people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Twenty-seven people who died had underlying health conditions including eleven people over the age of 80, nine people between the ages of 65 and 79 years old, and four people between the ages of 50 and 64 years old, and three people between the ages of 30 to 49 years old. One death was reported by the City of Pasadena.

Subject: (U//FOUO) JRIC Snapshot: Ricin Unlikely to Pose Significant Threat Despite Ease of Acquisition, Repeated Attempts to Use as a Biological Weapon

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

Attachment Link(s):

- 200922 FOUO JRIC Snapshot - Ricin Unlikely to Pose Significant Threat Despite Ease of Acquisition, Repeated Attempts to Use as a Biological Weapon.pdf (1 page)

Link(s) will expire on 10/6/2020

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence (JRIC) Snapshot: Ricin Unlikely to Pose Significant Terrorist Threat Despite Ease of Acquisition, Repeated Attempts to Use as a Biological Weapon**, dated 22 September 2020.

(U//FOUO) On 19 September 2020, law enforcement officials confirmed a letter addressed to President Trump at the White House contained ricin, a toxic protein extracted from castor beans; the incident caused no injuries or illness. The JRIC has not identified any specific, credible threats within the six-county AOR related to this event. While unlikely to pose a significant threat, the widespread presence of castor bean plants in the JRIC area of responsibility (AOR), as well as ongoing efforts by homegrown violent extremists (HVEs), domestic violent extremists (DVEs), and foreign terrorist organizations (FTOs) to use ricin as a biological weapon, will probably result in future plots and attempted attacks.

(U//FOUO) In relation to this incident, federal authorities arrested a female suspect armed with a gun as she attempted to enter the United States from Canada. The suspect allegedly sent five additional letters addressed to law enforcement agencies in South Texas along the Mexico border, according to unconfirmed open source reporting. On 21 September 2020, the Royal Canadian Mounted Police searched an apartment in Montreal, Canada, in connection with the incident. At this time, no further information about the suspect and the ongoing investigation is available.

(U) Please provide feedback at jric@jric.org.

Al-Shabaab Militant Sentenced for US Base Attack in Kenya

- On 17 September, a Somalian military court sentenced Farhan Mohamud Hassan to life in prison for his role in a January 2020 attack on a US base that killed one US soldier and two contractors.
- Hassan transported explosives to Kenya, and claimed he participated in multiple attacks in southern Somalia since joining al-Shabaab in 2010.

(U) NATIONAL

Manhunt Underway after New Jersey Officers Targeted in Shooting

- On 17 September, Camden County police announced a manhunt is underway for two suspects who fired gunshots into the home of two Camden County, New Jersey, police officers on 15 September.
- The Camden County Police Chief stated the shooting was a targeted attack against the officers and their residence; the officers were not injured.
- Authorities located a Honda Odyssey believed to have been used by the suspects; a $20,000 reward is offered for information leading to the arrest of the suspects.

(U) CALIFORNIA

Nothing Significant to Report (NSTR)

(U) CYBER

Iranian Nationals Charged with Cyber Attacks

- On 17 September, federal authorities charged Said Pourkarim Arabi, 34, Mohammad Reza Espargham, 25, and Mohammad Bayati, 34, with engaging in a coordinated campaign of identity theft and hacking on behalf of Iran's Revolutionary Guard Corps to steal US aerospace and satellite technology and resources.
- From July 2015 to February 2019, the suspects carried out cyber attacks targeting companies and organizations in the US and abroad, acquiring a list of over 1,800 accounts, to engage in coordinated social engineering to identify and steal the identities of US citizens working in satellite and aerospace fields.
- The suspects each face up to 20 years in prison.

(U) COVID-19 INTERIM GUIDANCE

Pre-Screen

- Employers should measure the employee's temperature and assess symptoms prior to them starting work. Ideally, temperature checks should happen before the individual enters the facility.

(U) NOTABLE ANNIVERSARY DATES

- 18 September 2001, United States: Letters containing high-grade Anthrax were sent to two US Senators and numerous news organizations nationwide, killing five people and infecting 17 others.
- 18 September 1997, Egypt: Bomb attack on Cairo tourist bus by two Muslim militants kill nine Germans.
- 19 September 2018, Britain: Martin Stokes drove into a crowd outside Al-Jajlis Al Hussaini Center in a hate crime that injured three.
- 19 September 1989, France: Union de Transports Aeriens Flight 772 to Paris explodes over Niger, killing 170; Libya held responsible.
- 20 September 2018, United States: Snochia Moseley, 26, fatally shot three and injured four at a Rite Aid in Harford County, Maryland, before dying from a self-inflicted gunshot at a nearby hospital.
- 20 September 2008, Pakistan: Truck bomb attack against Marriott Hotel in Islamabad kills more than 60, wounds 200; al-Qa'ida strongly suspected.
- 20 September 1984, Lebanon: Islamic Jihad Organization responsible for truck bomb at US Embassy annex in Beirut; 23 killed.

(U) CYBER

Iranian Nationals Charged with Cyber Intrusion Campaign

- On 16 September, authorities charged Hooman Heidarian, 30, and Mehdi Farhadi, 34, with a coordinated cyber intrusion campaign, sometimes on behalf of Iran, targeting computer systems in New Jersey, unspecified locations in the United States, Europe, and the Middle East.
- Since 2013, Heidarian and Farhadi stole hundreds of terabytes of confidential communications pertaining to national security, foreign policy intelligence, non-military nuclear information, aerospace data, human rights

activist information, victim financial information and personally identifiable information, and intellectual property, including unpublished scientific research.

Seven Cyber Actors Charged in Connection with Global Intrusion Campaign

- On 16 September, a federal grand jury charged five APT41-affiliated Chinese computer hackers with computer intrusions affecting more than 100 companies worldwide, including software development companies, computer hardware manufacturers, telecommunications providers, social media companies, video game companies, non-profit organizations, universities, think tanks, pro-democratic activists in Hong Kong, and foreign governments.
- An additional indictment led to the arrest of Malaysian nationals Wong Ong Hua, 46, and Ling Yang Ching, 32, who conspired with two of the Chinese hackers to target the video game industry in the United States and abroad.
- A court-issued seizure warrant resulted in the recent seizure of hundreds of accounts, servers, domain names, and command and control "dead drop" web pages used by the defendants.

(U) COVID-19 INTERIM GUIDANCE

Disinfect and Clean Work Spaces

- Clean and disinfect all areas such as offices, bathrooms, common areas, shared electronic equipment routinely.

(U) NOTABLE ANNIVERSARY DATES

- 2016, United States: Authorities arrest Ahmad Khan Rahimi for pressure cooker bombings in New York and New Jersey that wounded 31 people; believed to be influenced by al-Qa'ida.
- 2008, Yemen: Attack on US Embassy Killed 18 and wounded 17; Jihad of Yemen and Al-Qa'ida affiliate claimed responsibility.
- 1992, Germany: Four Iranian Kurds killed in Berlin's Mykonos restaurant.

Subject: (U) LACoDPH News Release: Public Health Reports 47 New Deaths and 474 New Positive Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 47 New Deaths and 474 New Positive Cases of Confirmed COVID-19 in Los Angeles County – Public Health Reminds Residents COVID-19 Testing is Available**, dated 15 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 47 new deaths and 474 new cases of confirmed COVID-19. The lower number of new cases, in part, reflect reduced testing due to wildfire smoke and recent extreme weather.

(U) Public Health reminds residents that testing capacity across the County remains high and appointments are available. Testing is also widely available within the provider community.

(U) If you have symptoms or think you were exposed to someone with COVID-19, you should get tested. You should also get tested if you were in a crowd or gathering where people were close together and not wearing face coverings and/or keeping their distance.

(U) For more information about getting tested, visit covid19.lacounty.gov/testing or call the County's 2-1-1 information line. Those without a regular provider are encouraged to call 2-1-1 for assistance. Residents who have a regular source of healthcare can contact their healthcare provider if they need to be tested for COVID-19.

(U) It is important to know if you are positive because you can transmit the virus without knowing you are infected. Younger people could unknowingly spread the disease to older and more vulnerable people with underlying health conditions who can suffer more severe illness. Ninety-two percent of the people who died from COVID-19 had underlying health conditions.

(U) To date, Public Health has identified 255,049 positive cases of COVID-19 across all areas of L.A. County, and 6,273 total deaths. Nearly 70% of all cases have occurred in people under the age of 50.

(U) Of the 47 new deaths reported today, 18 people that passed away were over the age of 80 years old, 17 people who died were between the ages of 65 and 79 years old, seven people who died were between the ages of 50 and 64 years old, three people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Thirty-six people who died had underlying health conditions including 13 people over the age of 80, 13 people between the ages of 65 and 79 years old, seven people between the ages of 50 and 64 years old, two people between the ages of 30 and 49 years old, and one person between the ages of 18 and 29 years old. One death was reported by the City of Pasadena.

Subject: (U) LACoDPH News Release: Public Health Highlights Actions that have a Ripple Effect on all County Residents - 24 New Deaths and 733 New Positive Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Highlights Actions that have a Ripple Effect on all County Residents - 24 New Deaths and 733 New Positive Cases of Confirmed COVID-19 in Los Angeles County**, dated 14 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 24 new deaths and 733 new cases of confirmed COVID-19. The lower number of cases today reflect a weekend reporting lag and reduced testing due to poor air quality.

(U) Actions that increase transmission and actions that decrease transmission of COVID-19 have a ripple effect among all County residents. As a result of the Safer at Home Order, when people were asked to stay home unless they needed to access essential services and when schools and many businesses were closed for in-person services, the number of cases remained fairly steady at 1,000 or less new cases per day.

(U) As recreational activities and businesses reopened, starting May 8, and as people were exposed to more non-household members when out, whether at work, while shopping, while protesting, and/or while celebrating Memorial Day and Independence Day, the County saw cases, and as a result hospitalizations and deaths, increase and spike in an alarming manner in mid-July.

(U) After re-closing some businesses, and moving other business operations outdoors, the County's case numbers decreased significantly, and we are back to consistently slowing the spread.

(U) To date, Public Health has identified 254,656 positive cases of COVID-19 across all areas of L.A. County, and a total of 6,231 deaths.

(U) Currently, there are 775 confirmed cases currently hospitalized and 35% of these people are confirmed cases in the ICU. Throughout this pandemic thousands of people have had long hospital stays and many more have become sick and may still be feeling the effects of their sickness weeks or even months later.

(U) Over the next six weeks, Public Health will be working with schools across the County that are re-opening for services to a limited number of cohorted students with high need for in-person support. To date, Public Health has received 59 applications from schools to reopen. Public Health will be posting, weekly, the list of schools who have submitted applications, and schools can expect that our public team of specialists will be in touch to provide technical assistance.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC) Notification: LASD Deputies Ambushed in Unprovoked Attack**, dated 14 September 2020.

(U) On 12 September 2020 at 1858 PDT, a gunman ambushed two LASD deputies who were sitting in their parked patrol vehicle at the MLK Transit Center in Compton. The suspect, only identified as a 28-30 year-old Black male, approached from behind and fired a handgun multiple times at the deputies through the passenger window, striking both.

(U) The critically wounded deputies, assigned to the department's Transit Services Bureau, include a 31-year-old female deputy who was shot in the jaw and arms, and a 24-year-old male deputy who was struck by gunfire in the forehead, arm, and hand. Both are hospitalized in stable condition.

(U) On the evening of 12 September, demonstrators gathered outside St. Francis Medical Center, where doctors treated the deputies, and blocked hospital emergency routes and chanted anti-police sentiments, including "we hope they die."

(U) The Los Angeles County Board of Supervisors is offering a $100,000 reward for information leading to the arrest and conviction of the suspect.

Subject: (U) LACoDPH News Release: Public Health Reports 43 New Deaths and 1,115 New Positive Cases of Confirmed COVID-19 in Los Angeles County; New MIS-C Cases in Children Confirmed

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 43 New Deaths and 1,115 New Positive Cases of Confirmed COVID-19 in Los Angeles County; New MIS-C Cases in Children Confirmed**, dated 11 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 43 new deaths and 1,115 new cases of confirmed COVID-19. To date, Public Health has identified 252,066 positive cases of COVID-19 across all areas of L.A. County, and a total of 6,171 deaths.

(U) The number of daily hospitalizations continues to decline. There are 889 confirmed cases currently hospitalized and 33% of these people are confirmed cases in the ICU. Similar to the numbers seen in early April, daily hospitalizations have dropped back to an average of under 1,000 hospitalizations a day.

(U) Public Health also reports three new cases of multisystem inflammatory syndrome in children (MIS-C). This brings the total number of MIS-C case in L.A. County to 34 children.

(U) All 34 children with MIS-C in L.A. County were hospitalized and 45% of the children were treated in the ICU. Twenty-seven percent of these cases were between the ages of 0 and 4 years old, 38% were between the ages of 5 and 11 years old, and 35% were between the ages of 12 and 20 years old. Latino/Latinx children continue to make up the majority of cases accounting for 71% of all cases. There have been no reported deaths in children with MIS-C in LA County.

(U) Of the 43 new deaths reported today (excluding Long Beach and Pasadena), 18 people that passed away were over the age of 80, 12 people who died were between the ages of 65 and 79 years old, eight people who died were between the ages of 50 and 64 years old, one person who died was between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Thirty people had underlying health conditions including 14 people over the age of 80 years old, nine people between the ages of 65 and 79 years old, five people between the ages of 50 and 64 years old, one person between the ages of 30 and 49, and one person between the ages of 18 to 29 years old. Three deaths were reported by the City of Long Beach.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 5,806 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 23% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

Subject: (U) LACoDPH News Release: Public Health Recommends Testing for Individuals Possibly Exposed to COVID-19 and Closely Monitors Data After Labor Day Weekend - 61 New Deaths and 671 New Positive Cases

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Recommends Testing for Individuals Possibly Exposed to COVID-19 and Closely Monitors Data After Labor Day Weekend - 61 New Deaths and 671 New Positive Cases of Confirmed COVID-19 In Los Angeles County**, dated 9 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 61 new deaths and 671 new cases of confirmed COVID-19. The high number of new deaths are from a backlog of reports received from over the weekend, and the low number of new cases reflect reduced testing due to the excessive heat.

(U) Public Health is carefully monitoring data over the next couple of weeks to see the impact of the holiday weekend on the transmission of the virus across County communities and recommends testing for individuals possibly exposed to COVID-19.

(U) If you were potentially exposed to COVID-19 over the holiday weekend, you are encouraged to get tested. For example, if you were in a crowded area this weekend and people were not wearing cloth face coverings, you should get tested. If you were around someone who was feeling sick, you should get tested. And if you were with someone who has tested positive for the virus, even if they never felt sick, you should get tested. Testing sites are open and appointments are available.

(U) Just over two weeks after Independence Day, the County experienced increases in cases, hospitalizations and deaths. For example, the 7-day average of daily reported COVID-19 cases around July 4 was about 2,200 cases per day, but two weeks later the number of new cases increased to over 3,100. In July, the County saw the steepest increases in hospitalizations, where the average was over 2100 hospitalizations per day; the most significant peaks were two to three weeks after the July 4 holiday. This past month however, daily hospitalizations have dropped back to an average of under 1000 hospitalizations a day, similar to the numbers in early April. Currently, there are 936 people who are confirmed cases currently hospitalized and 33% of these people are in the ICU. The 7-day average of daily deaths before July 4 was around 30 deaths per day, and tragically, 22 days after the July 4 holiday, the number of deaths climbed up to 44 deaths per day.

(U) To date, Public Health has identified 249,859 positive cases of COVID-19 across all areas of L.A. County, and a total of 6,090 deaths. Testing results are available for nearly 2,393,000 individuals with 10% of all people testing positive.

(U) Of the 61 new deaths reported today (excluding Long Beach and Pasadena), 22 people that passed away were over the age of 80, 13 people who died were between the ages of 65 and 79 years old, 23 people who died were between the ages of 50 and 64 years old, and three people who died were between the ages of 30 and 49 years old. Forty-six people had underlying health conditions including 15 people over the age of 80 years old, 10 people between the ages of 65 and 79 years old, 19 people between the ages of 50 and 64 years old and two people between the ages of 30 and 49. Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 5,728 people (99 percent of the

cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 24% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 53 cases and seven deaths reported earlier were not L.A. County residents.

Subject: (U) LACoDPH News Release: Public Health Reports 7 New Deaths and 439 New Positive Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 7 New Deaths and 439 New Positive Cases of Confirmed COVID-19 in Los Angeles County**, dated 8 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 7 new deaths and 439 new cases of confirmed COVID-19. Today's low number of new cases and deaths reflect both a lag in reporting and less testing availability over the holiday.

(U) To date, Public Health has identified 249,241 positive cases of COVID-19 across all areas of L.A. County, and a total of 6,036 deaths.

(U) There are 942 people who are confirmed cases currently hospitalized and 33% of these people are in the ICU. Testing results are available for more than 2,385,000 individuals with 10% of all people testing positive.

(U) Of the seven new deaths reported today, three people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, one person who died was between the ages of 65 and 79 years old, and three people who died were between the ages of 50 and 64 years old. All seven people had underlying health conditions.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 5,677 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 24% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 19 cases and one death reported earlier were not L.A. County residents.

(U) Because the current combination of fire, smoke, and the high temperatures create conditions that are unhealthy, Public Health urges all individuals in impacted areas to avoid unnecessary outdoor exposure and to limit physical exertion and to also try to keep indoor air as clean as possible by keeping windows and doors closed as much as possible. If it is too hot during the day to keep doors or windows closed and you do not have an air conditioning unit that re-circulates indoor air, consider going to an air-conditioned place, such as a cooling center.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: As COVID-19 Hospitalizations Decrease, Public Health Continues to Monitor for MIS-C - 47 New Deaths and 1,439 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: As COVID-19 Hospitalizations Decrease, Public Health Continues to Monitor for MIS-C - 47 New Deaths and 1,439 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 4 September 2020.

(U) As COVID-19 hospitalizations continues to decline, the Los Angeles County Department of Public Health (Public Health) reports three additional cases of multisystem inflammatory syndrome in children (MIS-C). This brings the total cases of MIS-C in L.A. County to 31 children.

(U) All of the 31 children with MIS-C in L.A. County were hospitalized and nearly half of the children treated in the ICU. Twenty-six percent of these cases were between the ages of 0 and 5 years old, 39% were between the ages of 6 and 12 years old, and 35% were between the ages of 13 and 20 years old. Latino/Latinx children continue to make up the majority of cases accounting for 71% of all cases. There continues to be no reported deaths in children with MIS-C in LA County.

(U) Parents and guardians are urged to contact their child's primary care provider if they believe their child is displaying MIS-C symptoms, - inflamed body parts, including the heart, lungs, kidneys, brain, skin, eyes, or gastrointestinal organs. If they do not have a primary care provider, dial 2-1-1 and L.A. County will help connect them to one.

(U) The County continues to see significant reductions in the number of people positive for COVID-19 that are hospitalized. Currently, there are 992 people who are confirmed cases currently hospitalized and 30% of these people are in the ICU. This is more than a 50% decrease from the over 2,000 COVID-19 patients hospitalized in early August.

(U) Today, Public Health confirms 47 new deaths and 1,439 new cases of COVID-19. To date, Public Health has identified 246,407 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,977 deaths.

(U) Of the 47 new deaths reported today, 14 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 16 people who died were between the ages of 65 and 79 years old, 11 people who died were between the ages of 50 and 64 years old, and four people who died were between the ages of 30 and 49 years old. Twenty-nine people had underlying health conditions including nine people over the age of 80 years old, 10 people between the ages of 65 and 79 years old, six people between the ages of 50 and 64 years old, and four people between the ages of 30 and 49 years old. One death was reported by the City of Long Beach and one death was reported by the City of Pasadena.

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC) Threat Assessment: No Specific, Credible Threats to JRIC AOR for 19th Anniversary of 9-11**, dated 4 September 2020.

(U//FOUO) The Joint Regional Intelligence Center has not identified any specific, credible threats related to the 19th anniversary of the 9/11 attacks within its area of responsibility. However, the JRIC assesses a heightened threat environment due to a confluence of significant circumstances, including the upcoming US presidential election, polarized US political climate, nationwide protests, and negative socioeconomic impacts of the ongoing COVID-19 pandemic. A variety of foreign and domestic threat actors likely seek to exploit this environment.

Subject: (U) LACoDPH News Release: Public Health Highlights the Importance of Worker Protections and Reporting Workplace Outbreaks of COVID-19 - Public Health Reports 61 New Deaths and 1,193 New Cases

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Highlights the Importance of Worker Protections and Reporting Workplace Outbreaks of COVID-19 - Public Health Reports 61 New Deaths and 1,193 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 3 September 2020.

(U) As 61 new deaths and 1,193 new cases of COVID-19 are reported, the Los Angeles County Department of Public Health (Public Health) highlights the importance of worker protections and reporting workplace outbreaks. Supporting worksites experiencing outbreaks are a crucial part of slowing the spread of COIVD-19 and protecting the health of communities.

(U) In July, the County experienced sharp increases in cases, hospitalizations and deaths due to the reopening of many sectors and holiday-related activities. Not surprisingly, this led to increases in outbreaks at workplaces, which spiked the week of July 13, nine days after Independence Day on July 4.

(U) People can pass this infection two days before having symptoms if they have symptoms at all. People that became infected with COVID-19 during this time likely and unknowingly exposed their coworkers when they went to work, which contributed to the spike in workplace outbreaks. Businesses must follow the critical infection control protocols in place to decrease the risk of transmission in their workplace.

(U) To date, Public Health has identified 244,999 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,932 deaths.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 5,576 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 24% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 129 cases and seven deaths reported earlier were not LA County residents.

(U) Of the 61 new deaths reported today, 23 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 17 people who died were between the ages of 65 and 79 years old, eight people who died were between the ages of 50 and 64 years old, two people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Thirty-six people had underlying health conditions including 15 people over the age of 80 years old, 14 people between the ages of 65 and 79 years old, four people between the ages of 50 and 64 years old, two people between the ages of 30 and 49 years old, and one person between the ages of 18 and 29 years old. Five deaths were reported by the City of Long Beach and five deaths were reported by the City of Pasadena.

Subject: (U) LACoDPH News Release: Public Health Revises Health Officer Order to Allow Schools K-12 to Offer Services for Students Most in Need; Reports 51 New Deaths and 1,457 New Positive Cases

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Revises Health Officer Order to Allow Schools K-12 to Offer Services for Students Most in Need of In-Person Learning; Reports 51 New Deaths and 1,457 New Positive Cases of Confirmed COVID-19 In Los Angeles County**, dated 2 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health), in consultation with the Board of Supervisors, has revised the Health Officer Order to allow for limited, on-campus operation for schools in L.A. County, as well as limited in-door operations of Hair Salons and Barbershops.

(U) Beginning Monday, September 14, schools K-12 may offer in-school services for small cohorts of students with Individualized Education Plans (IEP), students requiring instruction for English as a Second Language (ESL) or students needing assessments or specialized in-school services, as long as the school is able to fully implement the Health Officer's re-opening protocols.

(U) Public Health will not be opening the waiver program for instruction of students in grades TK-6 as the department monitors the implementation of this effort to safely get students needing specialized in-school services back to school.

(U) Hair salons and barbershops can re-open for indoor services at 25% occupancy provided they are in full compliance with the Health Officer's protocols. The Order encourages these businesses to continue outdoor operations when possible, and to offer in-door operations for those services that cannot be provided outdoors. This Order is in effect beginning immediately.

(U) All other current restrictions remain unchanged at this time.

(U) Today, Public Health has confirmed 51 new deaths and 1,457 new cases of confirmed COVID-19. This brings the cumulative number of positive cases of COVID-19 across all areas of L.A. County to 243,935, and a total of 5,878 deaths. There are currently 1,048 hospitalized, of which 31% are confirmed cases in the ICU. Upon further investigation, 43 cases and two deaths reported earlier were not L.A. County residents.

(U) Of the 50 new deaths reported today (excluding Long Beach and Pasadena), 22 people that passed away were over the age of 80, 15 people who died were between the ages of 65 and 79 years old, eight people who died were between the ages of 50 and 64 years old, three people that passed away were between the ages of 30 and 49 years old and two people that passed away were between the ages of 18 and 29 years old. Thirty-four people had underlying health conditions including 17 people that passed away were over the age of 80, 10 people who died were between the ages of 65 and 79 years old, six people who died were between the ages of 50 and 64 years old and one person that passed away was between the ages of 30 and 49 years old.

Subject: (U) LACoDPH News Release: Public Health Reminds Residents of the Risks from Gathering with People from Outside Your Household: Reports 45 New Deaths and 840 New Positive Cases of Confirmed COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reminds Residents of the Risks from Gathering with People from Outside Your Household: Reports 45 New Deaths and 840 New Positive Cases of Confirmed COVID-19 In Los Angeles County**, dated 1 September 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 45 new deaths and 840 new cases of confirmed COVID-19. The 7-day average of new cases is just under 1,300, which has declined steadily over the past month.

(U) Younger residents continue to make up the majority of positive new cases. Of the new cases reported today, 70% are of people under the age of 50 years old. Residents between the ages of 30 and 49 years old have the highest number of new cases among all age groups in LA County, 35% of new cases today. Children under the age of 11 years old represent 6% of new cases today.

(U) There continues to be widespread transmission of the virus in L.A. County, which is why it is important not to gather with people who aren't part of your household as it puts you at a greater risk for COVID-19. It is still safest to stay at home and avoid gatherings, even if everyone present is taking precautions.

(U) To date, Public Health has identified 242,521 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,829 deaths. There are currently 1,057 hospitalized, of which 33% are confirmed cases in the ICU. Upon further investigation, 87 cases reported earlier were not L.A. County residents.

(U) Of the 45 new deaths reported today (excluding Long Beach and Pasadena), 16 people that passed away were over the age of 80, 17 people who died were between the ages of 65 and 79 years old, 11 people who died were between the ages of 50 and 64 years old and one person who died was between the ages of 30 and 49 years old. Forty people had underlying health conditions including 14 people over the age of 80 years old, 16 people between the ages of 65 and 79 years old, nine people between the ages of 50 and 64 years old and one person between the ages of 30 and 49.

Subject: (U) LACoDPH News Release: Public Health Urges Residents to Plan for a Safe Labor Day Weekend – Reports 16 New Deaths and 1,022 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Urges Residents to Plan for a Safe Labor Day Weekend – Reports 16 New Deaths and 1,022 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 31 August 2020.

(U) While optimistic about the current community transmission data we are seeing, the Los Angeles County Department of Public Health (Public Health) is preparing for a holiday weekend and warning the public to heed the lessons learned from the spike in cases, hospitalizations and deaths that occurred after the previous holidays.

(U) Increases in cases and hospitalizations occurred within a few weeks of the Memorial Day and July 4th holidays. In order to continue our recovery journey, it's important to utilize the tools that we have and adhere to physical distancing and infection control requirements that reduce the risk of transmission of COVID-19.

(U) L.A. County has made encouraging progress in all the key indicators the past month. The percent of positive tests is a good indicator of how we are doing at slowing the spread of the virus. A month ago, on July 31, the 7-day test positivity rate was 8.6%. Today, the 7-day positivity rate is 4.7%, a decrease of 45% in one month. In that same period, the county's daily hospitalizations decreased by 48%, from 2,220 on July 31 to 1,043 today. The 7-day average of new cases has also declined steadily over the past month. On July 31 the 7-day average of new cases was 2,883 and today that number is 1,309, a decrease of 55%.

(U) Today, Public Health has confirmed 16 new deaths and 1,022 new cases of COVID-19. To date, Public Health has identified 241,768 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,784 deaths. Upon further investigation, three cases and one death reported earlier were not LA County residents.

(U) Of the 16 new deaths reported today, eight people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, two people who died were between the ages of 65 and 79 years old, four people who died were between the ages of 50 and 64 years old, and two people who died were between the ages of 30 and 49 years old. Eleven people had underlying health conditions including seven people over the age of 80 years old, two people between the ages of 65 and 79 years old, one person between the ages of 50 and 64 years old, and one person between the ages of 30 and 49 years old.

(U) Ninety-three percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 5,443 people (99 percent of the cases reported by Public Health); 51% of deaths occurred among Latino/Latinx residents, 24% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

(U) On Friday, the state announced a new tiered framework to capture more easily the extent of community transmission in counties across the state and will use this tiered system to guide possible sector re-openings for each county to consider. However, the ultimate decisions about sector re-openings will remain under the purview of the local Health Officer Orders that are developed in consultation with our Board of Supervisors. LA County is currently

in Tier 1, meaning that there continues to be widespread transmission of the virus in the county. The current number of new cases per day per 100,000 people is 13.1, nearly double the threshold for this tier which is less than 7 new cases per day per 100,000 population. And even though L.A. County's current test positivity rate of 5% puts us in Tier 2 (Red) for this metric, when the two metrics fall in different tiers the state places counties in the most restrictive tier; hence, L.A. County, like most counties in California, has been placed in Tier 1. Our path forward for recovery depends on us being able to reduce community transmission significantly so children and teachers can get back to their classrooms and more people can get back to their jobs with as much safety as possible.

Subject: (U) LACoDPH News Release: Public Health Reports an Increase in MIS-C Cases in LA County Children and 31 New Deaths and 1,509 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports an Increase in MIS-C Cases in LA County Children and 31 New Deaths and 1,509 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 28 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) is reporting three additional cases of multisystem inflammatory syndrome in children (MIS-C). This brings the total cases of MIS-C in L.A. County to 28 children.

(U) MIS-C affects children under 21 years old who may have been exposed to COVID-19 or had COVID-19. Different body parts can become inflamed, including the heart, lungs, kidneys, brain, skin, eyes, or gastrointestinal organs and there can be lifelong health impacts.

(U) Twenty-eight percent of these cases were between the ages of 0 and 5 years old, 39% were between the ages of 6 and 12 years old, and 32% were between the ages of 13 and 20 years old. The majority of cases (71%) were Latino/Latinx.

(U) There continue to be no reports of deaths in children associated with MIS-C in L.A. County. If you believe your child may be displaying MIS-C symptoms, contact your primary care provider. If you do not have a primary care provider, dial 2-1-1 and LA County will help connect you to one.

(U) Public Health advises physicians to consider for MIS-C in patient children under 21 years old and to notify the department immediately of any cases.

(U) Earlier today, the State revised their recovery roadmap and created an updated Tier Framework that classifies each California County based on their daily case rate and positivity rate. L.A. County has been placed in Tier 1 (purple) based on our average daily case rate for the prior two weeks of 13.1 new cases per 100,000 residents. Tier 1 is characterized by widespread community transmission. Although the State today revised slightly the list of permitted activities in Tier 1 to allow for the re-opening of both hair salons for indoor services and indoor shopping centers for permitted retail establishments, the County Health Officer Order has not been changed to permit these re-openings. As such, since County orders may be more restrictive than State guidance, all current restrictions remain in place until the Los Angeles County Department of Public Health and the Board of Supervisors have an opportunity to review the suggested guidance from the State and take actions that are appropriate for our County. Today, Public Health has confirmed 31 new deaths and 1,509 new cases of COVID-19. Of the new cases reported by Public Health today (excluding Long Beach and Pasadena), more than 68% occurred in people 49 years old or younger.

(U) To date, Public Health has identified 238,458 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,732 deaths. Upon further investigation, 37 cases reported earlier were not LA County residents.

(U) There are 1,168 people with confirmed cases of COVID-19 currently hospitalized and 32% of these people are confirmed cases in the ICU. This is the third straight day of daily hospitalizations under 1,200.

Subject: (U) LACoDPH News Release: Public Health Reports 38 New Deaths and 1,636 New Cases of Confirmed COVID-19 In Los Angeles County – Public Health Offers Guidance to Peaceful Protestors

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 38 New Deaths and 1,636 New Cases of Confirmed COVID-19 In Los Angeles County – Public Health Offers Guidance to Peaceful Protestors**, dated 27 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 38 new deaths and 1,636 new cases of confirmed COVID-19. The number of new cases reported today include a backlog of 280 test results received from the State.

(U) To date, Public Health identified 236,986 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,701 deaths. Nearly 65% of all cases reported by Public Health have occurred among people 49 years old and younger.

(U) There are 1,168 people with confirmed cases of COVID-19 currently hospitalized and 32% of these people are confirmed cases in the ICU. A month ago, the County was seeing over 2,000 daily hospitalizations regularly.

(U) Public Health joins the many voices who are coming together in anger, frustration and protest against racism and violence. Public Health acknowledges the observance of the 50th Anniversary of the Chicano Moratorium, recognized as a national day of resistance against racism, sexism, imperialism, and fascism, with a focus this year on environmental and racial injustices.

(U) There are many ways to observe the 50th Anniversary while avoiding gatherings and adhering to Public Health guidelines. However, for residents that plan on attending peaceful protests, please be aware of the elevated risks that come when people of different households gather during this pandemic, even when they are outdoors. Protests can inadvertently result in transmission of COVID-19, including from people who are asymptomatic and have no idea that they are positive for the virus. If you unknowingly become infected, you may infect other people in your life, including people who are older or who have underlying health conditions that put them at far greater risk of becoming seriously ill and dying from COVID-19.

(U) If you plan to attend a protest, please follow these guidelines:

- (U) Stay home if you are feeling sick. Seek medical attention as needed if you have symptoms for COVID-19, and be tested for the virus – testing is widely available across LA County.
- (U) If you are not sick and plan to attend a peaceful protest, wear a face covering over both your nose and mouth at all times and keep your physical distance, staying more than 3 steps away from anyone who is not from your household. Consider wearing eye protection. Encourage other attendees to do the same.
- (U) Keep your hands clean before, during, and after the protests. Bring hand sanitizer or frequently wash your hands.
- (U) If you think you have been exposed to COVID-19 during a protest, it is very important that you quarantine for 14 days and stay away from all other people, especially those at greater risk of becoming seriously ill from COVID-19. More guidance for attending protests is available online at: www.publichealth.lacounty.gov/media/Coronavirus/.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U//FOUO) California STAS Bulletin: COVID-19 Impacts to Wildland Fire Preparedness Likely to Negatively Affect Public Safety Agencies into the 2021 Fire Year

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

Attachment Link(s):

- 200827 FOUO STAS Bulletin - COVID-19 Impacts to Wildland Fire Preparedness Likely to Negatively Affect Public Safety Agencies into the 2021 Fire Year.pdf (6 pages)

Link(s) will expire on 9/9/2020

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) California State Threat Assessment System (STAS) Bulletin: COVID-19 Impacts to Wildland Fire Preparedness Likely to Negatively Affect Public Safety Agencies into the 2021 Fire Year,** dated 27 August 2020.

(U//FOUO) COVID-19-related financial, logistical, and operational impacts on federal, state, and local public safety and land management agencies and initiatives are complicating wildland and local fire prevention and response efforts during the current 2020 fire year; these cumulative impacts are likely to extend into the 2021 fire year. State and local budget reallocations, deferred or discontinued preventative vegetation management work by government land management agencies and private landowners, and physical measures necessary to limit transmission and spread of COVID-19 are creating detrimental conditions for prevention, response, evacuation, and shelter needs.

(U//FOUO) Fire forecasts, burn rates for the year, and active incidents indicate California is on track for one of its most active wildfire years, hampered by COVID-19-related postponement of prescribed burns, multi-agency wildfire drills and training, mitigation inspections, home hardening programs, and community awareness training. Drought; lightning strikes; human ignitors such as illegal fireworks, recreational/transient campfire escapes, and serial arsons; and renewed terrorist calls to use fire as a weapon present potential increases to fire risk. Budget cuts, staffing shortages, and virus-prevention measures further complicate planning and response for local fire and law enforcement agencies, as well as shelter authorities. All of these conditions will likely impact fire prevention and response operations into the 2021 fire year, as the duration of the pandemic extends.

(U) **WARNING**: This document is the exclusive property of the California State Threat Assessment System (STAS) and is **UNCLASSIFIED//FOR OFFICIAL USE ONLY (U//FOUO)**. Subject: (U) LACoDPH News Release: Public Health Reports 58 New Deaths and 1,642 New Cases of Confirmed COVID-19 In Los Angeles County - School Waiver Process Not Opening at this Time

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 58 New Deaths and 1,642 New Cases of Confirmed COVID-19 In Los Angeles County - School Waiver Process Not Opening at this Time**, dated 26 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 58 new deaths and 1,642 new cases of confirmed COVID-19. To date, Public Health identified 235,386 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,663 deaths.

(U) The state is monitoring all counties to determine their progress in slowing the spread of COVID-19. L.A. County must stay below 100 cases per 100,000 people 14-day case rate thresholds for three consecutive days to be removed from the state's COVID-19 county monitoring list.

(U) Today, the 14-day case rate per 100,000 people for L.A. County is 198 cases per 100,000 residents, and we are grateful to see this number come down. We need to continue taking all the steps we have these past weeks so that community transmission rates are low enough for us to continue our recovery journey.

(U) At this point, the school waiver process will not be reopening for applications.

(U) Information regarding confirmed cases of COVID-19 among pregnant women is collected. To date, 1,200 pregnant women have tested positive for the virus and 79% of these women were symptomatic. Tragically, two women who were pregnant passed away from COVID-19. Among the 193 infants that were tested for COVID-19 at birth, eight tested positive for the virus and 185 tested negative.

(U) Public Health continues to survey skilled nursing facilities in the County on their compliance with mandated COVID-19 testing and on COVID-19 cases and outbreaks. All 341 skilled nursing facilities responded and provided information about testing and new cases for the week of August 9. From August 9 through August 15, testing was completed for 12,793 nursing home residents and for 21,581 staff. Out of the 341 facilities, 190 were classified as having an outbreak, and of these skilled nursing facilities 123 did not report any additional cases. One hundred and fifty-one facilities were classified as not having an outbreak, and 130 of these did not report any positive test results from this round of testing. The 21 skilled nursing facilities that reported one or more positive cases are required to test all their residents and staff to control any outbreak.

(U) There are 1,186 confirmed cases currently hospitalized and 32% of these people are confirmed cases in the ICU. The number of daily hospitalizations continues to decrease. Daily hospitalizations peaked to 2,200 patients in mid-July.

(U) Testing results are available for nearly 2,221,000 individuals with 10% of all people testing positive. Upon further investigation, 33 cases reported earlier were not L.A. County residents.

Subject: (U) LACoDPH News Release: Public Health Continues to See a Decline in New Cases - 51 New Deaths and 989 New Positive Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Continues to See a Decline in New Cases - 51 New Deaths and 989 New Positive Cases of Confirmed COVID-19 In Los Angeles County**, dated 25 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 51 new deaths and 989 new cases of confirmed COVID-19. This is the first time the number of reported new cases has been under 1,000 since the beginning of June. In mid to late July, the daily reported number of new cases was around 3,200 cases per day.

(U) To date, Public Health identified 233,777 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,605 deaths.

(U) The state is monitoring all counties on six indicators to determine their progress in slowing the spread of COVID-19. These indicators include testing capacity, how much transmission of the virus is happening in the community, how many people are currently hospitalized for COVID-19, and the capacity of hospitals to care for people with COVID-19 with adequate numbers of available Intensive Care Unit beds and ventilators. LA County is meeting five of the state's six indicators, only missing the mark on the threshold of having less than 100 cases per 100,000 residents. As of today, August 25, the case rate per 100,000 people is 196 cases per 100,000 residents.

(U) The Governor allowed local health officers the discretion to grant waivers to school districts and private schools that would permit schools to reopen for in-classroom instruction for students in grades TK through grade 6 once case rates were under 200 per 100,000 people.

(U) It is too early to tell if the County's 14-day case rate will remain below 200, especially given cases reported on Monday and Tuesday are typically lower than other days of the week. Public Health will continue to monitor the case rate reported by the State.

(U) Public Health is working to assess the new guidance issued today by the State to determine what additional adjustments may be needed before opening up the waiver process.

(U) Of the 51 new deaths reported today, 19 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 13 people who died were between the ages of 65 and 79 years old, nine people who died were between the ages of 50 and 64 years old, two people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Thirty-seven people had underlying health conditions including 13 people over the age of 80

years old, 14 people between the ages of 65 and 79 years old, eight people between the ages of 50 and 64 years old, and two people between the ages of 30 and 49 years old.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 5,277 people (99 percent of the cases reported by Public Health); 50% of deaths occurred among Latino/Latinx residents, 24% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 105 cases and four deaths reported earlier were not L.A. County residents.

(U) There are 1,200 confirmed cases currently hospitalized and 32% of these people are confirmed cases in the ICU.

(U) Testing results are available for nearly 2,207,000 individuals with 10% of all people testing positive.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Sees Signs of Progress in COVID-19 Key Indicators - 13 New Deaths and 1,198 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 24 August 2020.

(U) As 13 new deaths and 1,198 new cases of COVID-19 are confirmed, the Los Angeles County Department of Public Health (Public Health) sees signs of the spread of COVID-19 slowing in key indicators, including daily hospitalizations and deaths.

(U) Daily hospitalizations numbers have decreased by 45% from the peak of over 2,200 in mid-July. There are 1,219 confirmed cases currently hospitalized and 32% of these people are confirmed cases in the ICU. The decreasing number of daily hospitalizations is one of the best indicators as it is an accurate representation of how many people are currently seriously ill from the virus.

(U) To date, Public Health identified 232,893 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,558 deaths. In mid-July, the 7-day average of people passing away from COVID-19 was an average of 44 deaths per day. On August 16, the average number of deaths was at an average of 28 deaths per day. In mid to late July, the daily reported number of new cases was around 3,200 cases per day. As of August 22, the 7-day average is 1,400 daily reported new cases.

(U) Of the 13 new deaths reported today, nine people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, two people who died were between the ages of 65 and 79 years old, one person who died was between the ages of 50 and 64 years old, and one person who died was between the ages of 30 and 49 years old. Eleven people had underlying health conditions including eight people over the age of 80 years old, one person between the ages of 65 and 79 years old, one person between the ages of 50 and 64 years old, and one person between the ages of 30 and 49 years old.

(U) Public Health has a dedicated call line for any person with a positive lab result. If you are positive for COVID-19 and have not yet connected with a public health specialist, the department urges you to call 1-833-540-0473 to connect with a public health specialist who can provide information about services and support. Residents who do not have COVID-19 should continue to call 211 for resources or more information.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: Public Health Sees Increase in MIS-C Cases in L.A. County Children and 46 New Deaths and 1,759 New Cases of Confirmed COVID- 19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Sees Increase in MIS-C Cases in L.A. County Children and 46 New Deaths and 1,759 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 21 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) is reporting nine additional cases of multisystem inflammatory syndrome in children (MIS-C). This brings the total cases of MIS-C in L.A. County to 25 children.

(U) Twenty-eight percent of these cases were between the ages of 0 and 5 years old, 44% were between the ages of 6 and 12 years old, and 28% were between the ages of 13 and 20 years old. The majority of cases (68%) were Latino/Latinx.

(U) No children with MIS-C in L.A. County have died.

(U) MIS-C is a condition that affects children under 21 years old across the country who may have been exposed to COVID-19 or had COVID-19. Different body parts can become inflamed, including the heart, lungs, kidneys, brain, skin, eyes, or gastrointestinal organs and there can be lifelong health impacts.

(U) Public Health advises physicians to consider for MIS-C in patient children under 21 years old and to notify the department immediately of any cases.

(U) Today, Public Health has confirmed 46 new deaths and 1,759 new cases of COVID-19. Of the new cases reported by Public Health today (excluding Long Beach and Pasadena), 72% occurred in people under the age of 50 years old.

(U) To date, Public Health has identified 229,054 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,491 deaths. Testing results are available for nearly 2,154,000 individuals with 10% of all people testing positive.

(U) Of the 46 new deaths reported today, 18 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 15 people who died were between the ages of 65 and 79 years old, nine people who died were between the ages of 50 and 64 years old, two people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 29 years old. Thirty-five people had underlying health conditions including 14 people over the age of 80 years old, 13 people between the ages of 65 and 79 years old, six people between the ages of 50 and 64 years old, one person between the ages of 30 and 49 years old, and one person between the ages of 18 and 29 years old. One death was reported by the City of Long Beach.

(U) There are 1,347 confirmed cases currently hospitalized and 32% of these people are confirmed cases in the ICU.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: Hypertension and Diabetes are Most Common Underlying Health Conditions in COVID-19 Deaths - 57 New Deaths and 1,603 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Hypertension and Diabetes are Most Common Underlying Health Conditions in COVID-19 Deaths - 57 New Deaths and 1,603 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 20 August 2020.

(U) To date, the Los Angeles County Department of Public Health (Public Health) has identified 227,346 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,446 deaths.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Hypertension and diabetes are the most common underlying health conditions among people who died from COVID-19; neurologic conditions and cardiovascular disease is also common. Nearly 3,000 people had hypertension, more than 2,000 people had diabetes, 1,300 people had neurologic conditions, and 1,300 people had cardiovascular disease. Please note, each person may have multiple conditions. Although people over 65 years old make up the largest portion of people who died with underlying health conditions, younger people with underlying health conditions become seriously ill and die from the virus as well. Twenty-four percent or 1,145 number of people who died with underlying health conditions were between the ages of 41 and 64 years old, and 3% or 151 people, were between the ages of 18 and 40 years old.

(U) Today, Public Health has confirmed 57 new deaths and 1,603 new cases of COVID-19.

(U) Backlog cases from the state electronic lab report (ELR) are still anticipated. Data sources that track other key indicators, including hospitalizations and deaths, are not affected by this reporting issue.

(U) Of the 57 new deaths reported today, 20 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 19 people who died were between the ages of 65 and 79 years old, 11 people who died were between the ages of 50 and 64 years old, and three people who died were between the ages of 30 and 49 years old. Forty-five people had underlying health conditions including 18 people over the age of 80 years old, 16 people between the ages of 65 and 79 years old, nine people between the ages of 50 and 64 years old, and three people between the ages of 30 and 49 years old. Four death were reported by the City of Long Beach.

(U) Of those who died, information about race and ethnicity is available for 5,123 people (99 percent of the cases reported by Public Health); 50% of deaths occurred among Latino/Latinx residents, 24% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 84 cases and three deaths reported earlier were not LA County residents.

(U) There are 1,378 confirmed cases currently hospitalized and 31% of these people are confirmed cases in the ICU. The average length of stay for people who are hospitalized for COVID-19 has shown steady decline. In early May, the average length of stay was a little over 10 days. In late July, the average length of stay had decreased to a little over 5 days. This may reflect improvements in treatment and a shift in the age distribution of hospitalized patients, with an increase in younger individuals.

(U) Testing results are available for more than 2,136,000 individuals with 10% of all people testing positive.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: Public Health Reports 61 New Deaths and 1,956 New Cases of Confirmed COVID-19 in Los Angeles County - Data Shows Signs of Closing the Gap in Inequitable Health Outcomes

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 61 New Deaths and 1,956 New Cases of Confirmed COVID-19 in Los Angeles County - Data Shows Signs of Closing the Gap in Inequitable Health Outcomes**, dated 19 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 61 new deaths and 1,956 new cases of COVID-19. The number of new cases reported today include a backlog of 100 test results received from the State and a few hundred cases from a lab that delayed reporting yesterday.

(U) To date, Public Health has identified 225,827 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,392 deaths.

(U) Public Health still anticipates receiving backlog cases from the state electronic lab report (ELR). Data sources that track other key indicators, including hospitalizations and deaths, are not affected by this reporting issue.

(U) Public Health has increased the number of investigations for non-compliance of the Health Officer Order from 2,877 investigations in March to 9,683 investigations in July. To date, there have been investigations at almost 30,000 workplaces. In the month of April, 30 businesses were closed for violations of the Health Officer Order. This number has decreased to 23 businesses closed for the month of July. Even as more inspections occurred in July than in April, there were less closures because most businesses have come into compliance with Health Officer Order directives. Public Health is hopeful more businesses will continue to come into compliance.

(U) Of the 61 new deaths, 26 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 20 people who died were between the ages of 65 and 79 years old, six people who died were between the ages of 50 and 64 years old, and three people who died were between the ages of 30 and 49 years old, and one person who died was between the ages of 18 and 39 years old. Thirty-eight people had underlying health conditions including 17 people over the age of 80 years old, 14 people between the ages of 65 and 79 years old, four people between the ages of 50 and 64 years old, and three people between the ages of 30 and 49 years old. Five deaths were reported by the City of Long Beach.

(U) Testing results are available for more than 2,121,000 individuals with 10% of all people testing positive.

Subject: (U) LACoDPH News Release: Public Health Reports 64 New Deaths and 1,003 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 64 New Deaths and 1,003 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 18 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 64 new deaths and 1,003 new cases of COVID-19. The number of new cases reported today is missing lab reports from one of the larger labs which is contributing to the lower number of new cases.

(U) To date, Public Health has identified 224,031 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,335 deaths.

(U) Public Health still anticipates receiving backlog cases from the state electronic lab report (ELR). Data sources that track other key indicators, including hospitalizations and deaths, are not affected by this reporting issue.

(U) In the last month, daily hospitalizations have decreased by 37%, from 2,219 in mid-July to 1,388 in mid-August. There are 1,352 confirmed cases currently hospitalized and 32% of these people are confirmed cases in the ICU. The decreasing number of daily hospitalizations is one of the best indicators that our efforts over the last few weeks are working, as it is an accurate representation of how many people are currently seriously ill from the virus.

(U) Of the 64 new deaths, 21 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 24 people who died were between the ages of 65 and 79 years old, 13 people who died were between the ages of 50 and 64 years old, and six people who died were between the ages of 30 and 49 years old. Fifty people had underlying health conditions including 20 people over the age of 80 years old, 17 people between the ages of 65 and 79 years old, eight people between the ages of 50 and 64 years old, and five people between the ages of 30 and 49 years old. Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 5,022 people (99 percent of the cases reported by Public Health); 50% of deaths occurred among Latino/Latinx residents, 24% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 103 cases and two deaths reported earlier were not L.A. County residents.

(U) Testing results are available for more than 2,103,000 individuals with 10% of all people testing positive.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: LA County Continues to See Decreases and Stabilizing of Key Indicators - 19 New Deaths and 1,185 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: LA County Continues to See Decreases and Stabilizing of Key Indicators - 19 New Deaths and 1,185 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 17 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) continues seeing decreases and stabilizing of key indicators, including daily hospitalizations and deaths.

(U) There are 1,341 confirmed cases currently hospitalized and 33% of these people are confirmed cases in the ICU. In the last month, daily hospitalizations have decreased by 37%, from 2,219 in mid-July to 1,388 in mid-August.

(U) Today, Public Health reports 19 new deaths and 1,185 new cases of COVID-19. In late July, the average daily reported deaths was 43. Now, in mid-August, Public Health is seeing an average of 30 reported deaths per day.

(U) To date, Public Health identified 223,131 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,273 deaths. Upon further investigation, 24 cases reported earlier were not LA County residents.

(U) Public Health still anticipates receiving backlog cases from the state electronic lab report. Data sources that track other key indicators, including hospitalizations and deaths, are not affected by this reporting issue.

(U) Of the 19 new deaths, seven people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, five people who died were between the ages of 65 and 79 years old, four people who died were between the ages of 50 and 64 years old, two people who died were between the ages of 30 and 49 years old and one person who died was between the ages of 18 and 29 years old. Thirteen people had underlying health conditions including six people over the age of 80 years old, three people between the ages of 65 and 79 years old, two people between the ages of 50 and 64 years old, one person between the ages of 30 and 49 years old, and one person between the ages of 18 and 29 years old. Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 4,960 people (99 percent of the cases reported by Public Health); 50% of deaths occurred among Latino/Latinx residents, 24% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

(U) Testing results are available for more than 2,093,000 individuals with 10% of all people testing positive.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: Public Health Reports 45 New Deaths and 2,642 New Cases of Confirmed COVID-19 in Los Angeles County - L.A. County Continues to see Downward Trend of Daily Hospitalizations

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 45 New Deaths and 2,642 New Cases of Confirmed COVID-19 in Los Angeles County - L.A. County Continues to see Downward Trend of Daily Hospitalizations**, dated 14 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 45 new deaths and 2,642 new cases of COVID-19.

(U) The number of new cases reported today are not known to include many backlog numbers from the state's electronic lab report system (ELR), if any. However, they do include delayed reporting of a few hundred cases from yesterday. A backlog of cases from the state is still expected. Data sources that track other key indicators, including hospitalizations and deaths, are not affected by this reporting issue.

(U) There are 1,415 confirmed cases currently hospitalized and 33% of these people are confirmed cases in the ICU. Today, the 7-day average of daily hospitalizations is 1,521 patients. Two weeks ago, on July 31, daily hospitalizations averaged 2,026 patients. There has been a 25% reduction in the number daily hospitalized patients in just two weeks.

(U) To date, Public Health has identified 218,693 positive cases of COVID-19 across all areas of L.A. County, and 5,214 total deaths.

(U) Of the 45 new deaths reported today, 21 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 12 people who died were between the ages of 65 and 79 years old, nine people who died were between the ages of 50 and 64 years old, and two people who died were between the ages of 30 and 49 years old. Thirty-three people had underlying health conditions including 19 people over the age of 80 years old, nine people between the ages of 65 and 79 years old and 5 people between the ages of 50 and 64 years old. One death was reported by the City of Long Beach.

Subject: (U) LACoDPH News Release: Public Health Reports 64 New Deaths and 1,999 New Cases of Confirmed COVID-19 in Los Angeles County - COVID-19 Outbreak Investigations Continue Throughout LA County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 64 New Deaths and 1,999 New Cases of Confirmed COVID-19 in Los Angeles County - COVID-19 Outbreak Investigations Continue Throughout LA County**, dated 13 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 64 new deaths and 1,999 new cases of COVID-19. To date, Public Health has identified 216,139 positive cases of COVID-19 across all areas of L.A. County, and a total of 5,171 deaths.

(U)The number of new cases reported today includes about 300 backlog cases from the State. Additional backlog reporting of cases is expected later this week. Data sources that track other key indicators, including hospitalizations and deaths, are not affected by this reporting issue.

(U) Currently, there are 891 COVID-19 outbreak investigations ongoing, including outbreaks at UPS, Trojan Battery and SoFi Stadium. These three locations each have between 60 and 90 confirmed positive cases among employees. As a reminder, employers must report when three employees test positive for COVID-19. This allows Public Health to intervene early, investigate and contain the spread of this virus.

(U) The department has closed 550 outbreak investigations for a total of 1,441 outbreak investigations throughout this pandemic.

(U) Public Health continues to respond to high volume of Health Officer Order violation complaints and initiated nearly 32,000 investigations. Since March, Public Health investigated more than 20,000 restaurants, more than 4,700 grocery stores, and more than 3,600 other businesses.

Subject: (U) LACoDPH News Release: Younger People Continue to Drive New Infections; Colleges and Universities Must Continue Distance Learning - 58 New Deaths and 2,428 New Cases of Confirmed COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Younger People Continue to Drive New Infections; Colleges and Universities Must Continue Distance Learning - 58 New Deaths and 2,428 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 12 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) announced that Institutions of Higher Education (IHE) would need to limit campus activities in the near term, as community transmission rates remain high. These higher rates are driven, in part, by younger people between 18 to 30 years old who currently account for 25% to 30% of new infections.

(U) Today, Public Health has confirmed 58 new deaths and 2,428 new cases of COVID-19. Of the new cases reported by Public Health today (excluding Long Beach and Pasadena), 71% occurred in people under the age of 50 years old.

(U) The number of new cases reported today includes about 700 backlog cases from the State. We anticipate receiving additional backlog cases later this week. Data sources that track other key indicators, including hospitalizations and deaths, are not affected by this reporting issue.

(U) There are 1,538 confirmed cases currently hospitalized and 32% of these people are confirmed cases in the ICU. Between March and July, adults ranging in age from 30 to 65 years old have made up the majority of hospitalized cases, with people in these age groups accounting for about 50% of all hospitalized cases.

(U) Of the 58 new deaths reported today, 19 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 24 people who died were between the ages of 65 and 79 years old, 11 people who died were between the ages of 50 and 64 years old, and three people who died were between the ages of 30 and 49 years old. Forty-five people had underlying health conditions including 16 people over the age of 80 years old, 17 people between the ages of 65 and 79 years old, nine people between the ages of 50 and 64 years old, and three people between the ages of 30 and 49 years old. One death was reported by the City of Long Beach.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 4,801 people (99 percent of the cases reported by Public Health); 50% of deaths occurred among Latino/Latinx residents, 24% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among

Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 39 cases and six deaths reported earlier were not LA County residents.

Subject: (U) LACoDPH News Release: LA County Reaches Somber Milestone of over 5,000 COVID-19 Deaths as Crisis Response Continues - 63 New Deaths and 1,440 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Reaches Somber Milestone of over 5,000 COVID-19 Deaths as Crisis Response Continues - 63 New Deaths and 1,440 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 11 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has reported more than 5,000 confirmed COVID-19 deaths in Los Angeles County. To date, Public Health has identified 211,808 positive cases of COVID-19 across all areas of L.A. County, and 5,057 total deaths.

(U) Today, Public Health has confirmed 63 new deaths and 1,440 new cases of COVID-19. The number of new cases reported today is missing lab reports from one of the larger labs, which is contributing to the lower number of new cases.

(U) Today's numbers do not include backlog numbers. The State indicated that a backlog of lab reports for L.A County from the State electronic laboratory system (ELR) should be reconciled this week. Data sources that track other key indicators, including hospitalizations and deaths, are not affected by this reporting issue.

(U) There are 1,524 confirmed cases currently hospitalized and 32% of these people are confirmed cases in the ICU. Daily hospitalizations were over 2,000 patients a month ago.

(U) Of the 63 new deaths, 31 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 16 people who died were between the ages of 65 and 79 years old, 13 people who died were between the ages of 50 and 64 years old, and one person who died was between the ages of 18 and 29 years old. Fifty-five people had underlying health conditions including 27 people over the age of 80 years old, 15 people between the ages of 65 and 79 years old, 12 people between the ages of 50 and 64 years old, and one person between the ages of 18 and 29 years old. Two deaths were reported by the City of Long Beach

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 4,746 people (99 percent of the cases reported by Public Health); 49% of deaths occurred among Latino/Latinx residents, 24% among White residents, 15% among Asian residents, 10% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 56 cases and 2 deaths reported earlier were not LA County residents.

Subject: (U) LACoDPH News Release: LA County Sees Signs of Stability in Key Indicators as COVID-19 Response Continues - 19 New Deaths and 1,920 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Sees Signs of Stability in Key Indicators as COVID-19 Response Continues - 19 New Deaths and 1,920 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 10 August 2020.

(U) As 19 new deaths and 1,920 new cases of COVID-19 are confirmed, the Los Angeles County Department of Public Health (Public Health) is seeing signs of stability in key indicators, including daily hospitalizations and deaths.

(U) There are 1,514 confirmed cases currently hospitalized and 31% of these people are confirmed cases in the ICU. Nearly a month ago the County was averaging about 2,040 daily hospitalizations. Towards the middle of July, this number was up to 2,200 daily hospitalizations. This is significant progress in the number of confirmed cases currently hospitalized daily.

(U) To date, Public Health identified 210,424 positive cases of COVID-19 across all areas of L.A. County, and a total of 4,996 deaths. Deaths in the county have declined, and today L.A. County represents less than half of all deaths in the State. For a long period, L.A. County accounted for slightly more than half the deaths statewide. Deaths remain stable at an average of 37 new deaths per day over the last two weeks.

(U) Today's numbers do not include backlog numbers; the State has indicated that the backlog of lab reports for L.A County from the State electronic laboratory system (ELR) should be sent shortly. Data sources that track other key indicators, including hospitalizations and deaths, were not affected by this reporting issue.

(U) Testing results are available for more than 1,952,000 individuals with 10% of all people testing positive. The 7-day average positivity rate has remained mostly flat over the month of July, hovering just under 9%. There was a slight increase to 9.5% towards the end of July. However, the department is currently seeing a positivity rate of 7.3%. Please note, this rate may be adjusted depending on how the state reporting issues will affect this metric.

(U) Public Health continues to plan for the beginning of another school year that will restart virtual learning for students in TK-12. In-person learning isn't allowed until the County's case rate declines to 200 cases per 100,000 population. Los Angeles County's case rate currently is 355 per 100,000.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: Public Health Reports 53 New Deaths and 3,116 New Cases of Confirmed COVID-19 in Los Angeles County – Daily Hospitalizations Data Showing Downward Trend

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 53 New Deaths and 3,116 New Cases of Confirmed COVID-19 in Los Angeles County – Daily Hospitalizations Data Showing Downward Trend**, dated 7 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 53 new deaths and 3,116 new cases of COVID-19.

(U) Public Health anticipates a continued reporting of a backlog of cases as the State electronic laboratory system (ELR) reporting delay is addressed. Data sources that track other key indicators, including hospitalizations and deaths, are not affected by this reporting issue.

(U) There are 1,680 confirmed cases currently hospitalized and 30% of these people are confirmed cases in the ICU. Currently, the County is seeing a downward trend in the number of daily hospitalizations. Last week, we reported more than 2,000 daily hospitalizations.

(U) To date, Public Health identified 204,167 positive cases of COVID-19 across all areas of L.A. County, and a total of 4,918 deaths.

(U) Testing results are available for more than 1,893,000 individuals with 10% of all people testing positive.

(U) Of the 53 new deaths, 21 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 18 people who died were between the ages of 65 and 79 years old, 11 people who died were between the ages of 50 and 64 years old, and three people who died was between the ages of 30 and 49 years old. Thirty-nine people had underlying health conditions including 17 people over the age of 80 years old, 13 people between the ages of 65 and 79 years old, seven people between the ages of 50 and 64 years old, and two people between the ages of 30 and 49 years old.

Subject: (U) LACoDPH News Release: L.A. County Exceeds 200,000 Positive Cases as COVID-19 Crisis Response Continues - 48 New Deaths and 3,290 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: L.A. County Exceeds 200,000 Positive Cases as COVID-19 Crisis Response Continues - 48 New Deaths and 3,290 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 6 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has reported more than 200,000 confirmed COVID-19 cases in Los Angeles County. To date, Public Health has identified 201,106 positive cases of COVID-19 across all areas of L.A. County, and a total of 4,869 deaths.

(U) Today, Public Health has confirmed 48 new deaths and 3,290 new cases of COVID-19. The high number of new cases are, in part, due to a backlog of test results received from one lab. Testing results are available for nearly 1,860,000 individuals with 10% of all people testing positive.

(U) There are 1,741 confirmed cases currently hospitalized and 29% of these people are confirmed cases in the ICU. The number of hospitalized patients continues to decrease. This number was up to 2,200 patients in the middle of July.

(U) Of the 48 new deaths, 14 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 12 people who died were between the ages of 65 and 79 years old, 14 people who died were between the ages of 50 and 64 years old, and five people who died was between the ages of 30 and 49 years old. Thirty-seven people had underlying health conditions including 10 people over the age of 80 years old, nine people between the ages of 65 and 79 years old, 13 people between the ages of 50 and 64 years old, and five people between the ages of 30 and 49 years old. Two deaths were reported by the City of Long Beach and one death was reported by the City of Pasadena. Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 4,562 people (99 percent of the cases reported by Public Health); 49% of deaths occurred among Latino/Latinx residents, 24% among White residents, 15% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 96 cases and four deaths reported earlier were not LA County residents.

(U) Public Health continues to respond to a high volume of Health Officer Order complaints. Since March, Public Health received a total of 20,129 Health Officer Order complaints and investigated more than 19,000 restaurants, more than 4,300 grocery stores, and more than 3,600 other businesses.

Subject: (U) LACoDPH News Release: Nearly 60% of New COVID-19 Cases Occur in Residents between 18 and 49 Years Old - 68 New Deaths and 2,347 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Nearly 60% of New COVID-19 Cases Occur in Residents between 18 and 49 Years Old - 68 New Deaths and 2,347 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 5 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 68 new deaths and 2,347 new cases of COVID-19. Residents between the ages of 18 and 49 years old make up nearly 60% of new COVID-19 cases, with residents between the ages of 30 to 49 years old driving most of these reported cases.

(U) Residents between the ages of 30 and 49 years old have the highest case rate among all age groups in LA County. Since the beginning of June, case rates for this group nearly tripled to a high of 1,122 cases per 100,000 population on July 24. Younger residents are also being hospitalized more than before. People between the ages of 30 and 49 years old account for 25% of hospitalized patients in the County. Patients between the ages of 18 and 29 years old now account for more than twice the proportion of all hospitalizations than they did in April. These patients now match the hospitalization rate of people aged 80 years old or older. By comparison, hospitalizations of those 80 years old or older have fallen by half since a peak in April.

(U) There are 1,768 confirmed cases currently hospitalized and 31% of these people are confirmed cases in the ICU. This continues to be lower than the daily hospitalizations of over 2,000 patients reported last week.

(U) Public Health anticipates receiving a backlog of cases once the State electronic laboratory system issues are fixed. This issue has undercounted the County's positive cases and affects the number of COVID-19 cases reported each day and our contact tracing efforts. Data sources that track other key indicators, including hospitalizations and deaths, are not affected by this reporting issue.

(U) Of the 68 new deaths, 23 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 24 people who died were between the ages of 65 and 79 years old, 17 people who died were between the ages of 50 and 64 years old, and three people who died was between the ages of 30 and 49 years old. Fifty-two people had underlying health conditions including 17 people over the age of 80 years old, 20 people between the ages of 65 and 79 years old, 13 people between the ages of 50 and 64 years old, and two people between the ages of 30 and 49 years old, one death was reported by the City of Pasadena.

(U) To date, Public Health has identified 195,614 positive cases of COVID-19 across all areas of L.A. County, and 4,758 deaths. Upon further investigation, 75 cases reported earlier were not L.A. County residents.

Subject: (U) LACoDPH News Release: Public Health Reports 57 New Deaths and 1,901 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 57 New Deaths and 1,901 New Cases of Confirmed COVID-19 in Los Angeles County - Data is incomplete due to delays in the State electronic lab reporting system**, dated 4 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 57 new deaths and 1,901 new cases of COVID-19.

(U) The State has determined under reporting of COVID-19 cases due to technology issues with the electronic laboratory system (ELR). Public Health learned of new issues with the State ELR feed on an emergency call convened by the State last night. This issue has undercounted the County's positive cases and affects the number of COVID-19 cases reported each day and our contact tracing efforts. However, there should not be delays in patients being notified of lab results, as laboratories continue to report tests results directly to providers and hospitals.

(U) The department has implemented an independent strategy to obtain accurate data and a team from the department is now working urgently to reach out to at least 81 labs to obtain all COVID-19 test results from July 26 to the present to determine the accurate positive case count in Los Angeles County for the time period in question. Public Health is also implementing a system for all labs to report positive test results to the department immediately so that moving forward the department can have an accurate case count and be assured that contact tracing efforts are not delayed.

(U) Public Health has noted issues with the State electronic lab reporting system for about two weeks. Once the data reporting issues are fixed, the number of cases is expected to increase.

(U) Data sources that track other key indicators, including hospitalizations, are not impacted by this reporting issue. Public Health is reporting 1,757 confirmed cases currently hospitalized and 31% of these people are confirmed cases in the ICU. The number of hospitalizations has been lower in recent days and this is not due to any known reporting issues. Daily hospitalizations were over 2,000 patients last week.

(U) To date, Public Health has identified 195,614 positive cases of COVID-19 across all areas of L.A. County, and 4,758 deaths. Upon further investigation, 75 cases reported earlier were not L.A. County residents.

(U) Of the 57 new deaths, 19 people that passed away (excluding Long Beach and Pasadena) were over the age of 80, 21 people who died were between the ages of 65 and 79 years old, 12 people who died were between the ages of 50 and 64 years old, three people who died was between the ages of 30 and 49 years

old and one person who died was between the ages of 18 and 29 years old. Forty-eight people had underlying health conditions including 16 people over the age of 80 years old, 19 people between the ages of 65 and 79 years old, 10 people between the ages of 50 and 64 years old, two people between the ages of 30 and 49 years old, and one person between the ages of 18 and 29 years old. One death was reported by the City of Long Beach.

Subject: (U) LACoDPH News Release: Public Health Cautiously Optimistic that County is On the Right Path to Slowing the Spread of COVID-19 - 12 New Deaths and 1,634 New Cases of Confirmed COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Cautiously Optimistic that County is On the Right Path to Slowing the Spread of COVID-19 - 12 New Deaths and 1,634 New Cases of Confirmed COVID-19 in Los Angeles**, dated 3 August 2020.

(U) The Los Angeles County Department of Public Health (Public Health) expressed cautious optimism today that community spread of COVID-19 in L.A. County has slowed and that other key indicators are stabilizing.

(U) The positive trends can be attributed to a variety of things, including the decreased opportunities for transmission, particularly in high-risk settings. Several weeks ago, bars were closed, and the indoor operations of a variety of businesses and institutions were moved outdoors.

(U) Today's 7-day average of cases is around 2,600 cases per day. This is down from a couple weeks ago where the county was seeing over 3,000 cases per day. The 7-day positivity rate has remained mostly flat over the month of July, hovering between 8 and 8.8 percent. And finally, hospitalizations, which is a key indicator of health system capacity, is on a positive trend with 2,000 hospitalizations on average. This number had ticked up to 2,200 in the middle of July. Although all of these key indicators are still too high, the plateauing of the trends is encouraging.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 12 new deaths and 1,634 new cases of COVID-19. To date, Public Health has identified 193,788 positive cases of COVID-19 across all areas of L.A. County, and a total of 4,701 deaths. Upon further investigation, 13 cases and three deaths reported earlier were not L.A. County residents.

(U) There are 1,784 people with confirmed cases of COVID-19 currently hospitalized. Of hospitalized patients, 30% are in the ICU and 18% are currently ventilated.

(U) Of the 11 new deaths reported today (excluding Long Beach and Pasadena), two people that passed away were over the age of 80, four people who died were between the ages of 65 and 79 years old, three people who died were between the ages of 50 and 64 years old and two people who died were between the ages of 30 and 49 years old. Eight people had underlying health conditions including two people over the age of 80 years old, two people between the ages of 65 and 79 years old, two people between the ages of 50 and 64 years old and two people between the ages of 30 and 49 years old.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 4,407 people (99 percent of the cases reported by Public Health); 48% of deaths occurred among Latino/Latinx residents, 25% among White residents, 15% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

(U) Testing results are available for 1,804,698 individuals with 10% of all people testing positive.

Subject: (U) LACoDPH News Release: Public Health Reports High Number of New COVID-19 Deaths - 69 New Deaths and 2,651 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports High Number of New COVID-19 Deaths - 69 New Deaths and 2,651 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 31 July 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 69 new deaths and 2,651 new cases of COVID-19. The increase in deaths reported today is significantly higher than what was reported last week. Last week's average was nearly 38 new deaths a day.

(U) There are 2,002 confirmed cases currently hospitalized and 29% of these people are confirmed cases in the ICU. There are a total of 2,568 confirmed and suspect cases that are currently hospitalized and 18% of these people are on ventilators.

(U) Public Health notes deaths are a lagging indicator of the spread of COVID-19 and reflects exposures that occurred weeks earlier.

(U) To date, Public Health has identified 188,481 positive cases of COVID-19 across all areas of L.A. County, and a total of 4,621 deaths. Upon further investigation, 42 cases reported earlier were not L.A. County residents.

(U) Of the 69 new deaths reported today, 18 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 25 people who died were between the ages of 65 and 79 years old, 15 people who died were between the ages of 50 and 64 years old, and four people who died were between the ages of 30 and 49 years old. Forty-four people had underlying health conditions including 13 people over the age of 80 years old, 17 people between the ages of 65 and 79 years old, 12 people between the ages of 50 and 64 years old, and two people between the ages of 30 and 49 years old. Six deaths were reported by the City of Long Beach and one death was reported by the City of Pasadena.

(U) Ninety-two percent of the people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 4,321 people (99 percent of the cases reported by Public Health); 48% of deaths occurred among Latino/Latinx residents, 25% among White residents, 15% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races.

(U) Testing results are available for nearly 1,760,000 individuals with 10% of all people testing positive.

Subject: (U) LACoDPH News Release: Public Health Announces $15 Million Allocated to Childcare for Essential Workers and Low-Income Families - 91 New Deaths and 4,825 New Cases of Confirmed COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Announces $15 Million Allocated to Childcare for Essential Workers and Low-Income Families - 91 New Deaths and 4,825 New Cases of Confirmed COVID-19 in Los Angeles County, High Number of New Deaths and New Cases of COVID-19 Partly Due to Backlog of Reports**, dated 29 July 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 91 new deaths and 4,825 new cases of COVID-19. The high number of new deaths are from a backlog of reports received from over the weekend. The high number of new cases are, in part, due to a backlog of over 2,000 results received from Thursday through Sunday.

(U) There are 2,045 confirmed cases currently hospitalized and 28% of these people are confirmed cases in the ICU. There are a total of 2,599 confirmed and suspect cases that are currently hospitalized and 17% of these people are on ventilators. The hospitalization data is missing data from three hospitals not included in today's update.

(U) Public Health is pleased to announce that the Board of Supervisors allocated $15 million in CARES Act funding for childcare vouchers to serve essential workers and low-income families in the County. Families seeking early care and education services may access vouchers by calling 888-92-CHILD (888-922-4453). Eligibility for these vouchers is set by the state.

(U) Public Health is reporting one additional case of multisystem inflammatory syndrome in children (MIS-C). This brings the total cases of MIS-C in LA County to 16 children. Ten of these cases are among girls. The majority of cases (73%) were Latino/Latinx. No children with MIS-C in LA County have died. MIS-C is a condition that has been affecting children under 21 years old across the country who may have been exposed to COVID-19 or had COVID-19. Different body parts can become inflamed, including the heart, lungs, kidneys, brain, skin, eyes, or gastrointestinal organs and there can be lifelong health impacts.

(U) To date, Public Health has identified 183,383 positive cases of COVID-19 across all areas of L.A. County, and a total of 4,516 deaths. Public Health anticipates continuing to receive a backlog of lab reports in the coming days due to problems with the state electronic lab reporting system. Testing results are available for nearly 1,683,000 individuals with 10% of all people testing positive.

(U) Of the 91 new deaths reported today, 31 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 27 people who died were between the ages of 65 and 79 years old, 17 people who died were between the ages of 50 and 64 years old, seven people who died were

between the ages of 30 and 49 years old, and three people who died were between the ages of 18 and 29. Seventy-two people had underlying health conditions including 28 people over the age of 80 years old, 22 people between the ages of 65 and 79 years old, 14 people between the ages of 50 and 64 years old, six people between the ages of 30 and 49 years old, and two between the ages of 18 and 29 years old. Five deaths were reported by the City of Long Beach and one death was reported by the City of Pasadena. Upon further investigation, 84 cases and one death reported earlier were not LA County residents.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 51 New Deaths and 2,708 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 28 July 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 51 new deaths and 2,708 new cases of COVID-19. To date, Public Health has identified 178,642 positive cases of COVID-19 across all areas of L.A. County, and a total of 4,426 deaths. Public Health anticipates receiving a backlog of cases in the coming days due to previous reporting delays in the State electronic lab system.

(U) Public Health is reporting 2,051 confirmed cases currently hospitalized and 29% of these people are confirmed cases in the ICU. There are a total of 2,621 confirmed and suspect cases that are currently hospitalized and 18% of these people are on ventilators. The hospitalization data is incomplete due to data from three hospitals not included in today's update.

(U) Of the 51 new deaths, 21 people that passed away (excluding Long Beach and Pasadena) were over the age of 80 years old, 12 people who died were between the ages of 65 and 79 years old, 11 people who died were between the ages of 50 and 64 years old, five people who died were between the ages of 30 and 49 years old, and two people who died were between the ages of 18 and 29. Forty-four people had underlying health conditions including 20 people over the age of 80 years old, 10 people between the ages of 65 and 79 years old, nine people between the ages of 50 and 64 years old, three people between the ages of 30 and 49 years old, and two people between the ages of 18 and 29 years old.

(U) Testing results are available for nearly 1,675,000 individuals with 10% of all people testing positive.

(U) Ninety-two percent of people who died from COVID-19 had underlying health conditions. Of those who died, information about race and ethnicity is available for 4,133 people (99 percent of the cases reported by Public Health); 48% of deaths occurred among Latino/Latinx residents, 25% among White residents, 15% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 94 cases reported earlier were not LA County residents.

Subject: (U) LACoDPH News Release: Public Health Underscores Compliance, Containment and Collaboration to Move L.A. County Forward 17 New Deaths and 2,039 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Underscores Compliance, Containment and Collaboration to Move L.A. County Forward 17 New Deaths and 2,039 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 27 July 2020.

(U) To underscore the ongoing need to protect the long-term health and well-being of residents and the workforce as we move forward in the recovery journey, the Los Angeles County Department of Public Health (Public Health) introduces and underscores a new set of three Cs: Compliance, Containment, and Collaboration.

(U) Compliance: Businesses must comply with Health Officer Orders and implement the strict infection control practices and distancing guidelines in place to protect the workforce and the public. Residents must continue to wear face coverings, maintain physical distancing, avoid gathering with people they don't live with and continue washing their hands and cleaning high- touch surfaces.

(U) Containment: Adequate testing and case investigations are critical tools to contain spread. The Department of Health Services has announced testing capacity has expanded to over 65% to serve communities hardest hit by COVID-19 that experience racial and economic disparities. Case interviews and contact tracing of people who are positive or exposed are isolating and quarantining must continue. Businesses and employers must also do their part and alert the department to outbreaks at their work sites.

(U) Collaboration: Collaborating across all sectors and government is imperative to ensure clear messages to the public, uninterrupted supply chains for testing supplies and personal protective equipment, and unity in strategies for re-opening with as much safety as possible.

(U) Today, Public Health has confirmed 17 new deaths and 2,039 new cases of COVID-19. Public Health anticipates receiving a backlog of cases in the coming days.

(U) Public Health is reporting 2,017 confirmed cases currently hospitalized and 29% of these people are confirmed cases in the ICU. There are a total of 2,552 confirmed and suspect cases that are currently hospitalized and 18% of these people are on ventilators. The hospitalization data is incomplete due to data from five non-reporting hospitals not being part of today's update.

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Reports 44 New Deaths and 1,949 New Cases of Confirmed COVID-19 in Los Angeles County - Reporting Delays in State Hospital and Case Data Contribute to Low Numbers**, dated 24 July 2020.

(U) Today, the Los Angeles County Department of Public Health (Public Health) has confirmed 44 new deaths and 1,949 new cases of COVID-19. The lower number of cases are, in part, due to lab result reporting delays in the State electronic lab system. The number of cases is expected to increase in the coming days once the data becomes available.

(U) Public Health reports there are 1,928 confirmed cases currently hospitalized and 29% of these people are confirmed cases in the ICU. There is a total of 2,470 confirmed and suspect cases that are currently hospitalized and 16% of these people are on ventilators. The hospitalization data is incomplete due to changes in reporting requirements from the U.S. Department of Health and Human Services. This resulted in historical data from 11 non-reporting hospitals not being part of today's update.

(U) To date, Public Health has identified 168,757 positive cases of COVID-19 across all areas of L.A. County, and 4,300 total deaths.

(U) Of the 44 new deaths, 19 people that passed away (excluding Long Beach and Pasadena) were over the age of 80, eight people who died were between the ages of 65 and 79 years old, eight people who died were between the ages of 50 and 64 years old, and eight people who died were between the ages of 30 and 49 years old. Thirty-six people had underlying health conditions including 17 people over the age of 80 years old, seven people between the ages of 65 and 79 years old, seven people between the ages of 50 and 64 years old, and five people between the ages of 30 and 49 years old. One death was reported by the City of Pasadena.

Subject: (U) LACoDPH News Release: Public Health Unveils Compliance Plan to Enforce Health Officer Orders - 49 New Deaths and 2,014 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Unveils Compliance Plan to Enforce Health Officer Orders - 49 New Deaths and 2,014 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 23 July 2020.

(U) As health inspectors continue to conduct visits to ensure infection control measures are in place in businesses across the County, the Los Angeles County Department of Public Health (Public Health) has created a tiered compliance and enforcement plan that will include citations and fines for businesses that continue to violate Health Officer Orders.

(U) Compliance with the Health Officer Orders is paramount for the long-term reopening of many economic sectors while ensuring the public health and safety of residents, which includes consumers and those who make up the workforce of these sectors.

(U) Beginning at the end of August, fines will be issued to businesses that are non-compliant that can range from $100 for the first offense to $500 and a 30 day permit suspension for multiple offenses. This includes businesses licensed and permitted by the department and those that are not.

(U) Today, Public Health has confirmed 49 new deaths and 2,014 new cases of COVID-19. To date, Public Health has identified 166,848 positive cases of COVID-19 across all areas of L.A. County, and 4,262 deaths.

(U) Of the 49 new deaths, 30 people that passed away (excluding Long Beach and Pasadena) were over the age of 65 years old, 10 people who died were between the ages of 41 and 65 years, and seven people who died were between the ages of 18 and 40 years old. Thirty-eight people had underlying health conditions including 25 people over the age of 65 years old, 10 people between the ages of 41 to 65 years old and 3 people between the ages of 18 and 40 years old. One death was reported by the City of Long Beach and one death was reported by the City of Pasadena. There are 2,210 confirmed cases currently hospitalized, 28% of these people are confirmed cases in the ICU and 19% are confirmed cases on ventilators. The number of hospitalizations has remained over 2,200 for five consecutive days.

Subject: (U) LACoDPH News Release: 57% of New Cases of COVID-19 are in People under 41 Years Old - 50 New Deaths and 2,741 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: 57% of New Cases of COVID-19 are in People under 41 Years Old - 50 New Deaths and 2,741 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 21 July 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 50 new deaths and 2,741 new cases of COVID-19. Of the new cases reported by Public Health today (excluding Long Beach and Pasadena), 57% occurred in people under the age of 41 years old.

(U) To date, Public Health has identified 161,673 positive cases of COVID-19 across all areas of LA County, and a total of 4,154 deaths. There are 2,218 confirmed cases currently hospitalized, 26% of these people are confirmed cases in the ICU and 18% are confirmed cases on ventilators. This is the third consecutive day of over 2,200 hospitalization.

(U) Of the 50 new deaths, 34 people that passed away (excluding Long Beach and Pasadena) were over the age of 65 years old and 15 people who died were between the ages of 41 and 65 years. 39 people had underlying health conditions including 29 people over the age of 65 years old and 10 people between the ages of 41 to 65 years old. One death was reported by the City of Long Beach.

(U) Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,867 people (99 percent of the cases reported by Public Health); 47% of deaths occurred among Latino/Latinx residents, 26% among White residents, 15% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 113 cases reported earlier were not LA County residents.

Russian Gunman Takes Hostages on Hijacked Bus in Ukraine

- On 21 July, Maksym S. Kryvosh, 44, hijacked a bus in Lutsk, western Ukraine, and took between 10 to 20 passengers as hostages, demanding that senior politicians state they are "terrorists."
- Amid an ongoing standoff with police, Kryvosh warned he rigged the bus with explosives and claimed he could detonate another bomb planted in Lutsk.
- According to Ukraine's Interior Ministry, Kryvosh was convicted of fraud, and illegal possession of arms and explosives in the past, and served 10 years in prison.

Update: Gunman Involved in Fatal Shooting of Federal Judge's Son Found Dead

- On 20 July, the FBI identified Roy Den Hollander, a self-proclaimed "anti-feminist" lawyer, as the gunman who fatally shot Daniel Anderl, 20, the son of US District Court Judge Esther Salas; Hollander was found dead of a self-inflicted gunshot wound.
- Although authorities have not announced a motive, officials said Hollander criticized Judge Salas in online postings, and was involved in an ongoing gender-equity case presented to her.

Subject: (U) LACoDPH News Release: Public Health Bolsters Case Investigation Efforts to Encourage Participation as COVID-19 Cases and Hospitalizations Increase - 9 New Deaths and 3,160 New Cases Confirmed

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Public Health Bolsters Case Investigation Efforts to Encourage Participation as COVID-19 Cases and Hospitalizations Increase - 9 New Deaths and 3,160 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 20 July 2020.

(U) As COVID-19 cases and hospitalizations continue to increase, the Los Angeles County Department of Public Health (Public Health) is providing $10 million to community-based organizations, particularly in the hardest hit communities, to encourage participation with case investigation and contact tracing efforts to help slow the spread of COVID-19. Public Health is also piloting a $20 gift card incentive program to thank individuals for participating in the hour-long contact tracing interview.

(U) Public Health has confirmed 9 new deaths and 3,160 new cases of COVID-19. To date, Public Health has identified 159,045 positive cases of COVID-19 across all areas of LA County, and a total of 4,104 deaths. The decrease in deaths may reflect a reporting lag from over the weekend.

(U) For the second straight day, Public Health confirms the highest number of new hospitalizations reported in a day with 2,232 people currently hospitalized, surpassing yesterday's count of 2,216 hospitalizations. Of the 2,232 confirmed COVID-19 cases currently hospitalized, 26% of these people are confirmed cases in the ICU and 19% are confirmed cases on ventilators.

(U) Of the nine new deaths, six people that passed away (excluding Long Beach and Pasadena) were over the age of 65 years old and two people who died were between the ages of 41 and 65 years. Five people had underlying health conditions including four people over the age of 65 years old and one person between the ages of 41 to 65 years old. One death was reported by the City of Long Beach.

Subject: (U) LACoDPH News Release: LA County Hits New High of COVID-19 Cases Reported in a Day - 59 New Deaths and 4,592 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: LA County Hits New High of COVID-19 Cases Reported in a Day - 59 New Deaths and 4,592 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 16 July 2020.

(U) The Los Angeles County Department of Public Health (Public Health) confirms 59 new deaths and 4,592 new cases of COVID-19. This is the largest increase in new cases, surpassing the count from July 14. Over the last 48 hours there have been 7,350 new cases.

(U) Of the 59 new deaths, 34 people who died were over the age of 65 years old and 20 people who died were between the ages of 41 and 65 years old. Forty-eight people had underlying health conditions including 32 people over the age of 65 years old and 16 people between the ages of 41 to 65 years old. Five deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 147,468 positive cases of COVID-19 across all areas of LA County, and a total of 3,988 deaths.

(U) Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,701 people (99 percent of the cases reported by Public Health); 46% of deaths occurred among Latino/Latinx residents, 26% among White residents, 15% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 2% among residents identifying with other races. Upon further investigation, 133 cases and seven deaths reported earlier were not LA County residents.

(U) There are 2,173 confirmed cases currently hospitalized, 27% of these people are confirmed cases in the ICU and 17% are confirmed cases on ventilators. Data shows younger people between the ages of 18 and 40 years old are being hospitalized at a higher rate than seen at any point in this pandemic. They comprise of 20% of patients with COVID-19 currently hospitalized.

(U) Testing results are available for over 1,440,000 individuals with 9% of all people testing positive.

Subject: (U) LACoDPH News Release: As 13 New Deaths and 2,593 New Cases of COVID-19 are Confirmed, Revised Health Officer Order Requires Closure of Additional Operations and Sectors: K-12 Protocol Released

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: As 13 New Deaths and 2,593 New Cases of COVID-19 are Confirmed, Revised Health Officer Order Requires Closure of Additional Indoor Operations and Sectors: Actions come as Public Health releases new K-12 protocol to provide "roadmap" to help schools plan for reopening**, dated 13 July 2020.

(U) As COVID-19 cases and hospitalizations continue to rise here and across California, the Los Angeles County Health Officer Order will be modified today to align with Governor Gavin Newsom's directives to prevent more cases, more serious illnesses, increased hospitalizations and more deaths.

(U) The Order requires the closure of additional indoor operations for certain sectors which promote the mixing of populations beyond households and make adherence to physical distancing with face coverings difficult.

(U) Bars, indoor dining at restaurants, indoor museums, indoor operations at zoos and aquariums, and cardrooms and satellite wagering facilities remain closed in Los Angeles County, and all events and gatherings are prohibited unless specifically allowed by the Order.

(U) As the new round of closures were announced, the Los Angeles County Department of Public Health (Public Health) also released reopening protocols for K through 12 schools in Los Angeles County. Developed in consultation with more than 500 stakeholders, the protocols are intended to serve as a roadmap for school districts as they plan how to reopen with as much safety as possible for students, teachers, staff and their families.

(U) Today's announcements come as Public Health has confirmed 13 new deaths and 2,593 new cases of COVID-19. All of the 13 people who passed away were over the age of 65 years old and nine of these people had underlying health conditions.

(U) To date, Public Health has identified 136,129 positive cases of COVID-19 across all areas of LA County, and a total of 3,822 deaths.

Subject: (U) LACoDPH News Release: LA County Reports High Number of Positive Cases: 18 New Deaths and 3,322 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **LA County Reports High Number of Positive Cases: 18 New Deaths and 3,322 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 12 July 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 18 new deaths and 3,322 new cases of COVID-19.

(U) Of the 16 people that passed away (excluding Long Beach and Pasadena), 14 people were over the age of 65 years old and two people who died were between the ages of 41 and 65 years old. Eleven people had underlying health conditions including 10 people over the age of 65 years old and one person between the ages of 41 to 65 years old. Two deaths were reported by the city of Long Beach.

(U) Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,543 people (99 percent of the cases reported by Public Health); 46% of deaths occurred among Latino/Latinx residents, 26% among White residents, 16% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 15 cases and two deaths reported earlier were not LA County residents.

(U) Testing results are available for over 1,336,000 individuals with 9% of all people testing positive.

(U) To date, Public Health has identified 133,549 positive cases of COVID-19 across all areas of LA County, and a total of 3,809 deaths.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **LA County Seeing High Number of Positive Cases and Deaths: 57 New Deaths and 2,916 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 11 July 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 57 new deaths and 2,916 new cases of COVID-19. There are more than 2,000 people currently hospitalized, 27% of these people are confirmed cases in the ICU and 18% are confirmed cases on ventilators. This remains substantially higher than the 1,350 to 1,450 daily hospitalizations seen four weeks ago.

(U) Of the 51 people that passed away (excluding Long Beach and Pasadena), 37 people were over the age of 65 years old, 11 people who died were between the ages of 41 and 65 years old, and three people who died were between the ages of 18 and 40 years old. Forty-three people had underlying health conditions including 32 people over the age of 65 years old, eight people between the ages of 41 to 65 years old, and three people between the ages of 18 and 40 years old. Four deaths were reported by the City of Long Beach and two deaths reported by the city of Pasadena.

(U) Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,529 people (99 percent of the cases reported by Public Health); 46% of deaths occurred among Latino/Latinx residents, 26% among White residents, 16% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 32 cases and two deaths reported earlier were not LA County residents.

(U) Testing results are available for over 1,313,000 individuals with 9% of all people testing positive.

(U) To date, Public Health has identified 130,242 positive cases of COVID-19 across all areas of LA County, and a total of 3,793 deaths.

Subject: (U) LACoDPH News Release: Contact Tracing Ramps up as COVID-19 Cases Increase- 51 New Deaths and 2,667 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Contact Tracing Ramps up as COVID-19 Cases Increase- 51 New Deaths and 2,667 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 10 July 2020.

(U) The Los Angeles County Department of Public Health (Public Health) continues ramping up contact tracing efforts as cases of COVID-19 increase. Public Health has confirmed 51 new deaths and 2,667 new cases of COVID-19.

(U) Of the 51 people that passed away, 32 people were over the age of 65 years old, 14 people who died were between the ages of 41 and 65 years old and three people who died were between 18 and 40 years old. Forty people had underlying health conditions including 28 people over the age of 65 years old, nine people between the ages of 41 to 65 years old, and three people between the ages of 18 and 40 years old. One death was reported by the City of Long Beach and one death was reported by the City of Pasadena. Seven people who passed away were residents at skilled nursing facilities.

(U) Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,482 people (99 percent of the cases reported by Public Health); 46% of deaths occurred among Latino/Latinx residents, 26% among White residents, 16% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 47 cases and two deaths reported earlier were not LA County residents.

(U) Testing results are available for nearly 1,269,000 individuals with 9% of all people testing positive. The daily positivity rate (a composite of a 7-day rolling average) is higher at 10%. There are 1,995 people currently hospitalized, 26% of these people are confirmed cases in the ICU and 17% are confirmed cases on ventilators. This remains substantially higher than the 1,350 to 1,450 daily hospitalizations seen four weeks ago.

(U) To date, Public Health has identified 127,358 positive cases of COVID-19 across all areas of LA County, and a total of 3,738 deaths.

Subject: (U) LACoDPH News Release: LA County Sees Highest Number of New Cases of COVID-19, Hospitalizations Steadily Increase – 46 New Deaths and 4,015 New Cases of Confirmed COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: LA County Sees Highest Number of New Cases of COVID-19 Partly Due to Backlog of Test Results, Hospitalizations Steadily Increase – 46 New Deaths and 4,015 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 7 July 2020.

(U) The Los Angeles County Department of Public Health (Public Health) confirms the highest number of new cases of COVID-19 reported in a day with 4,015 new cases. The high number of cases are, in part, due to a backlog of about 2,000 test results received from one lab who just submitted lab results from July 2 through July 5 today.

(U) Testing results are available for over 1,213,000 individuals with 9% of all people testing positive. The daily positivity rate (a composite of a 7-day rolling average) has risen to 11.6%.

(U) There are 1,969 people currently hospitalized, 27% of these people are confirmed cases in the ICU and 18% are confirmed cases on ventilators. This remains substantially higher than the 1,350 to 1,450 daily hospitalizations seen three weeks ago. The number of daily of hospitalizations has steadily increased to over 1,900 since July 1.

(U) In addition to the 4,015 new cases, Public Health has confirmed 46 new deaths of COVID-19. Twenty-eight people who died were over the age of 65 years old, 10 people who died were between the ages of 41 and 65 years old, and five people who died were between the ages of 18 and 40 years old. Thirty-four people had underlying health conditions including 24 people over the age of 65 years old, 7 people between the ages of 41 to 65 years old, and three people between the ages of 18 and 40 years old. Two deaths were reported by the City of Long Beach and one death was reported by the City of Pasadena.

(U) To date, Public Health has identified 120,539 positive cases of COVID-19 across all areas of LA County, and a total of 3,579 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,327 people (99 percent of the cases reported by Public Health); 44% of deaths occurred among Latino/Latinx residents, 27% among White residents, 16% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 46 cases and one death reported earlier were not LA County residents.

Subject: (U) LACoDPH News Release: LA County Sees Significant Increase in COVID-19 Transmission Between 18 and 40 Year old Residents: 48 New Deaths and 1,584 New Cases of Confirmed COVID-19

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: LA County Sees Significant Increase in COVID-19 Transmission Between 18 and 40 Year old Residents: 48 New Deaths and 1,584 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 6 July 2020.

(U) Today, the Los Angeles County Department of Public Health (Public Health) reports almost 50% of new cases occur among younger people with the most significant increase in the percentage of cases among residents between 18 and 40 years old.

(U) The Understanding America Study that is administered by USC's Dornsife Center reports that 55.2% of LA County residents had close contact (within 6 feet) with people who do not live with them in the last 7 days. This is an increase from the 30.5% reported from April 8-14.

(U) The Centers for Disease Control and Prevention issued a health advisory warning everyone to not use any hand sanitizer manufactured by "Eskbiochem SA de CV" in Mexico, due to the potential presence of methanol, a "toxic alcohol", as an active ingredient, which can cause blindness and/or death when absorbed through the skin or when swallowed.

(U) Today, Public Health has confirmed 48 new deaths and 1,584 new cases of COVID-19. Thirty-three people who died were over the age of 65 years old, 13 people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Forty-one people had underlying health conditions including 28 people over the age of 65 years old, 12 people between the ages of 41 to 65 years old, and one person between the ages of 18 and 40 years old. One death was reported by the City of Pasadena.

(U) To date, Public Health has identified 116,570 positive cases of COVID-19 across all areas of LA County, and a total of 3,534 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,283 people (99 percent of the cases reported by Public Health); 44% of deaths occurred among Latino/Latinx residents, 27% among White residents, 16% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, seven cases and one death reported earlier were not LA County residents.

Subject: (U) LACoDPH News Release: COVID-19 Deaths and Hospitalizations Increase: Residents Urged to Avoid Unnecessary Public Contact - 55 New Deaths and 2,204 New Cases of Confirmed COVID-19 in Los Angeles

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: COVID-19 Deaths and Hospitalizations Increase: Residents Urged to Avoid Unnecessary Public Contact - 55 New Deaths and 2,204 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 2 July 2020.

(U) The Los Angeles County Department of Public Health (Public Health) reports an increase in COVID-19 deaths and continues to see increases in hospitalizations. Public Health has confirmed 55 new deaths of COVID-19. This is 20 more deaths than yesterday's count.

(U) There are 1,893 people currently hospitalized, 28% of these people are confirmed cases in the ICU and 17% are confirmed cases on ventilators. This is the largest number of people hospitalized since early May, surpassing yesterday's count.

(U) There are 2,204 new cases of COVID-19. This is the fifth consecutive day of new cases over 2,000. This number is still missing lab reports from one of the larger labs.

(U) Of the 55 new deaths, 40 people who died were over the age of 65 years old, 11 people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Forty-five people had underlying health conditions including 36 people over the age of 65 years old, eight people between the ages of 41 to 65 years old, and one person between the ages of 18 to 40 years old. One death was reported by the City of Long Beach and two deaths were reported by the City of Pasadena.

(U) To date Public Health has identified 107,667 positive cases of COVID-19 across all areas of LA County, and a total of 3,454 deaths. Ninety-three percent of people who died had underlying health conditions and 7% did not. Of those who died, information about race and ethnicity is available for 3,209 people (99 percent of the cases reported by Public Health); 43% of deaths occurred among Latino/Latinx residents, 27% among White residents, 16% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 44 cases and three deaths reported earlier were not LA County residents. Testing results are available for over 1,133,000 individuals, with 9% of people testing positive.

Subject: (U) LACoDPH News Release: Increases of COVID-19 Cases and Hospitalizations Continue: 45 New Deaths and 2,779 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Increases of COVID-19 Cases and Hospitalizations Continue: 45 New Deaths and 2,779 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 30 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) is reporting continued increases in cases and hospitalizations. Today, the department is announcing 2,779 new cases of 2019 Novel Coronavirus (COVID-19). This is the third consecutive day of new cases over 2,100.

(U) There are 1,783 people currently hospitalized, 26% of these people are confirmed cases in the ICU and 18% are confirmed cases on ventilators. This is significantly higher than the 1,350 to 1,450 daily hospitalizations seen in recent weeks.

(U) Today, Public Health has confirmed 45 new deaths and 2,779 new cases of 2019 Novel Coronavirus (COVID-19). Twenty-nine people who died were over the age of 65 years old and 11 people who died were between the ages of 41 and 65 years old. Thirty-one people had underlying health conditions including 25 people over the age of 65 years old and six people between the ages of 41 to 65 years old. Five deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 103,529 positive cases of COVID-19 across all areas of LA County, and a total of 3,369 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,130 people (99 percent of the cases reported by Public Health); 43% of deaths occurred among Latino/Latinx residents, 27% among White residents, 17% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 22 cases and two deaths reported earlier were not LA County residents. Testing results are available for nearly 1,107,000 individuals, with 9% of people testing positive.

(U) Yesterday, a Health Officer Order was issued that closes LA County beaches from July 3 through July 6 at 5:00 a.m. to prevent crowded situations that could result in more spread of COVID-19. All public beaches, piers, public beach parking lots, beach bike paths that traverse that sanded portion of the beach, and beach access points will be temporarily closed to the public. The Order also prohibits fireworks displays.

Subject: (U) LACoDPH News Release: Community Spread of COVID-19 Continues and Residents and Businesses Must Take Action to Save Lives: 22 New Deaths and 2,903 New Cases

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Community Spread of COVID-19 Continues and Residents and Businesses Must Take Action to Save Lives: 22 New Deaths and 2,903 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 29 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) continues to see alarming trends of community spread. Today, the department is announcing 2,903 new cases of 2019 Novel Coronavirus (COVID-19), the single largest one-day case count since the pandemic began.

(U) Key metrics continue to show steep increases in community spread. The 7-day average of daily reported new cases of COVID-19 is nearly 2,000, an increase from the 1,379 average two weeks ago. There are 1,710 people currently hospitalized, higher than the 1,350 to 1,450 daily hospitalizations seen in recent weeks.

(U) More than 1 million people have been tested for COVID-19 in Los Angeles County. Testing results are available for over 1,089,000 individuals, with 9% of people testing positive. The cumulative positivity rate has increased from 8% to 9%, and the 7-day average of the daily positivity rate has increased from lowest daily rate of 4.6% positivity in late May to 8.4% today.

(U) In addition to the 2,903 new cases, Public Health has confirmed 22 new deaths of 2019 Novel Coronavirus (COVID-19). Eighteen people who died were over the age of 65 years old and four people who died were between the ages of 41 and 65 years old. Eighteen people had underlying health conditions including 17 people over the age of 65 years old and one person between the ages of 41 to 65 years old. To date, Public Health has identified 100,772 positive cases of COVID-19 across all areas of LA County, and a total of 3,326 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,093 people (99 percent of the cases reported by Public Health); 43% of deaths occurred among Latino/Latinx residents, 27% among White residents, 17% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 19 cases reported earlier were not LA County residents.

(U) Forty-two percent of cases are now among individuals between the ages of 18 and 40. While cases in this age range typically have lower risk for serious illness or death, Public Health is concerned they may unknowingly infect parents, grandparents, and friends and family who have underlying health conditions and who are at greater risk for serious illness and death. Everyone must continue to follow physical

distancing and infection control directives and wear a clean cloth face covering that securely covers both your nose and mouth when in contact with other people not in your household.

Subject: (U) LACoDPH News Release: Los Angeles County Bars Closing: 20 New Deaths and 2,542 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Bars Closing: 20 New Deaths and 2,542 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 28 June 2020.

(U) Los Angeles County will heed Gov. Gavin Newsom's directive and bars in Los Angeles County must close today. The County Health Officer Order will be amended today to require that all bars, breweries, brew pubs, pubs, wineries and tasting rooms in L.A. County close unless they are offering sit-down dine-in meals. This includes closing bar areas in restaurants.

(U) The Los Angeles County Department of Public Health is guided by science and data and the key metrics monitored are showing concerning trends. There has been a sharp increase in new cases and hospitalizations. The timing of these increases is in line with the reopening of key sectors, including bars, which are places where people remove their face covering to drink while they may be socializing with people not in their households.

(U) The State-mandated closing comes as the Department of Public Health is reporting significant increases in COVID-19 hospitalizations and the testing positivity rate. There are 1,717 people currently hospitalized, higher than the 1,350 to 1,450 daily hospitalizations seen in recent weeks. Testing results are available for over 1,056,000 individuals, with 9% of people testing positive. The cumulative positivity rate has increased from 8% to 9%, and the 7-day average of the daily positivity rate has increased from 5.8% two weeks ago to 8.7% today.

(U) Today, Public Health has confirmed 20 new deaths and 2,542 new cases of 2019 Novel Coronavirus (COVID-19). Fifteen people who died were over the age of 65 years old, four people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Thirteen people had underlying health conditions including 10 people over the age of 65 years old and three people between the ages of 41 to 65 years old. To date, Public Health has identified 97,894 positive cases of COVID-19 across all areas of LA County, and a total of 3,305 deaths. Ninety-four percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,076 people (99 percent of the cases reported by Public Health); 43% of deaths occurred among Latino/Latinx residents, 27% among White residents, 17% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 19 cases reported earlier were not LA County residents.

(U) Forty-one percent of cases are now among individuals between the ages of 18 and 40. While cases in this age range typically have low risk for serious illness or death, Public Health is concerned they may

unknowingly infect parents, grandparents, and friends and family who have underlying health conditions and who are at greater risk for serious illness and death. Everyone must continue to follow physical distancing and infection control directives and wear a clean cloth face covering that securely covers both your nose and mouth when in contact with other people not in your household.

Subject: (U) LACoDPH News Release: Los Angeles County Showing Increases in COVID-19 Cases, Hospitalizations and Positivity Rates; Residents Urged to Take Caution - 23 New Deaths and 2,169 New Cases

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Showing Increases in COVID-19 Cases, Hospitalizations and Positivity Rates; Residents Urged to Take Caution - 23 New Deaths and 2,169 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 27 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) is reporting significant increases in COVID-19 cases, hospitalizations and the testing positivity rate. The 7-day average of daily new cases is over 1,900; an increase from the 1,379 average two weeks ago. There are 1,698 people currently hospitalized. This is higher than the 1,350 to 1,450 daily hospitalizations seen in recent weeks. Testing results are available for over 1,037,000 individuals, with 9% of people testing positive. The cumulative positivity rate has increased from 8% to 9%, and the 7-day average of the daily positivity rate has increased from 5.8% two weeks ago to 8.6% today. Public Health reminds everyone that you remain safer at home and to always wear a face covering securely over your nose and mouth and keep six feet apart from others not in your household when out in public.

(U) Today, Public Health has confirmed 23 new deaths and 2,169 new cases of 2019 Novel Coronavirus (COVID-19). Twelve people who died were over the age of 65 years old, eight people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Thirteen people had underlying health conditions including nine people over the age of 65 years old, three people between the ages of 41 to 65 years old, and one person between the ages of 18 and 40 years old. Two deaths were reported by the City of Long Beach. One death among the 21 reported deaths (not including the 2 deaths in Long Beach) was a resident living in a skilled nursing facility.

(U) To date, Public Health has identified 95,371 positive cases of COVID-19 across all areas of LA County, and a total of 3,285 deaths. Ninety-four percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,051 people (99 percent of the cases reported by Public Health); 43% of deaths occurred among Latino/Latinx residents, 28% among White residents, 17% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 30 cases and five deaths reported earlier were not LA County residents.

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Announces 25 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,809 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 26 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) is reporting increases in COVID-19 cases, hospitalizations and the positivity rate for testing over the last several weeks. The 7-day average of daily new cases is now 1,979; an increase from the 1,379 average two weeks ago. There are 1,676 people who are currently hospitalized. This is higher than 1350 to 1450 daily hospitalizations seen in recent weeks. Testing results are available for over 1,020,000 individuals with 9% of people testing positive. Both the cumulative positivity rate has increased from 8% to 9%, and the 7-day average of the daily positivity rate has increased to 8.8%. Public Health reminds everyone that you remain safer at home and to always wear a face covering securely over your nose and mouth and keep six feet apart from others not in your household when out and about.

(U) Today, Public Health has confirmed 25 new deaths and 1,809 new cases of 2019 Novel Coronavirus (COVID-19). Nineteen people who died were over the age of 65 years old, four people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Twenty-two people had underlying health conditions including 19 people over the age of 65 years old, two people between the ages of 41 to 65 years old, and one person between the ages of 18 and 40 years old. One death was reported by the City of Long Beach.

(U) To date, Public Health has identified 93,232 positive cases of COVID-19 across all areas of LA County, and a total of 3,267 deaths. Ninety-four percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 3,041 people (99 percent of the cases reported by Public Health); 43% of deaths occurred among Latino/Latinx residents, 28% among White residents, 17% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 44 cases and four deaths reported earlier were not LA County residents.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Announces 18 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 2,571 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 22 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 18 new deaths and 2,571 new cases of 2019 Novel Coronavirus (COVID-19). Thirteen people who died were over the age of 65 years old and four people who died were between the ages of 41 and 65 years old. Seventeen people had underlying health conditions including nine people over the age of 65 years old and four people between the ages of 41 to 65 years old. One death was reported by the City of Pasadena.

(U) To date, Public Health has identified 85,942 positive cases of COVID-19 across all areas of LA County, and a total of 3,137 deaths. Ninety-four percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,918 people (99 percent of the cases reported by Public Health); 42% of deaths occurred among Latino/Latinx residents, 29% among White residents, 17% among Asian residents, 11% among African American/Black residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 26 cases and one death reported earlier were not LA County residents. There are 1,453 people who are currently hospitalized, 28% of these people are in the ICU and 19% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 960,000 individuals and 8% of people testing positive.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC) Threat Assessment: No Specific, Credible Threats to Independence Day Events in JRIC AOR**, dated 22 June 2020.

(U//FOUO) The JRIC has not identified any specific, credible threats related to Independence Day celebrations in its six-county AOR. However, the strong national symbolism associated with this US holiday and current US geopolitical conditions lead the JRIC to assess a heightened threat environment. Public gatherings remain desirable targets for extremists and lone offender attacks are difficult to detect.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 11 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,784 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 11 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 1,784 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 21 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 11 new deaths and 1,784 new cases of 2019 Novel Coronavirus (COVID-19). Four people who died were over the age of 65 years old and five people who died were between the ages of 41 and 65 years old. Eight people had underlying health conditions including four people over the age of 65 years old and four people between the ages of 41 to 65 years old. Two deaths were reported by the City of Long Beach. To date, Public Health has identified 83,397 positive cases of COVID-19 across all areas of LA County, and a total of 3,120 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,900 people (99 percent of the cases reported by Public Health); 42% of deaths occurred among Latino/Latinx residents, 29% among White residents, 17% among Asian residents, 11% among Black/African American residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 23 cases and one death reported earlier were not LA County residents. There are 1,426 people who are currently hospitalized, 29% of these people are in the ICU and 21% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 945,000 individuals and 8% of people testing positive.

(U) Public Health continues to assess key recovery indicators on the Recovery Dashboard to understand how COVID-19 is affecting communities and capacity to treat people who may become seriously ill. Increased contact with others not in your household results in increased risk of transmission of COVID-19. To help prevent an overwhelming surge of COVID-19 cases at healthcare facilities and to protect one another, everyone must always wear a face covering and keep six feet or more of distance from others not in your household, wash hands frequently, self-isolate if you're positive for COVID-19, and quarantine if you're a close contact of someone who tested positive. It is important if someone thinks they could be positive for COVID-19 and are awaiting testing results, to stay at home and act as if they are positive. This means self-isolating for 10 days and 72 hours after symptoms and fever subside, or until they receive a negative result. If a person tests positive for COVID-19, they should plan on receiving a call from a contact tracer to discuss how to protect themselves and others, to find out where they may have been, and who they were in close contact with while infectious. People who have underlying health conditions remain at much greater risk for serious illness from COVID-19, so it will continue to be very important for the County's vulnerable residents to stay at home as much as possible, to have groceries and medicine delivered, and to call their providers immediately if they have even mild symptoms.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 48 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 2,056 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 19 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 48 new deaths and 2,056 new cases of 2019 Novel Coronavirus (COVID-19). The high number of cases are, in part, due to delays in lab reporting. Thirty-six people who died were over the age of 65 years old, seven people who died were between the ages of 41 and 65 years old, and two people who died were between the ages of 18 and 40 years old. Thirty-seven people had underlying health conditions including 29 people over the age of 65 years old, six people between the ages of 41 to 65 years old, and two people between the ages of 18 and 40 years old. Two deaths were reported by the City of Long Beach and one death was reported by the City of Pasadena. To date, Public Health has identified 81,636 positive cases of COVID-19 across all areas of LA County, and a total of 3,110 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,892 people (99 percent of the cases reported by Public Health); 42% of deaths occurred among Latino/Latinx residents, 29% among White residents, 17% among Asian residents, 11% among Black/African American residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 29 cases and one death reported earlier were not LA County residents. There are 1,406 people who are currently hospitalized, 29% of these people are in the ICU and 22% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 916,000 individuals and 8% of people testing positive.

(U) It is important if someone thinks they could be positive for COVID-19 and are awaiting testing results, to stay at home and act as if they are positive. This means self-isolating for 10 days and 72 hours after symptoms and fever subside, or until they receive a negative result. Testing capacity continues to increase in LA County, with testing results available for nearly 891,000 individuals and 8% of people testing positive.

(U) A modified Health Officer Order and directives for the reopening of additional businesses was issued yesterday with an effective date of today, June 19. The Health Officer Order will allow for the following sectors to reopen once they implement the required protocols for infection control and distancing:

- (U) Cardrooms, satellite wagering facilities and racetracks with no spectators
- (U) Personal care services including: esthetician, skin care and cosmetology services; electrology; nail salons; body art professionals, tattoo parlors, microblading and permanent make-up; and piercing shops; and massage therapy
- (U) Bars, wineries, breweries and tasting rooms

(U) The Health Officer Order contains protocols for all businesses that are permitted to reopen to ensure it is done as safely as possible for employees, customers and residents; all sectors are reopening with reduced occupancy. Employees and visitors to these businesses will need to wear a cloth face covering when around other people and practice physical distancing of at least 6 feet at all times. Some employees may be required to wear face shields. It is important for everyone to follow the directives and to do their part every day to keep everyone as safe as possible. Businesses should take the time to put all of the

protocols in place before reopening. The directives will be available online and are contained in sector-specific protocols that inform all re-openings.

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 34 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 2,129 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 17 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 34 new deaths and 2,129 new cases of 2019 Novel Coronavirus (COVID-19). This is the highest number of new cases reported in a day, however about 600 cases are from a backlog of test results. Twenty-three people who died were over the age of 65 years old, seven people who died were between the ages of 41 and 65 years old, and four people who died were between the ages of 18 and 40 years old. Twenty-three people had underlying health conditions including 17 people over the age of 65 years old, four people between the ages of 41 to 65 years old, and two people between the ages of 18 and 40 years old. One death was reported by the City of Long Beach and one death was reported by the City of Pasadena.

(U) To date, Public Health has identified 77,189 positive cases of COVID-19 across all areas of LA County, and a total of 2,991 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,779 people (99 percent of the cases reported by Public Health); 42% of deaths occurred among Latino/Latinx residents, 29% among White residents, 17% among Asian residents, 11% among African American residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 24 cases and two deaths reported earlier were not LA County residents. There are 1,420 people who are currently hospitalized, 28% of these people are in the ICU and 22% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 854,000 individuals and 8% of people testing positive.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 33 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,337 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 16 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 33 new deaths and 1,337 new cases of 2019 Novel Coronavirus (COVID-19). Twenty-four people who died were over the age of 65 years old, eight people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Twenty-eight people had underlying health conditions including 20 people over the age of 65 years old and eight people between the ages of 41 to 65 years old.

(U) To date, Public Health has identified 75,084 positive cases of COVID-19 across all areas of LA County, and a total of 2,959 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,748 people (99 percent of the cases reported by Public Health); 42% of deaths occurred among Latino/Latinx residents, 28% among White residents, 17% among Asian residents, 11% among African American residents, less than 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 44 cases reported earlier were not LA County residents. There are 1,288 people who are currently hospitalized, 31% of these people are in the ICU and 25% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 841,000 individuals and 8% of people testing positive.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 46 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,857 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 11 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 46 new deaths and 1,857 new cases of 2019 Novel Coronavirus (COVID-19). Although this is the highest number of new cases reported in a day, 600 cases are from a backlog of test results. Thirty-two people who died were over the age of 65 years old, 13 people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 to 40 years old. Forty people had underlying health conditions including 27 people over the age of 65 years old, 12 people between the ages of 41 to 65 years old and one person between the ages of 18 and 40 years old.

(U) To date, Public Health has identified 68,875 positive cases of COVID-19 across all areas of LA County, and a total of 2,813 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,617 people (99 percent of the cases reported by Public Health) 41% of deaths occurred among Latino/Latinx residents, 29% among White residents, 17% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander and residents identifying with other races. Upon further investigation, 46 cases and one death reported earlier were not LA County residents. As of today, 7,190 people who tested positive for COVID-19 (11% of positive cases) have been hospitalized at some point during their illness. There are 1,416 people who are currently hospitalized, 29% of these people are in the ICU and 20% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 746,000 individuals and 8% of people testing positive.

(U) A modified Health Officer Order and directives for the reopening of additional businesses will be issued today with an effective date of June 12. The Health Officer order will allow for the following sectors to reopen once they implement the required protocols for infection control and distancing:

Subject: (U) LACoDPH News Release: Los Angeles County Announces 61 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 1,275 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 61 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,275 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 10 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 61 new deaths and 1,275 new cases of 2019 Novel Coronavirus (COVID-19). Forty-two people who died were over the age of 65 years old, 13 people who died were between the ages of 41 and 65 years old, and three people who died were between the ages of 18 to 40. Forty-nine people had underlying health conditions including 37 people over the age of 65 years old, nine people between the ages of 41 to 65 years old and three people between the ages of 18 and 40 years old. Three deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 67,064 positive cases of COVID-19 across all areas of LA County, and a total of 2,768 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,569 people (99 percent of the cases reported by Public Health) 41% of deaths occurred among Latino/Latinx residents, 28% among White residents, 17% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander and residents identifying with other races. Upon further investigation, 33 cases reported earlier were not LA County residents. As of today, 7,097 people who tested positive for COVID-19 (11% of positive cases) have been hospitalized at some point during their illness. There are 1,458 people who are currently hospitalized, 29% of these people are in the ICU and 20% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 732,000 individuals and 8% of people testing positive.

(U) A modified Health Officer Order and directives for the reopening of additional businesses will be issued tomorrow with an effective date of June 12. The Health Officer order will allow for the following sectors to reopen once they implement the required protocols for infection control and distancing:

- Gyms and fitness facilities
- Pro-league arenas without live audiences
- Day camps
- Museums, galleries, zoos and aquariums
- Campgrounds, RV parks and outdoor recreation
- Music, film and television production
- Hotels for leisure travel

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 56 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,225 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 9 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 56 new deaths and 1,225 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-eight people who died were over the age of 65 years old, 15 people who died were between the ages of 41 and 65 years old, and two people who died were between the ages of 18 to 40. Forty-four people had underlying health conditions including 33 people over the age of 65 years old, 10 people between the ages of 41 to 65 years old and one person between the ages of 18 and 40 years old. One death was reported by the City of Long Beach.

(U) To date, Public Health has identified 65,822 positive cases of COVID-19 across all areas of LA County, and a total of 2,707 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,512 people (99 percent of the cases reported by Public Health) 41% of deaths occurred among Latino/Latinx residents, 28% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander and residents identifying with other races. Upon further investigation, 47 cases and four deaths reported earlier were not LA County residents. As of today, 6,998 people who tested positive for COVID-19 (11% of positive cases) have been hospitalized at some point during their illness. There are 1,453 people who are currently hospitalized, 29% of these people are in the ICU and 22% are on ventilators. (U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC) Situation Report: Civil Unrest in the JRIC AOR and Notable Local Developments – 9 June 2020**, dated 9 June 2020.

(U//FOUO) The 25 May death of George Floyd in Minneapolis, Minnesota, has sparked nationwide protests, with some turning confrontational and leading to looting, arson, and riots, and calls for violence against law enforcement officers for perceived police brutality. On 30 May, California Governor Newsom announced a state of emergency in Los Angeles County and approved requests from Los Angeles and Los Angeles County to deploy the National Guard to assist the city and neighboring communities. On 7 June, Los Angeles Mayor Garcetti announced the National Guard will leave the city of Los Angeles after several days of peaceful demonstrations. A small number of National Guard units will be stationed nearby through 10 June to provide emergency support if needed. Planned, and likely unplanned, demonstrations are expected to continue. In light of these nationwide demonstrations, and the ongoing potential for violent confrontations between demonstrators and police, this JRIC Situation Report provides situational awareness on notable violent, criminal incidents, curfew announcements or extensions, and other notable developments in the JRIC six-county AOR.

Al-Qa'ida Leader Killed by French Forces in Mali

- On 5 June, France's defense minister announced French forces and their partners killed Abdelmalek Droukdel, the leader of al-Qa'ida's North Africa affiliate, during a 3 June operation.
- Droukdel's affiliate was responsible for a 2016 Burkina Faso hotel attack that left 30 dead and 150 wounded.

German Man Arrested for Threatening to Attack Muslims

- On 6 June, authorities arrested a 21-year-old man for allegedly threatening an attack on Muslims.
- The 21-year-old expressed his intentions to carry out an attack similar to the March 2019 Christchurch, New Zealand, mosque shootings.
- Authorities searched his apartment, and found weapons and right-wing digital content.

(U) NATIONAL

Pittsburgh Man Charged with Possession of a Destructive Device

- On 6 June, federal authorities announced charges against Matthew Michanowicz, 52, for illegal possession of an unregistered destructive device, after he planted a backpack with homemade explosives in downtown Pittsburgh to incite violence amid protests over the killing of George Floyd.
- Authorities executed a search warrant at Michanowicz's residence and located fuses and other explosive materials.
- Michanowicz faces up to 10 years in prison and a $250,000 fine.

Armed Man Drives through Crowd during Protest in Washington

- On 7 June, Seattle authorities arrested an unidentified male for driving his vehicle into a crowd of demonstrators and shooting a 27-year old man during protests in Seattle.
- According to witnesses and video footage, the suspect drove a black sedan toward a group of peaceful protestors, exited the vehicle wielding a gun, and proceeded to walk through the crowd toward a line of officers.
- Authorities recovered the gun at the scene; the victim is in stable condition.

(U) CALIFORNIA

Santa Cruz Deputy Killed, Two Officers Wounded in Ambush

- On 6 June, US Air Force Sergeant Steven Carrillo, 32, fatally shot Sergeant Damon Gutzwiller, 38, and wounded two officers in an ambush with gunfire and improvised explosives, before authorities shot and arrested him.
- Officers initially responded to a call of a suspicious van carrying guns and bomb-making devices near Ben Lomond and followed the van into a driveway; as officers arrived, Carrillo fired gunshots and threw improvised explosives.
- The FBI is investigating a possible connection between the incident and the 29 May fatal shooting of Officer Pat Underwood in Oakland.

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 25 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,523 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 7 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 25 new deaths and 1,523 new cases of 2019 Novel Coronavirus (COVID-19). The high number of cases are, in part, due to a backlog of test results received from one lab. Fifteen people who died were over the age of 65 years old; five people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Eighteen people had underlying health conditions including 14 people over the age of 65 years old, three people between the ages of 41 to 65 years old, and one person who died was between the ages of 18 and 40 years old. Four deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 63,844 positive cases of COVID-19 across all areas of LA County, and a total of 2,645 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,453 people (99 percent of the cases reported by Public Health) 41% of deaths occurred among Latino/Latinx residents, 28% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander and residents identifying with other races. Upon further investigation, 17 cases reported earlier were not LA County residents. As of today, 6,911 people who tested positive for COVID-19 (11% of positive cases) have been hospitalized at some point during their illness. There are 1,451 people who are currently hospitalized, 30% of these people are in the ICU and 21% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 696,000 individuals and 8% of people testing positive.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 56 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,329 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 6 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 56 new deaths and 1,329 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-six people who died were over the age of 65 years old; 17 people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Forty-seven people had underlying health conditions including 30 people over the age of 65 years old and 17 people between the ages of 41 to 65 years old. Two deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 62,338 positive cases of COVID-19 across all areas of LA County, and a total of 2,620 deaths. Ninety-four percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,433 people (99 percent of the cases reported by Public Health) 41% of deaths occurred among Latino/Latinx residents, 28% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander and residents identifying with other races. Upon further investigation, 36 cases and one death reported earlier were not LA County residents. As of today, 6,899 people who tested positive for COVID-19 (11% of positive cases) have been hospitalized at some point during their illness. There are 1,462 people who are currently hospitalized, 31% of these people are in the ICU and 20% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 682,000 individuals and 8% of people testing positive.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC) Situation Report: Civil Unrest in the JRIC AOR – 1200 Hours, 6 June**, dated 6 June 2020.

(U//FOUO) The 25 May death of George Floyd in Minneapolis, Minnesota, has sparked nationwide protests, with some turning confrontational and leading to looting, arson, and riots, and calls for violence against law enforcement officers for perceived police brutality. On 30 May, California Governor Newsom announced a state of emergency in Los Angeles County and approved requests from Los Angeles and Los Angeles County to deploy the National Guard to assist the city and neighboring communities. Planned, and likely unplanned, demonstrations are expected as the nationwide unrest continues. In light of these nationwide demonstrations, and the ongoing potential for violent confrontations between demonstrators and police, this JRIC Situation Report provides situational awareness on notable violent, criminal incidents, curfew announcements or extensions, and other developments in the JRIC six-county AOR.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 36 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,445 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 5 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 36 new deaths and 1,445 new cases of 2019 Novel Coronavirus (COVID-19). Twenty-five people who died were over the age of 65 years old; nine people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Twenty-nine people had underlying health conditions including 22 people over the age of 65 years old, six people between the ages of 41 to 65 years old, and one person between the ages of 18 and 40 years old. One death was reported by the City of Long Beach.

(U) To date, Public Health has identified 61,045 positive cases of COVID-19 across all areas of LA County, and a total of 2,565 deaths. Ninety-four percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,373 people (99 percent of the cases reported by Public Health) 41% of deaths occurred among Latino/Latinx residents, 28% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander and residents identifying with other races. Upon further investigation, 50 cases and two deaths reported earlier were not LA County residents. As of today, 6,833 people who tested positive for COVID-19 (11% of positive cases) have been hospitalized at some point during their illness. There are 1,488 people who are currently hospitalized, 29% of these people are in the ICU and 20% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 672,000 individuals and 8% of people testing positive.

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 44 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,469 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 4 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 44 new deaths and 1,469 new cases of 2019 Novel Coronavirus (COVID-19). The large increase in positive cases reflects a lag in reporting from one lab of over 500 positive cases. Twenty-seven people who died were over the age of 65 years old; 15 people who died were between the ages of 41 and 65 years old, and two people who died were between the ages of 18 and 40 years old. Thirty-four people had underlying health conditions including 21 people over the age of 65 years old, 12 people between the ages of 41 to 65 years old, and one person between the ages of 18 and 40 years old.

(U) To date, Public Health has identified 59,650 positive cases of COVID-19 across all areas of LA County, and a total of 2,531 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,341 people (99 percent of the cases reported by Public Health) 41% of deaths occurred among Latino/Latinx residents, 28% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander and residents identifying with other races. Upon further investigation, 53 cases and two deaths reported earlier were not LA County residents. As of today, 6,766 people who tested positive for COVID-19 (11% of positive cases) have been hospitalized at some point during their illness. There are 1,457 people who are currently hospitalized, 30% of these people are in the ICU and 21% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 659,000 individuals and 8% of people testing positive.

NYPD Officer Stabbed, Two Others Shot

- On 3 June, Dzenan Camovic, 20, stabbed an NYPD officer in the neck and shot two other officers in an unprovoked attack during anti-looting patrol in Brooklyn; all three officers are expected to recover.
- Police shot Camavic and he remains in critical condition at a hospital.
- Although authorities have not confirmed a motive, police investigating to see if the attack was terrorism-inspired.

Three Nevada Men Arrested on Terrorism Charges

- On 3 June, federal authorities announced a criminal complaint charging Stephen T. Parshall, 35, Andrew T. Lynam Jr., 23, and William L. Loomis, 40, for conspiracy to damage and destroy by fire and explosive, and possession of unregistered firearms.
- Authorities arrested the trio on 30 May as they were headed to a downtown Las Vegas protest; they filled gas cans at a parking lot and made Molotov cocktails in glass bottles.
- All three face fines and multiple years in prison.

Boston Man Charged with Civil Disorder

- On 3 June, authorities arrested and charged Vincent Eovacious, 18, with civil disorder and possession of a Molotov cocktail.
- Eovacious attempted to obstruct or interfere with law enforcement officers engaged in responding to a 1 June violent demonstration in Worcester.
- He faces up to 15 years in prison for civil disorder and unlawful possession of a firearm, three years of supervised release, and a $250,000 fine.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 46 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 1,155 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 46 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,155 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 3 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 46 new deaths and 1,155 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-four people who died were over the age of 65 years old; six people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Twelve people were reported to have underlying health conditions including 11 people over the age of 65 years old and one person between the ages of 41 to 65 years old. Five deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 58,234 positive cases of COVID-19 across all areas of LA County, and a total of 2,489 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,301 people (99 percent of the cases reported by Public Health) 41% of deaths occurred among Latino/Latinx residents, 28% among White residents, 17% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 39 cases reported earlier were not LA County residents. As of today, 6,680 people who tested positive for COVID-19 (11% of positive cases) have been hospitalized at some point during their illness. There are 1,422 people who are currently hospitalized, 26% of these people are in the ICU and 17% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 646,000 individuals and 8% of people testing positive.

(U) Public Health supports the need for LA County residents to stand together against racism and violence and joins the many voices expressing dismay, anger, and frustration at the murder of George Floyd by police. Because of the COVID-19 pandemic and the risk of widespread transmission, everyone engaging in peaceful protest should always wear a face covering securely over their nose and mouth to protect others and keep six feet apart from people outside their household.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Nothing Significant to Report (NSTR)

(U) NATIONAL

Alabama Officer Killed in the Line of Duty

- On 2 June, Moody Police Officer Sergeant Stephen Williams, 50, was fatally shot after he responded to assist multiple agencies at a Super 8 motel.
- Authorities arrested two suspects, but did not provide further details on the nature of the incident.
- Sergeant Williams was a 23-year veteran of law enforcement.

Update: Suspect Arrested, Charged in Shooting of Las Vegas Police Officer

- On 2 June, Las Vegas Metropolitan Police arrested and charged Edgar Samaniego, 20, with attempted murder for shooting Officer Shay Mikalonis, 29, in the head on 1 June.
- Officer Mikalonis remains on life support.

Utah Men Arrested for Attempting to Bring Firearms to Protest

- On 1 June, authorities arrested Yuri Silva, 27, and Christian Hernandez, 27, for making terroristic threats and possessing a controlled substance and firearm, respectively.
- Silva threatened to shoot law enforcement officers, bystanders, and encouraged others on social media to take up arms against police.
- Police conducted a search on the vehicle Hernandez was driving, and located marijuana, an Uzi with a suppressor, and ammunition.

(U) CALIFORNIA

Armed Man Posing as National Guard Arrested

- On 1 June, authorities arrested Gregory Wong, 31, for manufacturing or distributing an assault weapon and attempting to fall into formation with National Guard troops while in uniform in downtown Los Angeles.
- Wong, a former member of the National Guard, is being held on $50,000 bond.

Santa Ana Man Arrested with Cache of Weapons

- Santa Ana police have arrested and booked Jon Paul Worden, 32, on suspicion of being a felon in possession of firearms, ammunition, and assault with a deadly weapon on an officer.
- During a 31 May protest, Worden threw mortars at police and displayed a firearm in his possession.
- Police searched Worden's residence and found multiple assault weapons, thousands of rounds of ammunition, high capacity magazines, bullet proof vests, and 600 pounds of illegal fireworks and mortars.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 60 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 1,202 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 60 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,202 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 2 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 60 new deaths and 1,202 new cases of 2019 Novel Coronavirus (COVID-19). Forty people who died were over the age of 65 years old; 17 people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Forty-five people had underlying health conditions including 31 people over the age of 65 years old, 13 people between the ages of 41 to 65 years old, and one person between the ages of 18 and 40 years old. Two deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 57,118 positive cases of COVID-19 across all areas of LA County, and a total of 2,443 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,258 people (99 percent of the cases reported by Public Health) 41% of deaths occurred among Latino/Latinx residents, 28% among White residents, 17% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 52 cases and one death reported earlier were not LA County residents. As of today, 6,638 people who tested positive for COVID-19 (12% of positive cases) have been hospitalized at some point during their illness. There are 1,389 people who are currently hospitalized, 27% of these people are in the ICU and 18% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 633,000 individuals and 8% of people testing positive.

(U) Public Health joins the many voices expressing dismay, anger, and frustration at the murder of George Floyd by police, and supports the need for LA County residents to stand together against racism and violence. Because we are in the midst of a pandemic, everyone engaging in peaceful protest should always wear a face covering securely over their nose and mouth and keep six feet apart from others not in your household. Protestors who have had close contact with non-household members not wearing face coverings, should when possible, self-quarantine at their residence for 14 days and monitor themselves for COVID-19 symptoms. If they develop symptoms, they should call their healthcare provider and consider testing.

(U) The current Health Officer Order, Safer at Work and in the Community, allows for in-person dining at restaurants and hair salons to reopen once the establishments are able to implement the required distancing and infection control directives. The Health Officer Order specifically requires businesses to

follow the COVID-19 infection control protocols. As such, restaurant and hair salon owners and operators must complete and implement these protocols prior to reopening. Brewpubs, breweries, bars, pubs, craft distilleries, and wineries that do not offer sit-down, dine-in meals are still required to remain closed. Higher-risk businesses remain closed.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: Los Angeles County Announces 22 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 978 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 22 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 978 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 1 June 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 22 new deaths and 978 new cases of 2019 Novel Coronavirus (COVID-19). Sixteen people who died were over the age of 65 years old and six people who died were between the ages of 41 and 65 years old. Twenty-one people had underlying health conditions including 15 people over the age of 65 years old and six people between the ages of 41 to 65 years old.

(U) To date, Public Health has identified 55,968 positive cases of COVID-19 across all areas of LA County, and a total of 2,384 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,200 people (99 percent of the cases reported by Public Health) 41% of deaths occurred among Latino/Latinx residents, 28% among White residents, 17% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, six cases reported earlier were not LA County residents. As of today, 6,528 people who tested positive for COVID-19 (12% of positive cases) have been hospitalized at some point during their illness. There are 1,357 people who are currently hospitalized, 28% of these people are in the ICU and 18% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 612,000 individuals and 8% of people testing positive.

(U) Public Health supports the need for LA County residents to exercise their first amendment rights. There is, however, risk that these gatherings can become super-spreader events where a great deal of transmission of the COVID-19 virus can occur. Everyone engaging in peaceful protest should always wear a face covering over their nose and mouth and keep six feet apart from others not in your household.

(U) The current Health Officer Order, Safer at Work and in the Community, allows for in-person dining at restaurants and hair salons to reopen once the establishments are able to implement the required distancing and infection control directives. The Health Officer Order specifically requires businesses to follow the COVID-19 infection control protocols. As such, restaurant and hair salon owners and operators must complete and implement these protocols prior to reopening. Brewpubs, breweries, bars, pubs, craft distilleries, and wineries that do not offer sit-down, dine-in meals are still required to remain closed. Higher-risk businesses remain closed.

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC) Situation Report: Civil Unrest in the JRIC AOR – 1200 Hours, 1 June**, dated 1 June 2020.

(U//FOUO) The 25 May death of George Floyd in Minneapolis, Minnesota, has sparked nationwide protests, with some turning confrontational and leading to looting, arson, and riots, and calls for violence against law enforcement officers for perceived police brutality. On 30 May, California Governor Newsom announced a state of emergency in Los Angeles County and approved requests from Los Angeles and Los Angeles County to deploy the National Guard to assist the city and neighboring communities. In light of these nationwide demonstrations, and the ongoing potential for violent confrontations between demonstrators and police, this JRIC Situation Report provides situational awareness on notable violent, criminal incidents in the JRIC six-county AOR.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 48 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 2,112 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 48 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 2,112 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 30 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 48 new deaths and 2,112 new cases of 2019 Novel Coronavirus (COVID-19). The high number of cases are, in part, due to a backlog of test results being processed and also a new lab beginning to report results in a timely manner through the county's Electronic Laboratory Reporting (ELR) system. Thirty-six people who died were over the age of 65 years old and eight people who died were between the ages of 41 and 65 years old. Thirty-three people had underlying health conditions including 26 people over the age of 65 years old, and seven people between the ages of 41 to 65 years old.

(U) To date, Public Health has identified 53,651 positive cases of COVID-19 across all areas of LA County, and a total of 2,338 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,155 people (99 percent of the cases reported by Public Health); 40% of deaths occurred among Latino/Latinx residents, 28% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 23 cases reported earlier were not LA County residents. As of today, 6,486 people who tested positive for COVID-19 (13% of positive cases) have been hospitalized at some point during their illness. There are 1,415 people who are currently hospitalized, 28% of these people are in the ICU and 19% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 580,000 individuals and 8% of people testing positive.

(U) Los Angeles County received approval by the State on its variance. This variance allows the County to move through Stage 2 of the State's 4-stage Pandemic Roadmap at an accelerated rate as determined by our local Health Officer. Public Health has amended the current Health Officer Order, Safer at Work and in the Community, to allow in-person dining at restaurants and hair salons to reopen once the establishments are able to implement the required distancing and infection control directives. The directives are contained in sector-specific protocols that guide re-opening and are available online. Inspectors will continue to offer technical assistance as they monitor businesses for compliance with the Health Officer Order. Higher-risk businesses remain closed.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: Los Angeles County Announces 50 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,824 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 50 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,824 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 29 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 50 new deaths and 1,824 new cases of 2019 Novel Coronavirus (COVID-19). Some of the new cases reported are from a backlog of test results. Thirty-three people who died were over the age of 65 years old; 13 people who died were between the ages of 41 and 65 years old, and four people who died were between the ages of 18 and 40 years old. Forty people had underlying health conditions including 30 people over the age of 65 years old, seven people between the ages of 41 to 65 years old, and three people between the ages of 18 and 40 years old.

(U) To date, Public Health has identified 51,562 positive cases of COVID-19 across all areas of LA County, and a total of 2,290 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,112 people (99 percent of the cases reported by Public Health) 40% of deaths occurred among Latino/Latinx residents, 29% among White residents, 17% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 36 cases and one death reported earlier were not LA County residents. As of today, 6,430 people who tested positive for COVID-19 (13% of positive cases) have been hospitalized at some point during their illness. There are 1,462 people who are currently hospitalized, 27% of these people are in the ICU and 20% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 564,000 individuals and 8% of people testing positive.

(U) Now that the variance has been granted by the State, Public Health will be amending the current Health Officer Order, Safer at Work and in the Community, to allow for restaurants and hair salons to reopen only with the proper distancing and infection control protocols in place. All businesses must adhere to distancing and infection control protocols that provide safety for employees, customers and the County's most vulnerable residents before reopening. These protocols were developed to guide reopening and are available online. Inspectors will continue to monitor for compliance and ensure that all adhere to the Health Officer Order. Higher-risk businesses remain closed.

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence (JRIC) Snapshot: Nationwide Protests Over George Floyd Death Prompt Officer Safety Concerns**, dated 29 May 2020.

(U) The 25 May death of George Floyd, a 46-year-old Black man in Minneapolis, Minnesota, and the subsequent video circulating on social media depicting a White police officer kneeling on Floyd's neck on the ground while Floyd stated he couldn't breathe, has sparked nationwide protests this week, with some turning confrontational and leading to looting, arson, and riots, and calls for violence against law enforcement officers for perceived police brutality. All four Minneapolis police officers involved in the 25 May incident have been fired from the Minneapolis Police Department amid calls from the public for the officers to face criminal charges. On 29 May, the Minnesota Bureau of Criminal Apprehension arrested former Minneapolis Police Officer Derek Chauvin, who was seen in video with his knee on Floyd prior to his death.

(U//FOUO) In light of the recent nationwide demonstrations and the potential for violent confrontations between demonstrators and police, the JRIC assesses a heighted threat environment and is providing the following officer safety considerations.

(U) Please provide feedback at jric@jric.org.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 48 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,094 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 28 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 48 new deaths and 1,094 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-one people who died were over the age of 65 years old; 10 people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Thirty-three people had underlying health conditions including 24 people over the age of 65 years old, eight people between the ages of 41 to 65 years old, and one person between the ages of 18 and 40 years old. Six deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 49,774 positive cases of COVID-19 across all areas of LA County, and a total of 2,241 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,062 people (99 percent of the cases reported by Public Health) 40% of deaths occurred among Latino/Latinx residents, 29% among White residents, 17% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 20 cases and one death reported earlier were not LA County residents. As of today, 6,350 people who tested positive for COVID-19 (13% of positive cases) have been hospitalized at some point during their illness. There are 1,477 people who are currently hospitalized, 27% of these people are in the ICU and 19% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 531,000 individuals and 8% of people testing positive.

(U) The Health Officer Order continues to require specific higher-risk businesses to remain closed and prohibit dining in at restaurants. Restaurants are still allowed to serve food to customer via delivery, take-out or drive-thru. Public and private gatherings of any number of people outside of a single household unit are still not permitted except for public protests and faith-bases services as described in the Order. Everyone must continue to follow distancing and infection control protocols and wear a clean cloth face covering that securely covers both your nose and mouth when in contact with other people not in your household.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 53 new deaths and 933 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-five people who died were over the age of 65 years old; 14 people who died were between the ages of 41 and 65 years old, and two people who died were between the ages of 18 and 40 years old. Forty-three people had underlying health conditions including 30 people over the age of 65 years old, 12 people between the ages of 41 to 65 years old, and one person between the ages of 18 and 40 years old. Two deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 48,700 positive cases of COVID-19 across all areas of LA County, and a total of 2,195 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 2,024 people (99 percent of the cases reported by Public Health) 40% of deaths occurred among Latino/Latinx residents, 29% among White residents, 17% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 55 cases and one death reported earlier were not LA County residents. As of today, 6,283 people who tested positive for COVID-19 (13% of positive cases) have been hospitalized at some point during their illness. There are 1,477 people who are currently hospitalized, 27% of these people are in the ICU and 19% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 517,000 individuals and 8% of people testing positive.

(U) The new Health Officer Order issued yesterday, called Safer at Work and in the Community, allows for the reopening of houses of worship, office worksites, in-store shopping at retail establishments, including indoor malls and shopping centers, flea markets, swap meets and drive-in movie theaters. Houses of worship can operate at 25% capacity or with a maximum of 100 people, whichever is lower, and retail establishments can operate at 50% capacity. Pools, hot tubs and saunas that are in a multi-unit residence or part of a homeowners' association can also open. Political protests with limited numbers of participants are also allowed. This Order aligns the County with the State's Orders. Everyone must continue to follow distancing and infection control protocols and wear a clean cloth face covering that securely covers both your nose and mouth when in contact with other people not in your household. Public and private gatherings of any number of people outside of a single household unit are still not permitted except for public protests and faith-bases services as described in the Order. The Health Officer Order continues to

require specific higher-risk businesses to remain closed and prohibit dining in at restaurants. Restaurants are still allowed to serve food to customer via delivery, take-out or drive-thru.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 27 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,843 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 27 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,843 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 26 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 27 new deaths and 1,843 new cases of 2019 Novel Coronavirus (COVID-19). Although this is the highest number of new cases reported in a day, some of these cases are from a backlog of test results. Twenty people who died were over the age of 65 years old; six people who died were between the ages of 41 and 65 years old, and one person who died was between the ages of 18 and 40 years old. Seventeen people had underlying health conditions including 11 people over the age of 65 years old and six people between the ages of 41 to 65 years old.

(U) To date, Public Health has identified 47,822 positive cases of COVID-19 across all areas of LA County, and a total of 2,143 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,974 people (99 percent of the cases reported by Public Health) 39% of deaths occurred among Latino/Latinx residents, 29% among White residents, 17% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, thirty-nine cases reported earlier were not LA County residents. As of today, 6,195 people who tested positive for COVID-19 (13% of positive cases) have been hospitalized at some point during their illness. There are 1,443 people who are currently hospitalized, 28% of these people are in the ICU and 19% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 514,000 individuals and 8% of people testing positive.

(U) Of the 2,143 total deaths in LA County, 47% were in skilled nursing facilities. Testing capacity continues to increase across skilled nursing facilities in LA County with support from Public Health, the Los Angeles County Department of Health Services and the City of Los Angeles. As of this Friday, 157 skilled nursing facilities have tested all residents and staff, and an additional 68 are being scheduled. Public Health continues to schedule appointments with other skilled nursing facilities to complete testing, conduct on-site inspections and survey bed capacity, staffing capacity and availability of personal protective equipment.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 46 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,204 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 46 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,204 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 21 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 46 new deaths and 1,204 new cases of 2019 Novel Coronavirus (COVID-19). Twenty-eight people who died were over the age of 65 years old and 12 people who died were between the ages of 41 to 65 years old. Thirty people had underlying health conditions including 20 people over the age of 65 years old and 10 people between the ages of 41 to 65 years old. Three deaths were reported by the City of Long Beach and three deaths were reported by the City of Pasadena.

(U) To date, Public Health has identified 42,037 positive cases of COVID-19 across all areas of LA County, and a total of 2,016 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,863 people (99 percent of the cases reported by Public Health) 39% of deaths occurred among Latinx residents, 29% among White residents, 17% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 24 cases reported earlier were not LA County residents. As of today, 6,026 people who tested positive for COVID-19 (14% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for over 403,000 individuals and 9% of people testing positive.

(U) Current Health Officer Orders allow for retailers and manufacturers, select recreational facilities, and beaches to reopen and require specific higher-risk businesses to remain closed. Retailers remain closed to public entry and beaches are open for active recreation only. While many outdoor spaces are open, public and private gatherings of any number of people outside of a single household unit are still not permitted. Everyone must continue to follow distancing and infection control protocols, stay at least six feet apart and wear a clean cloth face covering that securely covers both your nose and mouth when in contact with other people not in your household. LA County is in stage two of the five-stage Roadmap to Recovery and until the final stage five is reached, Health Officer Orders and directives will continue to ensure that we slow spread of COVID-19 to prevent an overwhelming surge of COVID-19 cases at healthcare facilities.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: Los Angeles County Announces 76 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,183 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 76 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,183 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 19 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 76 new deaths and 1,183 new cases of 2019 Novel Coronavirus (COVID-19). Fifty-two people who died were over the age of 65 years old; 19 people who died were between the ages of 41 to 65 years old, and two people who died were between the ages of 18 and 40 years old. Sixty-four people had underlying health conditions including 48 people over the age of 65 years old, 14 people between the ages of 41 to 65 years old, and two people between the ages of 18 and 40 years old. One death was reported by the City of Long Beach and two deaths were reported by the City of Pasadena.

(U) To date, Public Health has identified 39,573 positive cases of COVID-19 across all areas of LA County, and a total of 1,913 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,722 people (99 percent of the cases); 39% of deaths occurred among Latinx residents, 29% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 61 cases and two deaths reported earlier were not LA County residents. As of today, 5,914 people who tested positive for COVID-19 (15% of positive cases) have been hospitalized at some point during their illness. There are 1,549 people who are currently hospitalized, 27% of these people are in the ICU and 19% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 359,000 individuals and 9% of people testing positive.

(U) The current Health Officer Order replaces the previous Health Officer Order and allows for retailers and manufacturers, select recreational facilities, and beaches to reopen. Retailers remain closed to public entry and beaches are open for active recreation only. Retail businesses, manufacturing and logistic businesses are required to prepare, implement and post their plan for adhering to directives including distancing and infection control practices that protect both employees and customers. Employees who can work from home should be doing so, and any staff who are in a group at greater risk of serious illness from COVID-19, like older adults and people with underlying health conditions, should be assigned work that can be done from home, if possible. All employees need to be given a written copy of the protocol for keeping them safe while working. Everyone must follow distancing and infection control protocols, stay at least six feet apart and wear a clean cloth face covering that securely covers both your nose and mouth when in contact with other people not in your household.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 18 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 477 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 18 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 18 new deaths and 477 new cases of 2019 Novel Coronavirus (COVID-19). Fifteen people who died were over the age of 65 years old and three people who died were between the ages of 41 to 65 years old. Fifteen people had underlying health conditions including 12 people over the age of 65 years old and three people between the ages of 41 to 65 years old.

(U) To date, Public Health has identified 38,451 positive cases of COVID-19 across all areas of LA County, and a total of 1,839 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,706 people (99 percent of the cases); 39% of deaths occurred among Latinx residents, 29% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. As of today, 5,835 people who tested positive for COVID-19 (15% of positive cases) have been hospitalized at some point during their illness. There are 1,570 people who are currently hospitalized, 27% of these people are in the ICU and 20% are on ventilators.

(U) Testing capacity continues to increase in LA County, with testing results available for over 350,000 individuals and 9% of people testing positive. Testing capacity also continues to increase across skilled nursing facilities in LA County. With the support from Public Health, the Los Angeles County Department of Health Services and the City of Los Angeles, 141 skilled nursing facilities have tested all residents and staff. Of the over 3,600 people tested, 402 (11%) tested positive for COVID-19 and only 57 (14%) of the people who tested positive were symptomatic. This highlights the number of people, in any setting, who may be positive for COVID-19 and have no symptoms. Public Health continues to schedule appointments with other skilled nursing facilities to complete testing, conduct on-site inspections and survey bed capacity, staffing capacity and availability of personal protective equipment.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 29 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 694 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 29 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 694 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 17 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 29 new deaths and 694 new cases of 2019 Novel Coronavirus (COVID-19). Twenty-four people who died were over the age of 65 years old, four people who died were between the ages of 41 to 65 years old and one person between the ages of 18 to 40 years old. Sixteen people had underlying health conditions including 14 people over the age of 65 years old, one person between the ages of 41 to 65 years old and one person between the ages of 18 to 40 years old.

(U) To date, Public Health has identified 37,974 positive cases of COVID-19 across all areas of LA County, and a total of 1,821 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,688 people (99 percent of the cases); 39% of deaths occurred among Latinx residents, 29% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 23 cases and one death reported earlier were not LA County residents.

(U) As of today, 5,816 people who tested positive for COVID-19 (16% of positive cases) have been hospitalized at some point during their illness. There are 1,648 people who are currently hospitalized, 26% of these people are in the ICU and 19% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 309,000 individuals and 11% of people testing positive.

(U) The Health Officer Order issued earlier this week, replaced the previous Health Officer Order and allows for retailers and manufacturers, select recreational facilities, and beaches to reopen. All retailers can reopen for curbside, door-side, outside pickup, or delivery only and manufacturing and logistic businesses that supply retail businesses can also reopen. Before retail businesses, manufacturing and logistic businesses reopen, they are required to prepare, implement and post their plan for adhering to directives including distancing and infection control practices that protect both employees and customers. Select recreational facilities, community gardens, and beaches for active recreation are now open. Everyone must continue to practice staying at least six feet apart and wearing a clean cloth face covering that securely covers both your nose and mouth when you are in contact with other people not in your household. This Order continues to require that specific higher-risk businesses remain closed and prohibits public and private gatherings of any number of people outside of a single household unit.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 47 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 962 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 47 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 962 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 15 May 2020.

(U) The LACoDPH has confirmed 47 new deaths and 962 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-seven people who died were over the age of 65 years old and five people who died were between the ages of 41 to 65 years old. Thirty-two people had underlying health conditions including 30 people over the age of 65 years old and two people between the ages of 41 to 65 years old. Five deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 36,259 positive cases of COVID-19 across all areas of LA County, and a total of 1,755 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,615 people (99 percent of the cases); 38% of deaths occurred among Latinx residents, 29% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 32 cases and one death reported earlier were not LA County residents. As of today, 5,727 people who tested positive for COVID-19 (16% of positive cases) have been hospitalized at some point during their illness. There are 1,733 people who are currently hospitalized, 25% of these people are in the ICU and 18% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 282,000 individuals and 11% of people testing positive.

(U) Public Health continues to track health outcomes by race, ethnicity and income level data of people who have been tested, hospitalized and died from COVID-19. African Americans, Native Hawaiian/Pacific Islanders, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Native Hawaiian/Pacific Islanders have a death rate of 89, African Americans have a death of 18, and people living in communities with high levels of poverty have a death rate of 29. These rates are significantly higher than the death rate of other races and ethnicities. The death rate for people who identify as Latinx is 16, for Asian is 12, and for White is 9. Public Health continues collaboration with community partners to improve testing, connection to care and communications to the communities experiencing these inequitable outcomes.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 51 New Deaths Related to COVID-19 - 925 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 51 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 925 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 14 May 2020.

(U) The LACoDPH has confirmed 51 new deaths and 925 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-five people who died were over the age of 65 years old and 12 people who died were between the ages of 41 to 65 years old. Forty-three people had underlying health conditions including 32 people over the age of 65 years old and 11 people between the ages of 41 to 65 years old. Three deaths were reported by the City of Pasadena and one death by the City of Long Beach.

(U) To date, LACoDPH has identified 35,329 positive cases of COVID-19 across all areas of LA County, and a total of 1,709 deaths. Ninety-two percent of people who died had underlying health conditions and 40% were between 18 and 65 years old. Of those who died, information about race and ethnicity is available for 1,573 people (99 percent of the cases); 38% of deaths occurred among Latinx residents, 29% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 24 cases and one death reported earlier were not LA County residents. As of today, 5,660 people who tested positive for COVID-19 (16% of positive cases) have been hospitalized at some point during their illness. There are 1,742 people who are currently hospitalized, 26% of these people are in the ICU and 19% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for over 272,000 individuals and 11% of people testing positive.

(U) A new Health Officer Order is being issued today that replaces the previous Health Officer Order and allows for lower-risk businesses and select recreational facilities and beaches to reopen. All retailers that are not located in an indoor mall or shopping center are able to reopen for curbside, door-side, outside pickup, or delivery only. The public is not allowed to go inside. Manufacturing and logistic businesses that supply retail businesses may also reopen. Before retail businesses, manufacturing and logistic businesses reopen, they are required to prepare, implement and post their plan for adhering to directives including distancing and infection control practices that protect both employees and customers. Beaches can reopen for active recreation including running, walking, swimming and surfing. However, group sports and activities like picnicking and sunbathing are not permitted, and parking lots, bike paths, piers, and boardwalks, remain closed. Select recreational facilities including golf courses, tennis courts, shooting and archery ranges, equestrian centers and community gardens can also reopen. Everyone must continue to practice physical distancing of at least six feet apart and wear a clean cloth face covering that securely

covers both your nose and mouth when around people outside of your household. This Order continues to require that specific higher-risk businesses remain closed and prohibits public and private gatherings of any number of people occurring outside a single household or living unit.

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 47 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,264 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 13 May 2020.

(U) The LACoDPH has confirmed 47 new deaths and 1,264 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-three people who died were over the age of 65 years old; nine people who died were between the ages of 41 to 65 years old, and one person who died was between the ages of 18 to 40 years old. Thirty-nine people had underlying health conditions including 30 people over the age of 65 years old, eight people between the ages of 41 to 65 years old and one person between the ages of 18 to 40 years old. Three deaths were reported by the City of Long Beach and one death by the City of Pasadena.

(U) To date, LACoDPH has identified 34,428 positive cases of COVID-19 across all areas of LA County, and a total of 1,659 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,529 people (99 percent of the cases); 38% of deaths occurred among Latinx residents, 29% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 16 cases and one death reported earlier were not LA County residents. As of today, 5,596 people who tested positive for COVID-19 (16% of positive cases) have been hospitalized at some point during their illness. There are 1,763 people who are currently hospitalized, 25% of these people are in the ICU and 17% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 264,000 individuals and 11% of people testing positive.

(U) A new Health Officer Order is being issued today that replaces the previous Health Officer Order and allows for lower-risk businesses and select recreational facilities and beaches to reopen. All retailers that are not located in an indoor mall or shopping center are able to reopen for curbside, door-side, outside pickup, or delivery only. The public is not allowed to go inside. Manufacturing and logistic businesses that supply retail businesses may also reopen. Before retail businesses, manufacturing and logistic businesses reopen, they are required to prepare, implement and post their plan for adhering to directives including distancing and infection control practices that protect both employees and customers. Beaches can reopen for active recreation including running, walking, swimming and surfing. However, group sports and activities like picnicking and sunbathing are not permitted, and parking lots, bike paths, piers, and boardwalks, remain closed. Select recreational facilities including golf courses, tennis courts, shooting and archery ranges, equestrian centers and community gardens can also reopen. Everyone must continue to

practice physical distancing of at least six feet apart and wear a clean cloth face covering that securely covers both your nose and mouth when around people outside of your household. This Order continues to require that specific higher-risk businesses remain closed and prohibits public and private gatherings of any number of people occurring outside a single household or living unit.

Lone Wolf ISIS Plot Thwarted in Spain

- On 8 May, the FBI and Spanish Police arrested a radicalized, ISIS-linked Moroccan suspect believed to be planning "lone wolf" attacks in Barcelona.
- The unidentified suspect, who maintained a low profile for years, began searching for target locations after Spain issued a national lockdown over the coronavirus epidemic.

(U) NATIONAL

Michigan Man Makes Bomb Threat to Test FBI Response

- On 11 May, federal authorities charged Joseph Todd Kowalczyk, 20, with transmitting a threat to injure after posting a threat on social media to detonate 10 bombs in Macomb County.
- Kowalczyk's threat referenced the 1993 FBI siege at the Branch Davidian compound in Waco, Texas.
- FBI investigators arrested Kowalczyk at his residence and did not recover any weapons or explosives. Kowalczyk said he was "testing the government" and did not intend to carry out the attack.

Florida Student Arrested for Threatening Mass Shooting at Virginia Tech

- On 11 May, Bowling Green Police Department arrested James Kelly, 36, for threatening to conduct a mass shooting at the Virginia Polytechnic Institute and State University.
- Kelly sent a manifesto to the University of Florida newspaper, demanding a change to an article written about his history of harassment and violent threats, or they will be blamed "for the needless deaths of all future VT students."

Subject: (U) LACoDPH News Release: Los Angeles County Announces 45 New Deaths Related to COVID-19 - 961 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 45 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 961 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 12 May 2020.

(U) The LACoDPH has confirmed 45 new deaths and 961 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-five people who died were over the age of 65 years old and nine people who died were between the ages of 41 to 65 years old. Forty-one people had underlying health conditions including 32 people over the age of 65 years old and nine people between the ages of 41 to 65 years old. One death was reported by the City of Long Beach.

(U) To date, LACoDPH has identified 33,180 positive cases of COVID-19 across all areas of LA County, and a total of 1,613 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,490 people (99 percent of the cases); 38% of deaths occurred among Latinx residents, 29% among White residents, 18% among Asian residents, 13% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 39 cases and one death reported earlier were not LA County residents. As of today, 5,508 people who tested positive for COVID-19 (17% of positive cases) have been hospitalized at some point during their illness. There are 1,731 people who are currently hospitalized, 26% of these people are in the ICU and 18% are on ventilators. Testing capacity continues to increase in LA County, with testing results available for nearly 253,000 individuals and 11% of people testing positive.

(U) Currently, LA County is in stage two of the five-stage roadmap to recovery which allows florists and some retailers to offer curbside pickup only, car dealership showrooms to reopen with appropriate physical distancing and infection control measures, and trails and golf courses to open with pro shops remaining closed to public entry. As a reminder, retail establishments are closed to all public entry and must ensure compliance with all protocols before reopening. Additional restrictions may be lifted later this week to allow for reopening additional retailers for curbside pickup, select manufacturers, and additional recreational facilities. Until the final stage five is reached, Health Officer Orders and directives will continue to ensure the slow of spread of COVID-19 to prevent an overwhelming surge of COVID-19 cases at healthcare facilities.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 39 New Deaths Related to COVID-19 - 591 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 39 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 591 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 11 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 39 new deaths and 591 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-three people who died were over the age of 65 years old; four people who died were between the ages of 41 to 65 years old, and one person who died was between the ages of 18 and 40 years old. Twenty-five people had underlying health conditions including 22 people over the age of 65 years old and three people between the ages of 41 to 65 years old. One death was reported by the City of Long Beach.

(U) To date, Public Health has identified 32,258 positive cases of COVID-19 across all areas of LA County, and a total of 1,569 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,445 people (99 percent of the cases); 38% of deaths occurred among Latinx residents, 29% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 10 cases reported earlier were not LA County residents. As of today, 5,437 people who tested positive for COVID-19 (17% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for over 240,000 individuals and 12% of people testing positive. This is a correction to yesterday's count of over 245,000 individuals tested and is due to the inclusion of serology test results.

(U) Public Health continues tracking the number of positive cases and deaths among healthcare workers related to the COVID-19 pandemic response. Public Health has confirmed 20 people who died from COVID-19 worked in a healthcare setting; fourteen people who died worked in skilled nursing and assisted living facilities, three people worked in hospitals, one person worked in a correctional facility, and for two people who died, their work setting was not specified. A total of 3,614 confirmed cases of COVID-19 occurred among healthcare workers and first responders; this is an additional 636 new cases reported since the previous week. Seven percent of healthcare workers with COVID-19 have been hospitalized. Forty-six percent of cases are among nurses, though cases have been identified among a range of occupational roles, including caregivers, people who work in administration, physicians and medical assistants. About 58% of these cases do not know or did not report how they were exposed. However, 79% of healthcare workers with known exposure were exposed in a healthcare facility. Healthcare workers who are positive

worked at 25 different occupational settings, and the vast majority of cases are among healthcare workers from skilled nursing facilities and hospitals.

Subject: LACoDPH News Release: Los Angeles County Announces 18 New Deaths Related to COVID-19 - 484 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Do not click on links or open attachments unless you recognize the sender and know the content is safe.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 18 New Deaths Related to COVID-19 - 484 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 10 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 18 new deaths and 484 new cases of 2019 Novel Coronavirus (COVID-19). Twelve people who died were over the age of 65 years old and three people who died were between the ages of 41 to 65 years old. Ten people had underlying health conditions including nine people over the age of 65 years old and one person between the ages of 41 to 65 years old. Three deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 31,677 positive cases of COVID-19 across all areas of LA County, and a total of 1,530 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,412 people (99 percent of the cases); 38% of deaths occurred among Latinx residents, 29% among White residents, 19% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, four cases reported earlier were not LA County residents. As of today, 5,410 people who tested positive for COVID-19 (17% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for over 245,000 individuals and 11% of people testing positive.

(U) Public Health issued a five-stage roadmap to recovery that describes a phased approach to slowly relaxing select directives of the Safer at Home Order and a reopening process for certain business sectors. Phase two begins today and allows florists and some retailers to offer curbside pickup only. Car dealership showrooms can reopen with appropriate physical distancing and infection control measures. Trails and golf courses can also open, but pro shops will remain closed and everyone using them must adhere to physical distancing and use cloth face coverings. Later next week, additional restrictions may be lifted to include other retailers, manufacturers, and recreational facilities.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 44 New Deaths Related to COVID-19 - 1011 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 9 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 44 new deaths and 1011 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-four people who died were over the age of 65 years old; seven people who died were between the ages of 41 to 65 years old, and one person who died was between the ages of 18 and 40 years old. Twenty-nine people had underlying health conditions including 25 people over the age of 65 years old and four people between the ages of 41 to 65 years old. Two deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 31,197 positive cases of COVID-19 across all areas of LA County, and a total of 1,512 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,397 people (99 percent of the cases); 38% of deaths occurred among Latinx residents, 29% among White residents, 19% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 110 cases reported earlier were not LA County residents. As of today, 5,363 people who tested positive for COVID-19 (17% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for nearly 227,000 individuals and 12% of people testing positive.

(U) Public Health issued a five-stage roadmap to recovery that describes a phased approach to slowly relaxing select directives of the Safer at Home Order and a reopening process for certain business sectors. Phase two begins today and allows florists and some retailers to offer curbside pickup only. Car dealership showrooms can reopen with appropriate physical distancing and infection control measures. Trails and golf courses can also open, but pro shops will remain closed and everyone using them must adhere to physical distancing and use cloth face coverings. Later next week, additional restrictions may be lifted to include other retailers, manufacturers, and recreational facilities.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 51 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 883 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 8 May 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 51 new deaths and 883 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-nine people who died were over the age of 65 years old, eight people who died were between the ages of 41 to 65 years old, and two people who died were between the ages of 18 and 40 years old. Forty-three people had underlying health conditions including 36 people over the age of 65 years old, six people between the ages of 41 to 65 years old and one person between the ages of 18 and 40 years old. Two deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 30,296 positive cases of COVID-19 across all areas of LA County, and a total of 1,468 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,352 people (99 percent of the cases); 39% of deaths occurred among Latinx residents, 29% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 14 cases and one death reported earlier were not LA County residents. As of today, 5,298 people who tested positive for COVID-19 (19% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for nearly 215,000 individuals and 12% of people testing positive.

(U) Public Health issued a five-stage roadmap to recovery that describes a phased approach to slowly relaxing select directives of the Safer at Home Order and a reopening process for certain business sectors. Phase two begins today and allows florists and some retailers to offer curbside pickup only. Car dealership showrooms can reopen with appropriate physical distancing and infection control measures. Trails and golf courses can also open, but pro shops will remain closed and everyone using them must adhere to physical distancing and use cloth face coverings. Subject: (U) LACoDPH News Release: Los Angeles County Announces 51 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 815 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 51 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 815 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 7 May 2020.

(U) The LACoDPH has confirmed 51 new deaths and 815 new cases of 2019 Novel Coronavirus (COVID-19). Forty-two people who died were over the age of 65 years old and six people who died were between the ages of 41 to 65 years old. Thirty-five people had underlying health conditions including 32 people over the age of 65 years old and three people between the ages of 41 to 65 years old. Two deaths were reported by the City of Long Beach.

(U) To date, LACoDPH has identified 29,427 positive cases of COVID-19 across all areas of LA County, and a total of 1,418 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,309 people (99 percent of the cases); 38% of deaths occurred among Latinx residents, 28% among White residents, 18% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 32 cases reported earlier were not LA County residents. As of today, 5,238 people who tested positive for COVID-19 (19% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for nearly 208,000 individuals and 12% of people testing positive.

(U) Yesterday, LACoDPH issued a five-stage roadmap to recovery that describes a phased approach to relaxing select directives of the Safer at Home Order and a reopening process for certain business sectors. The County will begin stage two, tomorrow, Friday, May 8, that allows florists and some retailers to offer curbside pickup. Car dealerships, golf courses and trails will also open with appropriate safeguards in place. Physical distancing and infection control protocols must be adhered to and cloth facing coverings must be worn. Employers are required to provide a cloth face covering for all employees to wear while performing duties that involve contact with others and limit the number of people entering businesses so that a physical distance of at least 6 feet can be maintained at all times by employees and customers. Employers must allow for frequent handwashing or have sanitizer available when hand washing isn't possible and may also need to stagger employee shifts to ensure that they can work at a safe distance from one another

while on site. The public will be required to follow the measures put in place by the businesses and wear a cloth face covering to enter the establishments or secure purchases curbside. Later next week additional restrictions may be lifted to include other retailers, manufacturers, and recreational facilities.

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 55 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – Public Health Unveils Five-Stage Recovery Roadmap**, dated 6 May 2020.

(U) The LACoDPH has confirmed 55 new deaths and 851 new cases of 2019 Novel Coronavirus (COVID-19). Forty-one people who died were over the age of 65 years old and 12 people who died were between the ages of 41 to 65 years old. Thirty-eight people had underlying health conditions including 27 people over the age of 65 years old and 11 people between the ages of 41 to 65 years old. One death was reported by the City of Long Beach and one death by the City of Pasadena.

(U) To date, LACoDPH has identified 28,644 positive cases of COVID-19 across all areas of LA County, and a total of 1,367 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,260 people (99 percent of the cases); 39% of deaths occurred among Latinx residents, 28% among White residents, 19% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 22 cases and one death reported earlier were not LA County residents. As of today, 5,142 people who tested positive for COVID-19 (19% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for nearly 192,000 individuals and 13% of people testing positive.

(U) As recovery planning continues, LACoDPH is issuing a five-stage roadmap to recovery roadmap to recovery that describes a phased approach to relaxing select directives of the Safer at Home Order and a reopening process for certain business sectors. LA County is currently in stage one of the Safer at Home recovery stage. However, the County anticipates beginning stage two as soon as Friday, May 8 by allowing florists and some retailers to offer curbside pickup. Car dealerships, golf courses and trails can also open with appropriate safeguards in place. Physical distancing and infection control protocols must be adhered to and cloth facing coverings must be worn. Later next week additional restrictions will be lifted to include many retailers, manufacturers, and other recreational facilities. The next three stages include the potential opening in phases of higher-risk businesses like movie theaters, schools, colleges and universities, followed

by conventions and spectator events, to finally normal operations. Each sector will have safe reopening protocols that must be adhered to.

Subject: (U//FOUO) JRIC Snapshot: Widespread Food Shortages Unlikely; Specialized Crops, Perishables May Be Adversely Affected by COVID-19

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

Attachment Link(s):

- 200505 FOUO JRIC Snapshot - Widespread Food Shortages Unlikely; Specialized Crops, Perishables May Be Adversely Affected by COVID-19.pdf (1 page)

Link(s) will expire on 6/4/2020

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence (JRIC) Snapshot: Widespread Food Shortages Unlikely; Specialized Crops, Perishables May Be Adversely Affected by COVID-19**, dated 5 May 2020.

(U//FOUO) COVID-19 pandemic-related impacts to the stability of the US food supply can have economic and social implications that may threaten national security. Widespread food shortages are unlikely, but supplies of perishable and specialized crops and products may be temporarily disrupted as producers, transporters, processors, packagers, and distributors adapt to unanticipated changes, including the demand shift from institutions/restaurants to retail grocers; labor shortages in fields and processing plants; and logistical challenges. Media reporting could fuel consumer panic over perceived food shortages, and provoke localized public disorder incidents.

(U//FOUO) Highly perishable foods such as produce, dairy, and meat depend heavily on humans for harvesting, processing, and packaging, making them more vulnerable to COVID-19 effects on labor supply than mechanized staple crops such as wheat, corn, and soybeans. Reduced agricultural output will also likely lead to lowered availability of animal feed in the near future. Temporary moratoriums by other countries on some cash crop exports have produced price spikes and fears of future shortages on world markets.

(U) Please provide feedback at jric@jric.org.

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 58 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,638 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 5 May 2020.

(U) The LACoDPH has confirmed 58 new deaths and 1,638 new cases of 2019 Novel Coronavirus (COVID-19). Forty-three people who died were over the age of 65 years old, 10 people who died were between the ages of 41 to 65 years old, and one person who died was between the ages of 18 to 40 years old. Forty-five people had underlying health conditions including 38 people over the age of 65 years old and seven people between the ages of 41 to 65 years old. Four deaths were reported by the City of Pasadena.

(U) To date, LACoDPH has identified 27,815 positive cases of COVID-19 across all areas of LA County, and a total of 1,313 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,201 people (99 percent of the cases); 38% of deaths occurred among Latinx residents, 28% among White residents, 19% among Asian residents, 12% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 40 cases and one death reported earlier were not LA County residents. As of today, 5,081 people who tested positive for COVID-19 (19% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for nearly 183,000 individuals and 13% of people testing positive.

Colorado Man Planning Armed Protest Arrested for Pipe Bombs

- On 1 May, federal authorities arrested Bradley Bunn, 53, after discovering pipe bombs in his residence during the service of a search warrant; Bunn came to the attention of law enforcement after organizing a 1 May armed protest to end Colorado's coronavirus restrictions.
- Bunn faces up to 10 years in prison and a $250,000 fine if convicted.

Michigan Security Guard Fatally Shot after Enforcing Face Mask Policy

- On 1 May, Calvin Munerlyn, 43, a security guard for a Family Dollar store in Flint, Michigan, was fatally shot after he refused to let a customer's daughter in the store without wearing a mask.
- Following a dispute, the customer left and returned with two men, one of whom shot Munerlyn in the back of the head.
- All three face first-degree premeditated murder and firearm charges; authorities are searching for the two men who are considered armed and dangerous.

Houston Police Helicopter Crash Kills One Officer

- On 2 May, a Houston police helicopter crashed into an apartment complex as it responded to a call to search for bodies in a bayou, killing Tactical Flight Officer Jason Knox and critically wounding the pilot, Senior Police Officer Chase Cormier.
- The NTSB, FAA, and Houston police are investigating the crash.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 28 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 568 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 28 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 568 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 4 May 2020.

(U) The LACoDPH has confirmed 28 new deaths and 568 new cases of 2019 Novel Coronavirus (COVID-19). Twenty-two people who died were over the age of 65 years old and four people who died were between the ages of 41 to 65 years old. Twenty-two people had underlying health conditions including 18 people over the age of 65 years old and four people between the ages of 41 to 65 years old. Two deaths were reported by the City of Pasadena.

(U) To date, LACoDPH has identified 26,217 positive cases of COVID-19 across all areas of LA County, and a total of 1,256 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 1,148 people (99 percent of the cases); 38% of deaths occurred among Latinx residents, 29% among White residents, 19% among Asian residents, 13% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 13 cases and one death reported earlier were not LA County residents. As of today, 5,019 people who tested positive for COVID-19 (19% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for nearly 173,000 individuals and 13% of people testing positive.

Texas Man Sentenced for Threats against President Trump

- On 1 May, Mickael Gedlu, 36, was sentenced to 18 months in federal prison for threatening to assassinate President Trump.
- Between December 2018 and June 2019, Gedlu made several threats against President Trump on social media.
- In a separate 31 May 2018 incident, Gedlu stood outside a fundraiser in Dallas with a "Kill Trump" sign.

Kansas Officer Killed in Shooting

- On 3 May, an unnamed suspect fatally shot Overland Park Police Officer Mike Mosher, 37, in a shootout at the termination of a pursuit; the suspect died at the scene.
- Officer Mosher was in uniform on his way into work when he observed a hit-and-run and initiated the pursuit.
- Authorities have not announced a motive or suspect information.

False Bomb Threat Temporarily Shuts Down Alaska Airport

- On 2 May, authorities diverted a Taiwan-bound China Airlines cargo plane to the Ted Stevens Anchorage International Airport following a bomb threat against the aircraft.
- FBI and Anchorage police moved the plane to a remote section of the airport and cleared it; there were no explosives.
- Authorities do not believe there is any continuing threat to the community, but are investigating the source of the threat.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 56 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 1,541 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 56 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,541 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 29 April 2020.

(U) The LACoDPH has confirmed 56 new deaths and 1,541 new cases of 2019 Novel Coronavirus (COVID-19). This is the highest number of new cases reported. Forty-one people who died were over the age of 65 years old, nine people who died were between the ages of 41 to 65 years old, and two people who died were between the ages of 18 and 40 years old. Forty-two people had underlying health conditions including 34 people over the age of 65 years old, six people between the ages of 41 to 65 years old, and two people between the ages of 18 and 40 years old. Two deaths were reported by the City of Long Beach and two deaths by the City of Pasadena.

(U) To date, LACoDPH has identified 22,485 positive cases of COVID-19 across all areas of LA County, and a total of 1,056 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 977 people (99 percent of the cases); 38% of deaths occurred among Latinx residents, 28% among White residents, 18% among Asian residents, 14% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 32 cases reported earlier were not LA County residents. As of today, 4,715 people who tested positive for COVID-19 (22% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for over 139,000 individuals and 14% of people testing positive.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: Los Angeles County Announces 29 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 900 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Announces 29 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 900 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 27 April 2020.

(U) The LACoDPH confirmed 29 new deaths and 900 new cases of 2019 Novel Coronavirus (COVID-19). Twenty-five people who died were over the age of 65 years old and three people who died were between the ages of 41 to 65 years old. Nineteen people had underlying health conditions including 18 people over the age of 65 years old and one person between the ages of 41 to 65 years old. One death was reported by the City of Pasadena.

(U) To date, LACoDPH has identified 20,417 positive cases of COVID-19 across all areas of LA County, and a total of 942 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 865 people (98 percent of the cases); 37% of deaths occurred among Latinx residents, 28% among White residents, 18% among Asian residents, 14% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans, Native Hawaiian/Pacific Islander, and people living in communities with high levels of poverty continue to have the highest rate of death per 100,000 people for COVID-19 when compared to other groups. Upon further investigation, 11 cases reported earlier were not LA County residents. As of today, 4,403 people who tested positive for COVID-19 (23% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for almost 124,000 individuals and 14% of people testing positive. Public Health will launch an interactive dashboard that will provide an overview on COVID-19 testing, cases and deaths along with maps and graphs showing testing, cases and death data by community poverty level, age, sex and race/ethnicity.

(U) Given the essential role of healthcare workers during the COVID-19 pandemic, Public Health is tracking their numbers of positive cases and deaths. Public Health has confirmed 11 people who died from COVID-19 worked in a healthcare setting and eight of the people who died worked in skilled nursing facilities. One thousand nine hundred and sixty-eight confirmed cases of COVID-19 occurred among healthcare workers and first responders and about 8% of these cases have been hospitalized. Forty-three percent of cases are among nurses, 5% are among physicians and 5% are among caregivers, receptionists, patient services, medical assistants, first responders and people working in administration. About 52% of these cases do not know or did not report how they were exposed. However, 40% of healthcare workers reported that they

were exposed to COVID-19 in a healthcare facility. Healthcare workers who are positive worked at 24 different settings across the County; 35% worked in hospitals and 35% worked in skilled nursing.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 18 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 440 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 18 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 440 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 26 April 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 18 new deaths and 440 new cases of 2019 Novel Coronavirus (COVID-19). Thirteen people who died were over the age of 65; four people who died were between the ages of 41 to 65 years old, and one person who died was between the ages of 18 to 40 years old. Fifteen people had underlying health conditions including 13 people over the age of 65 and two people between the ages of 41 to 65 years old.

(U) To date, Public Health has identified 19,528 positive cases of COVID-19 across all areas of LA County, and a total of 913 deaths. Ninety-three percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 837 people (98 percent of the cases); 37% of deaths occurred among Latinx residents, 28% among White residents, 18% among Asian residents, 14% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. African Americans continue to have the highest rate of death for COVID-19 when compared to other groups at 13 deaths per 100,000 people. The mortality rate for Latinx is 9.5; for Asians, the rate is 7.5; and for Whites, the rate is 5.5. Individuals living in lower-income communities are three times more likely to die from COVID-19 than individuals living in wealthier communities, with the death rate of 16.5 deaths per 100,000 people in communities where 30% to 100% of residents are living in poverty compared to the death rate of 5.3 per 100,000 people in communities where less than 10% of residents are living in poverty. Upon further investigation, 19 cases reported earlier were not LA County residents. As of today, 4,380 people who tested positive for COVID-19 (23% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for over 117,000 individuals and 14% of people testing positive.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 48 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 607 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 25 April 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 48 new deaths and 607 new cases of 2019 Novel Coronavirus (COVID-19). Thirty-seven people who died were over the age of 65 and nine people who died were between the ages of 41 to 65 years old. Thirty-eight people had underlying health conditions including 30 people over the age of 65 and eight people between the ages of 41 to 65 years old. Two deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 19,107 positive cases of COVID-19 across all areas of LA County, and a total of 895 deaths. Ninety-two percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 820 people (97 percent of the cases); 37% of deaths occurred among Latinx residents, 28% among White residents, 18% among Asian residents, 14% among African American residents, 1% among Native Hawaiian/Pacific Islander residents and 1% among residents identifying with other races. Upon further investigation, 17 cases and one death reported earlier were not LA County residents. As of today, 4,319 people who tested positive for COVID-19 (23% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for almost 114,000 individuals and 15% of people testing positive.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U//FOUO) JRIC Snapshot: Canadian Mass Shooting: Spree Killing with Some Pseudocommando Indicators

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

Attachment Link(s):

- 200422 FOUO JRIC Snapshot - Canadian Mass Shooting - Spree Killing with Some Pseudocommando Indicators.pdf (1 page)

Link(s) will expire on 5/22/2020

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) JRIC Snapshot: Canadian Mass Shooting: Spree Killing with Some Pseudocommando Indicators**, dated 22 April 2020.

(U//FOUO) On 19 April 2020, Gabriel Wortman shot and killed at least 22 individuals during a 12-hour shooting and arson spree in Nova Scotia, Canada, the worst mass shooting in the country's history. Review of the incident and pre-event behaviors suggests Wortman was likely a spree killer who exhibited some traits of a "pseudocommando" mass murderer. The first two victims were intentionally targeted. Wortman used a replica law enforcement (LE) vehicle, real Royal Canadian Mounted Police uniform, and weapons from his extensive collection of LE paraphernalia during his attacks. Police say the hunt for Wortman was hampered by the fact he was driving a vehicle that looked like a police cruiser and was wearing a police uniform. His motive is under investigation, and much is still unknown about his personal and professional relationships.

(U//FOUO) The attacks took place while most of Canada is in its fourth week of self-isolation measures due to the COVID-19 pandemic, but authorities do not yet know if this contributed to Wortman's mindset or attack planning. The JRIC is not aware of any credible threats of spree, pseudocommando, or mass violence attacks in the six-county area of responsibility; however, attacks by lone offenders are difficult to detect and deter.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 66 New Deaths Related to 2019 Novel Coronavirus (COVID-19); 1,318 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 66 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,318 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 22 April 2020.

(U) The LACoDPH has confirmed 66 new deaths and 1,318 new cases of 2019 Novel Coronavirus (COVID-19). Forty-eight people who died were over the age of 65; 13 people who died were between the ages of 41 to 65 years old, and two people who died were between the ages of 18 to 40 years old. Forty-nine people had underlying health conditions including 38 people over the age of 65, nine people between the ages of 41 to 65 years old and two people between the ages of 18 to 40 years old. Three deaths were reported by the City of Pasadena.

(U) To date, Public Health has identified 16,435 positive cases of COVID-19 across all areas of LA County, and a total of 729 deaths. Eighty-eight percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 646 people (95 percent of the cases); 37% of deaths occurred among Latinx residents, 27% among White residents, 18% among Asian residents, 15% among African American residents, and 2% among residents identifying with other races. Upon further investigation, 23 cases reported earlier were not LA County residents. As of today, 3,902 people who tested positive for COVID-19 (24% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for almost 91,000 individuals and 15% of people testing positive.

(U) Public Health continues to receive a backlog of test results. In an effort to expand testing capacity, many new labs are responding to the emergency and Public Health is working with them to ensure that they have the proper reporting systems in place. Until this reporting issue is resolved, there may be periodic increases in positive cases and total cases due to unevenness in daily reporting.

ISIS Rapper Arrested in Spain

- On 21 April, Spanish National Police arrested Abdel-Majed Abdel Bary, 28, for providing support to ISIS.
- Abdel Bary traveled to Syria in 2013 and was "one of Europe's most wanted Daesh foreign terrorist fighters"; he was detained with two other men at an Almeria apartment after entering Spain illegally.
- Abdel Bary is the son of Adel Abdel Bary, who was convicted in the 1998 US Embassy bombings in Kenya and Tanzania.

England Man Arrested for Appearing to Fire Weapons from a High-Rise Building

- On 22 April, Kent Police arrested an unidentified male on suspicion of firearms offenses after witnesses reported the suspect fired weapons from a high-rise balcony in Chatham, England.
- Authorities found four suspected imitation firearms at the scene.
- There were no reports of any injuries or a motive.

(U) NATIONAL

ISIS Loyalist from Alaska Pleads Guilty

- On 20 April, Gavin Lee Casdorph, 21, pleaded guilty to making false threats with explosives at the Lafayette College campus in Pennsylvania in May 2018.
- Casdorph, posing as a radicalized student, sent messages to college staff threatening to bomb multiple locations on campus after an argument with an online gamer.

Emails and Passwords from Health Organizations Posted Online

- On 22 April, cybersecurity experts reported unknown actors posted online nearly 25,000 email addresses and passwords belonging members of the National Institute of Health, the World Health Organization, the Centers for Disease Control and Prevention, the Gates Foundation, and other working groups combating the coronavirus pandemic.
- Far-right extremists re-published the lists and began calling for a “harassment campaign while sharing conspiracy theories about the coronavirus pandemic.”

Subject: (U) LACoDPH News Release: Los Angeles County Announces 46 New Deaths Related to 2019 Novel Coronavirus (COVID-19); 1,400 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 46 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 1,400 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 21 April 2020.

(U) The LACoDPH has confirmed 46 new deaths and 1,400 new cases of 2019 Novel Coronavirus (COVID-19). Seven hundred and thirty-four of these cases are from a backlog of tests, and 625 are daily reported cases. Thirty-three people who died were over the age of 65; four people who died were between the ages of 41 to 65 years old, and two people who died were between the ages of 18 to 40 years old. Thirty-one people had underlying health conditions including 27 people over the age of 65, three people between the ages of 41 to 65 years old and one person between the ages of 18 to 40 years old. Five deaths were reported by the City of Pasadena and two deaths were reported by the City of Long Beach.

(U) To date, Public Health has identified 15,140 positive cases of COVID-19 across all areas of LA County, and a total of 663 deaths. Eighty-nine percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 582 people (95 percent of the cases); 36% of deaths occurred among Latinx residents, 28% among White residents, 18% among Asian residents, 16% among African American residents, and 3% among residents identifying with other races. Upon further investigation, 76 cases reported earlier were not LA County residents. As of today, 3,639 people who tested positive for COVID-19 (24% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for over 89,000 individuals and 14% of people testing positive.

Link(s) will expire on 5/20/2020

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC) Notification: Mass Shooting in Nova Scotia, Canada**, dated 20 April 2020.

(U) On 18 April at approximately 2230 ADT, the Royal Canadian Mounted Police (RCMP) responded to an emergency call at a residence in Portapique, and discovered multiple casualties in and around the residence. The suspect, identified as Gabriel Wortman, 51, fled the scene disguised as a police officer and drove a car resembling a police vehicle.

(U) On 19 April, authorities located and fatally shot Wortman after he killed at least 18 people, including an ex-girlfriend, and RCMP Constable Heidi Stevenson, during a 12-hour overnight "shooting rampage" involving multiple locations beginning in Portapique and ending in Enfield. Authorities announced some of the victims did not appear to be linked to Wortman.

(U) The RCMP Commissioner stated there appeared to be an initial motivation that transitioned into randomness, and believes terrorism was not a factor. Authorities have not released details on the initial motive.

(U//FOUO) The JRIC has no information to indicate any nexus to its area of responsibility related to this incident.

Canadian Man Kills 18 in Mass Shooting

- On 18 April, Gabriel Wortman, 51, disguised as a Royal Canadian Mounted Police (RCMP) officer, fired gunshots at people in multiple locations of Nova Scotia, killing 18, including RCMP Constable Heidi Stevenson, before authorities fatally shot him.
- Authorities have not announced a motive; RCMP Chief Superintendent Chris Leather stated he was not aware of a past history of violence or extremist views connected to Wortman.
- RCMP Constable Stevenson was a 23-year veteran of the RCMP.

Coronavirus Brings Spike in Anti-Semitic Sentiments

- On 20 April, Tel Aviv University released an annual report depicting an 18% increase in attacks against Jews in 2019, and warning that the coronavirus pandemic threatens to amplify incitement.
- Researchers said the hatred stems from right-wing politicians, ultra-conservative pastors, anti-Zionist intellectuals, and Iranian state authorities.

(U) NATIONAL

Texas Police Officer Fatally Shot

- On 18 April, Alfredo Perez De La Cruz, 45, fatally shot San Marcos Police Officer Justin Putnam, 31, and wounded two officers, as police responded to a domestic disturbance call at a residence.
- San Marcos police stated the suspect died from a self-inflicted gunshot; he was armed with a rifle and wore body armor at the time of the shooting.
- Officer Putnam was a 5-year veteran of the San Marcos Police Department.

Texas Gunman Hijacks City Bus, Killed by Police

- On 19 April, Ramon Thomas Villagomez, 31, hijacked a Dallas-area bus with two passengers and a driver on board, leading police on a pursuit that ended in an officer-involved shooting, leaving Villagomez dead and two officers with non-life threatening injuries.
- Authorities said Villagomez was wanted for questioning in the stabbing death of his girlfriend.

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) JRIC Snapshot: Harassment, Protest Tactics Could Divert Scarce LE Resources During Pandemic**, dated 16 April 2020.

(U//FOUO) Though protected under the First Amendment, some statements and actions against public and political figures related to the COVID-19 pandemic have created safety concerns for the named individuals, diverting law enforcement (LE) agency investigative and protection resources already adversely impacted by illness, quarantine, or other virus mitigation policies. Threat statements, doxing, protests, and physical confrontations have the potential to escalate. Intense media coverage of government responses to the pandemic has raised the profile of government officials, notable personalities, and others. Governors, mayors, and public figures have become the focus of increasing public comment, both positive and negative. The JRIC is not aware of any credible threats to notable public figures in the six-county area of responsibility related to the COVID-19 pandemic.

(U) Please provide feedback at jric@jric.org.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 55 New Deaths Related to 2019 Novel Coronavirus (COVID-19); 399 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 55 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 399 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 16 April 2020.

(U) The LACoDPH has confirmed 55 new deaths and 399 new cases of 2019 Novel Coronavirus (COVID-19). This is the largest increase in new deaths for the third consecutive day. Over the last 48 hours, there have been 871 new cases. Forty-three people who died were over the age of 65; 9 people who died were between the ages of 41 to 65 years old. Forty-eight people had underlying health conditions, while four people over the age of 65 had no reported underlying health conditions. One death was reported by the City of Long Beach and two deaths by the City of Pasadena.

(U) To date, Public Health has identified 10,854 positive cases of COVID-19 across all areas of LA County, and a total of 455 deaths. Eighty-eight percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 390 people (92 percent of the cases); 33% of deaths occurred among Latinx residents, 31% among White residents, 17% among Asian residents, 16% among African American residents, and 3% among residents identifying with other races. Upon further investigation, 41 cases and two deaths reported earlier were not LA County residents. As of today, 2,847 people who tested positive for COVID-19 (26% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for over 70,000 individuals and 11% of people testing positive.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

(U//FOUO) The JRIC is providing this Joint COVID-19 Cyber Advisory to remind partners in the JRIC-LA Cyber Lab AOR to remain vigilant and to continue to implement appropriate cyber hygiene protocols. Malicious cyber actors are continuing to exploit the public's fears of the novel coronavirus (COVID-19). The information covers COVID-19 themed cyber threats from 2-14 April 2020. This advisory contains raw information subject to revision, and is provided for situational awareness only.

(U//FOUO) The Cal-CSIC Cybersecurity Executive Summary provides additional information on vulnerabilities with network-enabled medical devices that could impact life and limb.

(U//FOUO) The Cal-CSIC Cyber Advisory provides additional information on a critical vulnerability with certain configurations of VMware vCenter, which if exploited, could allow a cyber actor to extract highly sensitive information. VMWare has evaluated the severity issue and assigned a CVSSv3 criticality rating of 10– the highest possible rating.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 25 New Deaths Related to 2019 Novel Coronavirus (COVID-19); 239 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Announces 25 New Deaths Related to 2019 Novel Coronavirus (COVID-19); 239 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 13 April 2020.

(U) The LACoDPH confirmed 25 new deaths and 239 new cases of 2019 Novel Coronavirus (COVID-19). This is the smallest increase in new cases since March 26th. Over the last 48 hours, there have been 562 new cases. Eleven people who died were over the age of 65 and 12 people who died were between the ages of 41 to 65 years old. Twenty-two people had underlying health conditions; one person between the ages of 41 to 65 had no reported underlying health conditions. Two deaths were reported by the City of Long Beach.

(U) To date, LaCoDPH has identified 9,420 positive cases of COVID-19 across all areas of LA County, and a total of 320 deaths. Eighty-five percent of people who died had underlying health conditions. Of those who died, information about race and ethnicity is available for 262 people (82 percent of the cases); 33% of deaths occurred among Latino residents, 33% among White residents, 18% among Asian residents, 14% among African American residents, and 2% among residents identifying with other races. Upon further investigation, 11 cases and one death reported earlier were not LA County residents. As of today, 2,354 people who tested positive for COVID-19 (25% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with testing results available for almost 52,000 individuals and 13% of people testing positive.

(U) Healthcare workers risk their lives every day during the COVID-19 pandemic to save others. Public Health has confirmed three people that died from COVID-19 worked in a healthcare setting and 787 confirmed cases of COVID-19 have occurred among healthcare workers. One-third of these cases are among nurses and 9% among physicians. About 60% of these cases do not know or did not report how they were exposed. However, 24% of workers in these categories reported that they were exposed to COVID-19 through contact with a patient or another healthcare worker. Healthcare workers who are positive worked at 22 different settings across the County; 43% worked in hospitals, 19% worked in skilled nursing or assisted living facilities and 12% worked in outpatient settings.

(U) The current LACoDPH Health Officer Orders extends the previous Health Officer Order through May 15 that closed beaches, trails and trailheads, and non-essential businesses, and prohibited all public and private gatherings of any number of people occurring outside a single household or living unit. The

enhanced Order now requires essential businesses to provide a cloth face covering for all employees to wear while performing duties that involve contact with other employees and or the public and to post physical distancing plans. The public is also required to wear a face covering to enter essential businesses. The new measures for essential businesses go into effect at midnight on April 15.

Subject: (U) LACoDPH Safer at Home Order for Control of COVID-19: Temporary Prohibition of All Events and Gatherings, Closure of Non-Essential Businesses and Areas

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The above links will download the **(U) Los Angeles County Department of Public Health (LACoDPH) Safer at Home Order for Control of COVID-19: Temporary Prohibition of All Events and Gatherings, Closure of Non-Essential Businesses and Areas**, dated 10 April 2020.

(U) This LACoDPH Order (Order) amends and supersedes the Orders and Addendums of the County of Los Angeles Health Officer (Health Officer) issued on March 16, 19, 21, 27, and 31, 2020. This Order is issued to comply with Executive Order N-33-20 issued by Governor Gavin Newsom, wherein the State Public Health Officer ordered all individuals living in the State of California to stay home or at their place of residence, except as needed to maintain continuity of operations of the federal critical infrastructure sectors.

(U) Due to the continued rapid spread of the Novel Coronavirus (COVID-19) and the need to protect the most vulnerable members of our community, this Order continues to prohibit all indoor and outdoor public and private gatherings and events. The Order specifically requires all businesses to cease in-person operations and remain closed to the public, unless the business is defined as an Essential Business by this Order. This Order is effective within the County of Los Angeles Public Health Jurisdiction, defined as, all unincorporated areas and cities within the County of Los Angeles with the exception of the cities of Long Beach and Pasadena, and continues through May 15, 2020.

(U) For the full updated Order, please visit: Los Angeles County Department of Public Health.

(U) The LACoDPH site provides information on current statistics and FAQs on COVID-19.

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 18 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 475 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 18 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 475 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 10 April 2020.

(U) The LACoDPH has confirmed 18 new deaths and 475 new cases of 2019 Novel Coronavirus. Over the last 48 hours, there have been 900 new cases. Ten people who died were over the age of 65; seven people between the ages of 41 to 65 years old and one person between the ages of 18 to 40 years old. One death was reported by the City of Long Beach and one death by the City of Pasadena.

(U) To date, LACoDPH has identified 8,430 cases across all areas of LA County, including 241 deaths. Upon further investigation, 22 cases and two deaths reported earlier were not LA County residents. As of today, 2,043 people who tested positive for COVID-19 (24% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA County, with almost 40,700 individuals tested and 15% of people testing positive.

(U) A new Health Officer Order is being issued that extends the stipulation in the previous Health Officer Order through May 15, 2020. The Order also requires essential businesses to provide a cloth face covering for all of their employees to wear while performing duties that involve contact with other employees and or the public and to post their physical distancing plans. The public is also required to wear a face covering to enter essential businesses. All public and private gatherings of any number of people occurring outside a single household or living unit remain prohibited. Beaches, trails and trailheads and non-essential businesses remain closed. It is critical that everyone continue to take these actions to slow the spread of COVID-19. The Order allows essential businesses to implement the new measures by April 15.

ISIS Rocket Attack on US Base in Afghanistan

- On 9 April, ISIS claimed responsibility for a rocket attack against Bagram Airfield, the US military base in Kabul; US officials reported there were no casualties, injuries, or damage to the base.
- The attack occurred a day after the Afghan government released 100 Taliban prisoners as part of the US-Taliban peace deal.

(U) NATIONAL

Update: Texas Teen Arrested, Charged for Threatening to Spread Coronavirus

- On 7 April, Carrollton Police arrested and charged Lorraine Maradiaga, 18, with making a terroristic threat after she posted a series of videos on social media indicating she tested positive for coronavirus and intended to spread the disease.
- Carrollton police stated Maradiaga tested negative for COVID-19, with no evidence she tested positive; as a precaution, Maradiaga will be required to quarantine for 21 days upon her release from custody.

Texas Man Charged for COVID-19-Related Hoax

- On 8 April, federal authorities charged Christopher Charles Perez, 39, for allegedly perpetrating a COVID-19 hoax after he posted a threat on Facebook with a claim that he paid someone to spread coronavirus at San Antonio grocery stores.
- Authorities determined the threat was false and the virus was not spread at the grocery stores.
- Perez faces up to five years in prison.

(U) CALIFORNIA

Orange County Man Arrested for Firing Flare Gun Outside Hospital

- On 8 April, Fountain Valley police arrested Christopher Thomas Ray, 51, for shooting a flare gun outside the MemorialCare Orange Coast Medical Center and threatening to shoot up the hospital.
- Authorities determined Ray's girlfriend was receiving treatment at the hospital at the time of the incident; there were no injuries.

(U) CYBER

State-backed Hackers Taking Advantage of COVID-19 Outbreak

- On 8 April, US and British cybersecurity officials published a joint advisory warning users of online criminals and state-backed hackers who are taking advantage of and exploiting the coronavirus outbreak to advance their operations.
- Cybersecurity officials warned that cybercriminals are exploiting work-from-home solutions and virtual private networks.

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 22 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 550 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 7 April 2020.

(U) The LACoDPH has confirmed 22 new deaths and 550 new cases of 2019 Novel Coronavirus (COVID-19). Twenty-one of the people who died had underlying health conditions and 16 people were over the age of 65. Six people who died were between the ages of 41 and 65 years old and one of these individuals did not have underlying health conditions. Over the last 48 hours, there have been 970 new cases.

(U) To date, Public Health has identified 6,910 cases across all areas of LA County, including 169 deaths. As of today, 1,510 people who tested positive for COVID-19 (22% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA county, with over 35,000 individuals tested and 14% of people testing positive.

(U) Public Health has issued the following guidance for people with mild illness during this time of increased spread:

- If you are mildly sick, stay home for at least seven days and until 72 hours after being fever and symptom free. Call your doctor if you are concerned and/or your symptoms worsen. Individuals who are elderly, have underlying health conditions or pregnant should consider contacting their providers earlier when they are sick.

Subject: (U//FOUO) The White House Invitation: State & Local Briefing Call on COVID-19

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The JRIC is forwarding the attached **(U) The White House Invitation: State & Local Briefing Call on COVID-19**.

(U) On **Wednesday, April 8, at 1000 PT (1300 ET)**, please join Senior Administration Officials for a briefing call on COVID-19 (coronavirus). The primary focus of this week's briefing call will be federal agency guidance and implementation of the ***Coronavirus Aid, Relief, and Economic Security (CARES) Act***. You can find additional information from the U.S. Department of the Treasury **here**. Registration instructions are below – please read the RSVP instructions in their entirety before registering.

(U) Registration instructions are below – please read the RSVP instructions in their entirety before registering. If you have a particular question you would like addressed during the call, please flag those for the White House team.

(U) **Briefing Call Registration**
Date: Wednesday, 8 April 2020
Time: 1000 hours PT (1300 hours ET)
Call-In Registration: **CLICK HERE**
Note: Call-in lines are limited. Please register only if you are able to join the call. State and local leaders (especially staff) working in the same office are encouraged to register once as a group and use one call-in line (where appropriate and with proper social distancing) to maximize the number of people who can join. Upon successful registration, you will receive dial-in details to the email address you use to register. Note that multiple people cannot dial-in using the same registration information. Registration will be closed two hours prior to the call.

(U) **COVID-19: Important Resources for State, Local, and Tribal Officials**

- (U) **Coronavirus Guidelines for America**: The White House Coronavirus Task Force issued guidelines – **30 Days to Slow the Spread** (**Español**) – to extend the guidance for an additional 30 days. Even if you are young and otherwise healthy, you are at risk, and your activities can increase the risk of contracting the Coronavirus for others. Everyone can do their part. The recommendations are simple to follow but will have a resounding impact on public health.

- (U) **Up-To-Date Information**: The most up-to-date, verified information and guidance can be found via the **Centers for Disease Control and Prevention Coronavirus Disease 2019 website**. The Coronavirus Task Force holds frequent briefings, which can be viewed live **here**.

- (U) **COVID-19 Response and Recovery Primer**: Response and recovery efforts are locally executed, state managed, and federally supported. It is important that requests for assistance, including for critical supplies, get routed through the proper channels as soon as possible. Learn more about the response and recovery process via this important resource – **Coronavirus (COVID-19) Pandemic: Response and Recovery Through Federal-State-Local-Tribal Partnership**. FEMA's public assistance guidance for COVID-19 response efforts can be found **here**.

- (U) **Critical Infrastructure Workforce Guidelines**: On March 16th, the Department of Homeland Security (DHS) issued updated critical infrastructure guidance in response to the COVID-19 emergency. The guidance, and accompanying list, is intended to help State, local, tribal and territorial officials as they work to protect their communities, while ensuring continuity of functions critical to public health and safety, as well as economic and national security. The list is advisory in nature and is not a federal directive or standard. More **here**.

- (U) **Coronavirus Fact vs. Myth**: Rumors can easily circulate within communities during a crisis. FEMA setup a **website** to help the public distinguish between rumors and facts regarding the response to the coronavirus pandemic.

- (U) **Fraud & Scam Protection**: The Department of Justice is remaining vigilant in detecting, investigating, and prosecuting wrongdoing related to the crisis. Find out how you can protect yourself and helpful resources on DOJ's Coronavirus Fraud Prevention **website**. The Federal Trade Commission has also established a **website** with helpful information to help consumers avoid coronavirus-related scams.

- (U) **Social Media Resources**: Download the **Apple COVID-19 Screening Tool**. Follow the White House on **Twitter** and **Facebook**. Also follow HHS (**Twitter**/**Facebook**) and CDC (**Twitter**/**Facebook**) You can also find informational videos from Coronavirus Task Force members on mitigation, social distancing, etc. on the White House's **YouTube** page.

- (U) **Mental Health Resources**: Natural disasters – including such pandemics as the coronavirus outbreak – can be overwhelming and also can seriously affect emotional health. The Substance Abuse and Mental Health Administration's (SAMHSA) Disaster Distress Helpline – 1-800-985-5990 (or text TalkWithUs to 66746) – provides 24/7, 365-day-a-year crisis counseling and support to anyone who is seeking help in coping with the mental or emotional effects caused by developments related to the coronavirus pandemic. Learn more about the Disaster Distress Helpline **here**.

- (U) **Administration Actions and Federal Agency Resources**: USA.gov is cataloging all U.S. government activities related to coronavirus. From actions on health and safety to travel, immigration, and transportation to education, find pertinent actions **here**. Each Federal Agency has also established a dedicated coronavirus website, where you can find important information and guidance. They include: Health and Human Services (**HHS**), Centers of Medicare and Medicaid (**CMS**), Food and Drug Administration (**FDA**), Department of Education (**DoED**), Department of Agriculture (**USDA**), Small Business Administration (**SBA**), Department of Labor (**DOL**), Department of Homeland Security (**DHS**), Department of State (**DOS**), Department of Veterans Affairs (**VA**), Environmental Protection Agency (**EPA**), Department of the Interior (**DOI**), Department of Energy (**DOE**), Department of Commerce (**DOC**), Department of Justice (**DOJ**), Department of Housing and Urban Development (**HUD**), Department of the Treasury (**USDT**), Office of the Director of National Intelligence (**ODNI**), and U.S. Election Assistance Commission (**EAC**).

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC) Threat Assessment: No Specific, Credible Threats to 2020 Passover or Easter Festivities,** dated 6 April 2020.

(U//FOUO) The JRIC has not identified any specific, credible criminal or violent threats towards Easter and Passover activities taking place within its six-county AOR, however lone offender attacks are difficult to detect and deter. While COVID-19 stay at home orders will significantly decrease crowds and reduce targets of opportunity, there is a heightened threat from extremist groups who have been encouraged to exploit the preexisting COVID-19 pandemic to incite violence, promote their ideologies, and intimidate their targets. The US Justice Department remains vigilant in detecting, investigating, and prosecuting crimes related to the COVID-19 outbreak.

France Launches Terror Investigation after Knife Attack

- On 4 April, French police arrested a 33-year-old Sudanese asylum seeker for fatally stabbing two and wounding five with a knife in Romans-sur-Isère, Southeast France.
- The suspect conducted the stabbings at a tobacco shop, a butcher's shop, and in the streets; police are questioning two other Sudanese men who shared a flat with the suspect.
- France's national counterterrorism brigade, PNAT, opened an investigation into connections to a terrorist organization and criminal terrorist conspiracy.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 15 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 663 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 15 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 663 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 5 April 2020.

(U) The LACoDPH has confirmed 15 new deaths and 663 new cases of 2019 Novel Coronavirus (COVID-19). Eleven of the people who died had underlying health conditions and 10 people were over the age of 65. Two people who died were between the ages of 41 and 65 years old and one person was between the age of 18 and 40 years old. One individual over the age of 65 who died did not have underlying health conditions. Two deaths were reported by the City of Pasadena. Over the last 48 hours, there have been 1374 new cases.

(U) To date, Public Health has identified 5,940 cases across all areas of LA County, including 132 deaths. As of today, 1,257 people who tested positive for COVID-19 (21% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA county, with almost 31,000 individuals tested and 14% of people testing positive.

(U) Emerging evidence suggests that there may be a significant number of people infected with COVID-19 who are asymptomatic and capable of spreading the virus to others. New guidance from the Centers for Disease Control and Prevention (CDC) reminds us we need to use universal precautions all the time – assuming that each of us can infect others even when we aren't sick, and that others can infect us. Along with physical distancing, frequent handwashing, and remaining home when ill, the CDC is recommending that the general public wear non-medical face coverings when interacting with others while obtaining essential supplies and services. N95 and surgical masks should only be used by healthcare workers, first responders, and those essential workers providing care for people who are ill.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

(U) The LACoDPH has confirmed 28 new deaths and 711 new cases of 2019 Novel Coronavirus (COVID-19). Twenty-one of the people who died had underlying health conditions and 17 people were over the age of 65. Two individuals over the age of 65 who died did not have underlying health conditions. Nine people who died were between the ages of 18 and 65; six people who died in this age group had underlying health conditions. Two deaths were reported by the City of Long Beach. Over the last 48 hours, there have been 1238 new cases.

(U) To date, Public Health has identified 5277 cases across all areas of LA County, including 117 deaths. As of today, 1168 people who tested positive for COVID-19 (22% of positive cases) have been hospitalized at some point during their illness. Testing capacity continues to increase in LA county, with almost 29,000 individuals tested and 14% of people testing positive.

(U//FOUO) The above link will download the **(U//FOUO) California State Threat Assessment Center (STAC) Situation Report Graphic: California Impacts: Coronavirus Disease 2019 (COVID-19),** dated 3 April 2020.

(U) As of 3 April, cases of COVID-19 in California continue to increase, with more than 10,000 cases and 237 deaths reported. California's ability to test for COVID-19 cases is improving, both in terms of access to tests, and speed of results. Nationally, confirmed cases have surpassed the quarter-million mark and continue to climb, according to JHU. The US Department of Defense has activated several medical teams and provided additional resources to help combat COVID-19 in areas experiencing shortages. US authorities are actively responding to COVID-19 scams, include those selling and setting up fake COVID-19 cures and test sites. Globally, the number of deaths has reached approximately 58,000. US reports indicate Chinese officials have escalated their disinformation efforts by using social media accounts to portray the United States in a negative light. German officials are attempting to increase vigilance in order to thwart potential extremist threats.

(U) WARNING: This document is the exclusive property of the California State Threat Assessment Center (STAC) and is UNCLASSIFIED//FOR OFFICIAL USE ONLY (U//FOUO). It contains information that may be exempt from public release under the California Public Records Act (Govt. Code Sec. 6250, *et seq.*). It is to be controlled, stored, handled, transmitted, distributed and disposed of in accordance with STAC policy relating to U//FOUO information and is not to be released to the public, the media, or other personnel who do not have a valid need-to-know without prior approval of an authorized STAC official.

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

Subject: (U) LACoDPH COVID-19: Guidance for Cloth Face Coverings

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

Attachment Link(s):

- 200402 U LACoDPH COVID-19 - Guidance for Cloth Face Coverings.pdf (3 pages)

Link(s) will expire on 5/3/2020

UNCLASSIFIED

(U) The above links will download the **(U) Los Angeles County Department of Public Health (LACoDPH) Guidance for Cloth Face Coverings**, dated 2 April 2020.

(U) This document provides public health information for members of the general public who choose to use cloth face coverings when they need to leave their home for a short period of time to obtain essential goods or services. It is not an order or recommendation that cloth face coverings be worn by the general public. And it is not a substitute for existing guidance about social (physical) distancing and frequent handwashing.

(U) **Why wear a face cover?**
(U) Recent information has indicated that covering your nose and mouth can slow the spread of COVID-19 because:

- (U) Individuals can be contagious before the onset of symptoms. You may be contagious and do not know it. If you have covered your nose and mouth, it can limit the spread of COVID-19.
- (U) We touch our face less when our face is covered. Touching your face after touching something contaminated with COVID-19 increases your chances of getting sick with COVID-19.

(U) **How well do cloth face coverings work to prevent the spread of COVID-19?**

- (U) There is limited evidence to suggest that the use of cloth face coverings by the public during a pandemic could help reduce disease transmission. Their primary role is to reduce the release of infectious particles into the air when someone speaks, coughs, or sneezes, including someone who has COVID-19 but feels well. Cloth face coverings are not a substitute for physical distancing and washing hands and staying home when ill, but they may be helpful when combined with these primary interventions.

(U) The LACoDPH site provides information on current statistics and FAQs on COVID-19.

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 11 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 521 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 3 April 2020.

(U) The LACoDPH has confirmed 11 new deaths and 521 new cases of 2019 Novel Coronavirus (COVID- 19). Seven of the 11 deaths reported today occurred in people over the age of 65, three people were between 41– 65 years old, and one person was between 18 to 40 years old. All reported underlying health conditions except for one individual between 41– 65 years old. Additional information regarding some of the new cases is pending further investigation. Over the last 48 hours, there have been 1055 new cases.

(U) To date, Public Health has identified 4566 cases across all areas of LA County, including 89 deaths. As of today, 1018 people who tested positive for COVID-19 (22% of positive cases) have been hospitalized at some point during their illness.

(U) Public Health has issued the following guidance for people with mild illness during this time of increased spread:

- If you are mildly sick, stay home for at least seven days and until 72 hours after being fever and symptom free. Call your doctor if you are concerned and/or your symptoms worsen. Individuals who are elderly, have underlying health conditions or pregnant should consider contacting their providers earlier when they are sick.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 13 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 534 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 13 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 534 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 2 April 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed 13 new deaths and 534 new cases of 2019 Novel Coronavirus (COVID-19). Twelve of the 13 deaths reported today occurred in people over the age of 65; one person was between 41– 65 years old. All reported underlying health conditions except for one individual over the age of 65. Additional information regarding some of the new cases is pending further investigation. Over the last 48 hours, there have been 1047 new cases.

(U) To date, Public Health has identified 4045 cases across all areas of LA County, including 78 deaths. Upon further investigation, seven cases reported earlier were not LA County residents. As of today, 879 people who tested positive for COVID-19 (22% of positive cases) have been hospitalized at some point during their illness.

(U) Emerging evidence suggests that there may be a significant number of people infected with COVID-19 who are asymptomatic and capable of spreading the virus to others. New guidance from the Centers for Disease Control and Prevention (CDC) suggests that we need to think about using universal precautions all the time – assuming that each of us can infect others even when we aren't sick.

(U) The above links will download the **(U) Los Angeles County Department of Public Health (LACoDPH) COVID-19: UPDATE Home Quarantine Guidance for Close Contacts to Coronavirus Disease 2019**, dated 27 March 2020, **(U) LACoDPH COVID-19: UPDATE Home Isolation Instructions for People with Coronavirus-2019 Infection**, dated 31 March 2020, and **(U) LACoDPH COVID-19: What to do if I am Exposed FAQs**, dated 1 April 2020.

(U) The attached LACoDPH resources provide guidance for people who have been in close contact to or have COVID-19.

(U) **Home Care**
(U) There is no specific treatment for the virus that causes COVID-19. Here are steps that you can take to help you get better:

- (U) Rest
- (U) Drink plenty of fluids
- (U) Take acetaminophen (Tylenol®) to reduce fever and pain.
- (U) Note that children younger than age 2 should not be given any over-the-counter cold medications without first speaking with a doctor.
- (U) Note that these medicines do not "cure" the illness and do not stop you from spreading germs.

(U) **Seeking Medical Care**
(U) Seek prompt medical care if your symptoms get worse, especially if you are at a higher risk of serious illness. This includes people who are age 65 years and older, pregnant, or have a health problem such as a chronic disease or a weak immune system. It is recommended that you seek medical care for serious symptoms, such as:

- (U) Difficulty breathing
- (U) Can’t keep fluids down
- (U) Dehydration
- (U) Confusion
- (U) Other serious symptoms

(U) The LACoDPH site provides additional COVID-19 information, including current statistics, FAQs, and resources.

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

Terrorist Propaganda on COVID-19 as God's "Smallest Soldier" Attacking the West

- This week, media groups affiliated with ISIS and al-Qa'ida have continued to disseminate online propaganda hailing the calamity of the coronavirus pandemic as divine retribution, referring to it as a "solider of Allah" and God's wrath upon the West.
- On 31 March, al-Naba, ISIS' online publication, said the pandemic's impact shows the United States isn't all-powerful and invincible.

UK National Charged with Shipping Mislabeled, Unapproved COVID-19 Treatments

- On 1 April, Frank Richard Ludlow, 59, was charged for smuggling misbranded COVID-19 treatment drugs into the United States.
- Ludlow repackaged preexisting "Trinity Remedy" kits as "Trinity COVID-19 SARS Antipathogenic Treatment" kits that were not approved by the FDA to treat COVID-19 and shipped them from the UK to Utah and California.

(U) NATIONAL

Georgia Man Pleads Guilty to Attempting to Attack the White House

- On 1 April, Hasher Jallal Taheb, 23, pleaded guilty to planning a terrorist attack on the White House using weapons and explosives.
- Taheb claimed he was obligated to engage in jihad and target the White House because it is one of America's iconic landmarks.
- Taheb faces up to 15 years in prison as part of a plea agreement.

(U) CALIFORNIA

Port of Los Angeles Train Operator Charged with Derailing Locomotive near USNS Mercy

- On 1 April, the US Justice Department announced the arrest of Eduardo Moreno, 44, for allegedly running a locomotive off the end of rail tracks near the USNS Mercy on 31 March.

- According to the criminal complaint, Moreno admitted he intentionally derailed and crashed the train near the USNS Mercy over his suspicions that it had an alternate purpose related to COVID-19 or a government takeover.
- Moreno faces up to 20 years in federal prison.

Riverside County Sheriff's Deputy Dies of COVID-19

- On 2 April, Riverside County Sheriff's Deputy Terrell Young, died from COVID-19 complications, the first in his department to die of the disease.
- Deputy Young was a 15-year veteran of Riverside County Sheriff's Department.

(U) CYBER

Italy's Social Security Website Hit by Cyber Attack

- On 1 April, cyber actors targeted Italy's social security website, forcing it to shut down as people began applying for coronavirus benefits.
- The INPS agency received 339,000 applications for 600 euros, approximately $655 USD, as hackers compromised the site.

Subject: (U) LACoDPH COVID-19: Guidance for Monitoring EMS Personnel and (U) LACoDPH COVID-19: FAQs for EMS

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

Attachment Link(s):

- 200325 U LACoDPH COVID-19 - Guidance for Monitoring EMS Personnel.pdf (2 pages)
- 200327 U LACoDPH COVID-19 - FAQs for Emergency Medical Services.pdf (2 pages)

Link(s) will expire on 5/2/2020

UNCLASSIFIED

(U) The above links will download the **(U) Los Angeles County Department of Public Health (LACoDPH) COVID-19: Guidance for Monitoring EMS Personnel**, dated 25 March 2020 and **(U) LACoDPH COVID-19: FAQs for Emergency Medical Services (EMS)**, dated 27 March 2020.

(U) The attached LACoDPH resources provide guidance on ways to monitor EMS personnel and a general COVID-19 fact sheet for EMS personnel. The LACoDPH recommends the following personal protective equipment (PPE) and vehicle protection:

(U) **PPE**
(U) EMS clinicians who will directly care for a patient with possible COVID-19 infection or who will be in the compartment with the patient should follow Standard, Contact, and Droplet Precautions as indicated below:

- (U) Disposable patient examination gloves
- (U) Isolation gown (if there are shortages of gowns, they should be prioritized for aerosol-generating procedures, care activities where splashes and sprays are anticipated, and high-contact patient care activities that provide opportunities for transfer of pathogens to the hands and clothing of EMS clinicians (e.g., moving patient onto a stretcher).
- (U) Surgical mask
- (U) Eye protection (i.e., goggles or disposable face shield that fully covers the front and sides of the face).

(U) **Protection in the vehicle**

- (U) When possible, use vehicles that have isolated driver and patient compartments that can provide separate ventilation to each area.
- (U) If using a vehicle without an isolated driver compartment and ventilation, open the outside air vents in the driver area and turn on the rear exhaust ventilation fans to the highest setting in order to create a negative pressure gradient in the patient area.

- (U) If drivers will be involved in patient contact (e.g., moving patients onto stretchers), they should wear all recommended PPE listed above.
- (U) After completing patient care and before entering an isolated driver's compartment, the driver should remove and dispose of PPE and perform hand hygiene to avoid soiling the compartment. If the transport vehicle does **not** have an isolated driver's compartment, the driver should continue to wear a mask during transport.

(U) The LACoDPH site provides additional COVID-19 information, including current statistics, FAQs, and resources.

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

Subject: (U) LACoDPH News Release: Los Angeles County Announces 11 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 513 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 11 New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 513 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 28 March 2020.

(U) The LACoDPH has confirmed 11 new deaths and 513 new cases of 2019 Novel Coronavirus (COVID- 19). Nine of the 11 deaths reported today occurred in people over the age of 65, one person was between 41–65 years old; and one was person between 18 – 40 years old. All reported underlying health conditions except for two individuals over the age of 65. Additional information regarding some of the new cases is pending further investigation. Over the last 48 hours, there have been 1061 new cases.

(U) To date, Public Health has identified 3518 cases across all areas of LA County, including 65 deaths. Upon further investigation, 11 cases reported earlier were not LA County residents. As of today, 733 people who tested positive for COVID-19 (20% of positive cases) have been hospitalized at some point during their illness.

(U) Emerging evidence suggests that there may be a significant number of people infected with COVID-19 who are asymptomatic and capable of spreading the virus to others. New guidance from the Centers for Disease Control and Prevention (CDC) suggests that we need to think about using universal precautions all the time – assuming that each of us can infect others even when we aren't sick.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) IACP Guidance to Law Enforcement – Law Enforcement's Role in Enforcing Public Health Protections and (U) LACoDPH COVID-19: Updated Police and Fire FAQs

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

Attachment Link(s):

- 200326 U IACP Guidance to Law Enforcement - Law Enforcement's Role in Enforcing Public Health Protections.pdf (2 pages)
- 200328 U LACoDPH COVID-19 - Updated Police and Fire FAQs.pdf (3 pages)

Link(s) will expire on 5/1/2020

UNCLASSIFIED

(U) The above links will download the following **International Chief of Police Association (IACP) Guidance to Law Enforcement – Law Enforcement's Role in Enforcing Public Health Protections**, dated 26 March 2020, and **UPDATED Los Angeles County Department of Public Health (LACoDPH) COVID-19: Police and Fire FAQs**, dated 28 March 2020.

(U) The IACP provided additional guidance to law enforcement partners required to respond to calls for service related to public health orders, mandatory quarantines, and the protection of medical resources. This information is meant to help police departments better understand their authority in such situations, along with methods to reduce risk and exposure.

(U) **The LACoDPH recommends law enforcement follow the below guidelines to protect from exposure:**

- (U) Wash your hands often with soap and water for at least 20 seconds, especially after going to the bathroom; before eating; and after blowing your nose, coughing, or sneezing.
- (U) If soap and water are not readily available, use an alcohol-based hand sanitizer with at least 60% alcohol. Always wash hands with soap and water if hands are visibly dirty.
- (U) Avoid touching your eyes, nose, and mouth with unwashed hands.
- (U) Clean and disinfect frequently touched objects and surfaces using a regular household cleaning spray or wipe.
- (U) Cover your cough or sneeze with a tissue, then throw the tissue in the trash. If you do not have a tissue, use your sleeve (not your hands).
- (U) Get a flu shot to prevent influenza if you have not done so this season.
- (U) Stay at least 6 feet away from others as much as possible.
- (U) Learn your employer's plan for exposure control and participate in all-hands training on the use of Protective Personal Equipment (PPE) for respiratory protection, if available.

(U) COVID-19 is rapidly evolving, therefore public safety and first responders are encouraged to check the Department of Public Health and CDC websites for current information.

(U) **The JRIC reminds partners that the attached products contain mitigation strategies only; first responders should be guided by their agency's policies for responding to a public health emergency.**

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

Subject: (U//FOUO) JRIC Snapshot: ISIS Urges Attacks During COVID-19 Pandemic

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

Attachment Link(s):

- 200401 FOUO JRIC Snapshot - ISIS Urges Attacks During COVID-19 Pandemic.pdf (1 page)

Link(s) will expire on 5/1/2020

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) JRIC Snapshot: ISIS Urges Attacks During COVID-19 Pandemic**, dated 1 April 2020.

(U//FOUO) On 19 March 2020, the Islamic State of Iraq in ash-Sham urged followers in countries affected by the COVID-19 pandemic to conduct attacks, noting that first responder agencies are "stretched to the maximum" by personnel and resource shortages. The JRIC is not aware of any current, credible threats to the six-county area of responsibility (AOR) related to the recent ISIS call for violence; however, lone offender attacks are difficult to detect and deter.

(U//FOUO) ISIS regularly includes COVID-19 updates in its weekly Arabic-language newsletter, al-Naba. Messaging has evolved from rhetorical observations to calls for violence. **The 19 March article urged supporters to attack the healthcare sector in the West, and kill non-Muslims. Stay-home orders in many places have eliminated crowds and reduced targets of opportunity; unless conducted in a crowded place such as a hospital, homegrown violent extremist (HVE) attacks are unlikely to produce significant fatalities, but will divert law enforcement and healthcare resources, and possibly impact critical infrastructure**.

(U) Please provide feedback at jric@jric.org.

(U) **Warning:** This document is **Unclassified//For Official Use Only (U//FOUO)**. It contains sensitive information that cannot be released to the public or other personnel outside of the public safety community. UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) California State Threat Assessment Center (STAC) Situation Report Graphic: California Impacts: Coronavirus Disease 2019 (COVID-19),** dated 31 March 2020.

(U//FOUO) As of 31 March, 150 deaths have been confirmed in California as a result of COVID-19 infections, as reported by the LACoDPH. Nationally, there are at least 184,183 cases of novel coronavirus in the US, and at least 3,440 deaths. New anti-malarial drugs and mask cleaning methods were approved in order to combat COVID-19 in the US. The FBI warns of new video teleconference hacks as businesses and schools increasingly turn to online solutions for meetings. Globally, the number of deaths has reached at least 41,261, while cases have increased to 850,583. China has announced they will begin reporting the number of asymptomatic cases after receiving critique that the country was underreporting, while new reports indicate that China has shifted to use “Russian-Style” disinformation tactics amid the COVID-19 outbreak.

(U) WARNING: This document is the exclusive property of the California State Threat Assessment Center (STAC) and is UNCLASSIFIED//FOR OFFICIAL USE ONLY (U//FOUO). UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces 10 New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 548 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 31 March 2020.

(U) The LACoDPH has confirmed 10 new deaths and 548 new cases of 2019 Novel Coronavirus (COVID-19). Six of the 10 deaths reported today occurred in people over the age of 65, two between 41– 65 years old; and two between 18 – 40 years old. All had reported underlying health conditions except for one individual between 18-40 years old. Additional information regarding some of the new cases is pending further investigation. Over the last 48 hours, there have been 890 new cases.

(U) To date, Public Health has identified 3,011 cases across all areas of LA County, including 54 deaths. Upon further investigation, 11 cases reported earlier were not LA County residents. As of today, 594 people who tested positive for COVID-19 (20% of positive cases) have been hospitalized at some point during their illness.

(U) Current Health Officer Orders prohibit any public or private gatherings or events, and temporarily close all beaches and hiking trails throughout the entire County. Only essential businesses may remain open, and individuals are asked to stay home except to obtain essential goods or services. Health Officer Orders will continue through April 19.

New Jersey Man Arrested for Threats against Jews over Coronavirus

- On 27 March, Lakewood police arrested Anthony Lodespoto, 43, after he posted specific threats to harm Lakewood Jewish community members for violating a state ban regarding large gatherings amid the coronavirus outbreak.
- Officers charged Lodespoto with second degree terroristic threats.

Phoenix Police Commander Killed during Shooting

- On 29 March, Phoenix Police Commander Greg Carnicle was fatally shot and two officers were wounded in a shooting after responding to a domestic violence call.
- Authorities stated the suspect was killed at the scene, but is not clear if the suspect died as a result of officer gunfire.
- Commander Carnicle was a 31-year veteran of the Phoenix Police Department.

First NYPD Detective Dies of Coronavirus

- On 29 March, the NYPD commissioner announced Detective Cedric Dixon, a 23-year NYPD veteran, was the first detective to die from COVID-19, the third NYPD death.
- Authorities stated Dixon was in his 40s and suffered from underlying health conditions.
- Two other NYPD employees recently lost their lives from coronavirus: Dennis C. Dickson, a NYPD custodian, and Giacomina Barr-Brown, a civilian with the 49th Precinct Roll Call Officer.

Subject: (U) LACoDPH News Release: Los Angeles County Announces Six New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 344 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces Six New Deaths Related to 2019 Novel Coronavirus (COVID-19) – 344 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 28 March 2020.

(U) The LACoDPH has confirmed six new deaths and 344 new cases of 2019 Novel Coronavirus (COVID- 19). All of the five deaths reported yesterday occurred in people over the age of 60 who had underlying health conditions. Additional information regarding some of the new cases is pending further investigation. Over the last 48 hours, there have been 601 new cases.

(U) To date, Public Health has identified 1804 cases across all areas of LA County, including 32 deaths. Upon further investigation, three cases reported earlier were not LA County residents. As of today, 398 positive cases (22% of positive cases) have been hospitalized.

(U) On 27 March, a Health Officer Order was issued to temporarily close all beaches and hiking trails throughout the entire County due to recent dramatic increases in COVID-19 cases, and increased usage of beaches and hiking trails by many groups of people. It is imperative that everyone, collectively, take action to slow the spread of COVID-19. County and City Parks may remain open for passive recreational activities. Persons using the parks are required to practice social distancing at all times. The Order will continue through April 19.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: Los Angeles County Announces Three New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 138 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces Three New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 138 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 25 March 2020.

(U) The LACoDPH has confirmed three new deaths and 138 new cases of 2019 Novel Coronavirus (COVID-19). All three individuals that died were over the age of 65 and had underlying health conditions. One resided in Gardena, one in Wilmington and the other case is still under investigation. Additional information regarding some of the new cases is pending further investigation. Over the last 48 hours there have been 266 new cases.

(U) To date, LACoDPH has identified 799 cases across all areas of LA County, including 13 deaths. Upon completion of investigations, two cases reported earlier were not LA County residents and one death has been reclassified as a suspect case and is pending evaluation by the Centers for Disease Control and Prevention (CDC). As of today, 160 positive cases (20% of positive cases) have been hospitalized.

(U) Today, new Health Officer Orders are being issued to ensure that individuals who test positive for COVID-19, and those who are told by a clinician they are presumed to be positive for COVID-19 are required to self-isolate for a period of 7 days and 3 days of being symptom free. Additionally, those who have been in close contact with someone who is positive or presumed positive must quarantine themselves for 14 days from their last exposure to that person.

(U) Public Health has issued the following guidance during this time of increased spread:

- If you are mildly sick, stay home for at least seven days or until 72 hours after being fever free, whichever is longer. Call your doctor if you are concerned and/or your symptoms worsen. Individuals who are elderly, have underlying health conditions or pregnant should consider contacting their providers earlier when they are sick.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) IACP: Health and Safety for Law Enforcement Families, IAFF COVID-19: Behavioral Health Considerations, and LACoDMH-LACoDPH A Reference for Maintaining Mental Health and Well-Being

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

Attachment Link(s):

- 200320 U IACP COVID-19 - Health and Safety for Law Enforcement Families.pdf (2 pages)
- 200317 U IAFF COVID-19 - Behavioral Health Considerations.pdf (2 pages)
- 200219 U LACoDMH-LACoDPH A Reference for Maintaining Mental Health and Well-Being - Coping with Stress During Infectious Disease Outbreaks.pdf (1 page)

Link(s) will expire on 4/24/2020

UNCLASSIFIED

(U) The JRIC is forwarding the following **(U) International Association of Chiefs of Police (IACP): Health and Safety for Law Enforcement Families** dated 20 March 2020, **(U) International Association of Fire Fighters (IAFF): COVID-19: Behavioral Health Considerations**, dated 17 March 2020, and **(U) Los Angeles County Department of Mental Health (LACoDMH)-Los Angeles County Department of Public Health (LACoDPH): A Reference for Maintaining Mental Health and Well-Being: Coping with Stress During Infectious Disease Outbreaks**, dated 19 February 2020.

(U) As a result of a routine integration with medically compromised adults in both community and healthcare settings, fire, and EMS personnel are at increased risk for exposure to the coronavirus (COVID-19).

(U) **CDC recommends first responders consider the following to reduce secondary traumatic stress (STS) reactions:**

- (U) Acknowledge that STS can impact anyone helping families after a traumatic event.
- (U) Learn the symptoms including physical (fatigue, illness) and mental (fear, withdrawal, guilt).
- (U) Allow time for you and your family to recover from responding to the pandemic.
- (U) Create a menu of personal self-care activities that you enjoy, such as spending time with friends and family, exercising, or reading a book.
- (U) Take a break from media coverage of COVID-19.
- (U) Ask for help if you feel overwhelmed or concerned that COVID-19 is affecting your ability to care for your family and patients as you did before the outbreak.

(U) Everyone reacts differently to an infectious disease outbreak. While some go about their usual business, others will experience persistent anxiety, worry or fear related to the disease and a range of

issues, including emotional, behavioral, and physical reactions. If these reactions begin to interfere with your daily functioning, consider talking to a mental health provider. The IAFF describes some of these reactions as:

- (U) Worrying about your own health status.
- (U) Worrying about the health status of your loved ones.
- (U) Sleeping too much or not enough.
- (U) Changes in appetite.
- (U) Inability to fall asleep or stay asleep.
- (U) Difficulty concentrating due to persistent worry.
- (U) Worsening of other chronic health problems.
- (U) Increased time or energy devoted to monitoring physical symptoms.
- (U) Seeking reassurance from family, friends, and doctors.
- (U) Increased use of substances to help relax (alcohol, tobacco, drugs, or food).

(U) Family members of law enforcement officers reporting for duty may experience fear and distress that their officer may be exposed to the virus because of their profession. Family members may also be distressed at having their officer away from home for prolonged periods of time. IACC recommends law enforcement officers do the following:

- (U) Establish a clear path of regular and frequent communication to law enforcement families, such as an email list, dedicated social media account, or online group.
- (U) Share proactive steps and safety protocols being taken to ensure the health and well-being of officers and their families, including information on healthcare, mental wellness, and/or Employee Assistance Programs.
- (U) Engage with family or spousal support groups to disseminate official agency messaging to family members.

(U) If you have any questions, please contact the LA County Department of Mental Health Access Center 24/7 Helpline at (800) 854-7771 or (562) 651-2549.

(U) **The JRIC reminds partners that the attached products contain mitigation strategies only; first responders should be guided by their agency's policies for responding to a public health emergency.**

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

Subject: (U) LACoDPH News Release: Los Angeles County Announces Three New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 128 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces Three New Deaths Related to 2019 Novel Coronavirus (COVID-19) - 128 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 24 March 2020.

(U) The LACoDPH has confirmed three new deaths and 128 new cases of 2019 Novel Coronavirus (COVID-19). One individual was a youth under the age of 18, and two other individuals were between 50-70 years old. One of the individuals between 50-70 years old had underlying health conditions and resided in West Adams, the other is from a location that is still under investigation. The individual under the age of 18 resided in Lancaster. Because there are positive cases across the entire County, the public should not think one location is safer than the other. Additional information regarding some of the new cases is pending further investigation. Over the last 48 hours there have been 256 new cases.

(U) To date, the LACoDPH has identified 662 cases across all areas of LA County, including 11 deaths. This includes one new death reported by Long Beach yesterday. Upon completion of investigations, two cases reported earlier were not LA County residents. As of today, 119 positive cases have been hospitalized.

(U) As a follow-up to the 21 March LACoDPH Revised Health Officer Order, the LACoDPH issued an updated Novel Coronavirus (COVID-19) Safer at Home Order Frequently Asked Questions, dated 22 March 2020. The document can be found here: http://publichealth.lacounty.gov/media/Coronavirus/FAQ-SaferatHomeOrder.pdf

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Extremists Exploiting COVID-19 Pandemic to Inspire Supporters

- The New Jersey Department of Homeland Security and Preparedness advises that domestic and international extremist group supporters are encouraging their followers to carry out attacks during the COVID-19 pandemic.
- A neo-Nazi media group associated with white supremacist groups encourages its followers to discharge firearms in cities and put bullet-sized holes into car windows to encourage the theory of "accelerationism," the theory that participating in attacks will collapse society in order to build a racially pure nation.
- ISIS also encourages jihadists to conduct attacks throughout the most vulnerable populations in Europe and the United States.

Oklahoma Man Sentenced for Attempted Bank Bombing

- On 23 March, Jerry Drake Varnell, 26, was sentenced to 25 years for attempting to use a weapon of mass destruction at BancFirst in Oklahoma City.
- Varnell attempted to detonate what he believed was an explosives-laden van parked in an alley next to the bank; however, the explosives were inert.
- The FBI arrested Varnell on 12 August 2017 after a long-term undercover domestic terrorism investigation.

US Justice Department Files Its First Enforcement Action against COVID-19 Fraud

- On 22 March, the US Justice Department filed a case against operators of a fraudulent website engaging in a wire fraud scheme, offering access to World Health Organization vaccine kits in exchange for $4.95 shipping charges on the website.
- A US District Judge issued a temporary restraining order requiring the website registrar to immediately block public access to it.

Subject: (U) LACoDPH News Release: Los Angeles County Announces Two New Deaths Related to 2019 Novel Coronavirus (COVID-19) and 59 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces Two New Deaths Related to 2019 Novel Coronavirus (COVID-19) and 59 New Cases of Confirmed COVID-19 in Los Angeles County**, dated 21 March 2020.

(U) The LACoDPH has confirmed two additional deaths and 59 new cases of 2019 Novel Coronavirus (COVID-19). The individuals who died were both older than 65 with underlying health conditions; one person lived in Miracle Mile and the other individual resided in Del Rey. Because there are positive cases across the entire County, the public should not think one location is safer than another. Additional information regarding some of the new cases are pending completion of investigations.

(U) To date, LACoDPH has identified 351 cases across all areas in LA County including four deaths. As of today, 69 positive cases have been hospitalized. LACoDPH is investigating all new cases and will notify close contacts who are household members, intimate partners and healthcare professionals to assess and monitor them for signs and symptoms of illness. All confirmed cases are being isolated and close contacts are quarantined. It is critically important that everyone adheres to all the social distancing measures and practice good public health hygiene, including washing hands as frequently as possible.

(U) On 21 March, LACoDPH issued an enhanced Health Officer Order to reconcile elements in the March 19 Health Officer Order necessary to be consistent with the Governor's Order. The enhanced Order prohibits all gatherings and events, and clarifies that golf courses and personal grooming services (including hair and nail salons) are non-essential services that are closed. The Order can be found online: http://publichealth.lacounty.gov/media/Coronavirus/.

(U) LACoDPH has issued the following guidance during this time of increased spread:

(U) If you are mildly sick, stay home for at least seven days or until 72 hours after being fever free, whichever is longer. Call your doctor if you are concerned and/or your symptoms worsen. Individuals who are elderly, have underlying health conditions or pregnant should consider contacting their providers earlier when they are sick.

Subject: (U//FOUO) California Cybersecurity Integration Center (Cal-CSIC) Cybersecurity Advisory: Compromised Email Account Belonging to a California City Phishes ~450 Organizations

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

Attachment Link(s):

- 200319 FOUO Cal-CSIC Cybersecurity Advisory - Compromised Email Account Belonging to a California City Phishes - 450 Organizations.pdf (5 pages)

Link(s) will expire on 4/20/2020

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) California Cybersecurity Integration Center (Cal-CSIC) Cybersecurity Advisory: Compromised Email Account Belonging to a California City Phishes ~450 Organizations**, dated 19 March 2020.

(U//FOUO) On March 18, 2020, a compromised email account belonging to a California city phished ~450 organizations. A threat actor acquired a valid user credential from a city employee via a phishing site, and then leveraged the stolen username and password to phish several federal, state, and local governments along with medical services, first responders, energy utilities, school districts, special districts, media outlets, a financial institution, and other various private sector entities. California entities were primarily targeted, but other U.S. states experienced phishing activity as well.

(U//FOUO) Cal-CSIC advises the following countermeasures should be implemented to counter this threat:

- Verify that Microsoft Office 365 Advanced Threat Protection (ATP) is enabled and properly configured, if applicable;
- Enable Multi-factor Authentication;
- Conduct phishing awareness training; and
- Detect and/or block indicators of compromise.

(U) For further information concerning this report, please contact Cal-CSIC at [redacted] To help us identify ways to better serve you, please submit feedback.

(U) **Administrative Note**: This product is marked **TLP: GREEN**. Recipients may share **TLP:GREEN** information with peers and partner organizations within their sector or community, but not via publicly accessible channels. Information in this category can be circulated widely within a particular community. **TLP: GREEN** information may not be released outside of the community.

- 200319 U LACoDPH Guidance - Home Care Instructions for People with Respiratory Symptoms.pdf (3 pages)
- 200319 U LACoDPH Guidance - Home Quarantine Guidance for Close Contacts to COVID-19.pdf (2 pages)

Link(s) will expire on 4/18/2020

UNCLASSIFIED

(U) The JRIC is forwarding the following **Center for Disease Control (CDC) Guidance – Ten Ways to Manage Respiratory Symptoms at Home**, dated 12 March 2020; **Los Angeles County Department of Public Health (LACoDPH) Guidance – Home Care Instructions for People with Respiratory Symptoms**, dated 19 March 2020; and **LACoDPH Guidance – Home Quarantine Guidance for Close Contacts to COVID-19**, dated 19 March 2020.

(U) At this time, community transmission of COVID-19 has occurred in California. All individuals should prepare for possible impacts of COVID-19 and take precautions to prevent the spread of COVID-19.

(U) **The CDC defines isolation and quarantine as the following:**

- (U) Isolation separates sick people with a contagious disease from people who are not sick.
- (U) Quarantine separates and restricts the movement of people who were exposed to a contagious disease to see if they become sick.

(U) **If you have mild symptoms of and think you may have been exposed to COVID-19, the LA County Department of Public Health recommends the following:**

- (U) **Stay home, except to get medical care**
  - (U) Do not go to work, school, or public areas.
  - (U) Do not allow visitors and limit the number of people in your home.
  - (U) Separate yourself from others in your home. (Stay in a specific room and away from other people in your home as much as possible. It is very important to stay away from people who are at higher risk of serious illness. This includes people who are age 65 years and older, pregnant, or have a health problem such as a chronic disease or a weak immune system. Consider different living arrangements for these high-risk people if possible).
  - (U) Use a separate bathroom, if available.

- (U) Try to stay at least 6 feet away from others.
- (U) Do not handle pets or other animals.

- (U) **Separate yourself from other people in your home**
  - (U) Stay in a specific room and away from other people in your home as much as possible. It is particularly important to stay away from people who are at higher risk of serious illness. Consider alternate living arrangements for them if at all possible.
  - (U) Use a separate bathroom. It this is not possible, clean the bathroom after use (see below).
  - (U) Try to stay at least 6 feet from others.
  - (U) Open windows or use a fan or an air conditioner, if possible, in shared spaces in the home to ensure good air flow.
  - (U) Do not allow visitors and limit the number of people in your home.
  - (U) Do not handle pets or other animals while you are sick.

- (U) **Wear a facemask when you are around others**
  - (U) You should wear a facemask when you are around other people (e.g., sharing a room or vehicle) or pets and before you enter a hospital or doctor's office. If you are not able to wear a facemask (for example, because it causes trouble breathing), then people who live with you should not be in the same room with you. If they must enter your room, they should wear a facemask. After leaving your room, they should immediately clean their hands, then remove and dispose of their facemask, and clean their hands again wash their hands.

(U) **The JRIC reminds partners that the attached products contain mitigation strategies only; first responders should be guided by their agency's policies for responding to a public health emergency.**

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

UNCLASSIFIED

(U) The JRIC is forwarding the following **LACoDPH News Release: Los Angeles County Announces a Second Death Related to 2019 Novel Coronavirus (COVID-19) and Forty New Cases of Confirmed COVID-19 in Los Angeles County**, dated 19 March 2020.

(U) The Los Angeles County Department of Public Health (LACoDPH) has confirmed a second death and 40 new cases of 2019 Novel Coronavirus (COVID-19). The death occurred in an individual in their 30's with underlying health conditions from an unincorporated area outside of Pasadena. Because there are positive cases across the entire County, the public should not think one location is safer than the other. Additional information regarding some of the new cases are pending completion of an investigation.

(U) To date, LACoDPH has identified 231 cases across all areas in LA County, so everyone needs to practice social distancing and good public health hygiene.

(U) LACoDPH issued a Health Officer Order to prohibit group events and gatherings, require social distancing measures and the closure of certain businesses, including bars, gyms, movie theaters and entertainment centers. The Order along with guidance can be found online: http://publichealth.lacounty.gov/media/Coronavirus/.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

- 200303 U EMSA Memorandum - Interim Emergency Medical Services Guidelines for COVID-19.pdf (2 pages)
- 200303 U LACoDPH Coronavirus Disease (COVID-19) - Police and Fire FAQs.pdf (2 pages)

Link(s) will expire on 4/16/2020

UNCLASSIFIED

(U) The JRIC is forwarding the following **Center of Disease Control (CDC) Guidance to Law Enforcement – What Law Enforcement Personnel Need to Know about Coronavirus Disease 2019 (COVID-19)** dated 16 March 2020, **California Emergency Medical Services Authority (EMSA) Memorandum: Interim Emergency Medical Services Guidelines for COVID-19** dated 3 March 2020**, and Los Angeles County Department of Public Health (LACoDPH) COVID-19: Police and Fire FAQs**, dated 3 March 2020.

(U) The virus causing COVID-19 is called SARS-CoV-2. It is thought to spread mainly from person-to-person via respiratory droplets among close contacts. Respiratory droplets are produced when an infected person coughs or sneezes and can land in the mouths or noses, or possibly be inhaled into the lungs, of people who are nearby.

(U) The CDC recommends law enforcement follow the guidelines listed below:

(U) To protect yourself from exposure:

- If possible, maintain a distance of at least 6 feet,
- Practice proper hand hygiene (wash your hands with soap and water for at least 20 seconds. If soap and water are not readily available and illicit drugs are NOT suspected to be present, use an alcohol-based hand sanitizer with at least 60% alcohol),
- Do not touch your face with unwashed hands,
- Have a trained Emergency Medical Service/Emergency Medical Technician assess and transport anyone you think might have COVID-19 to a healthcare facility,
- Ensure only trained personnel wearing appropriate personal protective equipment (PPE) have contact with individuals who have or may have COVID-19, and

- Learn your employer's plan for exposure control and participate in all hands training on the use of PPE for respiratory protection, if available.

(U) The minimum recommended personal protective equipment that law enforcement should possess when in contact with individuals suspected or confirmed to have COVID-19 is:

- A single pair of disposable examination gloves,
- Disposable isolation gown or single use/ disposable coveralls (if unable to wear a disposable gown or coveralls because it limits access to duty belt and gear, ensure duty belt and gear are disinfected after contact with individual),
- Any NIOSH-approved particulate respirator (i.e., N-95 or higher level respirator); facemasks are an acceptable alternative until the supply chain is restored, and
- Eye protection (i.e., goggles or disposable face shield that fully covers the front and sides of the face).

(U) If close contact occurred during apprehension:

- Clean and disinfect duty belt and gear prior to reuse using a household cleaning spray or wipe, according to the product label,
- Follow standard operating procedures for the containment and disposal of used PPE, and
- Follow standard operating procedures for containing and laundering clothes, avoid shaking the clothes.

(U) COVID-19 is rapidly evolving, therefore public safety and first responders are encouraged to check the Department of Public Health and CDC websites for current information.

(U) The JRIC reminds partners that the attached products contain mitigation strategies only; first responders should be guided by their agency's policies for responding to a public health emergency.

(U) If you have questions, and would like to speak to an LA County Health and Human Services representative at 2-1-1.

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

Subject: (U) LACoDPH News Release: 2019 Novel Coronavirus (COVID-19) Advisory - 50 New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: 2019 Novel Coronavirus (COVID-19) Advisory – Fifty New Cases of Confirmed COVID-19 in Los Angeles County**, dated 17 March 2020.

(U) The LACoDPH confirmed 50 new cases of 2019 Novel Coronavirus (COVID-19) to date. The public should not think one location is safer than the other.

(U) Additional case information:

- One case had close contact with a confirmed case.
- 49 of these cases are pending more investigation.

(U) To date, Public Health has identified 144 cases across all areas in LA County, so everyone should be aware and practice social distancing.

(U) Public Health issued a Health Officer Order to prohibit group events and gatherings, require social distancing measures and the closure of certain businesses, including bars, gyms, movie theaters and entertainment centers. The Order along with guidance can be found online: http://publichealth.lacounty.gov/media/Coronavirus/.

(U) Public Health has issued the following guidance during this time of increased spread:

- Avoid non-essential travel, public gatherings, and places where large groups of people congregate.
- Event organizers postpone or cancel non-essential gatherings of 50 or more until at least the end of March.
- For gatherings of less than 50 people, social distancing measures must be followed.
- Limit gatherings of individuals who are at higher risk for severe illness from COVID-19 (people older than 65, pregnant women, and those with chronic illness) to no more than 10 people.
- This guidance does not apply to activities such as attendance at regular school classes, work, or essential services, including public transportation, airport travel or shopping.
- If you are mildly sick with a fever, stay home and call your doctor if you are concerned and/or your symptoms worsen. Individuals who are elderly, have underlying health conditions or pregnant should consider contacting their providers earlier when they are sick.
- Exclude employees and visitors with any fever and/or respiratory infection symptoms and visitors with recent travel to any country or region with significant community transmission (including communities in the US) from all schools, businesses, and gatherings of any size.

- Follow all social distancing recommendations issued by Public Health.

(U) Additional things you can do to protect yourself, your family and your community are on the Public Health website.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: LA County Public Health Issues Order to Prohibit Group Events and Gatherings, Require Social Distancing Measures and the Closure of Certain Businesses

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: LA County Public Health Issues Order to Prohibit Group Events and Gatherings, Require Social Distancing Measures and the Closure of Certain Businesses**, dated 16 March 2020.

(U) On 16 March 2020, the Los Angeles County Health Officer issued an order to prohibit all indoor and outdoor, public and private events and gatherings within a confined space, where 50 or more members of the public are expected to attend at the same time, to require social distancing measures and temporary closure of certain businesses. The decision for the Order is based on evidence of increasing community transmission requiring the immediate implementation of additional community mitigation efforts for organizations to help reduce the spread of COVID-19 within the county. This Order will remain in effect at least through March 31, 2020.

(U) The Order specifically requires that:

- Events and gatherings of 50 members or more are prohibited at least until April 1, 2020.
  - This order applies to conferences, arenas, stadiums, convention centers, and meeting spaces. These are places where persons, often strangers, sit and remain in close proximity of one another for extended periods of time.
- For all public and private events and gatherings of 10-49 persons, the Health Officer requires that event organizers and venue operators to do the following:
  - Enforce social distancing measures by requiring attendees or groups of attendees, such as a group of family members or household contacts, who remain at the event to be separated by a distance of at least six feet during the entirety of the event or gathering.
  - Provide access to hand washing facilities with soap and water or hand sanitizer that contains at least 60 percent alcohol.
  - Post a conspicuous sign at the entry of the event or gathering that instructs persons that have symptoms of respiratory illness to not attend.
  - Adhere to cleaning and infection control guidance provided by Public Health.
- The Order specifically requires the closure of bars and nightclubs that do not serve food, gyms, fitness centers, movie and performance theaters, bowling alleys and arcades.
- This Order does not supersede any stricter limitation imposed by a local public entity within the Los Angeles County. Certain activities are essential to the functioning of the County and the well-

being of our residents and must continue. This Order does not apply to sites and situations where people obtain essential services and essential goods to meet their basic needs, such as:

- Regular school classes, work, or essential services locations.
- Grocery stores or retail stores.
- Pharmacies.
- Places of transit, like airports, metro stations, or bus stations.
- Hospitals or health care facilities.
- Schools and universities/colleges.
- Congregate living situations, including dormitories.

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: 2019 Novel Coronavirus (COVID-19) Advisory – Eight New Cases of Confirmed COVID-19 in Los Angeles County** dated 13 March 2020.

(U) The LACoDPH has confirmed eight new cases of COVID-19. Social distancing is the best and most effective tool to slow the spread of novel coronavirus.

(U) Additional case information:

- Three cases have unidentified sources of exposure.
- One case had recently traveled to South Korea
- Four of these cases are pending more investigation.

(U) To date, LA County has identified 40 cases; of these, six cases are likely due to community transmission. Two of the cases we confirmed today are hospitalized. Public Health is investigating these cases and will notify persons who may have had close personal contact with these individuals, including any friends, family members or health care professionals, to assess and monitor them for signs and symptoms of illness. All confirmed cases are being isolated and close contacts are quarantined.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

Subject: (U) LACoDPH News Release: 2019 Novel Coronavirus (COVID-19) Advisory: Three New Cases of Confirmed COVID-19 in Los Angeles County

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: 2019 Novel Coronavirus (COVID-19) Advisory: Three New Cases of Confirmed COVID-19 in Los Angeles County**, dated 12 March 2020.

(U) The Los Angeles County Department of Public Health (Public Health) has confirmed three new cases of 2019 Novel Coronavirus (COVID-19). Two out of the three new cases have unidentified sources of exposure which is more evidence of community transmission. One case is hospitalized, and one case was exposed by a close contact who attended the AIPAC conference in Washington DC. Social distancing is the best and most effective tool to slow the spread of novel coronavirus.

(U) Public Health is investigating these cases and will notify persons who may have had close personal contact with these individuals, including any friends, family members or health care professionals, to assess and monitor them for signs and symptoms of illness. All confirmed cases are being isolated and close contacts are quarantined.

(U) The total number of cases in Los Angeles County is 32. These cases include four cases reported by our partners in the city of Long Beach, and one case reported by the city of Pasadena which have independent city health departments. These agencies will always be first to report their own positive cases, which Public Health will add to our total.

(U) **Always check with trusted sources for the latest accurate information about novel coronavirus.**

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED

(U) The JRIC is forwarding the following **Los Angeles County Department of Public Health (LACoDPH) News Release: Los Angeles County Announces First Death Related to 2019 Novel Coronavirus (COVID-19) - Public Health Confirms First Death from COVID-19 and Six Additional Cases in Los Angeles County**, dated 11 March 2020.

(U) The Los Angeles County Department of Public Health has confirmed the first death from COVID-19. The individual (a non-resident visiting friends) was an older adult who traveled extensively over the past month, including a long layover in South Korea. Public Health is also reporting six additional positive cases, one of which we presume is our second case of community transmission.

(U) Information about additional cases:

- 3 people are household contacts of a previously confirmed case of an LA County resident.
- 1 person was an international traveler to France returned home ill.
- 1 person traveled to a religious conference in another state was a close contact of a person at the conference who had tested positive.
- 1 person with no known travel or close contact exposure.

Orange County White Supremacist Sentenced for Fatal Stabbing

- On 28 February, Craig Matthew Tanber, 40, was sentenced to 56 years to life for fatally stabbing a man inside a Laguna Niguel bar in 2015 after a confrontation between the victim and Tanber's girlfriend, Elizabeth Thornburg.
- Thornburg directed racial slurs at the victim during the confrontation.
- Tanber was recently released from prison for a manslaughter conviction related to a previous white supremacist case.

Former Student Arrested for Threats to Montebello High School

- On 29 February, police arrested former Montebello High School student Devin Anthony Harper, 18, for criminal threats after he threatened a shooting at the school on his social media account.
- Authorities located a post on Harper's Instagram account stating he would bring a gun to campus on Monday and commit a "massacre."
- Authorities expelled Harper two years ago for making similar threats.

(U) CYBER

City of Torrance Cyberattack

- On 1 March, a cyberattack on a City of Torrance computer system interrupted the city's servers and email accounts.
- Authorities announced first responders' communication and dispatch was functioning, although some city business services were compromised.

- Public personal data was not impacted.

(U) NOTABLE ANNIVERSARY DATES

- 1974, Sudan: US Ambassador Cleo A. Noel, Jr., and deputy chief of mission George C. Moore assassinated by Black September after attack on Saudi Embassy in Khartoum the previous day.
- 2018, Burkina Faso: Militants launch an assault on the French Embassy, French Institute, and National Army headquarters killing 30 and wounding 85; Jama'at Nasr al-Islam wal Muslimin, an affiliate of Al-Qa'ida in the Islamic Maghreb claims responsibility.

US State Department Adds Militia Group Leader to Terrorism Blacklist

- On 26 February, the US State and Treasury Departments added Ahmad al-Hamidawi, secretary general of, Kata'ib Hizballah, an Iran-backed Iraqi militia, to its "specially designated global terrorist" blacklist.
- Kata'ib Hizballah was responsible for the December 2019 rocket attack on a military base in Kirkuk, that in turn prompted a US airstrike killing General Qasem Soleimani.

US Targets Lebanese Martyrs Foundation-linked Individuals and Entities

- On 26 February, the US Treasury Department added multiple Lebanese individuals and entities linked to the Martyrs Foundation to its designated "global terrorists" list.
- US officials said the Lebanon-based Martyrs Foundation channels financial support to militant groups, including Hizballah.

(U) NATIONAL

Molson Coors Headquarters Shooting

- On 26 February, a 51-year-old Molson Coors employee fatally shot five co-workers before dying of a self-inflicted gunshot.
- Authorities have not announced a motive or the suspect's identity.
- The incident is the 11th mass shooting in Wisconsin since 2004.

Racially Motivated Violent Extremists Arrested

- On 26 February, authorities arrested and charged four individuals in Washington, Texas, Florida, and Arizona for conspiracy to threaten and intimidate journalists and activists.
- The defendants conspired via an encrypted online chat group to identify primarily Jewish or minority journalists to intimidate.
- The defendants created propaganda posters with Nazi symbols, masked figures with guns and Molotov cocktails, and threatening language; the posters were delivered to Atomwaffen members for dissemination to journalists or activists.

Letter Bomb Explosions in Netherlands

- On 12 February, two letter bombs detonated at two separate facilities in the cities of Amsterdam and Kerkrade; no injuries were reported from the explosions.
- Authorities suspect the letters were sent by an extortionist demanding payment in bitcoin.
- Amsterdam authorities are investigating possible links between the two letter bombs, and a series of letter bombs and warning letters sent to businesses in January.

(U) NATIONAL

Ohio Man Sentenced for Alleged Terror Attack

- On 11 February, a federal judge sentenced Demetrius Pitts, 50, to 14 years in prison for attempting to provide material support to al-Qa'ida, and making threats to the President of the United States and first family.
- Authorities arrested Pitts as he was conducting reconnaissance two days prior to a planned VBIED attack at the Cleveland Independence Day parade in 2018.

UNCLASSIFIED

(U) The above links will download the **(U) National Counterintelligence Strategy of the United States 2020-2022 Press Release, Executive Summary, and Strategy,** dated 10 February 2020.

(U) NCSC unveiled the National Counterintelligence Strategy of the United States of America 2020-2022, outlining a new approach to counterintelligence to address threats that have evolved significantly since the last strategy in 2016.

(U) The United States is facing increasingly aggressive and complex threats from foreign intelligence services, as well as state and non-state actors. To anticipate and deter these threats, the US Government continues to address its fundamental, core counterintelligence missions: identifying, assessing, and neutralizing foreign intelligence activities and capabilities in the United States; mitigating insider threats, countering espionage and assassination attempts by foreign intelligence services from occurring on US soil and abroad; and protecting US sensitive and classified information and sensitive facilities from technical penetrations or espionage.

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

(U) GLOBAL

London Man Convicted of Planning Terror Attacks

- On 10 February, Woolwich Crown Court convicted Mohiussunnath Chowdhury, 28, of preparing an act of terrorism, collecting information likely to be useful to someone preparing an act of terrorism, and disseminating terrorist publications.
- After two acquittals on the same charges, authorities used undercover operations to gain new evidence for a successful prosecution.
- Chowdhury faces up to life in prison.

(U) NATIONAL

Louisiana Man Pleads Guilty to Burning Down Three Baptist Churches

- On 10 February, Holden Matthews, 22, pleaded guilty to destroying three churches over a 10-day period in 2019.
- Matthews posted real-time videos of the crimes to promote himself in the "black metal" community, copying similar Norwegian crimes from the 1990's.

Las Vegas Man Pleads Guilty to Possession of Bomb Components

- On 10 February, Conor Climo, 23, pleaded guilty to possession of bomb-making components after he expressed plans to attack a synagogue and an LGBTQ bar.
- During a search of Climo's residence, FBI agents found oxidizing agents used for fuel, hand-drawn schematics, an AR-15 rifle, and a bolt-action rifle.
- Climo admitted to online conversations with Feuerkrieg Division, an affiliate of Atomwaffen Division, a white supremacist group.

Kansas Soldier Pleads Guilty to Bomb Plot Charges

- On 10 February, US Army Private Jarrett William Smith, 24, pleaded guilty to posting bomb-making guides online with the intent for others to use it.
- Smith discussed killing Antifa activists and targeting a major news outlet with a bomb.

(U) CALIFORNIA

Orange County Lawyer Arrested for Selling Illegal Firearms

- On 10 February, federal authorities arrested and charged Melinda Romines, 41, with conspiracy to engage in selling firearms without a license, possession of unregistered firearms, and distributing methamphetamine.
- Romines allegedly acted as a broker between black market dealers and customers.

(U) CYBER

Nothing Significant To Report (NSTR)

(U) NOTABLE ANNIVERSARY DATES

- 2010, Democratic Republic of the Congo: Fifteen civilians kidnapped, seven later killed in Bisembe; Democratic Forces for the Liberation of Rwanda believed responsible.

Thailand Soldier Shooting Spree

- On 8 February, Thai Army Lt. Jakrapanth Thomma, 32, went on a shooting rampage that began with the fatal shooting of his commanding officer at a military base followed by a hostage situation at the Terminal 21 shopping mall, that left 29 dead and 57 wounded in Korat, Thailand.
- Following the fatal shooting of his commanding officer, Thomma stole a machine gun, two short guns, and 800 rounds of ammunition from the military base and fled in a military Humvee, shooting civilians along the way.
- Authorities fatally shot Thomma following an overnight standoff at the mall and rescued the hostages.
- The Thailand Prime Minister stated the motive was likely Thomma's grudge over a property deal.

(U) NATIONAL

NYPD Officers Shot in Targeted Incidents

- On 9 February, police arrested Robert Williams after he ambushed NYPD officers in two separate incidents within 12 hours, wounding two officers in the Bronx.
- Authorities stated Williams had a lengthy criminal history and may have been motivated by recent anti-police rhetoric and protests in the city.

(U) CALIFORNIA

Nothing Significant to Report (NSTR)

(U) CYBER

Chinese Military Personnel Charged with Computer Fraud

- On 10 February, an Atlanta federal grand jury charged four members of the Chinese People's Liberation Army (PLA) with hacking into Equifax's computer systems, stealing trade secret information and sensitive personal data of Americans.

- The PLA members exploited a vulnerability in a software used by Equifax's online dispute portal, allowing them to obtain login credentials to navigate Equifax's network.

(U) NOTABLE ANNIVERSARY DATES

- 2011, Pakistan: Teenage suicide bomber kills 27 soldiers in attack on military training center in Mardan; local member of Tehrik-e Taliban Pakistan claims responsibility.

AQAP Leader Killed in Yemen

- On 6 February, US authorities confirmed the death of al-Qa'ida in the Arabian Peninsula (AQAP) leader Qassim al-Rimi and AQAP Deputy Ayman al-Zawahiri in an airstrike in Yemen.
- In a 2 February audio statement, Al-Rimi stated AQAP was responsible for the 6 December 2019 Naval Air Station Pensacola shooting.

UK Authorities Arrest Two for Publishing Online Terrorist Material

- On 7 February, London Metropolitan authorities arrested Mohammed Abdul Ahad, 38, and Muhammad Abdur Raheem Kamali, 31, for hosting and contributing to an ISIS-affiliated propaganda website.
- Ahad and Kamali transcribed ISIS and al-Qa'ida extremist speeches and uploaded them to a website they hosted.

(U) NATIONAL

El Paso Shooter Charged with Federal Hate Crimes

- On 6 February, a federal grand jury indicted Patrick Wood Crusius, 21, on hate crimes and firearms charges in connection with the 3 August 2019 mass shooting at an El Paso, Texas, Walmart.
- The federal grand jury issued a 90-count indictment that included 22 counts of hate crimes resulting in death, 23 hate crimes involving an attempt to kill, and 45 counts of discharging a firearm in relation to the hate crimes.
- Crusius faces up to life in prison or the death penalty.

Nothing Significant to Report (NSTR)

(U) CYBER

Iranian-Linked APT Group Targets Journalists and Activists

- Independent researchers reported that Charming Kitten, an Iranian-linked APT group, targeted journalists, and political and human rights activists with a phishing email.
- The phishing email attempted to impersonate Farnaz Fassihi, a former New York Times journalist, and sent fake interview proposals or invitations to a webinar through Google sites where cyber actors gathered device and account login information.
- The cyberattack is reportedly related to a series of phishing attacks targeting a US candidate, government officials, and expatriate Iranians.

(U) NOTABLE ANNIVERSARY DATES

- 7 February 1991, United Kingdom: Attack on Number 10 Downing Street; mortar rounds fired at Prime Minister John Major's residence wound three; Provisional IRA responsible.
- 8 February 2008, India: Seven civilians killed in courtroom shooting in Tuensang; National Socialist Council of Nagaland-Isak-Muivah claims responsibility.
- 9 February 2009, Sri Lanka: Liberation Tigers of Tamil Eelam female suicide bomber kills 28, wounds 90 in Vishvamadu.
- 9 February 2000, Turkey: Kurdistan Workers' Party announces formal halt to war; adopts new name, Kongra-Gel, and reelects Abdullah Ocalan as leader.

UNCLASSIFIED//LAW ENFORCEMENT SENSITIVE

(U//LES) The above link will download the **(U//LES) El Paso Intelligence Center (EPIC) Officer Safety Bulletin: Potential for Exposure to Fentanyl in Vape Pens,** dated 31 January 2020.

(U) Since the introduction of vape pens in 2003, consumers have attempted to vape other substances (legal or illegal) due to the rapid absorption into the bloodstream. Vape pens are discreet, less likely to be associated with controlled substances, and mask odors from what is being vaped. Law enforcement reporting since 2015 has documented users adding fentanyl to their liquid vape pen "cartridges" or "barrels" for personal use.

(U) For further information regarding the handling of fentanyl, please refer to the Office of National Drug Control Policy Fentanyl Safety Recommendations for First Responders at https://www.whitehouse.gov/ondcp/key-issues/fentanyl/.

(U) LAW ENFORCEMENT SENSITIVE: The information marked (U//LES) in this document is the property of the El Paso Intelligence Center (EPIC) and may be distributed within the Federal Government (and its contractors), U.S. intelligence, law enforcement, public safety or protection officials, and individuals with a need to know. Distribution beyond these entities without EPIC authorization is prohibited. Precautions should be taken to ensure this information is stored and/or destroyed in a manner that precludes unauthorized access. Information bearing the LES caveat may not be used in legal proceedings without first receiving authorization from the originating agency. Recipients are prohibited from subsequently posting the information marked LES on a Web site or an unclassified network.

Subject: (U//FOUO) JRIC-LA Cyber Lab Joint Cyber Spotlight: Phishing Emails Exploit Novel Coronavirus Fears

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

Attachment Link(s):

- 200204 FOUO JRIC-LA Cyber Lab Joint Cyber Spotlight - Phishing Emails Exploit Novel Coronavirus Fears.pdf (1 page)

Link(s) will expire on 3/5/2020

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) The above link will download the **(U//FOUO) Joint Regional Intelligence Center (JRIC)-Los Angeles (LA) Cyber Lab Joint Cyber Spotlight: Phishing Emails Exploit Novel Coronavirus Fears,** dated 4 February 2020.

(U//FOUO) Nefarious actors are exploiting the public's fears of the novel coronavirus in phishing email campaigns, according to open source reporting. English-language malicious emails appear as official Centers for the Disease Control and Prevention Health Alert Network messages and contain camouflaged links urging readers to view the latest number of novel coronavirus infections in their jurisdictions. These links, once opened, may be used to steal users' Microsoft Outlook credentials.

(U//FOUO) Malicious emails may also include attachments containing malware, including Emotet, often used by threat actors to deliver Ryuk—a sophisticated ransomware. Ryuk allows attackers to manually execute the malware to infect only critical assets and resources on a victim's network, and disable the Windows System Restore option, making it impossible to recover from the attack without external backups.

(U//FOUO) The JRIC is not aware of any malicious email campaigns related to the novel coronavirus in the JRIC six-county area of responsibility.

(U) The JRIC appreciates your feedback.

(U) Click here to sign up for LA Cyber Lab alerts.

French Police Shoot Knife-Wielding Man after Receiving Attack Warning

- On 3 February, French authorities shot a man armed with a knife after he wounded one officer inside a police barrack in Dieuze, Eastern France.
- Shortly before the attack, an unidentified individual called the local police operations center, declared he was a soldier of ISIS, and warned there was going to be carnage in Dieuze.
- Officials continue their investigations but have not confirmed a link between the two incidents.

(U) NATIONAL

Shooting at Texas A&M University-Commerce

- On 3 February, authorities responded to a shooting at a university residence hall where two sisters were found dead, and a 2-year-old toddler was wounded.
- Officials continue to investigate the motive behind the shooting, but believe it was a targeted, isolated incident.

(U) CALIFORNIA

Update: Bay Area-Bound Greyhound Bus Shooter Identified

- On 3 February, authorities identified Anthony Devonte Williams, 33, of Maryland, as the gunman who fatally shot one and wounded five on a Greyhound bus traveling from Los Angeles to the Bay Area.
- Witness reports state Williams was rambling incoherently before the shooting started.
- Authorities have not announced a motive.

(U) CYBER

Twitter Fixes Exploit Used to Match Phone Numbers to Accounts

- Twitter fixed an exploit discovered in December 2019, where an unnamed cyber actor used a network of fake accounts to exploit the Twitter API to match specific usernames to phone numbers.

- Twitter announced requests to the affected API were coming from IP addresses within Iran, Israel, and Malaysia.
- Officials also issued a warning that some of the IP addresses may have ties to state-sponsored actors.

(U) NOTABLE ANNIVERSARY DATES

- 2009, Colombia: Seventeen civilians stabbed to death near Barbacoas; Revolutionary Armed Forces of Colombia claimed responsibility.

London Stabbing Deemed Terrorism, ISIS Claims Responsibility

- On 2 February, London police fatally shot Sudesh Amman, 20, after he stabbed two in a busy shopping district; a third person sustained minor injuries.
- Amman was recently released from prison for terrorism offenses and was under police surveillance at the time of the stabbing.
- On 3 February, ISIS claimed responsibility through its Amaq news agency.

(U) NATIONAL

Former FBI Translator Sentenced for Falsifying Transcripts

- On 31 January, a US District Court in Alexandria sentenced Abdirizak Wehelie, 68, to probation and a $1,000 fine for falsifying transcripts regarding phone calls placed by a terrorism suspect.
- In December 2012, Wehelie pleaded guilty to making false statements regarding a voice message left on his phone by an FBI-targeted suspect connected to al-Shabaab.

Suspected Al-Qa'ida Leader from Iraq Arrested in Arizona

- On 31 January, the US Justice Department announced the arrest of Phoenix-area resident Ali Yousif Ahmed Al-Nouri, 42, who will be extradited to Iraq to face murder charges.
- Al-Nouri is charged with killing two Iraqi police officers in 2006 in Fallujah.

Coast Guard Officer Sentenced for Attack Plot

- On 31 January, a Maryland federal judge sentenced Christopher Hasson, 50, to 13 years in prison for amassing weapons and compiling a hit list of political and media targets.
- According to court documents, Hasson was a white nationalist, searched the internet for home addresses of two Supreme Court justices, and the "best" gun to kill African-Americans with.

Al-Qa'ida Claims Deadly Attack at Florida Naval Base

- On 2 February, Al-Qa'ida in the Arabian Peninsula (AQAP) released an 18-minute video claiming responsibility for the December 2019 shooting at the Pensacola Naval Air Station.

- The video indicates there was communication between the shooter, Mohammed Saeed Alshamrani and AQAP, and claimed the shooter had planned to attack a US base for years.
- The video also provided a will written by Alshamrani to his family three months prior to the attack.

(U) CALIFORNIA

Shooting on Bay Area-Bound Greyhound Bus

- On 3 February, an unnamed suspect opened fire on a Greyhound bus traveling from Los Angeles to the Bay Area, killing one and wounding five.
- The suspect was taken into custody after exiting the bus; a motive has not been determined.

UNCLASSIFIED

(U) The above link will download the **(U) Los Angeles County Department of Public Health (LACDoPH) News Release: Frequently Asked Questions (FAQs) Addressing Emergency Responders Concerns about Novel Coronavirus (NCoV-2019)**, dated 1 February 2020.

(U) This document addresses emergency responders' concerns about novel coronavirus (NCoV-2019).

(U) Novel coronavirus is a new virus that hasn't been identified before in humans. Coronaviruses can be spread through close personal contact, or by touching an object of surface with the virus on it. Public Health is taking steps to prevent the spread of coronavirus in Los Angeles County.

(U) Based on current information, even though there is a case in Los Angeles, and there are likely to be additional cases, the risk of transmission of coronavirus within Los Angeles County remains low.

(U) LACDoPH recommends first responders use prevention measures that work to prevent other respiratory infections.

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

Subject: (U) Los Angeles County Department of Public Health (LACoDPH) News Release: Beware of False Information

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

Attachment Link(s):

- 200130 U LACoDPH News Release - Beware of False Information.pdf (1 page)

Link(s) will expire on 2/29/2020

UNCLASSIFIED

(U) The above link will download the **(U) Los Angeles County Department of Public Health News Release: Beware of False Information,** dated 30 January 2020.

(U) Following reports that a letter purporting to be from the Los Angeles County Department of Public Health (Public Health) is being distributed in the City of Carson regarding 2019 novel coronavirus (2019-nCoV), Public Health warns the public that this information is false and was not issued by Public Health. Accurate information will always be distributed officially by Public Health through its official channels in the form of a press release and will also be available on the Public Health website http://www.publichealth.lacounty.gov and social media accounts @lapublichealth. There is no immediate threat to the general public, no special precautions are required, and people should not be excluded from activities based on their race, country of origin, or recent travel if they do not have symptoms of respiratory illness.

(U) The Department of Public Health, along with state and federal partners, have appropriate systems in place to support appropriate screening and testing for those with an exposure to the novel coronavirus and healthcare providers are able to provide excellent care to manage respiratory illness. Public Health does not confirm suspect cases.

(U) For more information about 2019- nCoV, visit at http://www.publichealth.lacounty.gov and the CDC website at https://www.cdc.gov/coronavirus/2019-ncov/index.html or call 2-1-1.

(U) To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

Subject: (U//FOUO) RECALL: (U) JRIC Snapshot: Novel Coronavirus Enters the United States; Situation Is Fluid

ATTENTION: This email originated outside of LAPD. Please use caution when clicking on hyperlinks or opening attachments if you are unfamiliar with the sender.

UNCLASSIFIED//FOR OFFICIAL USE ONLY

(U//FOUO) **The JRIC is recalling this product, dated 22 January 2020, for revision. Please delete copies of the previous email and product, and destroy hard copies.**

(U) The above link will download the **(U) Joint Regional Intelligence (JRIC) Snapshot: Novel Coronavirus Enters the United States; Situation Fluid**, dated 22 January 2020.

(U) On 30 December 2019, China reported an outbreak of a new respiratory disease (novel coronavirus, 2019-nCoV) in Wuhan City, a major transportation hub about 700 miles south of Beijing with a population of more than 11 million people. On 21 January 2020, the Centers for Disease Control and Prevention (CDC) confirmed the first US infection case in a man who recently returned from China to the Seattle, Washington, area. Thus far, no confirmed cases of the disease have been identified in the JRIC area of responsibility (AOR).

(U) Much is unknown about the disease, and the situation remains fluid. As of 22 January 2020, 17 deaths—all in China—have been reported and the virus has infected at least 473 people, primarily in China and neighboring countries. Annually, influenza causes more hospitalizations and deaths than coronaviruses, including novel viruses like severe acute respiratory syndrome coronavirus (SARS-CoV) and Middle East respiratory syndrome coronavirus (MERS-CoV).

(U) Los Angeles International Airport (LAX) is one of five designated US airports to which travelers from Wuhan City are re-directed. CDC employees at LAX are screening these travelers for symptoms of 2019-nCoV. First responders are urged to use universal precautions.

(U) Please provide feedback.

(U) **Warning:** This email is **Unclassified//For Official Use Only (U//FOUO)**. To report suspicious activity to the JRIC, visit www.jric.org, or call (562) 345-1100 or (888) 705-JRIC (5742). Please direct all other questions to the JRIC at jric@jric.org.

(U) GLOBAL

UK Man Arrested for Downloading Terrorism Guides

- On 17 January, a Leeds Crown Court judge sentenced Umar Hafeez, 38, to four years and seven months for possessing terrorist publications useful to a person committing or preparing an act of terrorism.
- In 2015, Hafeez wrote a letter hoping his family members would use the skills they learned to become a martyr.
- Counterterrorism police stated Hafeez supported ISIS and has anti-Western sentiment.

(U) NATIONAL

Three Suspected Members of Violent Extremist Group Charged

- On 16 January, a federal criminal complaint charged Brian Mark Lemley Jr., 33, and William Garfield Bilbrough IV, 19, with transporting and harboring aliens; Patrik Jordan Mathews, 27, is charged with transporting a firearm and ammunition with the intent to commit a felony.
- Lemley Jr., Billbrough, and Mathews are alleged members of "The Base," whose goals include creating a white ethno-state and committing acts of violence against minority communities.
- Lemley Jr., Billbrough, and Mathews each face multiple years in federal prison.

(U) GLOBAL

Terror Attack Averted in Indian Union Territory

- On 16 January, Jammu and Kashmir police in the Indian union territory of Srinagar averted a terror attack after arresting five members of a Pakistan-backed terror group, Jaish-e-Mohammad.
- Authorities provided the group, who was responsible for earlier grenade attacks on security forces, planned to carry out an attack on 26 January, the nation's Republic Day.
- Authorities recovered a large cache of weapons and ammunitions, including secondary explosives, a remote trigger device, and a body vest laden with explosives.

(U) NATIONAL

Base Closed after Mortar Found in Vehicle

- On 15 January, Joint Base Pearl Harbor-Hickam closed for approximately two hours after security discovered a possible ordnance in a vehicle near the gate.
- Bomb squad personnel determined the device was an inert training round and contained no explosive material.
- Authorities did not provide the identities of the three suspects taken into custody and later released.

Two Individuals Sentenced for Working on Behalf of Iran

- On 15 January, a federal court sentenced US-Iranian citizen Ahmadreza Mohammadi-Doostdar, 39, and Iranian citizen and California resident Majid Ghorbani, 60, for conducting surveillance and collecting information on American citizens and US nationals.
- Doostdar traveled to the United States from Iran on three occasions and directed Ghorbani to collect identifying information on US persons linked to the anti-Iranian regime group Mujahedin e Khalq.
- US authorities provided Iran could use identifying information to silence those who oppose the Iran regime.

Five Chechens Arrested for Terror Plot in Germany

- On 14 January, police conducted raids at nine locations in four German states after discovering photographs of possible attack targets, including a synagogue and shopping mall, on a suspect's cellphone.
- According to prosecutors, five Chechens allegedly scouted locations to conduct an Islamist motivated attack.
- No arrests were made, but evidence seized during the raids is under investigation.

Kosovo Citizens Repatriated from Syria, Charged with Terrorism

- On 14 January, Kosovo prosecutors filed terrorism charges against an Albanian woman and man for allegedly joining ISIS in Syria.
- The two left Kosovo in March 2015 to join ISIS in Syria, and surrendered to Kurdish forces in Syria in early 2019.
- Kosovo authorities say 30 citizens remain actively supporting terror groups in Syria.

(U) NATIONAL

Maryland Man Pleads Guilty to Threatening Hispanics

- On 14 January, Eric Lin, 35, pleaded guilty in a Miami federal court to sending online threatening communications between May and August of 2019.
- Lin posted messages on Facebook that included plans to "kill all Hispanics," mass shootings of Hispanics, and the idolization of Adolf Hitler.
- Lin faces up to five years in prison.

(U) CALIFORNIA

Aircraft Dumps Jet Fuel over Los Angeles Neighborhoods

- On 14 January, a Delta Airlines flight returning to LAX, due to mechanical issues, conducted an emergency fuel release over a southeast Los Angeles region.

- Several schools in the area reported individuals experiencing health issues; responding emergency personnel evaluated and treated more than 50 for minor injuries at scene.

(U) CYBER

Nothing Significant to Report (NSTR)

(U) NOTABLE ANNIVERSARY DATES

- 2002, West Bank: Palestinian militia leader Ra'id al-Karmi killed by a bomb outside his home; Israel implicated.
- 2019, Kenya: Four suicide bombers and gunman storm DusitD2 Hotel in Nairobi, killing 14 including one American; al-Shabaab claims responsibility.

Nothing Significant to Report (NSTR)

(U) NATIONAL

New York Woman Sentenced for Bomb Plot

- On 9 January, a federal court sentenced Asia Siddiqui to 15 years in prison for planning to build a bomb for use in a terrorist attack in the United States.
- Between 2013 and 2015, Siddiqui and co-defendant, Noelle Velentzas, taught each other chemistry and electrical skills related to creating explosives, conducted research on making plastic explosives, and shopped for and acquired explosive device materials.
- At the time of Siddiqui and Velentzas' arrests, authorities seized propane gas tanks, soldering tools, car bomb instructions, and jihadist literature from their residences.

(U) GLOBAL

UK Prison Officers Assaulted in Terrorist Attack

- On 9 January, two inmates wearing fake suicide belts and armed with improvised bladed weapons stabbed four officers and a nurse at HMP Whitemoor, a maximum security prison in Cambridgeshire.
- The officers and nurse were treated at a hospital and released.
- Metropolitan police are investigating the incident as terrorism.
- Authorities identified one of the two inmates as Brusthom Ziamani, 24, who was jailed in 2015 for plotting to behead a British soldier.

(U) CYBER

Iranian-Linked Cyber Group Expanding Focus on US Critical Infrastructure

- On 9 January, industrial cyber security firm Dragos reported that Advanced Persistent Threat group 33 (APT33) has expanded its targeting of electric companies in North America.

- Dragos identified APT33 through the increased activity of the cyber group Parisite that targets known vulnerabilities of electric targets in the United States, which serves as an initial access group that enables further operations for APT33.
- Although Dragos stated the observed activity doesn't signal a physically-disruptive attack, the trend increases the risk of a disruptive or destructive attack on the electric sector.

(U) NOTABLE ANNIVERSARY DATES

- 10 January 2013, Pakistan: Bombings in Quetta and Mingaora kill 115; Lashkar-e-Jhangvi and United Baluch Army claim responsibility.
- 10 January 2009, Democratic Republic of the Congo: Six civilians, several military personnel killed in Sambia; Lord's Resistance Army believed responsible.
- 11 January 2010, India: Two killed as attackers fire on local traders; no claim of responsibility but the Communist Party of India-Maoist widely suspected.
- 12 January 2007, Greece: Rocket-propelled grenade attack against US Embassy in Athens, no injuries reported; Revolutionary Struggle claims responsibility.
- 12 January 2000, Turkey: Execution of PKK leader Abdullah Ocalan stayed.

British Teen Sentenced for Planning Terror Attack

- On 7 January, British authorities sentenced a 17-year-old to 80 months in custody for planning terror attacks in Durham, England.
- Seized documents from the suspect's residence included plans to carry out arson attacks against synagogues and a collection of far-right literature.
- In November 2019, the suspect was found guilty of disseminating a terrorist publication and possessing documents containing information useful to a terrorist.

(U) NATIONAL

New York Man Arrested for Hoax Anthrax Threat

- On 6 January, officials charged Ameen Keshavjee with mailing threatening communication and conveying an anthrax hoax threat after mailing a suspicious white powdery substance to an employee at a Manhattan bar.
- Keshavjee sent a series of threatening emails following a dispute, and indicated he hoped for the employee's death.
- Keshavjee faces 10 years in prison.

Oklahoma Man Charged for False Bomb Threat

- On 7 January, authorities charged Anthony John Michalski, 64, with providing false information about bombs at an airport on Christmas Eve.
- Michalski called the Tulsa International Airport and stated a drive-up nuclear suitcase bomb would arrive within three hours of his phone call.

Delaware Man Charged for Throwing Incendiary Device at Planned Parenthood

- On 6 January, officials charged Samuel James Gulick, 18, with intentionally damaging a Planned Parenthood facility and possession of an unregistered destructive device.
- Gulick spray-painted the phrase "Deus Vult" on the building prior to throwing an incendiary device at the window.

- Gulick faces 20 year in prison if convicted.
- JRIC note: Deus Vult is a Latin expression meaning “God wills it,” used by Christian Crusaders.
